14.7 Taxation

Dutch taxation

The statements below are only a general summary of certain material Dutch tax consequences for holders of common shares are non-residents of the Netherlands based on present Dutch tax laws and the Tax Convention of December 18, 1992, as amended by the protocol that entered into force on December 28, 2004, between the United States of America and the Kingdom of the Netherlands (the US Tax Treaty) and are not to be read as extending by implication to matters not specifically referred to herein. As to individual tax consequences, investors in common shares should consult their own professional tax advisor.

A holder of common shares is an individual who receives income or derives capital gains from common shares and this income received or capital gains derived are attributable to past, present or future employment activities of such holder, the income of which is taxable in the Netherlands.

Dividend withholding tax

In general, a distribution to shareholders by a company resident in the Netherlands (such as the Company) is subject to a withholding tax imposed by the Netherlands at a rate of 15%. Share dividends paid out of the Company's paid-in share premium recognized for Dutch tax purposes are not subject to the above-mentioned withholding tax. Share dividends paid out of the Company's retained earnings are subject to dividend withholding tax on the nominal value of the shares issued. Pursuant to the provisions of the US Tax Treaty, a reduced rate may be applicable in respect of dividends paid by the Company to a beneficial owner holding directly 10% or more of the voting power of the Company, if such owner is a company resident in the United States (as defined in the US Tax Treaty) and entitled to the benefits of the US Tax Treaty.

Pursuant to Dutch anti-dividend stripping legislation, a holder of common shares who is the recipient of dividends will generally not be considered the beneficial owner of the dividends if (i) as a consequence of a combination of transactions, a person other than the recipient benefits, in full or in part, directly or indirectly, from the dividends; (ii) whereby such other person retains, directly or indirectly, an interest similar to that in the common shares on which the dividends were paid; and (iii) that other person is entitled to a credit, reduction or refund of dividend withholding tax that is less than that of the recipient.

Dividends paid to qualifying exempt US pension trusts and qualifying exempt US organizations are, under certain conditions, exempt from Dutch withholding tax under the US Tax Treaty. Qualifying exempt US pension trusts normally remain subject to withholding at the rate of 15% and are required to file for a refund of the tax withheld. Only if certain conditions are fulfilled, such pension trusts may be eligible for relief at source upon

Table of Contents

Investor Relations 14.7

payment of the dividend. However, for qualifying exempt US organizations no relief at source upon payment of the dividend is currently available; such exempt US organizations should apply for a refund of the 15% withholding tax withheld. Further, under certain circumstances, certain exempt organizations (e.g. pension funds) may be eligible for a refund of Dutch withholding tax upon their request pursuant to Dutch tax law. Under proposed Dutch tax law (not yet entered into force as per January 1, 2017), provided certain conditions are met, such (US) organizations may be eligible for relief at source upon request.

Upon request and under certain conditions, certain qualifying non-resident individual and corporate holders of common shares resident in EU/EEA member states or in a qualifying non-EU/EEA state may be eligible for a refund of Dutch dividend withholding tax to the extent that the withholding tax levied is higher than the personal and corporate income tax which would have been due if they were resident in the Netherlands.

The Company may, with respect to certain dividends received from qualifying non-Dutch subsidiaries, credit taxes withheld from those dividends against the Dutch withholding tax imposed on certain qualifying dividends that are redistributed by the Company, up to a maximum of the lesser of:

- 3% of the amount of qualifying dividends redistributed by the Company; and
- 3% of the gross amount of certain qualifying dividends received by the Company.

The reduction is applied to the Dutch dividend withholding tax that the Company must pay to the Dutch tax authorities and not to the Dutch dividend withholding tax that the Company must withhold.

Income and capital gains

Income and capital gains derived from the common shares by a non-resident individual or non-resident corporate shareholder are generally not subject to Dutch income or corporation tax, unless (i) such income and gains are attributable to a (deemed) permanent establishment or (deemed) permanent representative in the Netherlands; or (ii) the shareholder is entitled to a share in the profits of an enterprise or (in the case of a non-resident corporate shareholder only) a co-entitlement to the net worth of an enterprise that is effectively managed in the Netherlands (other than by way of securities) and to which enterprise the common shares are attributable; or (iii) such income and capital gains are derived from a direct, indirect or deemed substantial participation in the share capital of the company (such substantial participation not being a business asset), and, in the case of a non-resident corporate shareholder only, it being held with the primary aim or one of the primary aims to avoid the levy of income tax or dividend withholding tax from another person and is not put in place without valid commercial reasons that reflect economic reality; or (iv) in the case of a non-resident corporate shareholder, such shareholder is a resident of Aruba, Curacao or Saint Martin with a permanent establishment or permanent representative in Bonaire, Eustatius or Saba to which the common shares are attributable and certain conditions are met; or (v) in the case of a non-resident individual, such individual derives income or capital gains from the common shares that are taxable as benefits from 'miscellaneous activities' in the Netherlands (*resultaat uit overige werkzaamheden*, as defined in the Dutch Income Tax Act 2001), which includes the performance of activities with respect to the common shares that exceed regular portfolio management.

In general, a holder of common shares has a substantial participation if he holds either directly or indirectly and either independently or jointly with his partner (as defined in the Dutch Income Tax Act 2001), the ownership of, or certain other rights over, at least 5% of the total issued share capital or total issued particular class of shares of the Company or rights to acquire direct or indirect shares, whether or not already issued, that represent at any time 5% or more of the total issued capital (or the total issued particular class of shares) or the ownership of certain profit participating certificates that relate to 5% or more of the annual profit or to 5% or more of the liquidation proceeds. A shareholder will also have a substantial participation in the Company if one or more of certain relatives of the shareholder hold a substantial participation in the Company. A deemed substantial participation amongst others exists if (part of) a substantial participation has been disposed of, or is deemed to have been disposed of, on a non-recognition basis.

Estate and gift taxes

No estate, inheritance or gift taxes are imposed by the Netherlands on the transfer or deemed transfer of common shares by way of gift by or on the death of a shareholder if, at the time of the death of the shareholder or the gift of the common shares (as the case may be), such shareholder is not a (deemed) resident of the Netherlands.

Inheritance or gift taxes (as the case may be) are due, however, if such shareholder:

- has Dutch nationality and has been a resident of the Netherlands at any time during the ten years preceding the time of their death or gift; or
- does not have Dutch nationality but has been a resident of the Netherlands at any time during the twelve months preceding the time of the gift (for Netherlands gift taxes only).

United States Federal Taxation

This section describes the material United States federal income tax consequences to a US holder (as defined below) of owning common shares. It applies only if the common shares are held as capital assets for

tax purposes. This section does not apply to a member of a special class of holders subject to special rules, including:

- a dealer in securities,
- a trader in securities that elects to use a mark-to-market method of accounting for securities holdings,
- a tax-exempt organization,
- a life insurance company,
- a person liable for alternative minimum tax,
- a person who actually or constructively owns 10% or more of our voting stock,
- a person who holds common shares as part of a straddle or a hedging or conversion transaction,
- a person who purchases or sells common shares as part of a wash sale for tax purposes, or
- a person whose functional currency is not the US dollar.

This section is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations, published rulings and court decisions, all as currently in effect, as well as on the US Tax Treaty. These laws and regulations are subject to change, possibly on a retroactive basis.

If a partnership holds the common shares, the United States federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. A partner in a partnership holding the common shares should consult its tax advisor with regard to the United States federal income tax treatment of an investment in the common shares.

A US holder is defined as a beneficial owner of common shares that is:

- a citizen or resident of the United States,
- a domestic corporation,
- an estate whose income is subject to United States federal income tax regardless of its source, or
- a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

A US holder should consult its own tax advisor regarding the United States federal, state and local and other tax consequences of owning and disposing of common shares in its particular circumstances.

This discussion addresses only United States federal income taxation.

Taxation of Dividends

Under the United States federal income tax laws, the gross amount of any dividend paid in stock or cash out of our current or accumulated earnings and profits (as determined for United States federal income tax purposes) is subject to United States federal income taxation. For a non-corporate US holder, dividends paid that constitute qualified dividend income will be taxable at the preferential rates applicable to long-term capital gains, provided that the non-corporate US holder holds the common shares for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and provided it meets other holding period requirements. Dividends paid with respect to the common shares generally will be qualified dividend income³⁾. A US holder must include any Dutch tax withheld from the dividend payment in this gross amount even though it does not in fact receive it. The dividend is taxable to a US holder when it receives the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. For dividend payments made in euro, the amount of the dividend distribution that a US holder must include in its income will be the US dollar value of the euro payments made, determined at the spot euro/ US dollar rate on the date the dividend distribution can be included in its income, regardless of whether the payment is in fact converted into US dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date a US holder includes the dividend payment in income to the date a US holder converts the payment into US dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for United States federal income tax purposes, will be treated as a non-taxable return of capital to the extent of a US holder's basis in the common shares and thereafter as capital gain. However, we do not expect to calculate earnings and profits in accordance with United States federal income tax principles. Accordingly, US holders should expect to generally treat distributions we make as dividends.

Subject to certain limitations, the Dutch tax withheld in accordance with the US Tax Treaty and paid over to the Netherlands will be creditable or deductible against a US holder's United States federal income tax liability. However, Dutch withholding tax may not be creditable or deductible to the extent that we reduce (as described above under "Dutch taxation - Dividend withholding tax") the amount of withholding tax paid over to the Netherlands by crediting taxes withheld from certain dividends received by us. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the preferential tax rates. To the extent a refund of the tax withheld is available under Dutch law, or under the US Tax Treaty, the amount of tax withheld that is refundable will not be eligible for credit against United States federal income tax liability. Dividends will be income from sources outside the United States, and depending on a holder's circumstances, will generally be either

“passive” or “general” income for the purposes of computing the foreign tax credit allowable to the holder.

Taxation of Capital Gains

A US holder that sells or otherwise disposes of its common shares will recognize capital gain or loss for United States federal income tax purposes equal to the difference between the US dollar value of the amount that it realizes and its tax basis, determined in US dollars, in its common shares. Capital gain of a non-corporate US holder is generally taxed at preferential tax rates where the holder has a holding period greater than one year ²⁾. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

PFIC Rules

We do not believe that the common shares will be treated as stock of a passive foreign investment company, or PFIC, for United States federal income tax purposes, but this conclusion is a factual determination that is made annually and thus is subject to change. If we are treated as a PFIC, unless a US holder elects to be taxed annually on a mark-to-market basis with respect to the common shares, gain realized on the sale or other disposition of the common shares would in general not be treated as capital gain. Instead a US holder would be treated as if it had realized such gain and certain “excess distributions” ratably over the holding period for the common shares and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, in addition to which an interest charge in respect of the tax attributable to each such year would apply. Any dividends received by a US holder will not be eligible for the special tax rates applicable to qualified dividend income if we are treated as a PFIC with respect to such US holder either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income and subject to the excess distribution regime described above.

- 1) In addition, a US holder that is an individual or estate, or a trust that does not fall into a special class of trusts that is exempt from such tax, is subject to a 3.8% tax on the lesser of (1) the US holder’s “net investment income” for the relevant taxable year and (2) the excess of the US holder’s modified adjusted gross income for the taxable year over a certain threshold (the “Medicare tax”). A US holder’s net investment income generally includes its dividend income.
- 2) In addition, the gain or loss is generally included in a US holder’s net investment income, which may be subject to a 3.8% tax as described in the discussion of the Medicare tax under the heading – “Taxation of Dividends”.

14.8 New York Registry Shares

Fees and Charges Payable by a Holder of New York Registry Shares

Citibank, N.A., as the US registrar, transfer agent, paying agent and shareholder servicing agent (“Agent”) under Philips’ New York Registry Share program (the “Program”), collects fees for delivery and surrender of New York Registry Shares directly from investors depositing ordinary shares or surrendering New York Registry Shares for the purpose of withdrawal or from intermediaries acting for them. The Agent collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of the distributable property to pay the fees.

The charges of the Agent payable by investors are as follows:

The New York Transfer Agent charges shareholders a fee of up to USD 5.00 per 100 shares for the exchange of New York Registry shares for ordinary shares and vice versa.

Fees and Payments made by the Agent to Philips

The Agent has agreed to reimburse certain expenses of Philips related to the Program and incurred by Philips in connection with the Program. In the year ended December 31, 2016, the Agent reimbursed to Philips, or paid to third parties on Philips’ behalf, a total sum of EUR 503,520.

The table below sets forth the types of expenses that the Agent has agreed to reimburse and the amounts reimbursed in the year ended December 31, 2016:

Category of Expense Reimbursed to Philips in EUR		amount reimbursed in the year ended December 31, 2016
Program-related expenses such as legal fees and New York Stock Exchange listing fees		98,443
A portion of the issuance and cancellation fees actually received by the Agent from holders of New York Registry Shares, net of Program-related expenses already reimbursed by the Agent.		405,077 ¹⁾
Expense reimbursed		503,520

¹⁾ Translated at USD/EUR exchange rate of actual date(s) of reimbursement(s) during 2016

The Agent has also agreed to waive certain fees for standard costs associated with the administration of the program.

The table below sets forth those expenses that the Agent paid directly to third parties in the year ended December 31, 2016.

Category of Expense paid directly to third parties in EUR		amount in the year ended December 31, 2016
Reimbursement of Proxy Process expenses		11,572
Reimbursement of Legal Fee expenses		
NYSE Listing Fee		86,871
Fulfillment		
Expense paid directly to third parties		98,443

Under certain circumstances, including removal of the Agent or termination of the Program by Philips, Philips is required to repay the Agent certain amounts reimbursed and/or expenses paid to or on behalf of Philips.

BMC

Business Market Combination - As a diversified technology group, Philips has a wide portfolio of categories/business innovation units which are grouped in business groups based primarily on technology or customer needs. Philips has physical market presence in over 100 countries, which are grouped into 17 market clusters. Our primary operating modus is the Business Market matrix comprising Business Groups and Markets. These Business Market Combinations (BMCs) drive business performance on a granular level at which plans are agreed between global businesses and local market teams.

Brominated flame retardants (BFR)

Brominated flame retardants are a group of chemicals that have an inhibitory effect on the ignition of combustible organic materials. Of the commercialized chemical flame retardants, the brominated variety are most widely used.

CO₂-equivalent

CO₂-equivalent or carbon dioxide equivalent is a quantity that describes, for a given mixture and amount of greenhouse gas, the amount of CO₂ that would have the same global warming potential (GWP), when measured over a specified timescale (generally 100 years).

Circular economy

A circular economy aims to decouple economic growth from the use of natural resources and ecosystems by using those resources more effectively. By definition it is a driver for innovation in the areas of material-, component- and product reuse, as well as new business models such as solutions and services. In a Circular Economy, the more effective use of materials enables to create more value, both by cost savings and by developing new markets or growing existing ones.

Dividend yield

The dividend yield is the annual dividend payment divided by Philips' market capitalization. All references to dividend yield are as of December 31 of the previous year.

Electronic Industry Citizenship Coalition (EICC)

The Electronic Industry Citizenship Coalition was established in 2004 to promote a common code of conduct for the electronics and information and communications technology (ICT) industry. EICC now includes more than 100 global companies and their suppliers.

Employee Engagement Index (EEI)

The Employee Engagement Index (EEI) is the single measure of the overall level of employee engagement at Philips. It is a combination of perceptions and attitudes related to employee satisfaction, commitment and advocacy.

Energy-using Products (EuP)

An energy-using product is a product that uses, generates, transfers or measures energy (electricity, gas, fossil fuel). Examples include boilers, computers, televisions, transformers, industrial fans and industrial furnaces.

Full-time equivalent employee (FTE)

Full-time equivalent is a way to measure a worker's involvement in a project. An FTE of 1.0 means that the person is equivalent to a full-time worker, while an FTE of 0.5 signals that the worker works half-time.

Global Reporting Initiative (GRI)

The Global Reporting Initiative (GRI) is a network-based organization that pioneered the world's most widely used sustainability reporting framework. GRI is committed to the framework's continuous improvement and application worldwide. GRI's core goals include the mainstreaming of disclosure on environmental, social and governance performance.

Green Innovation

Green Innovation comprise all R&D activities directly contributing to the development of Green Products or Green Technologies.

Green Products

Green Products offer a significant environmental improvement in one or more Green Focal Areas: Energy efficiency, Packaging, Hazardous substances, Weight, Recycling and disposal and Lifetime reliability. The life cycle approach is used to determine a product's overall environmental improvement. It calculates the environmental impact of a product over its total life cycle (raw materials, manufacturing, product use and disposal). Green Products need to prove leadership in at least one Green Focal Area compared to industry standards, which is defined by a sector specific peer group. This is done either by outperforming reference products (which can be a competitor or predecessor product in the particular product family) by at least 10%, outperforming product specific eco-requirements or by being awarded with a recognized eco-performance label. Because of different product portfolios, sectors have specified additional criteria for Green Products, including product specific minimum requirements where relevant.

Growth geographies

Growth geographies are the developing geographies comprising of Asia Pacific (excluding Japan, South Korea, Australia and New Zealand), Latin America, Central & Eastern Europe, the Middle East (excluding Israel) and Africa.

Hazardous substances

Hazardous substances are generally defined as substances posing imminent and substantial danger to public health and welfare or the environment.

Income from operations (EBIT)

Income from operations (earnings before interest and tax) represents net income, less discontinued operations net of income taxes, investments in associates net of income taxes, income tax expense, financial income and financial expense.

Income from continuing operations

Net income from continuing operations, or net income excluding discontinued operations.

Initiatief Duurzame Handel (IDH)

IDH is the Dutch Sustainable Trade Initiative. It brings together government, frontrunner companies, civil society organizations and labor unions to accelerate and up-scale sustainable trade in mainstream commodity markets from the emerging countries to Western Europe.

International Standardization Organization (ISO)

The International Standardization Organization (ISO) is the world's largest developer and publisher of International Standards. ISO is a network of the national standards institutes of more than 160 countries, one member per country, with a Central Secretariat in Geneva, Switzerland, that coordinates the system. ISO is a non-governmental organization that forms a bridge between the public and private sectors.

Light-Emitting Diode (LED)

Light-Emitting Diode (LED), in electronics, is a semiconductor device that emits infrared or visible light when charged with an electric current. Visible LEDs are used in many electronic devices as indicator lamps, in automobiles as rear-window and brake lights, and on billboards and signs as alphanumeric displays or even full-color posters. Infrared LEDs are employed in autofocus cameras and television remote controls and also as light sources in fiber-optic telecommunication systems.

Lives improved by Philips

To calculate how many lives we are improving, market intelligence and statistical data on the number of people touched by the products contributing to the social or ecological dimension over the lifetime of a product are multiplied by the number of those products delivered in a year. After elimination of double counts - multiple different product touches per individual are only counted once - the number of lives improved by our innovative solutions is calculated. We established our 2012 baseline at 1.6 billion a year.

Mature geographies

Mature geographies are the highly developed markets comprising of Western Europe, North America, Japan, South Korea, Israel, Australia and New Zealand.

Non-Governmental Organization (NGO)

A non-governmental organization (NGO) is any non-profit, voluntary citizens' group which is organized at a local, national or international level.

OEM

Original Equipment Manufacturer.

Operational carbon footprint

A carbon footprint is the total set of greenhouse gas emissions caused by an organization, event, product or person; usually expressed in kilotonnes CO₂-equivalent. The Philips operational carbon footprint is calculated on a half-year basis and includes industrial sites (manufacturing and assembly sites), non-industrial sites (offices, warehouses, IT centers and R&D facilities), business travel (lease and rental cars and airplane travel) and logistics (air, sea and road transport).

Polyvinyl chloride (PVC)

Polyvinyl chloride, better known as PVC or vinyl, is an inexpensive plastic so versatile it has become completely pervasive in modern society. The list of products made from polyvinyl chloride is exhaustive, ranging from phonograph records to drainage and potable piping, water bottles, cling film, credit cards and toys. More uses include window frames, rain gutters, wall paneling, doors, wallpapers, flooring, garden furniture, binders and even pens.

REACH

Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) is a European Union regulation dated 18 December 2006. REACH addresses the production and use of chemical substances, and their potential impacts on both human health and the environment.

Regulation on Hazardous Substances (RoHS)

The RoHS Directive prohibits all new electrical and electronic equipment placed on the market in the European Economic Area from containing lead, mercury, cadmium, hexavalent chromium, poly-brominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE), except in certain specific applications, in concentrations greater than the values decided by the European Commission. These values have been established as 0.01% by weight per homogeneous material for cadmium and 0.1% for the other five substances.

VOC

Volatile organic compounds (VOCs) are organic chemicals that have a high vapor pressure at ordinary room temperature. Their high vapor pressure results from a low boiling point, which causes large numbers of molecules to evaporate or sublime from the liquid or solid form of the compound and enter the surrounding air, a trait known as volatility.

Voluntary turnover

Voluntary turnover covers all employees who resigned of their own volition.

Waste Electrical and Electronic Equipment (WEEE)

The Waste Electrical and Electronic Equipment Directive (WEEE Directive) is the European Community directive on waste electrical and electronic equipment which became European Law in February 2003, setting collection, recycling and recovery targets for all types of electrical goods. The directive imposes the responsibility for the disposal of waste electrical and electronic equipment on the manufacturers of such equipment.

Weighted Average Statutory Tax Rate (WASTR)

The reconciliation of the effective tax rate is based on the applicable statutory tax rate, which is a weighted average of all applicable jurisdictions. This weighted average statutory tax rate (WASTR) is the aggregation of the result before tax multiplied by the applicable statutory tax rate without adjustment for losses, divided by the group result before tax.
