

[Table of Contents](#)

[Investor Relations 17.7](#)

[17.7 Taxation](#)

[Dutch Taxation](#)

The statements below are only a general summary of certain material Dutch tax consequences for holders of common shares that are non-residents of the Netherlands based on present Dutch tax laws and the Tax Convention of December 18, 1992, as amended by the protocol that entered into force on December 28, 2004, between the United States of America and the Kingdom of the Netherlands (the US Tax Treaty) and are not to be read as extending by implication to matters not specifically referred to herein. As to individual tax consequences, investors in the common shares should consult their own professional tax advisor.

With respect to a holder of common shares that is an individual who receives income or derives capital gains from the common shares and this income received or capital gains derived are attributable to past, present or future employment activities of such holder, the income of which is taxable in the Netherlands, the Dutch tax position is not discussed in this summary.

[Dividend withholding tax](#)

In general, a distribution to shareholders by a company resident in the Netherlands (such as the Company) is subject to a withholding tax imposed by the Netherlands at a rate of 15%. Share dividends paid out of the Company's paid-in share premium recognized for Dutch tax purposes are not subject to the above mentioned withholding tax. Share dividends paid out of the Company's retained earnings are subject to dividend withholding tax on the nominal value of the shares issued. Pursuant to the provisions of the US Tax Treaty, a reduced rate may be applicable in respect of dividends paid by the Company to a beneficial owner holding directly 10% or more of the voting power of the Company, if such owner is a company resident of the United States (as defined in the US Tax Treaty) and entitled to the benefits of the US Tax Treaty.

Pursuant to Dutch anti-dividend stripping legislation, a holder of common shares who is the recipient of dividends will generally not be considered the beneficial owner of the dividends if (i) as a consequence of a combination of transactions, a person other than the recipient wholly or partly benefits from the dividends; (ii) whereby such other person retains, directly or indirectly, an interest similar to that in the common shares on which the dividends were paid; and (iii) that other person is entitled to a credit, reduction or refund of dividend withholding tax that is less than that of the recipient.

Dividends paid to qualifying exempt US pension trusts and qualifying exempt US organizations are under certain conditions exempt from Dutch withholding tax under the US Tax Treaty. Qualifying exempt US pension trusts normally remain subject to withholding at the rate of 15% and are required to file for a refund of the tax withheld. Only if certain conditions are fulfilled, such pension trusts may be eligible for relief at source upon payment of the dividend. However, for qualifying exempt US organizations no relief at source upon payment of the dividend is available; such exempt US organizations should apply for a refund of the 15% withholding tax withheld. Further, under certain circumstances, certain exempt organisations (e.g pension funds) may be eligible for a refund of Dutch withholding tax upon their request pursuant to Dutch tax law.

The Company may, with respect to certain dividends received from qualifying non-Dutch subsidiaries, credit taxes withheld from those dividends against the Dutch withholding tax imposed on certain qualifying dividends that are redistributed by the Company, up to a maximum of the lesser of:

- 3% of the amount of qualifying dividends redistributed by the Company; and
- 3% of the gross amount of certain qualifying dividends received by the Company.

The reduction is applied to the Dutch dividend withholding tax that the Company must pay to the Dutch tax authorities and not to the Dutch dividend withholding tax that the Company must withhold.

[Income and capital gains](#)

Income and capital gains derived from the common shares by a non-resident individual or non-resident corporate shareholder are generally not subject to Dutch income or corporation tax, unless (i) such income and gains are attributable to a (deemed) permanent establishment or (deemed) permanent representative in the Netherlands of the shareholder; or (ii) the shareholder is entitled to a share in the profits of an enterprise or (in case of a non-resident corporate shareholder only) a co-entitlement to the net worth of an enterprise, that is effectively managed in the Netherlands (other than by way of securities) and to which enterprise the common shares are attributable; or (iii) such income and capital gains are derived from a direct, indirect or deemed substantial participation in the share capital of the company (such substantial participation not being a business asset), and, in the case of a non-resident corporate shareholder only, it being held with the primary aim or one of the primary aims to avoid the levy of income tax or dividend withholding tax from another person; or (iv) in case of a non-resident corporate shareholder, such shareholder is a resident of Aruba, Curacao or Saint Martin with a permanent establishment or permanent representative in Bonaire, Eustatius or Saba to which the common shares are attributable, while the profits of such shareholder are taxable in the Netherlands pursuant to article 17(3)(c) of the Dutch Corporate Income Tax Act 1969; or (v) in case of a non-resident individual, such individual derives income or capital gains from the common shares that are taxable as benefits from 'miscellaneous activities' in the Netherlands (*resultaat uit overige werkzaamheden*, as

defined in the Dutch Income Tax Act 2001), which includes the performance of activities with respect to the ordinary shares that exceed regular portfolio management. *It is noted that pursuant to Dutch tax law changes as per 1 January 2016, in deviation from the applicable wording for 2015 under (iii) above, a non-resident corporate shareholder that holds a direct, indirect or deemed substantial participation in the Company is subject to Dutch corporation tax if such substantial participation is being held with the primary aim or one of the primary aims to avoid the levy of income tax or dividend withholding tax from another person and is put in place without valid commercial reasons that reflect economic reality.*

In general, a holder of common shares has a substantial participation if he holds either directly or indirectly and either independently or jointly with his partner (as defined in the Dutch Income Tax Act 2001), the ownership of, or certain other rights over, at least 5% of the total issued share capital or total issued particular class of shares of the Company or rights to acquire shares, whether or not already issued, that represent at any time 5% or more of the total issued capital (or the total issued particular class of shares) or the ownership of certain profit participating certificates that relate to 5% or more of the annual profit or to 5% or more of the liquidation proceeds. A shareholder will also have a substantial participation in the Company if one or more of certain relatives of the shareholder hold a substantial participation in the Company. A deemed substantial participation amongst others exists if (part of) a substantial participation has been disposed of, or is deemed to have been disposed of, on a non-recognition basis.

Estate and gift taxes

No estate, inheritance or gift taxes are imposed by the Netherlands on the transfer or deemed transfer of common shares by way of gift by or on the death of a shareholder if, at the time of the death of the shareholder or the gift of the common shares (as the case may be), such shareholder is not a (deemed) resident of the Netherlands.

Inheritance or gift taxes (as the case may be) are due, however, if such shareholder:

- has Dutch nationality and has been a resident of the Netherlands at any time during the ten years preceding the time of the death or gift; or
- has no Dutch nationality but has been a resident of the Netherlands at any time during the twelve months preceding the time of the gift (for Netherlands gift taxes only)

United States Federal Taxation

This section describes the material United States federal income tax consequences to a US holder (as defined below) of owning common shares. It applies only if the common shares are held as capital assets for tax purposes. This section does not apply to a member of a special class of holders subject to special rules, including:

- a dealer in securities,
- a trader in securities that elects to use a mark-to-market method of accounting for securities holdings,
- a tax-exempt organization,
- a life insurance company,
- a person liable for alternative minimum tax,
- a person that actually or constructively owns 10% or more of our voting stock,
- a person that holds common shares as part of a straddle or a hedging or conversion transaction,
- a person that purchases or sells common shares as part of a wash sale for tax purposes, or
- a person whose functional currency is not the US dollar.

This section is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations, published rulings and court decisions, all as currently in effect, as well as on the US Tax Treaty. These laws and regulations are subject to change, possibly on a retroactive basis.

If a partnership holds the common shares, the United States federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. A partner in a partnership holding the common shares should consult its tax advisor with regard to the United States federal income tax treatment of an investment in the common shares.

A US holder is defined as a beneficial owner of common shares that is:

- a citizen or resident of the United States,
- a domestic corporation,
- an estate whose income is subject to United States federal income tax regardless of its source, or
- a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

A US holder should consult its own tax advisor regarding the United States federal, state and local and other tax consequences of owning and disposing of common shares in its particular circumstances.

This discussion addresses only United States federal income taxation.

Taxation of Dividends

Under the United States federal income tax laws, the gross amount of any dividend paid out of our current or accumulated earnings and profits (as determined for United States federal income tax purposes) is subject to United States federal income taxation. For a non-corporate US holder, dividends paid that constitute

[Table of Contents](#)

[Investor Relations 17.7](#)

qualified dividend income will be taxable at a maximum tax rate of 20% provided that the non-corporate US holder holds the common shares for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meets other holding period requirements. Dividends paid with respect to the common shares generally will be qualified dividend income¹⁾. A US holder must include any Dutch tax withheld from the dividend payment in this gross amount even though it does not in fact receive it. The dividend is taxable to a US holder when it receives the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. The amount of the dividend distribution that a US holder must include in its income will be the US dollar value of the euro payments made, determined at the spot euro/US dollar rate on the date the dividend distribution is includible in its income, regardless of whether the payment is in fact converted into US dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date a US holder includes the dividend payment in income to the date a US holder converts the payment into US dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for United States federal income tax purposes, will be treated as a non-taxable return of capital to the extent of a US holder's basis in the common shares and thereafter as capital gain.

Subject to certain limitations, the Dutch tax withheld in accordance with the US Tax Treaty and paid over to the Netherlands will be creditable or deductible against a US holder's United States federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the maximum 20% tax rate. To the extent a refund of the tax withheld is available under Dutch law, or under the US Tax Treaty, the amount of tax withheld that is refundable will not be eligible for credit against United States federal income tax liability. Dividends will be income from sources outside the United States, and depending on a holder's circumstances, will generally be either "passive" or "general" income for purposes of computing the foreign tax credit allowable to the holder.

[Taxation of Capital Gains](#)

A US holder that sells or otherwise disposes of its common shares will recognize capital gain or loss for United States federal income tax purposes equal to the difference between the US dollar value of the amount that it realizes and its tax basis, determined in US dollars, in its common shares. Capital gain of a non-corporate US holder is generally taxed at a maximum tax rate of 20% where the holder has a holding period greater than one year²⁾. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

[PFIC Rules](#)

We do not believe that the common shares will be treated as stock of a passive foreign investment company, or PFIC, for United States federal income tax purposes, but this conclusion is a factual determination that is made annually and thus is subject to change. If we are treated as a PFIC, unless a US holder elects to be taxed annually on a mark-to-market basis with respect to the common shares, gain realized on the sale or other disposition of the common shares would in general not be treated as capital gain. Instead a US holder would be treated as if it had realized such gain and certain "excess distributions" ratably over the holding period for the common shares and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, in addition to which an interest charge in respect of the tax attributable to each such year would apply. Any dividends received by a US holder will not be eligible for the special tax rates applicable to qualified dividend income if we are treated as a PFIC with respect to such US holder either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income and subject to the excess distribution regime described above.

- 1) In addition, a US holder that is an individual or estate, or a trust that does not fall into a special class of trusts that is exempt from such tax, is subject to a 3.8% tax on the lesser of (1) the US holder's "net investment income" for the relevant taxable year and (2) the excess of the US holder's modified adjusted gross income for the taxable year over a certain threshold (the "Medicare tax"). A US holder's net investment income generally includes its dividend income.
- 2) In addition, the gain or loss is generally included in a US holder's net investment income, which may be subject to a 3.8% tax as described in the discussion of the Medicare tax under the heading - "Taxation of Dividends".

17.8 New York Registry Shares

Fees and Charges Payable by a Holder of New York Registry Shares

Citibank, N.A. as the US registrar, transfer agent, paying agent and shareholder servicing agent ("Agent") under Philips' New York Registry Share program (the "Program"), collects fees for delivery and surrender of New York Registry Shares directly from investors depositing ordinary shares or surrendering New York Registry Shares for the purpose of withdrawal or from intermediaries acting for them. The Agent collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of the distributable property to pay the fees.

The charges of the Agent payable by investors are as follows:

The New York Transfer Agent charges shareholders a fee of up to USD 5.00 per 100 shares for the exchange of New York Registry shares for ordinary shares and vice versa.

Fees and Payments made by the Agent to Philips

The Agent has agreed to reimburse certain expenses of Philips related to the Program and incurred by Philips in connection with the Program. In the year ended December 31, 2015 the Agent reimbursed to Philips, or paid amounts on Philips behalf to third parties, a total sum of EUR 1,009,956.

The table below sets forth the types of expenses that the Agent has agreed to reimburse and the amounts reimbursed in the year ended December 31, 2015:

Category of Expense Reimbursed to Philips in EUR

amount reimbursed in the year ended December 31, 2015

Program related expenses such as legal fees and New York Stock Exchange listing fees	92,635
A portion of the issuance and cancellation fees actually received by the Agent from holders of New York Registry Shares, net of Program-related expenses already reimbursed by the Agent to Philips.	917,322 ¹⁾
Expense reimbursed	<u>1,009,956</u>

¹⁾ Translated at USD/EUR exchange rate of actual date(s) of reimbursement(s) during 2015

The Agent has also agreed to waive certain fees for standard costs associated with the administration of the program.

The table below sets forth those expenses that the Agent paid directly to third parties in the year ended December 31, 2015.

Category of Expense paid directly to third parties in EUR

amount in the year ended December 31, 2015

Reimbursement of Proxy Process expenses	10,047
Reimbursement of Legal Fee expenses	
NYSE Listing Fee	82,588
Fullfillment	
Expense paid directly to third parties	<u>92,635</u>

Under certain circumstances, including removal of the Agent or termination of the Program by Philips, Philips is required to repay the Agent certain amounts reimbursed and/or expenses paid to or on behalf of Philips.

[Table of Contents](#)

[Definitions and abbreviations 18](#)

[18 Definitions and abbreviations](#)

[BMC](#)

Business Market Combination - As a diversified technology group, Philips has a wide portfolio of categories/business innovation units which are grouped in business groups based primarily on technology or customer needs. Philips has physical market presence in over 100 countries, which are grouped into 17 market clusters. Our primary operating modus is the Business Market matrix comprising Business Groups and Markets. These Business Market Combinations (BMCs) drive business performance on a granular level at which plans are agreed between global businesses and local market teams.

[Brominated flame retardants \(BFR\)](#)

Brominated flame retardants are a group of chemicals that have an inhibitory effect on the ignition of combustible organic materials. Of the commercialized chemical flame retardants, the brominated variety are most widely used.

[CO₂-equivalent](#)

CO₂-equivalent or carbon dioxide equivalent is a quantity that describes, for a given mixture and amount of greenhouse gas, the amount of CO₂ that would have the same global warming potential (GWP), when measured over a specified timescale (generally 100 years).

[Cash flow before financing activities](#)

The cash flow before financing activities is the sum of net cash flow from operating activities and net cash flow from investing activities.

[Chlorofluorocarbon \(CFC\)](#)

A chlorofluorocarbon is an organic compound that contains carbon, chlorine and fluorine, produced as a volatile derivative of methane and ethane. CFCs were originally developed as refrigerants during the 1930s.

[Circular economy](#)

A circular economy aims to decouple economic growth from the use of natural resources and ecosystems by using those resources more effectively. By definition it is a driver for innovation in the areas of material-, component- and product reuse, as well as new business models such as solutions and services. In a Circular Economy, the more effective use of materials enables to create more value, both by cost savings and by developing new markets or growing existing ones.

[Comparable sales](#)

Comparable sales exclude the effect of currency movements and acquisitions and divestments (changes in consolidation). Philips believes that comparable sales information enhances understanding of sales performance.

[Continuing net income](#)

This equals recurring net income from continuing operations, or net income excluding discontinued operations and excluding material non-recurring items.

[Dividend yield](#)

The dividend yield is the annual dividend payment divided by Philips' market capitalization. All references to dividend yield are as of December 31 of the previous year.

[EBITA](#)

Earnings before interest, tax and amortization (EBITA) represents income from continuing operations excluding results attributable to non-controlling interest holders, results relating to investments in associates, income taxes, financial income and expenses, amortization and impairment on intangible assets (excluding software and capitalized development expenses). Philips believes that EBITA information makes the underlying performance of its businesses more transparent by factoring out the amortization of these intangible assets, which arises when acquisitions are consolidated. In our Annual Report on form 20-F this definition is referred to as Adjusted IFO.

[EBITA per common share](#)

EBITA divided by the weighted average number of shares outstanding (basic). The same principle is used for the definition of net income per common share, replacing EBITA with net income.

[Electronic Industry Citizenship Coalition \(EICC\)](#)

The Electronic Industry Citizenship Coalition was established in 2004 to promote a common code of conduct for the electronics and information and communications technology (ICT) industry. EICC now includes more than 100 global companies and their suppliers.

[Employee Engagement Index \(EEI\)](#)

The Employee Engagement Index (EEI) is the single measure of the overall level of employee engagement at Philips. It is a combination of perceptions and attitudes related to employee satisfaction, commitment and advocacy.

[Energy-using Products \(EuP\)](#)

An energy-using product is a product that uses, generates, transfers or measures energy (electricity, gas, fossil fuel). Examples include boilers, computers, televisions, transformers, industrial fans and industrial furnaces.

[Free cash flow](#)

Free cash flow is the net cash flow from operating activities minus net capital expenditures.

[Full-time equivalent employee \(FTE\)](#)

Full-time equivalent is a way to measure a worker's involvement in a project. An FTE of 1.0 means that the person is equivalent to a full-time worker, while an FTE of 0.5 signals that the worker works half-time.

[Global Reporting Initiative \(GRI\)](#)

The Global Reporting Initiative (GRI) is a network-based organization that pioneered the world's most widely used sustainability reporting framework. GRI is committed to the framework's continuous improvement and application worldwide. GRI's core goals include the mainstreaming of disclosure on environmental, social and governance performance.

Green Innovation

Green Innovation comprise all R&D activities directly contributing to the development of Green Products or Green Technologies.

Green Products

Green Products offer a significant environmental improvement in one or more Green Focal Areas: Energy efficiency, Packaging, Hazardous substances, Weight, Recycling and disposal and Lifetime reliability. The life cycle approach is used to determine a product's overall environmental improvement. It calculates the environmental impact of a product over its total life cycle (raw materials, manufacturing, product use and disposal). Green Products need to prove leadership in at least one Green Focal Area compared to industry standards, which is defined by a sector specific peer group. This is done either by outperforming reference products (which can be a competitor or predecessor product in the particular product family) by at least 10%, outperforming product specific eco-requirements or by being awarded with a recognized eco-performance label. Because of different product portfolios, sectors have specified additional criteria for Green Products, including product specific minimum requirements where relevant.

Growth geographies

Growth geographies are the developing geographies comprising of Asia Pacific (excluding Japan, South Korea, Australia and New Zealand), Latin America, Central & Eastern Europe, the Middle East (excluding Israel) and Africa.

Hydrochlorofluorocarbon (HCFC)

Hydrochlorofluorocarbon is a fluorocarbon that is replacing chlorofluorocarbon as a refrigerant and propellant in aerosol cans.

Income from continuing operations

Net income from continuing operations, or net income excluding discontinued operations.

Initiatief Duurzame Handel (IDH)

IDH is the Dutch Sustainable Trade Initiative. It brings together government, frontrunner companies, civil society organizations and labor unions to accelerate and up-scale sustainable trade in mainstream commodity markets from the emerging countries to Western Europe.

International Standardization Organization (ISO)

The International Standardization Organization (ISO) is the world's largest developer and publisher of International Standards. ISO is a network of the national standards institutes of more than 160 countries, one member per country, with a Central Secretariat in Geneva, Switzerland, that coordinates the system. ISO is a non-governmental organization that forms a bridge between the public and private sectors.

Light-Emitting Diode (LED)

Light-Emitting Diode (LED), in electronics, is a semiconductor device that emits infrared or visible light when charged with an electric current. Visible LEDs are used in many electronic devices as indicator lamps, in automobiles as rear-window and brake lights, and on billboards and signs as alphanumeric displays or even full-color posters. Infrared LEDs are employed in autofocus cameras and television remote controls and also as light sources in fiber-optic telecommunication systems.

Lives improved by Philips

To calculate how many lives we are improving, market intelligence and statistical data on the number of people touched by the products contributing to the social or ecological dimension over the lifetime of a product are multiplied by the number of those products delivered in a year. After elimination of double counts – multiple different product touches per individual are only counted once – the number of lives improved by our innovative solutions is calculated. We established our 2012 baseline at 1.6 billion a year.

Mature geographies

Mature geographies are the highly developed markets comprising of Western Europe, North America, Japan, South Korea, Israel, Australia and New Zealand.

Net debt : group equity ratio

The percentage distribution of net debt over group equity plus net debt.

Non-Governmental Organization (NGO)

A non-governmental organization (NGO) is any non-profit, voluntary citizens' group which is organized at a local, national or international level.

OEM

Original Equipment Manufacturer.

Operational carbon footprint

A carbon footprint is the total set of greenhouse gas emissions caused by an organization, event, product or person; usually expressed in kilotonnes CO₂-equivalent. The Philips operational carbon footprint is calculated on a half-year basis and includes industrial sites (manufacturing and assembly sites), non-industrial sites (offices, warehouses, IT centers and R&D facilities), business travel (lease and rental cars and airplane travel) and logistics (air, sea and road transport).

Perfluorinated compounds (PFC)

A perfluorinated compound (PFC) is an organofluorine compound with all hydrogens replaced by fluorine on a carbon chain—but the molecule also contains at least one different atom or functional group. PFCs have unique properties to make materials stain, oil, and water resistant, and are widely used in diverse applications. PFCs persist in the environment as persistent organic pollutants, but unlike Printed Circuit Board (PCB), they are not known to degrade by any natural processes due to the strength of the carbon-fluorine bond.

Polyvinyl chloride (PVC)

Polyvinyl chloride, better known as PVC or vinyl, is an inexpensive plastic so versatile it has become completely pervasive in modern society. The list of products made from polyvinyl chloride is exhaustive, ranging from phonograph records to drainage and potable piping, water bottles, cling film, credit cards and toys. More uses include window frames, rain gutters, wall paneling, doors, wallpapers, flooring, garden furniture, binders and even pens.

Productivity

Philips uses Productivity internally and as mentioned in this Annual Report as a non-financial indicator of efficiency that relates the added value, being income from operations adjusted for certain items such as restructuring and acquisition-related charges plus salaries and wages (including pension costs and other social security and similar charges), depreciation of property, plant and equipment, and amortization of intangibles, to the average number of employees over the past 12 months.

Regulation on Hazardous Substances (RoHS)

The RoHS Directive prohibits all new electrical and electronic equipment placed on the market in the European Economic Area from containing lead, mercury, cadmium, hexavalent chromium, poly-brominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE), except in certain specific applications, in concentrations greater than the values decided by the European Commission. These values have been established as 0.01% by weight per homogeneous material for cadmium and 0.1% for the other five substances.

Return on equity (ROE)

This ratio measures income from continuing operations as a percentage of average shareholders' equity. ROE rates Philips' overall profitability by evaluating how much profit the company generates with the money shareholders have invested.

Return on invested capital (ROIC)

Return on Invested Capital consists of income from continuing operations excluding results attributable to non-controlling interest holders, results relating to investments in associates and financial income and expenses, divided by the average net operating capital at year end and the preceding four quarter ends. Philips believes that ROIC information makes the underlying performance of its businesses more transparent as it relates returns to the operating capital in use.

SF₆

SF₆ (Sulfur hexafluoride) is used in the electrical industry as a gaseous dielectric medium.

Turnover rate of net operating capital

Sales divided by average net operating capital (calculated on the quarterly balance sheet positions).

Voluntary turnover

Voluntary turnover covers all employees who resigned of their own volition.

Waste Electrical and Electronic Equipment (WEEE)

The Waste Electrical and Electronic Equipment Directive (WEEE Directive) is the European Community directive on waste electrical and electronic equipment which became European Law in February 2003, setting collection, recycling and recovery targets for all

types of electrical goods. The directive imposes the responsibility for the disposal of waste electrical and electronic equipment on the manufacturers of such equipment.

Weighted Average Statutory Tax Rate (WASTR)

The reconciliation of the effective tax rate is based on the applicable statutory tax rate, which is a weighted average of all applicable jurisdictions. This weighted average statutory tax rate (WASTR) is the aggregation of the result before tax multiplied by the applicable statutory tax rate without adjustment for losses, divided by the group result before tax.
