

SECTION 3**RISK FACTORS**

Our business, operations and financial condition are subject to various risks and uncertainties. We have described below significant factors that may adversely affect our business, operations, financial performance and condition or industry. You should be aware that the occurrence of any of the events described in the following risk factors, elsewhere in or incorporated by reference into this report, and other events that we have not predicted or assessed, could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

ASBESTOS-RELATED RISKS

Our wholly owned Australian Performing Subsidiary, is required to make payments to a special purpose fund that provides compensation for Australian asbestos-related personal injury and death claims for which certain Former James Hardie Companies are found liable. These payments may affect our ability to grow the Company.

On 21 November 2006, JHI plc (formerly JHI NV and JHI SE), AICF, the NSW Government and the Performing Subsidiary entered into the AFFA to provide long-term funding to AICF, a special purpose fund that provides compensation for Australian asbestos-related personal injury and death claims for which the Former James Hardie Companies are found liable.

We have recorded a gross asbestos liability of US\$1.7 billion in our consolidated financial statements as of 31 March 2013, based on the AFFA governing our anticipated future payments to AICF. The net unfunded AFFA liability, net of tax was US\$851.6 million at 31 March 2013. The initial funding was made to AICF in February 2007 and annual payments are to be made each July, subject to the terms of the AFFA. The amounts of these annual payments are dependent on several factors, including our free cash flow (as defined in the AFFA), actuarial estimations, actual claims paid, operating expenses of AICF and the annual cash flow cap. In fiscal year 2013, we made contributions of US\$184.1 million (A\$177.5 million) to AICF. From the time AICF was established in February 2007 through May 2013, we have contributed approximately A\$599.2 million to the fund. Our obligation to make future contributions to AICF continues to be linked under the terms of the AFFA to our long-term financial success, especially our ability to generate net operating cash flow.

As a result of our obligation to make payments under the AFFA, our funds available for capital expenditures (either with respect to our existing business or new business opportunities), repayments of debt, payments of dividends or other distributions have been, and will be, reduced by the amounts paid to AICF, and consequently, our financial position, liquidity, results of operations and cash flows have been, and will be, reduced or materially adversely affected. Our obligation to make these payments could also affect or restrict our ability to access equity or debt capital markets.

Potential escalation in proven claims made against, and associated costs of, AICF could increase our annual funding payments required to be made under the AFFA, which may cause us to have to increase our asbestos liability in the future.

The amount of our asbestos liability is based, in part, on actuarially determined, anticipated (estimated), future annual funding payments to be made to AICF on an undiscounted and uninflated basis. Future annual payments to AICF are based on updated actuarial assessments that are to be performed as of 31 March of each year to determine expected asbestos-related personal injury and death claims to be funded under the AFFA for the financial year in which the payment is made and the next two financial years. Estimates of actuarial liabilities are based on many assumptions, which may

not prove to be correct, and which are subject to considerable uncertainty, since the ultimate number and cost of claims are subject to the outcome of events that have not yet occurred, including social, legal and medical developments as well as future economic conditions.

If future proven claims are more numerous, the liabilities arising from them are larger than that currently estimated by AICF's actuary, KPMG Actuarial, or if AICF investments decline in value, it is possible that pursuant to the terms of the AFFA, we will be required to pay higher annual funding payments to AICF than currently anticipated and on which our asbestos liability is based. If this occurs, we may be required to increase our asbestos liability which would be reflected as a charge in our consolidated statements of operations and comprehensive income (loss) at that date. Any such changes to actuarial estimates which require us to increase our asbestos liability could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Even though the AFFA has been implemented, we may be subject to potential additional liabilities (including claims for compensation or property remediation outside the arrangements reflected in the AFFA) because certain current and former companies of the James Hardie Group previously manufactured products that contained asbestos.

Prior to 1937, ABN 60, which is now owned and controlled by AICF, manufactured products in Australia that contained asbestos. In addition, prior to 1987, two former subsidiaries of ABN 60, Amaca and Amaba, which are now also owned and controlled by AICF, manufactured products in Australia that contained asbestos. ABN 60 also held shares in companies that manufactured asbestos-containing products in Indonesia and Malaysia, and held minority shareholdings in companies that conducted asbestos-mining operations based in Canada and Southern Africa. Former ABN 60 subsidiaries also exported asbestos-containing products to various countries. AICF is designed to provide compensation only for certain claims and to meet certain related expenses and liabilities, and legislation in New South Wales, Australia in connection with the AFFA seeks to defer all other claims against the Former James Hardie Companies. The funds contributed to AICF will not be available to meet any asbestos-related claims made outside Australia, or claims made arising from exposure to asbestos occurring outside Australia, or any claim for pure property loss or pure economic loss or remediation of property. In these circumstances, it is possible that persons with such excluded claims may seek to pursue those claims directly against us. Defending any such litigation could be costly and time consuming, and consequently, our financial position, liquidity, results of operations and cash flows could be materially adversely affected.

Prior to 1988, a New Zealand subsidiary in the James Hardie Group manufactured products in New Zealand that contained asbestos. In New Zealand, asbestos-related disease compensation claims are managed by the state-run Accident Compensation Corporation ("ACC"). Our New Zealand subsidiary that manufactured products that contained asbestos contributed financially to the ACC fund as required by law via payment of an annual levy while it carried on business. All decisions relating to the amount and allocation of payments to claimants in New Zealand are made by the ACC in accordance with New Zealand law. The Injury Prevention, Rehabilitation and Compensation Act 2001 (NZ) bars compensatory damages for claims that are covered by the legislation which may be made against the ACC fund. However, we may be subject to potential liability if any of these claims are found not to be covered by the legislation and are later brought against us, and consequently, our financial position, liquidity, results of operations and cash flows could be materially adversely affected.

Because our revenues are primarily derived from sales in US dollars and the actuarially assessed asbestos liability is recorded in Australian dollars and payments pursuant to the AFFA are made in Australian dollars, we may experience unpredictable volatility in our reported results due to changes in the US dollar (and other currencies from which we derive our sales) compared to the Australian dollar.

Payments pursuant to the AFFA are required to be made to AICF in Australian dollars. In addition, annual payments to AICF include calculations based on various estimates that are denominated in Australian dollars. To the extent that our future obligations exceed Australian dollar cash flows derived from our Australian operations, and we do not hedge this foreign exchange exposure, we will need to convert US dollars or other foreign currency into Australian dollars in order to meet our obligations pursuant to the AFFA. As a result, any unfavourable fluctuations in the US dollar (the majority of our revenues is derived from sales in US dollars) or other currencies against the Australian dollar could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

In addition, because our results of operations are reported in US dollars and the asbestos liability is based on estimated payments denominated in Australian dollars, fluctuations in the A\$/US\$ exchange rate will cause unpredictable volatility in our reported results for the foreseeable future. For example, during fiscal years 2013, 2012 and 2011, we recorded a favourable impact of US\$0.2 million, and unfavourable impacts of US\$6.2 million and US\$107.3 million, respectively, due to fluctuations in the US dollar compared to the Australian dollar.

Any unfavourable fluctuation in US dollar and the other currencies from which we derive our sales compared to the Australian dollar could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

The AFFA imposes certain non-monetary obligations.

Under the AFFA, we are also subject to certain non-monetary obligations that could prove onerous or otherwise materially adversely affect our ability to undertake proposed transactions or pay dividends. For example, the AFFA contains certain restrictions that generally prohibit us from undertaking transactions that would materially adversely affect the relative priority of AICF as a creditor, or that would materially impair our legal or financial capacity and that of the Performing Subsidiary, in each case such that we and the Performing Subsidiary would cease to be likely to be able to meet the funding obligations that would have arisen under the AFFA had the relevant transaction not occurred. Those restrictions apply to dividends and other distributions, reorganisations of, or dealings in, share capital which create or vest rights in such capital in third parties, or non-arm's length transactions. While the AFFA contains certain exemptions from such restrictions (including, for example, exemptions for arm's length dealings; transactions in the ordinary course of business; certain issuances of equity securities or bonds; and certain transactions provided certain financial ratios are met and certain amounts of dividends), implementing such restrictions could materially adversely affect our ability to enter into transactions that might otherwise be favourable to us and could materially adversely affect our financial position, liquidity, results of operations and cash flows.

The AFFA does not eliminate the risk of adverse action being taken against us.

There is a possibility that, despite certain covenants agreed to by the NSW Government in the AFFA, adverse action could be directed against us by one or more of the NSW Government, the government of the Commonwealth of Australia, governments of the other states or territories of Australia or any other governments, unions or union representative groups, or asbestos disease groups with respect to the asbestos liabilities of the Former James Hardie Companies or other current and former companies

of the James Hardie Group. Any such adverse action could materially adversely affect our financial position, liquidity, results of operations and cash flows.

The complexity and long-term nature of the AFFA and related legislation and agreements may result in litigation as to their interpretation.

Certain legislation, the AFFA and related agreements, which govern the implementation and performance of the AFFA are complex and have been negotiated over the course of extended periods between various parties. There is a risk that, over the term of the AFFA, some or all parties may become involved in disputes as to the interpretation of such legislation, the AFFA or related agreements or the terms of the AFFA may change. We cannot guarantee that no party will commence litigation seeking remedies with respect to such a dispute, nor can we guarantee that a court will not order other remedies which may materially adversely affect us.

There is no certainty that the Facility to AICF will remain in place for the entire term of the Facility.

Drawings under the Facility to AICF, as described in Note 11 to our consolidated financial statements, are subject to satisfaction of certain specified conditions precedent and the NSW Government (as lender) has the right to cancel the loan facility, require repayment of money advanced and enforce security granted to support the loan in the various circumstances prescribed in the Facility agreement and related security documentation. There are also certain positive covenants given by, and restrictions on the activities of, AICF and Former James Hardie Companies which apply during the term of the loan. A breach of any of these covenants or restrictions may also lead to cancellation of the Facility, early repayment of the loan and/or enforcement of the security. As such, there can be no certainty that the Facility will remain in place for its intended term.

If the Facility does not remain in place for its intended term, AICF may experience a short-term funding shortfall. A short-term funding shortfall for AICF could subject us to negative publicity. Such negative publicity could materially adversely affect our financial position, liquidity, results of operations and cash flows, employee morale and the market prices of our publicly traded securities.

We may have insufficient Australian taxable income to utilise tax deductions.

We may not have sufficient Australian taxable income in future years to utilise the tax deductions resulting from the funding payments under the AFFA to AICF. Further, if as a result of making such funding payments we incur tax losses, we may not be able to fully utilise such tax losses in future years of income. Any inability to utilise such deductions or losses could materially adversely affect our financial position, liquidity, results of operations and cash flows.

Certain AFFA tax conditions may not be satisfied.

Despite the ATO rulings for the expected life of the AFFA, it is possible that new (and adverse) tax legislation could be enacted in the future. It is also possible that the facts and circumstances relevant to operation of the ATO rulings could change over the life of the AFFA. We may elect to terminate the AFFA if certain tax conditions are not satisfied for more than 12 months. However, we do not have a right to terminate the AFFA if, among other things, the tax conditions are not satisfied as a result of the actions of a member of the James Hardie Group.

Under certain circumstances, we may still have an obligation to make annual funding payments on an adjusted basis if the tax conditions remain unsatisfied for more than 12 months. If the tax conditions are not satisfied in a manner which does not permit us to terminate the AFFA, our financial position,

liquidity, results of operations and cash flows may be materially adversely affected. The extent of this adverse effect will be determined by the nature of the tax condition which is not satisfied.

DOMICILE RELATED RISKS

The rules and regulations applying to us as an Irish plc may change.

We became an Irish public limited company in fiscal year 2013. As an Irish plc, our board meetings and all strategic decisions occur in Ireland. However, there can be no assurance that Irish law will not become more restrictive or otherwise disadvantageous to us.

Tax benefits are available under the US-Netherlands Income Tax Treaty to US and Dutch taxpayers that qualify for those benefits. In spite of a favourable settlement with the Appeals Division of the IRS for calendar years 2006 and 2007, our eligibility for continuing benefits under the US-Netherlands Tax Treaty is still undetermined for 2010.

On 28 December 2004, the United States and The Netherlands amended the US-Netherlands Income Tax Treaty (prior to amendment, the "Original US-NL Treaty"; post amendment, the "New US-NL Treaty"). We believe that, based on the transitional rules set forth in the New US-NL Treaty, the Original US-NL Treaty applied to us and to our Dutch and US subsidiaries until 31 January 2006. We believe that, under the limitation on benefits ("LOB") provision of the Original US-NL Treaty, no US withholding tax applied to interest or royalties that our US subsidiaries paid to our Dutch finance subsidiary. The LOB provision of the Original US-NL Treaty had various conditions of eligibility for reduced US withholding tax rates and other treaty benefits, all of which we satisfied. If, however, we do not qualify for benefits under the New US-NL Treaty, those interest and royalty payments would be subject to a 30% US withholding tax.

Companies eligible for benefits under the New US-NL Treaty qualify for a zero percent US withholding tax rate not only on interest and royalties but also, in certain circumstances, on dividends. However, the LOB provision of the New US-NL Treaty has a number of new, more restrictive eligibility requirements for eliminating or reducing US withholding taxes and for other treaty benefits. We changed our organisational and operational structure as of 1 January 2006 to satisfy the requirements of the LOB provision of the New US-NL Treaty and believe we are eligible for the benefits of the New US-NL Treaty commencing 1 February 2006 until 29 June 2010, at which time we became an Irish tax resident and eligible for benefits under the US-Ireland Income Tax Treaty (the "US-Ireland Treaty").

In spite of a favourable settlement with the Appeals Division of the IRS for calendar years 2006 and 2007, our eligibility for continuing benefits under the New US-NL Treaty is still undetermined for calendar year 2010 (since we became an Irish tax resident and eligible for benefits under the US-Ireland Treaty in June 2010) because such eligibility is determined on an annual basis. If during a subsequent tax audit or related process, the IRS determines that we are not eligible for continuing benefits under the New US-NL Treaty, we may not qualify for treaty benefits. As a result, our effective tax rate could significantly increase beginning in the fiscal year that such determination is made and we could be liable for taxes owed for calendar year 2010, which could materially adversely affect our financial position, liquidity, results of operations and cash flows.

Tax benefits are available under the US-Ireland Income Tax Treaty to US and Irish taxpayers that qualify for those benefits. Our eligibility for benefits under the US-Ireland Tax Treaty is determined on an annual basis and we could be audited by the IRS for this issue. If during a subsequent tax audit or related process, the IRS determines that we are not eligible for benefits under the US-Ireland Treaty, we may not qualify for treaty benefits. As a result, our effective tax rate could significantly increase and we could be subject to a 30% US withholding tax rate on payments of interest, royalties and dividends from our US subsidiaries to our Irish resident subsidiaries.

In October 2009, we transferred our intellectual property and our treasury and finance operations to Irish resident subsidiaries. We believe that interest and royalties paid by our US subsidiaries to these Irish resident subsidiaries qualify for treaty benefits in the form of reduced withholding tax under the U.S.-Ireland Treaty. For the period between the incorporation of these subsidiaries until the date that we became a tax resident in Ireland, our Irish subsidiaries qualified for treaty benefits under the “derivative benefits” clause of the US-Ireland Treaty on the basis that we were also eligible for treaty benefits under the amended US-NL Income Tax Treaty.

We believe that, under the LOB provision of the US-Ireland Treaty, no US withholding tax applies to interest or royalties that our US subsidiaries paid to our Irish resident subsidiaries. The LOB provision has various conditions of eligibility for reduced US withholding tax rates and other treaty benefits, all of which we believe are satisfied. If, however, we do not qualify for benefits under the US-Ireland Treaty, those interest and royalty payments would be subject to a 30% US withholding tax.

With effect from 29 June 2010 forward (i.e., the date upon which we became an Irish tax resident), we believe that, under the US-Ireland Treaty, a 5% US withholding tax applies to dividends paid by our US subsidiaries to our Irish resident subsidiaries. The LOB provision of the US-Ireland Treaty has various conditions of eligibility for reduced US withholding tax rates and other treaty benefits, all of which we believe we have satisfied. If, however, we do not qualify for benefits under the US-Ireland Treaty, dividend payments by our US subsidiaries would be subject to a 30% US withholding rate.

Our eligibility for benefits under the US-Ireland Tax Treaty is determined on an annual basis and we could be audited by the IRS for this issue. If during a subsequent tax audit or related process, the IRS determines that we are not eligible for benefits under the US-Ireland Treaty, we may not qualify for treaty benefits. As a result, our effective tax rate could significantly increase beginning in the fiscal year that such determination is made and we could be liable for taxes owing for calendar year 2010 and subsequent periods, which could adversely affect our financial position, liquidity, results of operations and cash flows.

Irish law contains provisions that could delay or prevent a change of control that may otherwise be beneficial to you.

Irish law contains several provisions that could have the effect of delaying or preventing a change of control of our ownership. The Irish Takeover Rules generally prohibit the acquisition of shares of our common stock if, because of an acquisition of a relevant interest (including interests held in the form of shares of our common stock, CUFs or ADSs) in such shares, the voting rights of the shares in which a person (or persons acting in concert) holds relevant interests increases (i) from 30% or below to over 30% or (ii) from a starting point that is above 30% and below 50%. However, this prohibition is subject to exceptions, including acquisitions that result from acceptances under a mandatory takeover bid made in compliance with the Irish Takeover Rules. Although the Irish Takeover Rules may help to ensure that no person acquires voting control of us without making an offer to all shareholders, they may also have the effect of delaying or preventing a change of control that may otherwise be beneficial to you. In addition to the operation of the Irish Takeover Rules, the Company may, from time to time,

put in place appropriate retention arrangements to ensure that it retains its key employees during periods of corporate change.

Our ability to pay dividends and conduct share buy-backs is dependent on Irish law and may be limited in the future if we are not able to maintain sufficient levels of distributable profits.

Under Irish law, an Irish company is able to pay dividends and/or conduct a buy-back of shares up to the amount of its distributable profits which are determined under applicable accounting practices generally accepted in Ireland ("Irish GAAP"). We believe that our current corporate structure has allowed us to maintain sufficient levels of distributable profits to continue paying dividends in accordance with our publicly disclosed dividend policy, which is updated from time to time, and to conduct share buy-backs as announced in May 2013. However, transactions or events could cause a reduction in our distributable profits, resulting in our inability to pay dividends on our securities or to conduct share buy-backs, which could have a material adverse impact on the market value of the securities that you have invested in.

In the future, we may be required to withhold Irish dividend withholding tax from distributions made by us to you.

The waiver received from the Irish Revenue authorities in respect of Irish dividend withholding tax, as described in Section 3, "Taxation" expires on 31 July 2013. After 31 July 2013, ie for our FY2014 half year dividend onwards, we may be required to withhold Irish dividend withholding tax from distributions made by us to you unless you complete and provide to us a Dividend Withholding Tax form as prescribed by Irish Revenue.

TAXATION RELATED RISKS

Our effective income tax rate could increase and materially adversely affect our business.

We operate in multiple jurisdictions and pay tax on our income according to the tax laws of these jurisdictions. Various factors, some of which are beyond our control, determine our effective tax rate. The primary drivers of our effective tax rate are the tax rates of the jurisdictions in which we operate, the level and geographic mix of pre-tax earnings, intra-group royalties, interest rates and the level of debt which give rise to interest expense on external debt and intra-group debt, extraordinary and non-core items, and the value of adjustments for timing differences and permanent differences, including the non-deductibility of certain expenses, all of which are subject to change and which could result in a material increase in our effective tax rate. Such changes to our effective tax rate could materially adversely affect our financial position, liquidity, results of operations and cash flows.

Exposure to additional tax liabilities due to audits could materially adversely affect our business.

Due to our size and the nature of our business, we are subject to ongoing reviews by authorities in taxing jurisdictions on various tax matters, including challenges to various positions we assert on our income tax and withholding tax returns. We accrue for tax contingencies based upon our best estimate of the taxes ultimately expected to be paid, which we update over time as more information becomes available. Such amounts are included in taxes payable or other non-current liabilities, as appropriate. We record additional tax expense in the period in which we determine that the recorded tax liability is less than the ultimate assessment we expect. The amounts ultimately paid on resolution of reviews by taxing jurisdictions could be materially different from the amounts included in taxes payable or other non-current liabilities and result in additional tax expense which could materially adversely affect our financial position, liquidity, results of operations and cash flows.

OTHER RISKS***Our business is dependent on the residential and commercial construction markets.***

Demand for our products depends in large part on the residential construction markets and, to a lesser extent, on commercial construction markets. The level of activity in residential construction markets depends on new housing starts and residential remodeling projects, which are a function of many factors outside our control, including general economic conditions, the availability of financing, mortgage and other interest rates, inflation, unemployment, the inventory of unsold homes, the level of foreclosures, home resale rates, housing affordability, demographic trends, gross domestic product growth and consumer confidence in each of the countries and regions in which we operate.

Any slowdown in the markets we serve could result in decreased demand for our products and cause us to experience decreased sales and operating income. In addition, deterioration or continued weaknesses in general economic conditions, such as higher interest rates, high levels of unemployment, restrictive lending practices and increased foreclosures could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Substantial and increasing competition in the building products industry could materially adversely affect our business.

Competition in the building products industry is based largely on price, quality, performance and service. Our fibre cement products compete with products manufactured from natural and engineered wood, vinyl, stucco, masonry, gypsum and other materials as well as fibre cement products offered by other manufacturers. Some of our competitors may have greater product diversity, greater financial and other resources, and better access to raw materials than we do and, among other factors, may be less affected by reductions in margins resulting from price competition.

Increased competition in any of the markets in which we compete would likely cause pricing pressures in those markets. Any of these factors could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We rely on only a few customers to buy our fibre cement products and the loss of any major customer could materially adversely affect our business.

Our two largest customers individually account for over 10% of our net sales. These two customers' accounts receivable represented 22% and 21% of our trade accounts receivable at 31 March 2013 and 2012, respectively. We generally do not have long-term contracts with our large customers. Accordingly, if we were to lose one or more of our large customers because our competitors were able to offer customers more favourable pricing terms or for any other reason, we may not be able to replace customers in a timely manner or on reasonable terms. The loss of one or more of our large customers could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We may experience unforeseen delays and/or cost overruns in our planned capital expenditures in future periods, and such delays and/or cost overruns could result in additional expenses and impairment of the carrying value of our assets in future periods. Such unforeseen delays, cost overruns or asset impairment charges could have a material adverse effect on our business.

We are expanding production capacity in anticipation of the continued improvement of the operating environment and we expect to incur significant capital expenditures in fiscal year 2014 and beyond to meet anticipated demand increases in major markets.

For example, we currently expect to spend approximately US\$150 million in fiscal year 2014 on facility upgrades and expansions, equipment to ensure regulatory compliance and the implementation of new fibre cement technologies.

We may incur unforeseen delays and/or cost overruns due to a variety of factors, including but not limited to an overall decline in general economic conditions, a downturn in the principal markets in which we operate, the entrance of a key competitor leading to a loss in market share or an adverse change in the regulatory environment impacting our business. Any one or combination of these or other factors could have a significant adverse effect on the nature, timing, extent and amount of our planned capital expenditures, and may also result in potential additional expenses and write-down in the carrying value of our capital projects and other existing production assets. Such delays, cost overruns and asset impairment charges could have a material adverse effect on our financial position, results of operations and liquidity.

Regulatory action and continued scrutiny may have an adverse effect on our business.

Our compliance with laws and regulations can be subject to future government review and interpretation. If we fail to comply with applicable laws and regulations, we could be subject to fines, penalties, or other legal liability. Also, should these laws and regulations be amended or expanded, or should new laws and regulations be enacted, we could incur additional compliance costs or restrictions on our ability to manufacture our products and operate our business. Furthermore, our failure to comply with such laws and regulations could result in additional costs, fees or reporting requirements as well as significant regulatory action including fines, penalties and legal defense costs, and could subject us to negative publicity. Such actions could have a material adverse effect on our financial position, results of operations and cash flows.

Our Irish residency could also result in increased negative publicity related to the Company. There continues to be negative publicity regarding, and criticism of, companies that have subsidiaries which conduct substantial business in the US but are domiciled in foreign countries. We cannot assure you that we will not be subject to similar criticism. We previously have been the subject of significant negative publicity in connection with the events that were considered by the Special Commission Inquiry and the ASIC proceedings in Australia, which we believe has in the past contributed to declines in the price of our publicly traded securities.

We believe that any such adverse action or negative publicity could materially adversely affect our financial position, liquidity, results of operations and cash flows, employee morale and the market prices of our publicly traded securities.

Because we have significant operations outside of the United States and report our earnings in US dollars, unfavourable fluctuations in currency values and exchange rates could have a material adverse effect on our business.

Because our reporting currency is the US dollar, our non-US operations face the additional risk of fluctuating currency values and exchange rates. Such operations may also face hard currency shortages and controls on currency exchange. Approximately 30%, 33% and 32% of our net sales in fiscal years 2013, 2012 and 2011, respectively, were derived from sales outside the United States. Consequently, changes in the value of foreign currencies (principally Australian dollars, New Zealand dollars, Philippine pesos, Euros, U.K. pounds and Canadian dollars) could materially affect our business, results of operations and financial condition. We generally attempt to mitigate foreign exchange risk by entering into contracts that require payment in local currency, hedging transactional risk, where appropriate, and having non-US operations borrow in local currencies. Although we may enter into such financial instruments from time to time to manage our foreign exchange risks, we did

not have any material foreign exchange contracts outstanding at 31 March 2013. There can be no assurance that we will be successful in these mitigation strategies, or that fluctuations in foreign currencies and other foreign exchange risks will not have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We may be adversely affected by the current disruptions and volatility in the Eurozone.

The Eurozone has experienced difficult credit and liquidity conditions and market disruptions leading to general fiscal and economic weakening, including in Ireland, the Company's country of domicile. Concerns regarding the Eurozone sovereign debt and banking crisis have resulted in instability and uncertainty in financial markets and adversely impacted market sentiment across Europe. These negative trends have caused considerable turbulence on the global financial and credit markets due to concerns related to the possible downgrading of the sovereign debt and fiscal instability of several Eurozone countries.

The ongoing uncertainty surrounding conditions in the Eurozone, and the impact it has on the world financial markets, may result in reduced access to credit for the Company. In addition, if conditions in the Eurozone deteriorate and the initiatives being implemented to resolve the sovereign debt and banking crisis ultimately fail, there is a risk of departure from the Euro by one or more Eurozone countries, which may lead to volatility in foreign exchange rates as the negative effects of such a departure impact the world financial markets. Also, rescue measures that are or may be implemented to address the Eurozone sovereign debt and banking crisis may result in significant changes to the current tax structure in Eurozone countries, which could have a significant adverse effect on the Company's effective tax rate on earnings.

Any such adverse consequences from the current disruptions and volatility in the Eurozone could have a material adverse effect on our financial position, results of operations and cash flows.

If payouts for product liability claims resulting from allegations of product defects exceed our insurance coverage, these payouts could result in a material adverse effect on our business.

The actual or alleged existence of defects in any of our products could subject us to significant product liability or recall claims, including potential putative class action claims. Although we do not have insurance coverage for damage to, or defects in, our products, we do have product liability insurance coverage for bodily injury or property damage which may arise from the use of our products. Although we believe this coverage is adequate and we intend to maintain this coverage in the future, we cannot assure you that this coverage will be sufficient to cover all future product liability claims or that this coverage will be available at reasonable rates in the future. In some jurisdictions, we are subject to joint and several liability. The successful assertion of one or more claims against us, or a co-defendant, that exceed our insurance coverage could require us to incur significant expenses to pay these damages. These additional expenses could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Losses and expenses relating to the New Zealand product liability claims could have a material adverse effect on our business.

Since fiscal year 2002, our New Zealand subsidiaries have been and continue to be joined in a number of product liability claims in New Zealand that relate to residential buildings (single dwellings and apartment complexes) and a small number of non-residential buildings, primarily constructed from 1998 to 2004. The product liability claims often involve multiple parties and allege that losses were incurred due to excessive moisture penetration of the buildings' structures. The claims typically include allegations of poor building design, inadequate certification of plans, inadequate construction review and compliance certification and deficient work by sub-contractors.

We recognise a liability for both asserted and unasserted New Zealand product liability claims in the period in which the loss becomes probable and estimable. The amount of reasonably possible loss is dependent on a number of factors including, without limitation, the specific facts and circumstances unique to each claim brought against our New Zealand subsidiaries, the existence of any co-defendants involved in defending the claim, the solvency of such co-defendants (including the ability of such co-defendants to remain solvent until the related claim is ultimately resolved), the availability of claimant compensation under a Government compensation scheme, the amount of loss estimated to be allocable to our New Zealand subsidiaries in instances that involve co-defendants in defending the claim and the extent to which our New Zealand subsidiaries have access to third-party recoveries to cover a portion of the costs incurred in defending and resolving such actions. In addition to the above limitations, the total loss incurred is also dependent on the manner and extent to which the statute of limitations will apply in future periods.

The amount of provision for asserted and unasserted product liability claims in New Zealand, net of estimated third-party recoveries, is US\$15.2 million at 31 March 2013. During the year ended 31 March 2013 the Company recognised US\$13.2 million in expenses related to the legacy New Zealand product liability claims. Due to the inherent uncertainties associated with estimating the amount of loss incurred for asserted and unasserted claims, as discussed above, and based on information presently available, we believe it is possible that the ultimate resolution of these legacy claims could result in an additional loss of up to approximately US\$10 million in excess of the amount accrued, net of estimated third-party recoveries, at 31 March 2013. The provision and estimated additional loss incorporates assumptions that are subject to the foregoing uncertainties and are principally derived from, but not exclusively based on, historical claims experience. If the nature and extent of claims in future periods differ from historical claims experience, then the actual amount of losses incurred may be materially higher or lower than the Company's estimates. Accordingly, losses incurred in connection with defending and resolving asserted and unasserted New Zealand product liability claims in the future could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

The amount of provision, net of estimated third-party recoveries, and additional loss noted above is exclusive of a representative action initiated by the New Zealand Ministry of Education. For the risks and uncertainties associated with this matter, including the risk of material losses and expenses, see the separate New Zealand Ministry of Education risk factor, below.

Losses and expenses relating to the New Zealand Ministry of Education claim could have a material adverse effect on our business.

On 16 April 2013, the New Zealand Ministry of Education and other related plaintiffs initiated a 'representative action' in the New Zealand High Court against several building materials manufacturers, including two of the Company's New Zealand subsidiaries, in relation to several thousand New Zealand school buildings. The New Zealand Ministry of Education and other plaintiffs are alleging that the cladding systems used on school buildings were defective and prone to failure, and are asserting negligent conduct, negligent misstatement and breach of the New Zealand Consumer Guarantees Act 1993 and Fair Trading Act 1986. The claim seeks an unspecified and unquantified amount of damages in relation to alleged repair costs.

Two property surveying businesses were commissioned by the Ministry of Education to conduct visual inspections of school buildings to assess the potential exposure to damage arising from moisture ingress. The results of these surveys indicated the Ministry of Education's national exposure to weathertightness risk to be approximately NZ\$1.5 billion. Historically, our New Zealand subsidiaries have been joined to these New Zealand product liability claims as one of several co-defendants, including local government entities responsible for enforcing building codes and practices, resulting in our New Zealand subsidiaries becoming liable for only a portion of each claim. In addition, our

New Zealand subsidiaries have had access to third-party recoveries to defray a significant portion of the costs incurred in resolving such claims.

The amount of loss that the New Zealand subsidiaries may be liable to pay, if any, is dependent on a wide range of factors, which include, without limitation, the legal and technical merits of the claim, the amount of damages asserted by the New Zealand Ministry of Education and the other plaintiffs, the proportion of the claim specifically allocable to the Company's New Zealand subsidiaries and the extent to which statutory limitation periods (to which the claim is highly sensitive) will apply. The Company and its New Zealand subsidiaries are continuing to assess the merits of the claim and intend to vigorously defend against the allegations made. The Company is not yet able to determine the amount of any loss or range of loss, if any, the New Zealand subsidiaries may become liable for in future periods. Losses and expenses arising from defending and resolving this claim may have a material adverse effect on the Company's financial position, results of operations and cash flows in future periods.

Warranty claims relating to our products and exceeding our warranty reserves could have a material adverse effect on our business.

We have offered, and continue to offer, various warranties on our products, including a prorated 50-year limited warranty offering until 2009 and a non-prorated 30-year limited warranty offering thereafter and to present for certain of our fibre cement siding products in the United States. In total, as of 31 March 2013, we have accrued US\$27.1 million for such warranties within "Accrued product warranties" on our consolidated balance sheets and have disclosed the movements in our consolidated warranty reserves within Note 10 to our consolidated financial statements in Section 2. Although we maintain reserves for warranty-related claims and legal proceedings that we believe are adequate, we cannot assure you that warranty expense levels or the results of any warranty-related legal proceedings will not exceed our reserves. If our warranty reserves are significantly exceeded, the costs associated with such warranties could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We may incur significant costs, including capital expenditures, in complying with applicable environmental and health and safety laws and regulations.

In each jurisdiction in which we operate, we are subject to environmental, health and safety laws and regulations governing our operations, including, among other matters (i) the air, soil, and water quality of our plants and (ii) the use, handling, storage, disposal and remediation of hazardous substances currently or formerly used by us or any of our affiliates. Under these laws and regulations, we may be held jointly and severally responsible for the remediation of any hazardous substance contamination at our or our predecessors' past or present facilities and at third-party waste disposal sites. We may also be held liable for any claims, penalties or fines arising out of human exposure to hazardous substances or other environmental damage, including damage to natural resources, and our failure to comply with air, water, waste, and other environmental regulations.

In addition, many of our products contain crystalline silica, which can be released in a respirable form in connection with manufacturing, and product installation, demolition, and handling or use. The inhalation of respirable crystalline silica, identified as a carcinogen by the State of California and other governmental entities, at high and prolonged exposure levels is known to be associated with silicosis and has been the subject of extensive tort litigation. If current standards are heightened, we may also face future costs related to engineering and compliance to meet these new standards or regulations relating to crystalline silica. Additionally, there is a risk that claims for silica-related health effects could be made against us resulting in litigation. Although we carry what we believe to be appropriate workers compensation and third-party liability insurance limits, we cannot assure you that we will have

adequate limits or resources to satisfy any future silica-related health effect claims. Nor can we assure you that this coverage will continue to be available at reasonable rates in the future. In addition, our sales could decrease if silica-related claims are made against us, or regulations impact the use of our products, and as a result, potential users may decide not to use our products. Such outcomes may have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

The costs of complying with environmental and health and safety laws relating to our operations or the liabilities arising from past or future releases of, or exposure to, hazardous substances, greenhouse gases, or product liability matters, or our failure to comply with air, water, waste, and other than existing environmental regulations may result in us making future expenditures that could have a material adverse effect on our financial position, liquidity, results of operations and cash flows. Such regulations and laws may increase the cost to procure energy or other products necessary to our operation, thereby increasing our operating costs. In addition, we cannot make any assurances that the laws currently in place that directly or indirectly relate to environmental liability will not change. If, for example, applicable laws or judicial interpretations related to successor liability or “piercing the corporate veil” were to change, such changes could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We may experience adverse fluctuations in the supply and cost of raw materials and energy supply necessary to our business which could have a material adverse effect on our business.

Cellulose fibre (wood-based pulp), silica, cement and water are the principal raw materials used in the production of fibre cement, and the availability and cost of such raw materials are critical to our operations. Our fibre cement business periodically experiences fluctuations in the supply and costs of raw materials, and some of our supply markets are concentrated. In fiscal year 2013, the average NBSK pulp price relative to our US business was US\$878 per ton, a decrease of 8% compared to fiscal year 2012. In April 2013, the average NBSK pulp price relative to our US business increased to US\$930 per ton.

Freight costs in the US were also lower in fiscal year 2013 compared to the prior year. Freight costs are expected to decrease slightly in fiscal year 2014 as compared to fiscal year 2013.

Price fluctuations or material delays may occur in the future due to lack of raw materials, suppliers, or supply chain disruptions. The loss or deterioration of our relationship with a major supplier, an increase in demand by third parties for a particular supplier’s products or materials, delays in obtaining materials, or significant increases in fuel and energy costs could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Demand for our products is subject to changes in consumer preference.

The continued development of builder and consumer preference for our fibre cement products over competitive products is critical to sustaining and expanding demand for our products. Therefore, a failure to maintain and increase builder and consumer acceptance of our fibre cement products could have a material adverse effect on our growth strategy, as well as our financial position, liquidity, results of operations and cash flows.

Our ability to sell our products into certain markets is influenced by building codes and ordinances in effect in the related localities and states and may limit our ability to compete effectively in certain markets and our ability to increase or maintain our current market share for our products.

Most states and localities in the markets in which we sell our products maintain building codes and ordinances that determine the requisite qualities of materials that may be used to construct homes and

buildings for which our products are intended. Our products may not qualify under building codes and ordinances in certain markets, prohibiting our customers from using our products in those markets. This may limit our ability to sell our products into certain markets. In addition, ordinances and codes may change over time which may, from the time they are implemented, prospectively limit or prevent the use of our products in those markets, causing us to lose market share for our products. Although we keep up-to-date on the current and proposed building codes and ordinances of the markets in which we sell or plan to sell our products and, when appropriate, seek to become involved in the ordinance and code setting process, our efforts may be ineffective, which would have a material adverse effect on our financial condition, liquidity, results of operations and cash flows.

Our financial performance could be impacted by a customer's inability to pay amounts owed.

Our financial performance is dependent on our customers within the building products industry. Our customers' businesses have been impacted by the current economic environment, disruptions to the capital and credit markets and decreased demand for their products and services. If any of our largest customers or a substantial number of smaller customers are adversely affected by these conditions, if we become aware of information related to the credit worthiness of a major customer, or if future actual default rates on receivables in general differ from those currently anticipated, we may have to adjust the reserves for uncollectible receivables, which could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Our reliance on third-party distribution channels could impact our business.

We offer our products directly and through a variety of third-party distributors and dealers. Changes in the financial or business condition of these distributors and dealers could subject the Company to losses and affect its ability to bring our products to market and could have a material adverse effect on our business, financial position, liquidity, results of operations and cash flows. Further, our ability to effectively manage inventory levels at distributor locations may be impaired under such arrangements, which could increase expenses associated with excess and obsolete inventory and negatively impact cash flows.

Changes in, or failure to comply with, the laws, regulations, policies or conditions of any jurisdiction in which we conduct our business could result in, among other consequences, the loss of our assets in such jurisdiction, the elimination of certain rights that are critical to the operation of our business in such jurisdiction, a decrease in revenues or the imposition of additional taxes or other costs.

Because we own assets, manufacture and sell our products internationally, our activities are subject to political, economic, legal and other uncertainties, including:

- changing political and economic conditions;
- changing laws and policies;
- the general hazards associated with the assertion of sovereign rights over certain areas in which we conduct our business; and
- laws limiting or conditioning the right and ability of subsidiaries and joint ventures to pay dividends or remit earnings to affiliated companies.

Although we seek to take applicable laws, regulations and conditions into account in structuring our business on a global basis, changes in, or our failure to comply with, the laws, regulations, policies or

conditions of any jurisdiction in which we conduct our business could result in, among other consequences, the loss of our assets in such jurisdiction, the elimination of certain rights that are critical to the operation of our business in such jurisdiction, a decrease in revenues or the imposition of additional taxes. Therefore, any change in laws, regulations, policies or conditions of a jurisdiction could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Because our intellectual property and other proprietary information may become publicly available, we are subject to the risk that competitors could copy our products or processes.

Our success depends, in part, on the proprietary nature of our technology, including non-patentable intellectual property such as our process technology. To the extent that a competitor is able to reproduce or otherwise capitalise on our technology, it may be difficult, expensive or impossible for us to obtain adequate legal or equitable relief. Also, the laws of some foreign countries may not protect our intellectual property to the same extent as do the laws of the United States. In addition to patent protection of intellectual property rights, we consider elements of our product designs and processes to be proprietary and confidential and/or trade secrets. To safeguard our confidential information, we rely on employee, consultant and vendor non-disclosure agreements and contractual provisions and a system of internal and technical safeguards to protect our proprietary information. However, any of our registered or unregistered intellectual property rights may be subject to challenge or possibly exploited by others in the industry, which could materially adversely affect our financial position, liquidity, results of operations, cash flows and competitive position.

Severe weather, natural disasters and climate change could have an adverse effect on our overall business.

Our plants and other facilities are located in places that could be affected by natural disasters, such as hurricanes, typhoons, cyclones, earthquakes, floods, tornados and other natural disasters. Natural disasters and widespread adverse climate changes that directly impact our plants or other facilities could materially adversely affect our manufacturing or other operations and, thereby, harm our overall financial position, liquidity, results of operations and cash flows.

In the manufacture of our products, we rely on a continuous and uninterrupted supply of electric power, water and, in some cases, natural gas, as well as the availability of water, waste and emissions discharge facilities. Any future shortages or discharge curtailments, of a material nature, could significantly disrupt our operations and increase our expenses. We currently do not have backup generators on our sites with the capability of maintaining all of a site's full operational power needs and we do not have alternate sources of power in the event of a sustained blackout. While our insurance includes coverage for certain "business interruption" losses (i.e., lost profits) and for certain "service interruption" losses, such as an accident at our supplier's facility, any losses in excess of the insurance policy's coverage limits or any losses not covered by the terms of the insurance policy could have a material adverse effect on our financial condition. If blackouts interrupt our power supply, we would be temporarily unable to continue operations at the affected facilities. Any future material and sustained interruptions in our ability to continue operations at our facilities could damage our reputation, harm our ability to retain existing customers or obtain new customers and could result in lost revenue, any of which could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

In the future, we may be unable to renew our credit facilities on their current terms or terms that are customary for other companies in our industry or which have similar credit ratings, or be able to obtain any alternative or additional financing arrangements.

In the future, we may not be able to renew credit facilities on substantially similar terms, or at all; we may have to pay additional fees and expenses that we might not have to pay under current circumstances; and we may have to agree to terms that could increase the cost of our debt facilities. If we are unable to renew our credit facilities on terms which are not materially less favourable than the terms currently available to us or obtain alternative or additional financing arrangements, we may experience liquidity issues and will have to reduce our levels of planned capital expenditures, suspend dividend payments and/or share buy-back programs or take other measures to conserve cash in order to meet our future cash flow requirements.

Ineffective internal controls over financial reporting could impact our business and operating results.

The SEC, as directed by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring companies to include in their Annual Report on Form 20-F a report of management on the Company's internal controls over financial reporting that contains an assessment by management of the effectiveness of the Company's internal controls over financial reporting. In addition, the Company's independent registered public accounting firm must report on the Company's internal control over financial reporting. Our management concluded that our internal controls over financial reporting are effective. Moreover, our independent registered public accounting firm was satisfied with our internal controls, the level at which our controls are documented, designed, operated and reviewed. Nonetheless, during the course of future evaluation, documentation and attestation, we may identify deficiencies that we may not be able to remedy in a timely manner. Furthermore, our internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. If we fail to achieve and maintain the adequacy of our internal controls, we may not be able to conclude that we have effective internal controls, on an ongoing basis, over financial reporting in accordance with the Sarbanes-Oxley Act. Furthermore, effective internal controls over financial reporting are necessary for us to produce reliable financial reports and are important to help prevent fraud. As a result, our failure to achieve and maintain effective internal controls over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm our business and negatively impact the trading price of our ADSs. Furthermore, even effective internal controls can only provide reasonable assurance with respect to the preparation and fair presentation of financial statements. In addition, we have incurred considerable costs and used significant management time and other resources in our effort to comply with Section 404 and other requirements of the Sarbanes-Oxley Act.

Our use of accounting estimates involves judgment and could impact our financial results.

The preparation of financial statements requires management to make judgments, estimates, and assumptions that affect the reported amounts of assets, liabilities, income, and expenses. Due to the inherent uncertainty in making estimates, actual results reported in future periods may be based upon amounts which differ from those estimates. Estimates, judgments, and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The accounting policies deemed critical to the Company's results, based upon materiality and significant judgments and estimates, are described in Note 2 to our consolidated financial statements in Section 2. In addition, as discussed in Note 10, "Product Warranties" and Note 13, "Contingencies and Commitments" to our consolidated financial statements in Section 2, we make certain estimates including decisions related to legal

proceedings and warranty reserves. If the judgment, estimates, and assumptions used by the Company in preparing its financial statements are subsequently found to be incorrect, there could be a material impact on the Company's results of operations.

We may acquire or divest businesses from time to time, and this may materially adversely affect our results of operations and financial condition and may significantly change the nature of the company in which you have invested.

In the past, we have divested business segments. In the future, we may acquire other businesses or sell some or all of our assets or business segments. Any significant acquisition or sale may materially adversely affect our results of operations and financial condition and could change the overall profile of our business. As a result, the value of our shares may decrease in response to any such acquisition or sale and, upon any such acquisition or sale, our shares may represent an investment in a company with significantly different assets and prospects from the Company when you made your initial investment in us.

We are dependent upon our key management personnel for our future success.

Our success is greatly influenced by our ability to attract and retain qualified executives with experience in our market and industry. Our ability to retain executive officers and key management personnel is important to the implementation of our strategy. We could potentially lose the services of any of our senior management personnel due to a variety of factors that could include, without limitation, death, incapacity, personal issues, retirement, resignation, or competing employers. We may fail to attract and retain qualified key management personnel required to continue to operate our business successfully. The unexpected loss of senior management, coupled with our failure to recruit qualified successors, could have a material adverse effect on our business and the trading price of our common stock.

Our systems may be subject to security breaches and other cyber security incidents.

We may face attempts by others to penetrate our computer systems and networks to misappropriate our proprietary information and technology or interrupt our business. The reliability and security of our information technology infrastructure and software, and our ability to expand and continually update technologies in response to our changing needs is critical to our business. To the extent that any disruptions or security breaches result in a loss or damage to our data, or in inappropriate disclosure of proprietary information, it could cause significant damage to our reputation and affect our relationships with our customers and ultimately harm our business.

COMMITMENT TO PROVIDE FUNDING ON A LONG-TERM BASIS IN RESPECT OF ASBESTOS-RELATED LIABILITIES OF FORMER SUBSIDIARIES

The AFFA to provide long-term funding to AICF was approved by shareholders in February 2007. The accounting policies utilised by us to account for the AFFA are described in Note 2 to our consolidated financial statements in Section 2.

Asbestos Adjustments

The asbestos adjustments included in the consolidated statements of operations and comprehensive income (loss) comprise the following:

(Millions of US dollars)	Fiscal Years Ended 31 March		
	2013	2012	2011
Change in estimates:			
Change in actuarial estimate - asbestos liability	\$ (163.0)	\$ (67.8)	\$ 9.8
Change in actuarial estimate - insurance receivable	27.9	49.8	(0.5)
Change in estimate - AICF claims handling costs	5.9	8.4	12.2
Subtotal - Change in estimates	(129.2)	(9.6)	21.5
Write - back of insurance receivable	11.9	-	-
Gain (loss) on foreign currency exchange	0.2	(6.2)	(107.3)
Total Asbestos Adjustments	\$ (117.1)	\$ (15.8)	\$ (85.8)

Asbestos-Related Assets and Liabilities

Under the terms of the AFFA, we have included on our consolidated balance sheets certain asbestos-related assets and liabilities. These amounts are detailed in the table below, and the net total of these asbestos-related assets and liabilities is commonly referred to by us as the "Net AFFA Liability."

(Millions of US dollars)	31 March	
	2013	2012
Asbestos liability - current	\$ (135.0)	\$ (125.3)
Asbestos liability - non-current	(1,558.7)	(1,537.3)
Asbestos liability - Total	(1,693.7)	(1,662.6)
Insurance receivable - current	22.2	19.9
Insurance receivable - non-current	209.4	208.6
Insurance receivable - Total	231.6	228.5
Workers' compensation asset - current	0.9	0.5
Workers' compensation asset - non-current	60.7	83.4
Workers' compensation liability - current	(0.9)	(0.5)
Workers' compensation liability - non-current	(60.7)	(83.4)
Workers' compensation - Total	-	-
Loan facility	-	(30.9)
Other net liabilities	(1.6)	(2.3)
Restricted cash and cash equivalents and restricted short-term investment assets of AICF	133.5	65.0
Net AFFA liability	(1,330.2)	(1,402.3)
Deferred income taxes - current	18.6	23.0
Deferred income taxes - non-current	434.1	421.5
Deferred income taxes - Total	452.7	444.5
Income tax payable	25.9	18.5
Net Unfunded AFFA liability, net of tax	\$ (851.6)	\$ (939.3)

[Table of Contents](#)

On 2 April 2012, in accordance with arrangements agreed with the NSW Government and AICF, the Company contributed US\$138.7 million (A\$132.3 million) to AICF. A further contribution of US\$45.4 million (A\$45.2 million) was contributed on 2 July 2012, in accordance with the terms of the AFFA. Total contributions for the year ended 31 March 2013 were US\$184.1 million (A\$177.5 million).

Restricted cash and cash equivalents at 31 March 2012 reflected the early contribution to AICF of US\$138.7 million (A\$132.3 million). The determination of any contribution to AICF in respect of the year ended 31 March 2013 will reverse the effect of the increase in the Company's free cash flow resulting from the movement in restricted cash and cash equivalents to 31 March 2013 related to the early contribution. The Company's adjusted free cash flow for these purposes is net cash used by operating activities for the year ended 31 March 2013 of US\$29.4 million (A\$28.2 million). In accordance with the terms of the AFFA, and the arrangements agreed with the NSW Government and AICF for an early contribution based on the Company's free cash flow for the year ended 31 March 2012, the Company does not anticipate making a contribution to AICF in respect of the year ended 31 March 2013.

Asbestos Liability

The amount of the asbestos liability reflects the terms of the AFFA, which has been calculated by reference to (but is not exclusively based upon) the most recent actuarial estimate of the projected future asbestos-related cash flows prepared by KPMG Actuarial. The asbestos liability also includes an allowance for the future claims-handling costs of AICF. The Company receives an updated actuarial estimate as of 31 March each year. The most recent actuarial assessment was performed as of 31 March 2013.

The changes in the asbestos liability for the year ended 31 March 2013 are detailed in the table below:

	A\$ Millions	A\$ to US\$ rate	US\$ Millions
Asbestos liability - 31 March 2012	A\$ (1,598.4)	0.9614	\$ (1,662.6)
Asbestos claims paid ¹	121.3	0.9694	125.1
AICF claims-handling costs incurred ¹	2.4	0.9694	2.5
Change in actuarial estimate ²	(156.4)	0.9597	(163.0)
Change in estimate of AICF claims-handling costs ²	5.7	0.9597	5.9
Loss on foreign currency exchange			(1.6)
Asbestos liability - 31 March 2013	A\$ (1,625.4)	0.9597	\$ (1,693.7)

¹ The average exchange rate for the period is used to convert the Australian dollar amount to US dollars based on the assumption that these transactions occurred evenly throughout the period.

² The spot exchange rate at 31 March 2013 is used to convert the Australian dollar amount to US dollars as the adjustment to the estimate was made on that date.

[Table of Contents](#)

[Insurance Receivable – Asbestos](#)

The changes in the insurance receivable for the year ended 31 March 2013 are detailed in the table below:

	A\$ Millions	A\$ to US\$ rate	US\$ Millions
Insurance receivable – 31 March 2012	A\$ 219.7	0.9614	\$ 228.5
Insurance recoveries ¹	(35.7)	0.9694	(36.8)
Write-back of insurance receivable ³	11.5	0.9717	11.9
Change in actuarial estimate ²	26.8	0.9597	27.9
Gain on foreign currency exchange			0.1
Insurance receivable – 31 March 2013	A\$ 222.3	0.9597	\$ 231.6

¹ The average exchange rate for the period is used to convert the Australian dollar amount to US dollars based on the assumption that these transactions occurred evenly throughout the period.

² The spot exchange rate at 31 March 2013 is used to convert the Australian dollar amount to US dollars as the adjustment to the estimate was made on that date.

³ The weighted average spot exchange rates on the dates the transactions occurred are used to convert the Australian dollar amounts to US dollars as the adjustments were made on those dates.

Included in insurance receivable is US\$6.0 million recorded on a discounted basis because the timing of the recoveries has been agreed with the insurer.

[Deferred Income Taxes – Asbestos](#)

The changes in the deferred income taxes–asbestos for the year ended 31 March 2013 are detailed in the table below:

	A\$ Millions	A\$ to US\$ rate	US\$ Millions
Deferred tax assets – 31 March 2012	A\$ 427.3	0.9614	\$ 444.5
Amounts offset against income tax payable ¹	(24.8)	0.9694	(25.6)
AICF earnings ¹	31.9	0.9694	32.9
Gain on foreign currency exchange			0.9
Deferred tax assets – 31 March 2013	A\$ 434.4	0.9597	\$ 452.7

¹ The average exchange rate for the period is used to convert the Australian dollar amount to US dollars based on the assumption that these transactions occurred evenly throughout the period.

[Income Taxes Payable](#)

A portion of the deferred income tax asset is applied against the Company's income tax payable. At 31 March 2013 and 2012, this amount was US\$25.6 million and US\$23.1 million, respectively. During the year ended 31 March 2013, there was a US\$0.7 million unfavourable effect of foreign currency exchange.

Table of Contents

Other Net Assets (Liabilities)

Other net assets (liabilities) include a provision for asbestos-related education and medical research contributions of US\$1.9 million and US\$2.3 million at 31 March 2013 and 2012, respectively.

Also included in other net assets (liabilities) are the other assets and liabilities of AICF including trade receivables, prepayments, fixed assets, trade payables and accruals. These other assets and liabilities of AICF were a net asset of US\$0.3 million and nil at 31 March 2013 and 2012, respectively. During the year ended 31 March 2013, there was nil effect of foreign currency exchange on these other assets and liabilities.

Restricted Cash and Short-term Investments of AICF

Cash and cash equivalents and short-term investments of AICF are reflected as restricted assets as these assets are restricted for use in the settlement of asbestos claims and payment of the operating costs of AICF.

In June 2012, AICF invested US\$106.5 million (A\$105.0 million) of its excess cash in time deposits at a fixed interest rate of 5.1% and a six month maturity. In December 2012, these time deposits matured and are reflected as *Restricted cash and cash equivalents - Asbestos* on the consolidated balance sheet as of 31 March 2013.

At 31 March 2013, the Company revalued AICF's short-term investments available-for-sale resulting in a positive mark-to-market fair value adjustment of US\$0.9 million. This appreciation in the fair value of investments is recorded in *Other Comprehensive Income*.

The changes in restricted cash and short-term investments of AICF for the year ended 31 March 2013 are set forth in the table below:

	A\$ Millions	A\$ to US\$ rate	US\$ Millions
Restricted cash and cash equivalents and restricted short-term investments - 31 March 2012	A\$ 62.5	0.9614	\$ 65.0
Asbestos claims paid ¹	(121.3)	0.9694	(125.1)
Payments received in accordance with AFFA ²	177.5	0.9641	184.1
AICF operating costs paid - claims handling ¹	(2.4)	0.9694	(2.5)
AICF operating costs paid - non-claims handling ¹	(1.6)	0.9694	(1.7)
Insurance recoveries ¹	35.7	0.9694	36.8
Interest and investment income ¹	6.8	0.9694	7.0
Unrealised gain on investments ¹	0.9	0.9694	0.9
NSW loan repayment ²	(29.7)	0.9901	(30.0)
Other ¹	(0.3)	0.9694	(0.3)
Loss on foreign currency exchange			(0.7)
Restricted cash and cash equivalents and restricted short-term investments - 31 March 2013	A\$128.1	0.9597	\$ 133.5

¹ The average exchange rate for the period is used to convert the Australian dollar amount to US dollars based on the assumption that these transactions occurred evenly throughout the period.

² The spot exchange rate on the date the transaction occurred is used to convert the Australian dollar amount to US dollars.

Actuarial Study; Claims Estimate

AICF commissioned an updated actuarial study of potential asbestos-related liabilities as of 31 March 2013. Based on KPMG Actuarial's assumptions, KPMG Actuarial arrived at a range of possible total cash flows and proposed a central estimate which is intended to reflect an expected outcome. The Company views the central estimate as the basis for recording the asbestos liability in the Company's financial statements, which under US GAAP, it considers the best estimate. Based on the results of these studies, it is estimated that the discounted (but inflated) value of the central estimate for claims against the Former James Hardie Companies was approximately A\$1.7 billion (US\$1.8 billion). The undiscounted (but inflated) value of the central estimate of the asbestos-related liabilities of Amaca and Amaba as determined by KPMG Actuarial was approximately A\$2.5 billion (US\$2.6 billion). Actual liabilities of those companies for such claims could vary, perhaps materially, from the central estimate described above. The asbestos liability includes projected future cash flows as undiscounted and uninflated on the basis that it is inappropriate to discount or inflate future cash flows when the timing and amounts of such cash flows is not fixed or readily determinable.

The asbestos liability has been revised to reflect the most recent actuarial estimate prepared by KPMG Actuarial as of 31 March 2013 and to adjust for payments made to claimants during the year then ended.

In estimating the potential financial exposure, KPMG Actuarial made assumptions related to the total number of claims which were reasonably estimated to be asserted through 2074, the typical cost of settlement (which is sensitive to, among other factors, the industry in which a plaintiff claims exposure, the alleged disease type and the jurisdiction in which the action is brought), the legal costs incurred in the litigation of such claims, the rate of receipt of claims, the settlement strategy in dealing with outstanding claims and the timing of settlements.

Due to inherent uncertainties in the legal and medical environment, the number and timing of future claim notifications and settlements, the recoverability of claims against insurance contracts, and estimates of future trends in average claim awards, as well as the extent to which the above named entities will contribute to the overall settlements, the actual amount of liability could differ materially from that which is currently projected.

The potential range of costs as estimated by KPMG Actuarial is affected by a number of variables such as nil settlement rates (where no settlement is payable by the Former James Hardie Companies because the claim settlement is borne by other asbestos defendants (other than the former James Hardie subsidiaries) which are held liable, peak year of claims, past history of claims numbers, average settlement rates, past history of Australian asbestos-related medical injuries, current number of claims, average defence and plaintiff legal costs, base wage inflation and superimposed inflation. The potential range of losses disclosed includes both asserted and unasserted claims. While no assurances can be provided, the Company believes that it is likely to be able to partially recover losses from various insurance carriers. As of 31 March 2013, KPMG Actuarial's undiscounted (but inflated) central estimate of asbestos-related liabilities was A\$2.5 billion (US\$2.6 billion). This undiscounted (but inflated) central estimate is net of expected insurance recoveries of A\$342.9 million (US\$357.3 million) after making a general credit risk allowance for insurance carriers for A\$27.4 million (US\$28.6 million) and an allowance for A\$52.7 million (US\$54.9 million) of "by claim" or subrogation recoveries from other third parties. The Company has not netted the insurance receivable against the asbestos liability on its consolidated balance sheets.

A sensitivity analysis has been performed to determine how the actuarial estimates would change if certain assumptions (i.e., the rate of inflation and superimposed inflation, the average costs of claims and legal fees, and the projected numbers of claims) were different from the assumptions used to

Table of Contents

determine the central estimates. This analysis shows that the discounted (but inflated) central estimates could be in a range of A\$1.1 billion (US\$1.1 billion) to A\$2.6 billion (US\$2.7 billion). The undiscounted (but inflated) estimates could be in a range of A\$1.6 billion (US\$1.7 billion) to A\$4.2 billion (US\$4.4 billion) as of 31 March 2013. The actual cost of the liabilities could be outside of that range depending on the results of actual experience relative to the assumptions made.

During the 2013 financial year, mesothelioma claims reporting activity has been above actuarial expectations for the first time since the 2009 financial year. One of the critical assumptions is the estimated peak year of mesothelioma disease claims, which was targeted for 2010/2011. Potential variation in this estimate has an impact much greater than the other assumptions used to derive the discounted central estimate. For example, if the peak year occurs five years later, in 2015/2016, the discounted central estimate could increase by approximately 45%.

Claims Data

AICF provides compensation payments for Australian asbestos-related personal injury claims against the Former James Hardie Companies. The claims data in this section are reflective of these Australian asbestos-related personal injury claims against the Former James Hardie Companies.

The following table shows the activity related to the numbers of open claims, new claims and closed claims during each of the past five years and the average settlement per settled claim and case closed:

	Years Ended 31 March				
	2013	2012	2011	2010	2009
Number of open claims at beginning of period	592	564	529	534	523
Number of new claims	542	456	494	535	607
Number of closed claims ¹	672	428	459	540	596
Number of open claims at end of period	462	592	564	529	534
Average settlement amount per settled claim	A\$231,313	A\$218,610	A\$204,366	A\$190,627	A\$190,638
Average settlement amount per settled claim	US\$238,615	US\$228,361	US\$193,090	US\$162,250	US\$151,300
Average settlement amount per case closed	A\$200,561	A\$198,179	A\$173,199	A\$171,917	A\$168,248
Average settlement amount per case closed	US\$206,892	US\$207,019	US\$163,642	US\$146,325	US\$133,530

¹ Included in the number of closed claims of 672 for the year ended 31 March 2013 are 153 claims primarily settled at nil settlement amounts that had been closed in prior years but not reflected as such in the year in which they were closed. Accordingly these 153 claims have been included in claims activity during the year ended 31 March 2013 to appropriately reflect the actual number of open claims at 31 March 2013. These 153 additional claims that were closed in prior years have been excluded for the purposes of determining the average settlement amount in both US and Australian dollars, as reflected in the table above, for the year ended 31 March 2013. As these 153 claims were closed in prior years, the actual number of closed claims during the year ended 31 March 2013 was 519 claims.

Under the terms of the AFFA, the Company has rights of access to actuarial information produced for AICF by the Approved Actuary. The Company's disclosures with respect to claims statistics are subject to it obtaining such information from the Approved Actuary. The AFFA does not provide the Company an express right to audit or otherwise require independent verification of such information or the methodologies to be adopted by the Approved Actuary. As such, the Company relies on the accuracy and completeness of the information and analysis of the Approved Actuary when making disclosures with respect to claims statistics.

AICF – NSW Government Secured Loan Facility

On 9 December 2010, the Obligors entered into the Facility with The State of New South Wales, Australia whereby AICF may borrow, subject to certain conditions, up to an aggregate amount of A\$320.0 million (US\$333.4 million, based on the exchange rate at 31 March 2013).

The amount available to be drawn depends on the value of the insurance policies benefiting the Obligors and may be adjusted upward or downward, subject to a ceiling of A\$320.0 million. At 31 March 2013, the discounted value of insurance policies was A\$216.3 million (US\$225.4 million, based on the exchange rate at 31 March 2013).

In accordance with the terms of the Facility, drawings under the Facility may only be used by AICF to fund the payment of asbestos claims and certain operating and legal costs of the Obligors. The amount available to be drawn is subject to periodic review by NSW. The Facility is available to be drawn up to the tenth anniversary of signing and must be repaid on or by 1 November 2030.

Interest accrues daily on amounts outstanding. Interest is calculated based on a 365-day year and is payable monthly. AICF may, at its discretion, elect to capitalise interest payable on amounts outstanding under the Facility on the date interest becomes due and payable. In addition, if AICF does not pay interest on a due date, it is taken to have elected to capitalise the interest.

NSW will borrow up to 50% of the amount made available under the Facility from the Commonwealth.

To the extent that NSW's source of funding the Facility is from the Commonwealth, the interest rate on the Facility is calculated by reference to the cost of NSW's borrowings from the Commonwealth for that purpose, being calculated with reference to the Commonwealth Treasury fixed coupon bond rate for a period determined as appropriate by the Commonwealth.

In summary, to the extent that NSW's source of funding is not from the Commonwealth, the interest rate on drawings under the Facility is calculated as (i) during the period to (but excluding) 1 May 2020, a yield percent per annum calculated at the time of the first drawdown of the Facility by reference to the NSW Treasury Corporation's 6% 1/05/2020 Benchmark Bonds, (ii) during the period after 1 May 2020, a yield percent per annum calculated by reference to NSW Treasury Corporation bonds on issue at that time and maturing in 2030, or (iii) in any case, if the relevant bonds are not on issue, a yield percent per annum in respect of such other source of funding for the Facility determined by the NSW Government in good faith to be used to replace those bonds, including any guarantee fee payable to the Commonwealth in respect of the bonds (where the bonds are guaranteed by the Commonwealth) or other source of funding.

Under the Facility, Amaca, Amaba and ABN 60 each guarantee the payment of amounts owed by AICF and AICF's performance of its obligations under the Facility. Each Obligor has granted a security interest in certain property including cash accounts, proceeds from insurance claims, payments remitted by the Company to AICF and contractual rights under certain documents including the AFFA. Each Obligor may not deal with the secured property until all amounts outstanding under the Facility are paid, except as permitted under the terms of the security interest.

Under the terms of the Facility, each Obligor must, upon receipt of proceeds from insurance claims and payments remitted by the Company under the AFFA, apply all of such proceeds in repayment of amounts owing under the Facility. NSW may, at its sole discretion, waive or postpone (in such manner and for such period as it determines) the requirement for the Obligors to apply proceeds of insurance claims and payments remitted by the Company to repay amounts owed under the Facility to ensure AICF has sufficient liquidity to meet its future cash flow needs.

The Obligors are subject to certain operating covenants under the Facility and the terms of the security interest, including, without limitation, (i) positive covenants relating to providing corporate reporting documents, providing particular notifications and complying with the terms of the AFFA, and (ii) negative covenants restricting them from voiding, canceling, settling, or adversely affecting existing insurance policies, disposing of assets and granting security to secure any other financial indebtedness, other than in accordance with the terms and conditions of the Facility.

Upon an event of default, NSW may cancel the commitment and declare all amounts outstanding as immediately due and payable. The events of default include, without limitation, failure to pay or repay amounts due in accordance with the Facility, breach of covenants, misrepresentation, cross default by an obligor and an adverse judgment (other than a personal asbestos or Marlew claim) against an Obligor.

The term of the Facility expires on 1 November 2030. At that time, all amounts outstanding under the Facility become due and payable.

On 17 February 2012, AICF made an initial drawing of A\$29.7 million (being US\$32.0 million translated at the prevailing spot exchange rate on 17 February 2012) under the Facility. On 3 April 2012, all amounts outstanding under the Facility were fully repaid.

Because the Company consolidates AICF due to the Company's pecuniary and contractual interests in AICF as a result of the funding arrangements outlined in the AFFA, any drawings, repayments or payments of accrued interest by AICF under the Facility impact the Company's consolidated financial position, results of operations and cash flows.

Any drawings, repayments, or payments of accrued interest under the Facility by AICF do not impact the Company's free cash flow, as defined in the AFFA, on which annual contributions remitted by the Company to AICF are based. James Hardie Industries plc and its wholly-owned subsidiaries are not a party to, guarantor of, or security provider in respect of the Facility.

LEGAL PROCEEDINGS

The Company is involved from time to time in various legal proceedings and administrative actions related to the normal conduct of its business, including general liability claims, putative class and representative action lawsuits and litigation concerning our products and services. Although it is impossible to predict the outcome of any pending legal proceeding, management believes that such proceedings and actions should not, individually or in the aggregate, have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows, except as they relate to asbestos, the ASIC proceedings, tax contingencies, New Zealand product liability claims, the New Zealand Ministry of Education matter and the matters described in the Other Legal Matters sections below. For further details, see "Risk Factors" in this Section.

ASIC Proceedings

In February 2007, ASIC commenced civil proceedings in the Supreme Court of New South Wales against the Company, ABN 60 and ten then-present or former officers and directors of the James Hardie Group. While the subject matter of the allegations varied between individual defendants, the allegations against the Company were confined to alleged contraventions of provisions of the Australian Corporations Act/Law relating to continuous disclosure and engaging in misleading or deceptive conduct in respect of a security. The Company defended each of the allegations made by ASIC and the orders sought against it in the proceedings, as did the former directors and officers of the Company.

[Table of Contents](#)

On 23 April 2009, the Supreme Court issued judgment against the Company and the ten former officers and directors of the Company.

The Company and nine of the former directors and officers lodged appeals against the Supreme Court's judgments, and ASIC responded by lodging cross appeals against the appellants. The appeals lodged by the former directors and officers were heard in April 2010 and the appeal lodged by the Company was heard in May 2010.

On 30 September 2010, the Company entered into agreements with third parties and subsequently received payment of US\$10.3 million relating to the costs of the ASIC proceedings for certain former officers. These recoveries were reflected as a reduction in selling, general and administrative expenses for the year ended 31 March 2011.

On 17 December 2010, the New South Wales Court of Appeal dismissed the Company's appeal against the Supreme Court's judgment and ASIC's cross appeal and ordered that the Company pay 90% of the costs incurred by ASIC in respect of the Company's appeal. The Court of Appeal also allowed the appeals brought by the non-executive directors, but dismissed ASIC's related cross-appeals, and ordered ASIC to pay the non-executive directors' costs of the proceedings and the appeals. The Court of Appeal allowed the appeals and cross appeals in respect of certain former officers in part and reserved certain matters for further submissions. On 6 May 2011, the Court of Appeal rendered judgment in the exoneration, penalty and cost matters for certain former officers in which it varied certain orders made at first instance and ordered that there be no order as to the costs of the appeals of the certain former officers and ASIC's related cross-appeals.

ASIC subsequently filed applications for special leave to the High Court appealing from the Court of Appeal judgment in favour of the former directors' and former officers' appeals. Two former officers also filed special leave applications to the High Court. The Company did not file an application for special leave to the High Court. The High Court granted ASIC's application for special leave on 13 May 2011. The High Court also granted the special leave application for one of the former officers, with the other former officer withdrawing his application. Appeals brought by ASIC and the Company's former non-executive directors and former officer were heard by the High Court over three days commencing 25 October 2011.

On 3 May 2012, the High Court upheld ASIC's appeal with costs and overturned the Court of Appeal's decision in favour of the former non-executive directors and dismissed the former officer's appeal against the Court of Appeal's decision. The High Court did not render judgment on claims by the non-executive directors and former officer to be excused from liability, penalty and disqualification and on certain questions concerning costs and, instead, remitted these matters back to the Court of Appeal for further consideration.

The Court of Appeal heard submissions on the matters remitted by the High Court over a three-day period commencing 20 August 2012. The Court of Appeal delivered its judgment on 12 November 2012. In respect of five of the former non-executive directors, the Court of Appeal ordered that they each pay a penalty of A\$25,000 and in respect of two of the former non-executive directors, the Court of Appeal ordered that they each pay a penalty of A\$20,000. The Court of Appeal also imposed banning orders on each of the non-executive directors, which restrict them from serving as a director for various lengths of time, the longest of which is through 30 April 2013. The Court of Appeal ordered that the former officer pay a penalty of A\$75,000 plus interest and be banned from acting as a director for a period of seven years commencing on 27 August 2009. The Court of Appeal made costs orders against the former non-executive directors and former officer in respect of some of ASIC's costs incurred in the various Court of Appeal proceedings. The parties made further submissions to the Court of Appeal in respect of some remaining costs issues and the Court of Appeal delivered its judgment on these remaining issues on 31 May 2013.

The amount of ASIC's costs that the Company is required to pay as a result of costs orders made in these proceedings is contingent on a number of factors. These include, without limitation, whether the costs incurred by ASIC are reasonable having regard to the issues pursued in the case by ASIC, the number of legal practitioners involved in such legal work and their applicable fee rates, and the associated legal work undertaken specifically in respect of those issues for which ASIC is awarded costs (since ASIC is not entitled to certain costs).

In April 2013, ASIC commenced without prejudice discussions with the Company, former non-executive directors and former officer in relation to the amount of costs payable to ASIC under certain of the various costs orders made to date in these proceedings. In respect of the costs payable by the Company under orders made against the Company and under indemnities, the Company has recorded a provision of US\$2.0 million as of 31 March 2013. The Company notes that other recoveries may be available, including as a result of repayments by former directors in accordance with the terms of their indemnity agreements. Losses and expenses in future periods from these proceedings are not expected to have a material adverse effect on the Company's financial position, results of operations or cash flows.

Throughout the proceedings, the Company has paid a proportion of the costs of the former non-executive directors and the former executive, with the remaining costs being met by third parties. It is the Company's policy to expense legal costs as incurred.

For further information, see Note 13 to our consolidated financial statements in Section 2.

Tax Contingencies

Due to our size and the nature of our business, we are subject to ongoing reviews by taxing jurisdictions on various tax matters. We accrue for tax contingencies based upon our best estimate of the taxes ultimately expected to be paid, which we update over time as more information becomes available. Such amounts are included in taxes payable or other non-current liabilities, as appropriate. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognise a tax benefit during the period in which we determine that the liability is no longer necessary. We record additional tax expense in the period in which we determine that the recorded tax liability is less than the ultimate assessment we expect.

In fiscal years 2013, 2012 and 2011, we recorded an income tax benefit of US\$0.2 million, income tax expense of US\$0.5 million and nil, respectively, as a result of the finalisation of certain tax audits (whereby certain matters were settled) and the expiration of the statute of limitations related to certain tax positions.

We file income tax returns in various jurisdictions, including Ireland, the United States, Australia, New Zealand, the Philippines and The Netherlands. We are no longer subject to US federal examinations by the IRS for tax years prior to tax year 2009. We are no longer subject to examinations by The Netherlands tax authority, for tax years prior to tax year 2008. We are no longer subject to Australian federal examinations by the ATO for tax years prior to tax year 2009.

In connection with our re-domicile from The Netherlands to Ireland, we became an Irish tax resident on 29 June 2010. While we were domiciled in The Netherlands, we derived significant tax benefits under the US-Netherlands tax treaty. The treaty was amended during fiscal year 2005 and became effective for us on 1 February 2006. The amended treaty provided, among other things, requirements that we must meet for us to qualify for treaty benefits and its effective income tax rate. During fiscal year 2006, we made changes to our organisational and operational structure to satisfy the requirements of the amended treaty and believe that we were in compliance and qualified for treaty benefits while we were

domiciled in The Netherlands. However, if during a subsequent tax audit or related process, the IRS determines that these changes did not meet the requirements, we may not qualify for treaty benefits and our effective income tax rate could significantly increase beginning in the fiscal year that such determination is made, and we could be liable for taxes owed for calendar year 2010 when we were domiciled in The Netherlands.

We believe that it is more likely than not that we were in compliance and should qualify for treaty benefits for calendar year 2010 when we were domiciled in The Netherlands. Therefore, we believe that the requirements for recording a liability have not been met and therefore we have not recorded any liability at 31 March 2013.

New Zealand Product Liability

Since fiscal year 2002, our New Zealand subsidiaries have been and continue to be joined in a number of product liability claims in New Zealand that relate to residential buildings (single dwellings and apartment complexes) and a small number of non-residential buildings, primarily constructed from 1998 to 2004. The product liability claims often involve multiple parties and allege that losses were incurred due to excessive moisture penetration of the buildings' structures. The claims typically include allegations of poor building design, inadequate certification of plans, inadequate construction review and compliance certification and deficient work by sub-contractors.

We recognise a liability for both asserted and unasserted New Zealand product liability claims in the period in which the loss becomes probable and estimable. The amount of reasonably possible loss is dependent on a number of factors including, without limitation, the specific facts and circumstances unique to each claim brought against our New Zealand subsidiaries, the existence of any co-defendants involved in defending the claim, the solvency of such co-defendants (including the ability of such co-defendants to remain solvent until the related claim is ultimately resolved), the availability of claimant compensation under a Government compensation scheme, the amount of loss estimated to be allocable to our New Zealand subsidiaries in instances that involve co-defendants in defending the claim and the extent to which our New Zealand subsidiaries have access to third-party recoveries to cover a portion of the costs incurred in defending and resolving such actions. In addition to the above limitations, the total loss incurred is also dependent on the manner and extent to which the statute of limitations will apply in future periods.

Historically, our New Zealand subsidiaries have been joined to these New Zealand product liability claims as one of several co-defendants, including local government entities responsible for enforcing building codes and practices, resulting in our New Zealand subsidiaries becoming liable for only a portion of each claim. In addition, our New Zealand subsidiaries have had access to third-party recoveries to defray a significant portion of the costs incurred in resolving such claims.

We have made a provision for asserted and unasserted New Zealand product liability claims within Other Current and Other Non-current Liabilities, with a corresponding estimated receivable for third-party recoveries being recognised within Accounts and Other Receivables at 31 March 2013. The amount of provision for product liability claims in New Zealand, net of estimated third-party recoveries, is US\$15.2 million at 31 March 2013. During the year ended 31 March 2013 the Company recognised US\$13.2 million in expenses related to the legacy New Zealand product liability claims.

The estimated loss incorporates assumptions that are subject to the foregoing uncertainties and are principally derived from, but not exclusively based on, historical claims experience. If the nature and extent of claims in future periods differ from the historical claims experience, then the actual amount of loss may be materially higher or lower than estimated losses accrued at 31 March 2013. For example, despite having resolved a number of legacy product liability claims in New Zealand since 2002, our

New Zealand subsidiaries are becoming exposed to increased losses for a greater proportion of these claims due to the insolvency of co-defendants and the expiration of some of our New Zealand subsidiaries rights of third-party recoveries. Accordingly, due to the inherent uncertainties associated with estimating the amount of loss incurred for asserted and unasserted claims, as discussed above, and based on information presently available, we believe it is possible that the ultimate resolution of these legacy claims could result in an additional loss of up to approximately US\$10 million in excess of the amount accrued, net of estimated third-party recoveries, at 31 March 2013. Accordingly, losses incurred in connection with defending and resolving asserted and unasserted New Zealand product liability claims in the future could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

For further information, see “Risk Factors” in this Section and Note 13 to our consolidated financial statements in Section 2.

New Zealand Ministry of Education

On 16 April 2013, the New Zealand Ministry of Education and other related plaintiffs initiated a ‘representative action’ in the New Zealand High Court against several building materials manufacturers, including two of our New Zealand subsidiaries, in relation to several thousand New Zealand school buildings. The New Zealand Ministry of Education and other plaintiffs are alleging that the cladding systems used on school buildings were defective and prone to failure, and are asserting negligent conduct, negligent misstatement and breach of the New Zealand Consumer Guarantees Act 1993 and Fair Trading Act 1986. The claim seeks an unspecified and unquantified amount of damages in relation to alleged repair costs.

Two property surveying businesses were commissioned by the Ministry of Education to conduct visual inspections of school buildings to assess the potential exposure to damage arising from moisture ingress. The results of these surveys, completed on 12 April 2010 and in April 2012, indicated the Ministry of Education’s national exposure to weathertightness risk to be approximately NZ\$1.5 billion. This amount was derived by conducting visual surveys to form a high-level review of potential risk of damage due to moisture ingress, but did not employ the use of destructive testing or internal inspections. The amount of exposure to potential damage due to weathertightness risk identified in these reports may not represent damage actually incurred nor correspond with the amount of loss ultimately asserted by the Ministry of Education in the claim. In addition, the estimated remedial costs set forth in these reports are subject to inherent limitations in quantifying weathertightness risk based on limited information, as outlined in each report.

As the reports have been commissioned by the Ministry of Education, we are unable to adequately scrutinise the reasonableness of the data inputs used or the manner in which inherent uncertainties were overcome in deriving the amount of weathertightness risk exposure. The actual amount of damage could be materially higher or lower than the amount noted by each surveyor, and may not be indicative of the actual amount of loss ultimately asserted by the Ministry of Education in the future for the purposes of the claim.

The amount of loss the New Zealand subsidiaries may be liable to pay, if any, is dependent on a wide range of factors, which include, without limitation, the legal and technical merits of the claim, the amount of damages asserted by the New Zealand Ministry of Education and the other plaintiffs, the proportion of the claim specifically allocable to our New Zealand subsidiaries and the extent to which statutory limitation periods (to which the claim is highly sensitive) will apply. Losses and expenses arising from defending and resolving this claim may have a material adverse effect on our financial position, results of operations and cash flows in future periods. We and our New Zealand subsidiaries are continuing to assess the merits of the claim and intend to vigorously defend against the allegations

[Table of Contents](#)

made. We are not yet able to determine the amount of any loss or range of loss, if any, the New Zealand subsidiaries may become liable for in future periods.

For further information, see "Risk Factors" in this Section and Note 13 to our consolidated financial statements in Section 2.

Other Legal Matters

Environmental

Our operations, like those of other companies engaged in similar businesses, are subject to a number of laws and regulations on air and water quality, waste handling and disposal. Our policy is to accrue for environmental costs when it is determined that it is probable that an obligation exists and the amount can be reasonably estimated.

Other Product Liability

As of March 2013, one of our US subsidiaries has been named as a defendant in eleven related lawsuits in eight separate U.S. federal district courts. Four of the lawsuits were filed between March 2012 and March 2013, adding to the seven lawsuits already pending as of the end of March 2012. Each lawsuit has a different set of facts and circumstances; however, the lawsuits all relate to products allegedly manufactured by the subsidiary, raise virtually the same claims and are brought by generally the same underlying plaintiffs' counsel. In addition to the individually-named plaintiffs, each lawsuit seeks to pursue claims on behalf of a purported but unidentified class of homeowners.

The plaintiffs moved to transfer and consolidate all of the related actions within one federal district court, and their motion was granted in June 2012. However, no class has been certified. We believe we have meritorious defenses to each lawsuit and in opposition to class certification, and intend to vigorously defend the actions. Based on available information and circumstances presently known, we believe that the outcome of these related actions will not have a material adverse effect on our financial condition, results of operations or cash flows.

EMPLOYEES

During each of the last three fiscal years, we employed the following average number of people:

	Fiscal Years Ended 31 March		
	2013	2012	2011
Fibre Cement United States and Canada	1,681	1,581	1,586
Fibre Cement Australia	446	453	416
Fibre Cement New Zealand	142	143	142
Fibre Cement Philippines	166	154	151
Pipes Australia	62	62	59
Fibre Cement Europe	53	47	43
Research & Development, including			
Technology	155	128	107
General Corporate	33	36	36
Total Employees	2,738	2,604	2,540

As of the end of 31 March 2013, of the 2,738 average number of people employed, approximately 350 employees were members of labour unions (approximately 300 and 50 employees in Australia and New Zealand, respectively). Under Australian law, we cannot keep records of union members. The

[Table of Contents](#)

number quoted is the number of people who work in our factories that have union participation and therefore may be represented by a union). Our management believes that we have a satisfactory relationship with these unions and its members and there are currently no ongoing labour disputes. We currently have no employees who are members of a union in the United States.

LISTING DETAILS

As a company incorporated under the laws of Ireland, we have listed our securities for trading on the ASX, through the use of the Clearing House Electronic Subregister System ("CHESS"), via CUFS. CUFS are a form of depositary security that represent a beneficial ownership interest in the securities of a non-Australian corporation. Each of our CUFS represents the beneficial ownership of one share of common stock of JHI plc, the legal ownership of which is held by CHESS Depositary Nominees Pty Ltd. The CUFS are listed and traded on the ASX under the symbol "JHX."

We have also listed our securities for trading on the NYSE. We sponsor a program, whereby beneficial ownership of five CUFS is represented by one ADS, which is issued by The Bank of New York Mellon. These ADSs trade on the NYSE in the form of ADRs, under the symbol "JHX." Unless the context indicates otherwise, when we refer to ADSs, we are referring to ADRs or ADSs and when we refer to our common stock we are referring to the shares of our common stock that are represented by CUFS.

Price History

The high and low trading prices of JHI plc CUFS on the ASX are as follows:

Period	High (A\$)	Low (A\$)
Fiscal year ended:		
31 March 2013	10.50	6.87
31 March 2012	7.99	4.66
31 March 2011	8.05	5.05
31 March 2010	8.86	3.73

Trading Markets

Our securities are listed and quoted on the following stock exchanges:

Common Stock (in the form of CUFS)	Australian Securities Exchange
ADSs	New York Stock Exchange

We cannot predict the prices at which our shares and ADSs will trade or the volume of trading for such securities, nor can we assure you that these securities will continue to meet the applicable listing requirements of these exchanges.

Trading on the Australian Securities Exchange

The ASX is headquartered in Sydney, Australia, with branches located in each Australian state capital. Our CUFS trade on the ASX under the symbol "JHX." The ASX is a publicly listed company with trading being undertaken by brokers licensed under the Corporations Act. Trading principally takes place between the hours of 10:00 a.m. and 4:00 p.m. on each weekday (excluding Australian public holidays). Settlement of trades in uncertificated securities listed on the ASX is generally effected electronically on the third business day following the trade. This is undertaken through CHES, which is the clearing and settlement system operated by the ASX.

Trading on the New York Stock Exchange

In the United States, five JHI plc CUFS equal one JHI plc ADS. Our ADSs trade on the NYSE under the symbol "JHX." Trading principally takes place between the hours of 9:30 a.m. and 4:00 p.m. Eastern Time on each weekday (excluding US public holidays). All inquiries and correspondence regarding ADSs

should be directed to BNY Mellon, depository for our ADSs, at 101 Barclay Street, 22W, New York, NY 10286. To speak directly to a BNY Mellon representative, please call 1-888-BNY-ADRS (1-888-269-2377) if you are calling from within the United States. If you are calling from outside the US, please call 201-680-6825. You may also send an e-mail inquiry to shrrelations@bnymellon.com or visit the website at www.bnymellon.com/shareowner.

MEMORANDUM AND ARTICLES OF ASSOCIATION

General

On 17 June 2010, we completed our Re-domicile from The Netherlands to Ireland and became an Irish SE company incorporated and existing under the laws of Ireland. On 15 October 2012, we completed our conversion from an Irish SE to become an Irish public limited liability company under Irish law, with the name of James Hardie Industries plc.

Our corporate domicile is in Ireland and our office is located at Europa House, Second Floor, Harcourt Center, Harcourt Street, Dublin 2, Ireland. We are registered at the Companies Registration Office of the Department of Enterprise Trade and Innovation in Dublin, Ireland under number 485719.

Key Provisions of our Articles of Association

Purpose of the Company

Our main object, which is stated in our Memorandum of Association, is to:

“carry on the businesses of manufacturer, distributor, wholesaler, retailer, service provider, investor, designer, trader and any other business (except the issuing of policies of insurance) which may seem to the Company’s board of directors capable of being conveniently carried on in connection with these objects or calculated directly or indirectly to enhance the value of or render more profitable any of the Company’s property.”

The Memorandum of Association also states that we will have the power to carry on the business of a holding company and co-ordinate the administration, finances and activities of any subsidiary companies or associated companies.

We also have the usual powers of an Irish public limited company. These include the power to borrow, to charge assets, to grant guarantees and indemnities, to incorporate new companies and to acquire existing companies.

Provisions of our Articles of Association Related to Directors

General and borrowing powers: Our Articles of Association grant the directors a general power to manage the Company. The directors will have the power to exercise all of the powers of the Company that have not been otherwise expressly reserved to the shareholders by Irish Company Law or our Articles of Association. In addition, the directors also will be granted certain specific powers by our Articles of Association, including:

- the power to delegate their powers to the CEO, any director, any person or persons employed by us or any of our subsidiaries or to a committee of the Board;
- the power to appoint attorneys to act on our behalf;
- the power to borrow money on our behalf and to mortgage or charge our undertaking, property, assets, and uncalled capital as security for such borrowings; and
- the power to do anything that is necessary or desirable for us to participate in any computerised, electronic or other system for the facilitation of the transfer of CUFS or the operation of our registers that may be owned, operated or sponsored by the ASX.

Our Articles of Association expressly list some, but not all, of the duties of directors.

Under Irish law, directors have a common law fiduciary duty to act in the best interest of Irish plc and to exercise good faith and due care and skill. Directors also have statutory duties that mainly relate to administrative obligations.

Power to vote on compensation: The maximum aggregate remuneration of the non-executive directors is US\$2,000,000 and can be changed from time to time by an ordinary resolution. Changes to non-executive director remuneration are recommended by the Remuneration Committee and are approved at a properly convened meeting of the Board (which consists of eight non-executive directors and the CEO).

Arrangements for remuneration in the form of shares or CUFs for directors requires shareholder approval pursuant to an ordinary resolution.

There is no requirement for our shareholders to approve the remuneration policy. The Company currently intends to continue voluntarily producing a remuneration report.

These provisions are subject to the relevant listing rules of the ASX regarding director remuneration.

Age Limit for Retirement or Non-Retirement: Our Articles of Association do not include any provisions regarding the mandatory retirement age of a director.

Number of shares for Director's qualification: No director will require a share qualification in order to act as a director.

Power to vote on proposals, arrangements or contracts in which the director is materially interested: The Company's Articles of Association provide that a director cannot vote on any resolution concerning a matter in which he has, directly or indirectly, an interest which is material or a duty which conflicts or may conflict with the interests of the Company. A director cannot be counted in the quorum present at a meeting in relation to any such resolution on which the director is not entitled to vote.

Under Irish law, directors who have a personal interest in a contract or a proposed contract with the Company are required to declare the nature of their interest at a meeting of the directors of the Company. The Company is required to maintain a register of such declared interests which must be made available for inspection by the shareholders at general meetings.

Issuance of Shares; Preemptive Rights

We have been registered with one class of shares; however, our Articles of Association will allow for any share to be issued with such rights or restrictions as the shareholders may by ordinary resolution determine.

Shareholders may authorise us (acting through our directors) by special resolution to issue shares in whatever manner on the basis that they will be subsequently redeemed. Once issued, we may cancel redeemed shares or alternatively hold them as treasury shares (which subsequently will be reissued or cancelled).

The Board has the power (a) to issue shares up to a maximum of our authorised share capital and (b) to limit or exclude statutory pre-emptive rights in respect of such issue for cash consideration, for a period of up to five years in each case, subject to renewal, by a special resolution of shareholders (which requires the approval of holders of 75% of shares present in person or by proxy and voting at

the relevant general meeting) in the case of disapplication of statutory pre-emptive rights, and an ordinary resolution (which requires the approval of holders of a majority of shares present in person or by proxy and voting at the relevant general meeting) in the case of authorising the board to issue shares).

Our Articles of Association grant these authorisations to the board, which will expire (unless renewed) on 13 August 2017.

These authorisations are subject to the listing rules of the ASX and NYSE in relation to the issue of new equity securities, which require:

- in the case of the ASX, shareholder approval for the issue of equity securities which exceed 15% of the number of equity securities on issue (as determined in accordance with the ASX listing rules and subject to the various exemptions set out therein); and
- in the case of the NYSE, shareholder approval for the issuance of shares that have or will have upon issuance voting power equal to or in excess of 20% of the voting power outstanding before the issuance of such shares (subject to certain exceptions).

If the Board is at any time not designated as the authorised body for such powers, the shareholders acting by ordinary resolution have the power to issue shares, but only upon the proposal of the Board.

As an Irish company that has listed securities in Australia and the United States, we are subject to applicable legislation regarding insider trading. Generally, Australian law prohibits persons from trading on the basis of information which is not generally available and which, if it were generally available, a reasonable person would expect to have a material effect on the price or value of securities. Similarly, in the United States, persons are prohibited from trading on the basis of material, non-public information. We have adopted an internal code on insider trading consistent with Australian and US laws and regulations.

Repurchase of Shares and Reduction of Capital

Irish law permits us to redeem our shares (provided such shares are redeemable) at any time whether on or off market without shareholder approval. Accordingly, our Articles of Association provide that, when we agree to acquire any shares (unless we elect to treat the acquisition as a purchase), it shall be a term of such contract that the relevant shares become redeemable on the entry into of that contract and that completion of that contract shall constitute redemption of the relevant shares. This means that we may acquire our own shares.

In addition, Irish law permits an Irish company and its subsidiaries to make market purchases of the shares of the Irish company on a recognised stock exchange if shareholders of the company have granted the company and/or its subsidiaries a general authority by ordinary resolution to do so. Currently, the Irish Stock Exchange, the NYSE, NASDAQ and the London Stock Exchange are the recognised stock exchanges for this purpose.

As the ASX is not currently a recognised stock exchange for the purposes of Irish law, on- and off-market purchases of our shares (by way of trading CUFS) will only be available to us through their redemption in accordance with the redemption mechanism in our Articles of Association, outlined above, provided we do not treat such acquisition as a purchase.

A redemption or repurchase of shares may only be funded out of freely distributable reserves or out of the proceeds of a fresh issue of shares for that purpose.

Under Irish Company Law, the Board may determine whether shares that we have repurchased or redeemed will either be held in treasury or cancelled. However, under Irish Company Law, the nominal value of treasury shares held by us may not, at any one time, exceed 10% of the nominal value of our issued share capital.

Unless otherwise required by Irish plc's Articles of Association or Irish law, no business other than the appointment of a chairman may be transacted at any general meeting unless at least 5% of Irish plc's issued share capital is present or represented.

Shareholders Meetings and Voting Rights

Our AGMs will generally be held in Ireland unless shareholder approval, pursuant to an ordinary resolution, is granted at the preceding AGM to hold the following general meeting outside of Ireland. There is no requirement that extraordinary general meetings be held in Ireland. We must hold an AGM in each calendar year and within nine months after the financial year end and we shall announce the date of each such AGMs no less than 35 business days before such meeting is due to be held. All business that is transacted at an AGM shall be deemed to be special business, except: (1) the declaration of a dividend; (2) the consideration of the accounts, balance sheets and reports of the directors and auditors; (3) the election of directors in the place of those retiring (whether by rotation or otherwise, with rotation occurring at staggered intervals and in any event at least once every three years, except for the CEO, who is not subject to re-election); (4) the fixing of the remuneration of the directors (if required); and (5) the fixing of the remuneration of the auditors.

We shall announce the date of an extraordinary general meeting no less than 35 business days before such meeting is due to be held save in exceptional circumstances where the board resolves otherwise. An extraordinary general meeting may be convened by (1) the directors or (2) pursuant to Irish Company Law, by one or more persons who alone or together hold 10% of our issued share capital. An extraordinary general meeting must be convened within 21 calendar days after a request has been made of us by a shareholder (who holds 10% or more of our issued share capital), and the extraordinary general meeting must be held no later than two months after such a request has been made by a shareholder.

One or more persons who alone or together hold at least 10% of our issued share capital may request that the Board call an extraordinary general meeting. In addition, such holders may also request that the Board place a matter on the agenda of any general meeting so long as any such request shall be received by us at least 30 business days before the general meeting to which it relates, at such postal or e-mail address as specified by us for that purpose in the announcement of the general meeting. Such request must be accompanied by stated grounds justifying its inclusion, or a draft resolution, together not to exceed 1,000 words. Such a request will be declined by our Board where: (i) the request is contrary to the Memorandum or Articles of Association, Irish law or the ASX Listing Rules, or (ii) the time limits specified in the Articles of Association have not been complied with.

The quorum for general meetings and for meetings of a separate class of shareholders of an Irish plc is one or more persons who alone or jointly hold at least 5% of such Irish plc's issued share capital or, in the case of a separate class meeting, 5% of the issued share capital of that class. These same quorum requirements also apply to all adjourned meetings.

Holders of CUFS and ADSs do not appear on our share register as legal holders of shares. Accordingly, the ability to call an extraordinary general meeting only may be exercised, in the case of holders of CUFS, by providing instructions to the CUFS depository or by converting their CUFS to shares, and, in the case of holders of ADSs, by converting their ADSs to CUFS and thereafter providing instructions to the CUFS depository or converting their CUFS to shares.

All shares issued have the right to one vote for each share held on every matter submitted to a vote of the shareholders. CUFS holders are entitled to attend and to speak at our shareholder meetings and can vote at our shareholder meetings:

- by instructing CHES Depositary Nominees Pty Limited (“CDN”), as legal owner of our shares represented by CUFS, how to vote the shares represented by the holder’s CUFS;
- by directing CDN to appoint itself (or another person) as the Nominated Proxy pursuant to a voting instruction form provided by the Company; or
- by converting the holder’s CUFS into our shares and voting the shares at the meeting, which must be undertaken prior to the meeting. However, in order to sell their shares on the ASX thereafter, it will be first necessary to convert them back to CUFS.

ADS holders will not be entitled to attend our general meetings of shareholders, but can vote by giving an instruction to The Bank of New York Mellon, as the ADS depositary on how to instruct CDN to vote at a meeting.

Irish law and our Articles of Association currently do not impose any limitations on the rights of persons who are not residents of Ireland to hold or vote shares, solely as a result of such non-resident status.

Annual Report

Our fiscal year runs from 1 April through 31 March. Irish law requires that our annual accounts must be laid before the shareholders at the AGM within nine months of the balance sheet date and that copies of our financial statements must be sent to the shareholders 21 days before the AGM. We prepare consolidated annual accounts under “modified” US GAAP, which is US GAAP to the extent that it is not inconsistent with Irish Company Law. We will also prepare standalone annual entity accounts under Irish GAAP and lay those accounts before a general meeting of shareholders.

The annual accounts will also include report of an independent accountant.

Indemnification

Our Articles of Association provide that our current and former directors, company secretary, employees and persons who may be deemed by our board to be our agent are indemnified by us for costs, losses and expenses arising out of such person’s exercise of their duties to us. However, under Irish Company Law, this indemnity only binds us to indemnify a current or former director or company secretary where judgment is given in any civil or criminal action in favour of such director or company secretary, or where a court grants relief because the director or company secretary acted honestly and reasonably and ought fairly to be excused. Our Articles of Association apply the same restrictions to employees and persons deemed by our board to be our agent who are not current or former directors or company secretary.

We have also entered into deeds of access, insurance and indemnity with our directors, company secretary and certain senior employees.

Dividends

Dividends and distributions of assets to shareholders may be declared (a) in the case of dividends, by the board or (b) upon the recommendation of the board, by an ordinary resolution of shareholders, provided that with respect to dividends or distributions declared pursuant to subsection (b) above, the dividends or distributions may not exceed the amount recommended by the Board.

Dividends and distributions may only be made in-so-far as (a) we have sufficient distributable profits and (b) our net assets are in excess of the aggregate of called up share capital plus undistributable reserves and the distribution does not reduce our net assets below such aggregate.

If directors so resolve, any dividend that has remained unclaimed for twelve years from the date of its declaration shall be forfeited and cease to be owned by the Company. The payment by directors of any unclaimed dividend or other moneys payable in respect of a share into a separate account shall not constitute us a trustee in respect thereof. However, it is unlikely that any such unclaimed dividends will be forfeited due to the operation of Australian legislation, under which dividends that have been unclaimed for six years are paid to the relevant state authority, through which shareholders can claim a refund of such dividends in the future.

Our Board determines the record dates at which time registered holders of our shares, including the CHES Depositary Nominee issuing CUFS to the ADS depositary, will be entitled to dividends and also sets the payment dates for these dividends. Dividends are declared payable to our shareholders in US dollars. The ADS Depositary (Bank of New York Mellon) receives dividends in US dollars directly from JHI plc on each CUFS dividend payment date and will distribute any dividend to holders of ADSs in US dollars pursuant to the terms of the deposit agreement. Other CUFS holders registered at a dividend record date are paid their dividend on each CUFS dividend payment date in the equivalent amount of Australian dollars, as determined by the prevailing exchange rate shortly after the CUFS dividend record date.

Amendment of Articles of Association

Our Articles of Association may be amended by our shareholders, which include changes to the rights of shareholders, subject to Irish Company Law restrictions, by resolution approved by 75% of the votes cast at a general meeting of shareholders at which at least 5% of our issued share capital is present or represented.

Liquidation Rights

In the event of our liquidation, and after we have paid all debts and liquidation expenses, the excess of any assets shall be distributed among our shareholders in proportion to the capital at the commencement of the winding up paid up or credited as paid up on such shares held by our shareholders. As a holding company, our sole material assets will be the capital stock of its subsidiaries.

Limitations on Right to Hold Common Stock

The Irish Takeover Rules regulate takeover and merger transactions, however effected, by which control of a target incorporated in Ireland may be obtained or consolidated. Control means a holding or aggregate holding of shares carrying 30% or more of the voting rights of a company, irrespective of whether the holding or holdings give de facto control.

The Irish Takeover Rules are statute based. The Irish Takeover Panel is the body that regulates all transactions subject to the Irish Takeover Rules.

Rule 9 of the Irish Takeover Rules states that, except with the consent of the Irish Takeover Panel, when:

- any person acquires, whether by a series of transactions over a period of time or not, shares or other securities which (taken together with shares or other securities held or acquired by persons acting in concert) carry 30% or more of the voting rights of a company; or

- any person, who together with persons acting in concert, holds not less than 30% of the voting rights and such person or any person acting in concert with them acquires, in any period of twelve months, additional shares or other securities of more than 0.05% of the total voting rights of the company,

such person must extend offers to the holders of any class of equity securities (whether voting or non-voting) and to holders of any class of transferable voting capital in respect of all such equity securities and transferable voting capital.

A single holder (that is, a holder excluding any parties acting in concert with the holder) holding more than 50% of the voting rights of a company is not subject to Rule 9.

The Irish Takeover Rules also contain rules called “Substantial Acquisition Rules” which restrict the speed with which a person may increase their holding of shares and rights over shares to an aggregate of between 15% and 30% of the voting rights of a company. These rules also require accelerated disclosure of acquisitions of shares or rights over shares relating to such holdings.

The Irish Takeover Rules are built on the following general principles that apply to any transaction regulated by such rules:

- all holders of the securities of an offeree of the same class must be afforded equivalent treatment; moreover, if a person acquires control of a company, the other holders of securities must be protected;
- the holders of the securities of an offeree must have sufficient time and information to enable them to reach a properly informed decision on the offer; where it advises the holders of securities, the board of the offeree must give its views on the effects of implementation of the offer on employment, conditions of employment and the locations of the offeree’s places of business;
- the board of an offeree must act in the interests of the company as a whole and must not deny the holders of securities the opportunity to decide on the merits of the offer;
- false markets must not be created in the securities of the offeree, of the offeror or of any other company concerned by the offer in such a way that the rise or fall of the prices of the securities becomes artificial and the normal functioning of the markets is distorted;
- an offeror must announce an offer only after ensuring that he or she can fulfill in full any cash consideration, if such is offered, and after taking all reasonable measures to secure the implementation of any other type of consideration;
- an offeree must not be hindered in the conduct of its affairs for longer than is reasonable by an offer for its securities; and
- a substantial acquisition of securities (whether such acquisition is to be effected by one transaction or a series of transactions) shall take place only at an acceptable speed and shall be subject to adequate and timely disclosure.

The prohibition does not apply to holdings by the CUFS depositary, CDN, of our shares as custodian for the CUFS holders but will apply to CDN where another person acquires or holds a relevant interest in breach of the provisions. If a person acquires or holds a relevant interest in breach of the prohibition, we have several powers available to it under our Articles of Association. These include powers to

require the disposal of our common stock, disregard the exercise of votes and suspend dividend rights. These powers will only extend to that number of shares of common stock which are acquired or held in breach of the prohibition.

Although these provisions of our Articles of Association may help to ensure that no person may acquire voting control of us without making an offer to all shareholders, these provisions may also have the effect of delaying or preventing a change in control of the Company.

Disclosure of Holdings

Under Irish law, a person must notify us in writing within five business days of an acquisition or disposition of shares in Irish plc where:

- such person’s interest was below 5% of our issued share capital prior to such acquisition and equals or exceeds 5% after such acquisition;
- such person’s interest was equal to or above 5% of our issued share capital before an acquisition or disposition and increases or decreases through an integer of a percentage as a result of such acquisition or disposition (e.g., from 5.8% to 6.3% or from 8.2% to 7.9%); and
- where such person’s interest was equal to or above 5% of our issued share capital before a disposition and falls below 5% as a result of such disposition.

In addition, under Irish law, we can, if we have reasonable cause to believe that a person or company has an interest in our shares, require such person or company to confirm that belief (or as the case may be) to indicate whether or not it is the case and to provide certain information in relation to such holdings, including details of his or her interest in our shares and the interests (if any) of all persons having a beneficial interest in the shares. To the extent any such information is made available to us, Irish law requires that we make such information available to any person upon such person’s request.

Failure of a shareholder to disclose its interests in our shares as described above will result in no right or interest of any kind in respect of that person’s shares being enforceable, whether directly or indirectly by action or legal proceeding. If a person fails to respond to us when we make a request for information in the manner described above, we may apply to the High Court of Ireland for an order stating that: (a) any transfer of such shares will be void; (b) such shares will have no voting rights; (c) no further shares will be issued in right of those shares or pursuant to any offer made to the holder thereof; and (d) such shares will not be entitled to any payment from us. Such restrictions, whether imposed for a failure to disclose a notifiable interest or for a failure to respond to a request for information, may only be lifted by an order of the High Court of Ireland.

Shareholders are also subject to beneficial ownership reporting disclosure requirements under US securities laws, including the filing of beneficial ownership reports on Schedules 13D and 13G with the SEC. The SEC’s rules require all persons who beneficially own more than 5% of a class of securities registered with the SEC to file either a Schedule 13D or 13G. This filing requirement applies to all holders of our shares of common stock, ADSs or CUFS because our securities have been registered with the SEC. The number of shares of common stock underlying ADSs and CUFS is used to determine whether a person beneficially owns more than 5% of the class of securities. This beneficial ownership-reporting requirement applies whether or not the holders are US residents. The decision of whether to file a Schedule 13D or a Schedule 13G will depend primarily on the nature of the beneficial owner and the circumstances surrounding the person’s beneficial ownership. A copy of the rules and regulations relating to the reporting of beneficial ownership with the SEC, as well as Schedules 13D and 13G, are available on the SEC’s website at www.sec.gov.

MATERIAL CONTRACTS

In addition to the other contracts that are described in this annual report, including without limitation the AFFA and certain other related agreements described in "Commitment to Provide Funding on a Long-Term Basis in Respect of Asbestos-Related Liabilities of Former Subsidiaries," our stock option plans and certain material employment contracts described under Section 2, "Remuneration Report," and any material contracts that have been entered into in the ordinary course of business, the following are the contracts we consider to be material to us. All contracts described below have been filed as exhibits to this annual report and are hereby incorporated by reference, and the summary below is qualified in its entirety by reference to the full texts of such contracts.

US Dollar Cash Advance Facilities. For all facilities, the interest rate is calculated two business days prior to the commencement of each draw-down period based on LIBOR, plus the margins of individual lenders, and is payable at the end of each draw-down period. At 31 March, 2013, there were no facilities drawn under the combined facilities and US\$405.0 million was available.

At 31 March 2013, the Company was in compliance with all restrictive debt covenants contained in its credit facility agreements. Under the most restrictive of these covenants, the Company (i) must not exceed a maximum of net debt to earnings before interest, tax, depreciation and amortisation, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited and excluding assets, liabilities and other balance sheet items of the AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, (ii) must meet or exceed a minimum ratio of earnings before interest and taxes to net interest charges, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, and (iii) must ensure that no more than 35% of Free Cash Flow (as defined in the AFFA), in any given financial year ("Annual Cash Flow Cap") is contributed to AICF on the payment dates under the AFFA in the next following financial year. The Annual Cash Flow Cap does not apply to payments of interest, if any, to AICF and is consistent with contractual obligations of the Performing Subsidiary and the Company under the AFFA.

Gypsum Indemnity. We sold our gypsum wallboard manufacturing facilities in April 2002. Under the terms of the sale agreement with the buyer, BPB US Holdings, Inc., we agreed to customary indemnification obligations which generally have expired. However, pursuant to the sale agreement, we agreed to indemnify the buyer for any future liabilities arising from asbestos-related injuries to persons or property arising from our former gypsum business. We are not aware of any asbestos-related claims arising from the gypsum business nor circumstances that would give rise to such claims. Further, our obligation under the sale agreement to indemnify the buyer for liabilities arising from asbestos-related injuries arises only if such claims exceed US\$5.0 million in the aggregate, is limited to US\$250.0 million in the aggregate and will continue for 30 years after the closing date of the sale of the gypsum business.

Pursuant to the terms of our agreement to sell our gypsum business, we also retained responsibility for any losses incurred by the buyer resulting from environmental conditions at the Duwamish River in the State of Washington so long as notice of a claim was given within 10 years of the closing date and subject to a US\$34.5 million limitation. The 10 year period in which to give notice expired in April 2012 and we received no such notice prior to that time period or since.

EXCHANGE CONTROLS

The European Commission has imposed financial sanctions on a number of countries throughout the world that are suspected of being involved in activities such as terrorism or repression of its citizens. Ireland has given effect to these sanctions through the implementation of regulations and statutory

instruments. We do not have any subsidiaries located in countries with imposed financial sanctions by the European Commission. In addition, we do not conduct business or other revenue-generating activities in these countries.

Except for restrictions contained in the regulations or statutory instruments referred to above, there are no legislative or other legal provisions currently in force in Ireland or arising under our Articles of Association restricting the import or export of capital, including the availability of cash and cash equivalents for use by JHI plc and its wholly owned subsidiaries, or remittances to our security holders not resident in Ireland. In addition, except for restrictions contained in the regulations or statutory instruments referred to above, cash dividends payable in US dollars on our common stock may be officially transferred from Ireland and converted into any other convertible currency.

There are no limitations, either by Irish law or in our Articles of Association, on the right of non-residents of Ireland to hold or vote our common stock.

TAXATION

The following summarises the material US and Irish tax consequences of an investment in shares of our common stock. This summary does not address every aspect of taxation relevant to a particular investor subject to special treatment under any applicable law and is not intended to apply in all respects to all categories of investors. In addition, except for the matters discussed under “Irish Taxation”, this summary does not consider the effect of other foreign tax laws or any state, local or other tax laws that may apply to an investment in shares of our common stock. This summary assumes that we will conduct our business in the manner described in this annual report. Changes in our organisational structure or the manner in which we conduct our business may invalidate all or parts of this summary. The laws on which this summary is based could change, perhaps with retroactive effect, and any law changes could invalidate all or parts of this summary. We will not update this summary for any law changes after the date of this annual report.

This discussion does not bind either the US or Irish tax authorities or the courts of those jurisdictions. Except where outlined below, we have not sought a ruling nor will we seek a ruling of the US or Irish tax authorities about matters in this summary. We cannot assure you that those tax authorities will concur with the views in this summary concerning the tax consequences of the purchase, ownership or disposition of our common stock or that any reviewing judicial body in the United States or Ireland would likewise concur.

PROSPECTIVE INVESTORS SHOULD CONSULT THEIR TAX ADVISERS REGARDING THE PARTICULAR TAX CONSEQUENCES OF ACQUIRING, OWNING AND DISPOSING OF SHARES OF OUR COMMON STOCK, INCLUDING THE EFFECT OF ANY FOREIGN, STATE OR LOCAL TAXES.

United States Taxation

The following is a summary of the material US federal income tax consequences generally applicable to “US Shareholders” (as defined below) who beneficially own shares of our common stock and hold the shares as capital assets. For purposes of this summary, a “US Shareholder” means a beneficial owner of our common stock that is: (1) a citizen or individual resident of the United States (as defined for US federal income tax purposes); (2) a corporation created or organised in or under the law of the United States or any of its political subdivisions; (3) an estate whose income is subject to US federal income taxation regardless of its source or (4) a trust if (i) a court in the United States can exercise primary supervision over the administration of the trust, and one or more United States persons can

control all of the substantial decisions of the trust, or (ii) the trust was in existence on 20 August 1996 and properly elected to continue to be treated as a United States person. If a partnership (including for this purpose any entity treated as a partnership for US federal tax purposes) is a beneficial owner of a share of our common stock, the US federal tax treatment of a partner in the partnership generally will depend on the status of the partner and the activities of the partnership. A holder of our common stock that is a partnership and partners in that partnership should consult their own tax advisers regarding the US federal income tax consequences of holding and disposing of those shares.

This summary does not comprehensively describe all possible tax issues that could influence a current or prospective US Shareholder's decision to buy or sell shares of our common stock. In particular, this summary does not discuss: (1) the tax treatment of special classes of US Shareholders, like financial institutions, life insurance companies, tax exempt organisations, tax-qualified employer plans and other tax-qualified or qualified accounts, investors liable for the alternative minimum tax, dealers in securities, shareholders who hold shares of our common stock as part of a hedge, straddle or other risk reduction arrangement, or shareholders whose functional currency is not the US dollar; (2) the tax treatment of US Shareholders who own (directly or indirectly by attribution through certain related parties) 10% or more of our voting stock; and (3) the application of other US federal taxes, like the US federal estate tax. The summary is based on the Internal Revenue Code, applicable US Department of Treasury regulations, judicial decisions and administrative rulings and practice, all as of the date of this annual report.

Treatment of ADSs. For US federal income tax purposes, a holder of an ADS is considered the owner of the shares of stock represented by the ADS. Accordingly, except as otherwise noted, references in this summary to ownership of shares of our common stock includes ownership of the shares of our common stock underlying the corresponding ADSs.

Taxation of Distributions. Subject to the passive foreign investment company rules discussed below, the tax treatment of a distribution on shares of our common stock held by a US Shareholder depends on whether the distribution is from our current or accumulated earnings and profits (as determined under US federal income tax principles). To the extent a distribution is from our current or accumulated earnings and profits, a US Shareholder will include the amount of the distribution in gross income as a dividend. To the extent a distribution exceeds our current and accumulated earnings and profits, a US Shareholder will treat the excess first as a non-taxable return of capital to the extent of the US Shareholder's tax basis in those shares and thereafter as capital gain. See the discussion of "Capital Gain Rates" below. Notwithstanding the foregoing described treatment, we do not intend to maintain calculations of our current and accumulated earnings and profits. Dividends received on shares of our common stock will not qualify for the inter-corporate dividends received deduction.

Distributions to US Shareholders that are treated as dividends may be subject to a reduced rate of tax under US tax laws. For taxable years ending on or prior to 31 December 2012, "qualified dividend income" is subject to a maximum tax rate of 15%. For taxable income years beginning after 31 December 2012 "qualified dividend income" is only subject to a maximum rate of 15% for taxpayers whose taxable income is below a certain threshold. For taxpayers whose taxable income is above this threshold the maximum rate is 20%. "Qualified dividend income" includes dividends received from a "qualified foreign corporation." A "qualified foreign corporation" includes (1) a foreign corporation that is eligible for the benefits of a comprehensive income tax treaty with the United States that contains an exchange of information program and (2) a foreign corporation that pays dividends with respect to shares of its stock that are readily tradable on an established securities market in the United States. We believe that we are, and will continue to be, a "qualified foreign corporation" and that dividends we pay with respect to our shares will qualify as "qualified dividend income." To be eligible for the 15% tax rate, a US Shareholder must hold our shares un-hedged for a minimum holding period (generally, 61 days during the 121-day period beginning on the date that is 60 days before the ex-dividend date of the

distribution). Although we believe we presently are, and will continue to be, a “qualified foreign corporation,” we cannot guarantee that we will so qualify. For example, we will not constitute a “qualified foreign corporation” if we are classified as a “passive foreign investment company” (discussed below) in either the taxable year of the distribution or the preceding taxable year. In addition, effective 1 January 2013, the Health Care and Education Reconciliation Act of 2010 subjects net investment income (including dividend income) of certain taxpayers to a 3.8% tax rate.

Distributions to US Shareholders that are treated as dividends are generally considered income from sources outside the United States and, for purposes of computing the limitations on foreign tax credits that apply separately to specific categories of income, foreign source “passive category” income or, in the case of certain holders, “general category” income. In addition, special rules will apply to determine a US Shareholder’s foreign tax credit limitation if a dividend distributed with respect to our shares constitutes “qualified dividend income” (as described above). See the discussion of “Credit of Foreign Taxes Withheld” below.

The amount of any distribution we make on shares of our common stock in foreign currency generally will equal the fair market value in US dollars of that foreign currency on the date a US Shareholder receives it. A US Shareholder will have a tax basis in the foreign currency equal to its US dollar value on the date of receipt and will recognise ordinary US source gain or loss when it sells or exchanges the foreign currency. US Shareholders who are individuals will not recognise gain upon selling or exchanging foreign currency if the gain does not exceed US\$200 in a taxable year and the sale or exchange constitutes a “personal transaction” under the Code. The amount of any distribution we make with respect to shares of our common stock in property other than money will equal the fair market value of that property on the date of distribution.

Credit of Foreign Taxes Withheld. Under certain conditions, including a requirement to hold shares of our common stock unhedged for a certain period, and subject to limitations, a US Shareholder may claim a credit against the US Shareholder’s federal income tax liability for the foreign tax owed and withheld or paid with respect to distributions on our shares. Alternatively, a US Shareholder may deduct the amount of withheld foreign taxes, but only for a year for which the US Shareholder elects to deduct all foreign income taxes. Complex rules determine how and when the foreign tax credit applies, and US Shareholders should consult their tax advisers to determine whether and to what extent they may claim foreign tax credits.

Sale or Other Disposition of Shares. Subject to the passive foreign investment company rules discussed below, a US Shareholder will recognise capital gain or loss on the sale or other taxable disposition of shares of our common stock, equal to the difference between the US Shareholder’s adjusted tax basis in the shares sold or disposed of and the amount realised on the sale or disposition. Individual US Shareholders may benefit from lower marginal tax rates on capital gains recognised on shares sold, depending on the US Shareholder’s holding period for the shares. See the discussion of “Capital Gain Rates” below. Capital losses that do not offset capital gains are subject to limitations on deductibility. The gain or loss from the sale or other disposition of shares of our common stock generally will be treated as income from sources within the United States for foreign tax credit purposes, unless the US Shareholder is a US citizen residing outside the United States and certain other conditions are met.

Capital Gain Rates. For individual US Shareholders, the tax rates applicable to capital gain and ordinary income may vary substantially. For calendar year 2012, the highest marginal income tax rate that could apply to the ordinary income of an individual US Shareholder (disregarding the effect of limitations on deductions) was 35%. In contrast, a maximum rate of 15% applied to any net capital gain of an individual US Shareholder if that gain was attributable to the sale or exchange of capital assets held more than one year. Gain attributable to the sale or exchange of capital assets held one year or

less is short-term capital gain, taxable at the same rates as ordinary income. In addition, a maximum rate of 15% applies to “qualified dividend income” (as described above). Effective 1 January 2013, long-term capital gains of certain US individual Shareholders are subject to a maximum rate of 20%. In addition, the Health Care and Education Reconciliation Act of 2010 subjects net investment income (including long and short-term capital gain income) of certain taxpayers to additional tax of 3.8%.

Passive Foreign Investment Company Status. Special US federal income tax rules apply to US Shareholders owning capital stock of a PFIC. A foreign corporation will be a PFIC for any taxable year in which 75% or more of its gross income is passive income or in which 50% or more of the average value of its assets is “passive assets” (generally assets that generate passive income or assets held for the production of passive income). For these purposes, passive income excludes certain interest, dividends or royalties from related parties.

If we were a PFIC, each US Shareholder would likely face increased tax liabilities upon the sale or other disposition of shares of our common stock or upon receipt of “excess distributions,” unless the US Shareholder elects (1) to be taxed currently on its pro rata portion of our income, regardless of whether the income was distributed in the form of dividends or otherwise (provided we furnish certain information to our shareholders), or (2) to mark its shares to market by accounting for any difference between the shares’ fair market value and adjusted basis at the end of the taxable year by either an inclusion in income or a deduction from income (provided our ADSs, CUFS or common shares satisfy a test for being regularly traded on a qualified exchange or other market). Because of the manner in which we operate our business, we are not, nor do we expect to become, a PFIC.

Controlled Foreign Corporation Status. If more than 50% of either the voting power of all classes of our voting stock or the total value of our stock is owned, directly or indirectly, by citizens or residents of the United States, United States domestic partnerships and corporations or estates or trusts other than foreign estates or trusts, each of which owns 10% or more of the total combined voting power of all classes of our stock entitled to vote, which we refer to as “10-Percent Shareholders”, we could be treated as a Controlled Foreign Corporation (“CFC”), under the Code. This classification would, among other consequences, require 10-Percent Shareholders to include in their gross income their pro rata shares of our “Subpart F income” (as specifically defined by the Code) and our earnings invested in US property (as specifically defined by the Code).

In addition, gain from the sale or exchange of our common shares by a United States person who is or was a 10-Percent Shareholder at any time during the five-year period ending with the sale or exchange is treated as dividend income to the extent of the earnings and profits attributable to the stock sold or exchanged. Under certain circumstances, a corporate shareholder that directly owns 10% or more of our voting shares may be entitled to an indirect foreign tax credit for income taxes we paid in connection with amounts so characterised as dividends under the Code.

US Federal Income Tax Provisions Applicable to Non-United States Holders. A Non-US Holder means a beneficial owner of our common stock that is (1) a nonresident alien of the United States for US federal income tax purposes; (2) a corporation created or organised in or under the law of a country, or any of its political subdivisions, other than the United States; or (3) an estate or trust that is not a US Shareholder. A Non-US Shareholder generally will not be subject to US federal income taxes, including US withholding taxes, on any dividends paid on our shares or on any gain realised on a sale, exchange or other disposition of the shares unless the dividends or gain is effectively connected with the conduct by the Non-US Shareholder of trade or business in the United States (and is attributable to a permanent establishment or fixed base the Non-US Shareholder maintains in the United States if an applicable income tax treaty so requires as a condition for the Non-US Shareholder to be subject to US taxation on a net income basis on income related to the common stock). A corporate Non-US Shareholder under certain circumstances may also be subject to an additional “branch profits tax” on

that type of income, the rate of which may be reduced pursuant to an applicable income tax treaty. In addition, gain recognised on a sale, exchange or other disposition of our shares by a Non-US Shareholder who is an individual generally will be subject to US federal income taxes if the Non-US Shareholder is present in the United States for 183 days or more in the taxable year in which the sale, exchange or other disposition occurs and certain other conditions are met.

US Information Reporting and Backup Withholding. Dividend payments on shares of our common stock and proceeds from the sale, exchange or redemption of shares of our common stock may be subject to information reporting to the Internal Revenue Service and possible US backup withholding at a current rate of 28%. Backup withholding will not apply to a shareholder who furnishes a correct taxpayer identification number or certificate of foreign status and makes any other required certification or who is otherwise exempt from backup withholding. United States persons who are required to establish their exempt status generally must provide that certification on a properly completed Internal Revenue Service Form W-9 (Request for Taxpayer Identification Number and Certification). Non-US Shareholders generally will not be subject to US information reporting or backup withholding. However, Non-US Shareholders may be required to provide certification of non-US status in connection with payments received in the United States or through certain US related financial intermediaries.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a shareholder's US federal income tax liability, and a shareholder may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the Internal Revenue Service and furnishing any required information.

Irish Taxation

As discussed above, with effect from 29 June 2010 forward, we believe we should be considered to be an Irish tax resident and should no longer be considered to be a Dutch tax resident under the Netherlands/Ireland double tax treaty from the date that the Irish tax authorities treat us as an Irish resident company under the treaty. Accordingly, we believe that the Irish tax implications set out below are relevant for shareholders who invest in shares of our common stock and hold the shares as capital assets.

The following is a summary of the material Irish tax consequences generally applicable to shareholders who invest in shares of our common stock, who are neither tax resident, nor ordinarily resident in, Ireland. This summary does not contain a detailed description of all of the Irish tax consequences for all shareholders, which depend on that shareholder's particular circumstances, and should not be a substitute for advice from an appropriate professional adviser in relation to all of the possible tax issues that could influence a prospective shareholder's decision to acquire shares of our common stock. This summary is based on Irish tax legislation, relevant Irish case law, other Irish Revenue guidance and published opinions and administrative pronouncements of the Irish tax authorities, income tax treaties to which Ireland is a party, and such other authorities as we have considered relevant, all as in effect and available as at the date of this annual report, any of which may change possibly with retroactive effect.

Treatment of ADSs. In general, for Irish tax purposes, an owner of depositary receipts is considered the owner of the shares of stock represented by depositary receipts. Accordingly, except as otherwise noted, references in this section of the annual report to ownership of shares of our common stock includes ownership of the shares underlying the corresponding ADSs.

Irish Dividend Withholding Tax. Distributions made by us to non-Irish resident shareholders will, subject to certain exceptions, be subject to Irish dividend withholding tax at the standard rate of income tax (which is currently 20%) unless you are a shareholder who falls within one of the categories of exempt shareholders referred to below. Where dividend withholding tax applies, we will be responsible

for withholding the dividend withholding tax at source. For dividend withholding tax purposes, a dividend includes any distribution made by us to our shareholders, including cash dividends, non-cash dividends and additional shares taken in lieu of a cash dividend.

Dividend withholding tax is not payable where an exemption applies provided that we have received all necessary documentation required by the relevant legislation from our shareholders prior to payment of the dividend.

Certain of our non-Irish tax resident shareholders (both individual and corporate) are entitled to an exemption from dividend withholding tax. In particular, a non-Irish tax resident shareholder is not subject to dividend withholding tax on dividends received from us where the shareholder is:

- an individual shareholder resident for tax purposes in either a member state of the EU (apart from Ireland) or in a country with which Ireland has a double tax treaty, and the individual is neither resident nor ordinarily resident in Ireland;
- a corporate shareholder not resident for tax purposes in Ireland nor ultimately controlled, directly or indirectly, by persons so resident and which is resident for tax purposes in either a member state of the EU (apart from Ireland) or a country with which Ireland has a double tax treaty;
- a corporate shareholder that is not resident for tax purposes in Ireland and which is ultimately controlled, directly or indirectly, by persons resident in either a member state of the EU (apart from Ireland) or in a country with which Ireland has a double tax treaty;
- a corporate shareholder that is not resident for tax purposes in Ireland and whose principal class of shares (or those of its 75% parent) is substantially and regularly traded on a recognised stock exchange in either a member state of the EU (including Ireland where the Company trades only on the Irish stock exchange) or in a country with which Ireland has a double tax treaty or on an exchange approved by the Irish Minister for Finance; or
- a corporate shareholder that is not resident for tax purposes in Ireland and is wholly-owned, directly or indirectly, by two or more companies the principal class of shares of each of which is substantially and regularly traded on a recognised stock exchange in either a member state of the EU (including Ireland where the Company trades only on the Irish stock exchange) or in a country with which Ireland has a double tax treaty or on an exchange approved by the Irish Minister for Finance,

and provided that, in all cases noted above, the shareholder has made the appropriate non-resident declaration to us prior to payment of the dividend.

Where the shareholder is not the beneficial owner, we will be required to withhold Irish dividend withholding tax at the standard rate of income tax unless the shareholder is a qualifying intermediary under Irish law and that shareholder has received all necessary documentation required by the relevant legislation, as described above, from the beneficial owner prior to payment of the dividend.

Where our shareholders hold ADSs, they may not be required to submit an appropriate declaration in order to receive dividends without deduction of Irish dividend withholding tax provided their registered address is in the US.

Up to 31 July 2013 non-resident shareholders who are entitled to an exemption, as outlined above, will generally be able to receive dividends without any dividend withholding tax and without the need to complete the aforementioned non-resident declaration forms, pursuant to a waiver we have received from the Irish Revenue authorities.

After 31 July 2013 shareholders must complete and send to us a non-resident declaration form in order to avoid Irish dividend withholding tax. If the appropriate declaration is not made, these shareholders will be liable for Irish dividend withholding tax of 20% on dividends paid by us and may not be entitled to offset this tax. In this case, it would be necessary for shareholders to apply for a refund of the withholding tax directly from the Irish Revenue authorities.

Shareholders that do not fulfil the documentation requirements or otherwise do not qualify for one of the withholding tax exemptions outlined above may be able to claim treaty benefits under a double taxation convention. In this regard, where a double taxation convention is in effect between Ireland and the country of residence of a non-resident shareholder, depending on the terms of that double taxation convention, such a non-resident shareholder may be eligible for a full or partial exemption resulting in a lower dividend withholding tax rate than 20%.

For example, under the US-Ireland Treaty, certain US corporate shareholders owning directly at least 10% of our voting power, are eligible for a reduction in withholding tax to 5% with respect to dividends that we pay, unless the shares of common stock held by such residents form part of the business property of a business carried on through a permanent establishment in Ireland. The same exception applies if the beneficial owner of the shares, being a citizen or resident of the United States, performs independent personal services from a fixed base situated in Ireland and the holding of the shares of common stock in respect of which the dividends are paid pertains to such fixed base in Ireland. A shareholder of our common stock, other than an individual, will be ineligible for the benefits of the US-Irish Treaty unless the shareholder satisfies certain tests under the LOB provisions of Article 23 of the US-Ireland Treaty. To prevent so-called dividend stripping, Irish law generally denies the treaty benefit of a reduced dividend withholding tax rate for any dividend paid to a recipient who is not the "beneficial owner" of the dividend.

Irish Taxes on Income and Capital Gains. Shareholders who are neither tax resident of, nor ordinarily resident in, Ireland should not be subject to any Irish taxes in respect of dividends distributed by us (other than the dividend withholding tax described above) or capital gains realised on the disposition of shares of our common stock unless such shares are used, held or acquired for the purposes of a trade carried on in Ireland through a branch or an agency. An individual who is temporarily a non-resident of Ireland at the time of the disposal may, under anti-avoidance legislation, still be liable to Irish taxation on any chargeable gains realised (subject to the availability of exemptions).

Capital Acquisitions Tax. Irish capital acquisitions tax ("CAT") applies to gifts and inheritances. Subject to certain tax-free thresholds (which are determined by the relationship between the donor and successor or donee), gifts and inheritances are liable to tax. With effect from 6 December 2012, the rate of CAT increased from 30% to 33%. Gifts and inheritances passing between spouses are exempt from CAT.

Where a gift or inheritance is taken under a disposition made on or after 1 December 1999, it will be within the charge of CAT:

- to the extent that the property of which the gift or inheritance consists is situated in Ireland at the date of the gift or inheritance;
- where the person making the gift or inheritance is or was resident or ordinarily resident in Ireland at the date of the disposition under which the gift or inheritance is taken; or
- where the person receiving the gift or inheritance is resident or ordinarily resident in Ireland at the date of the gift or inheritance.

Table of Contents

Please note that the charge to CAT in respect of appointments from a discretionary trust can be different and as a result, specific advice should be taken in this regards.

A non-Irish domiciled individual will not be regarded as resident or ordinarily resident in Ireland for CAT purposes on a particular date unless they are resident or ordinarily resident in Ireland on that date and have been resident in Ireland for the five consecutive tax years immediately preceding the year of assessment in which the date falls.

A gift or inheritance of our common stock will be within the charge of CAT, notwithstanding that the person from whom or by whom the gift or inheritance is received is domiciled or resident outside Ireland.

The Estate Tax Convention between Ireland and the United States generally provides for CAT paid on inheritances in Ireland to be credited against US federal estate tax payable in the United States and for tax paid in the United States to be credited against tax payable in Ireland, based on priority rules set forth in the Estate Tax Convention. The Estate Tax Convention does not apply to CAT paid on gifts. Irish domestic legislation also provides for a general relief from double taxation in respect of gifts and inheritances.

Irish Stamp Duty. Any electronic transfers of shares through the CHESS or the ADR system will be treated as exempt from stamp duty in Ireland. If a shareholder undertakes an off-market transaction involving a transfer of the underlying shares, this will be subject to Irish stamp duty at a rate of 1% of market value or consideration paid, whichever is greater and will not be able to be registered until duly stamped. An off-market transfer of CUFS will also, where evidenced in writing, be subject to the 1% Irish stamp duty. In addition a conversion of shares into CUFS or ADSs or a conversion of CUFS or ADSs into underlying shares will be liable to 1% Irish stamp duty where the conversion is on a sale or in contemplation of a sale. In each case, payment of this stamp duty will be the responsibility of the person receiving the transfer.

Documents Available for Review

We are subject to the reporting requirements of the Exchange Act applicable to “foreign private issuers” and in accordance therewith file reports, including annual reports, and other information with the SEC. Such reports and other information have been filed electronically with the SEC since 4 November 2002. The SEC maintains a site on the Internet, at www.sec.gov, which contains reports and other information regarding issuers that file electronically with the SEC. In addition, such reports may be obtained, upon written request, from our company secretary at our Corporate Headquarters in Ireland or our Investor Relations department in Australia. Such reports and other information filed with the SEC prior to November 2002 may be inspected and copied at prescribed rates at the public reference facilities maintained by the SEC at 100 F Street N.E., Washington, D.C. 20549, or obtained by written request to our company secretary. Although, as a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of proxy statements and annual reports to shareholders and the quarterly reporting requirements of the Exchange Act, we:

- furnish our shareholders with annual reports containing consolidated financial statements examined by an independent registered public accounting firm; and
- furnish quarterly reports for the first three quarters of each fiscal year containing unaudited consolidated financial information in filings with the SEC under Form 6-K.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Cash and cash equivalents include amounts on deposit in banks and cash invested temporarily in various highly liquid financial instruments with original maturities of three months or less when acquired.

We have operations in foreign countries and, as a result, are exposed to foreign currency exchange rate risk inherent in purchases, sales, assets and liabilities denominated in currencies other than the US dollar. We also are exposed to interest rate risk associated with our long-term debt and to changes in prices of commodities we use in production.

Periodically, interest rate swaps, commodity swaps and forward exchange contracts are used to manage market risks and reduce exposure resulting from fluctuations in interest rates, commodity prices and foreign currency exchange rates. Our policy is to enter into derivative instruments solely to mitigate risks in our business and not for trading or speculative purposes.

Foreign Currency Exchange Rate Risk

We have significant operations outside of the United States and, as a result, are exposed to changes in exchange rates which affect our financial position, results of operations and cash flow. In addition, payments to AICF are required to be made in Australian dollars which, because the majority of our revenues is produced in US dollars, exposes us to risks associated with fluctuations in the US dollar/Australian dollar exchange rate. See "Risk Factors" in this Section.

For our fiscal year ended 31 March 2013, the following currencies comprised the following percentages of our net sales, expenses and liabilities:

	US\$	A\$	NZ\$	Other ¹
Net sales	69.9%	20.6%	4.2%	5.3%
Expenses ²	62.8%	28.3%	4.1%	4.8%
Liabilities (excluding borrowings) ²	10.9%	86.6%	1.9%	0.6%

For our fiscal year ended 31 March 2012, the following currencies comprised the following percentages of our net sales, expenses and liabilities:

	US\$	A\$	NZ\$	Other ¹
Net sales	67.4%	22.8%	4.4%	5.4%
Expenses ²	66.6%	24.1%	4.2%	5.1%
Liabilities (excluding borrowings) ²	10.7%	87.3%	1.4%	0.6%

¹ Comprised of Philippine Pesos and Euros.

² Liabilities include A\$ denominated asbestos liability, which was initially recorded in the fourth quarter of fiscal year 2006. Expenses include cost of goods sold, selling general and administrative expenses, research and development expenses and adjustments to the asbestos liability. See "Risk Factors," "Commitment to Provide Funding on a Long-Term Basis in Respect of Asbestos-Related Liabilities of Former Subsidiaries" in this Section, and Note 11 of our consolidated financial statements in Section 2 for further information regarding the asbestos liability.

We purchase raw materials and fixed assets and sell some finished product for amounts denominated in currencies other than the functional currency of the business in which the related transaction is generated. In order to protect against foreign exchange rate movements, we may enter into forward exchange contracts timed to mature when settlement of the underlying transaction is due to occur. As of 31 March 2013, there were no material contracts outstanding.

Funding Under the AFFA

The A\$ to US\$ assets and liabilities rate moved from 0.9614 as of 31 March 2012 to 0.9597 as of 31 March 2013, a 0.2% movement, resulting in a US\$0.2 million favourable impact on our fiscal year 2013 net income. Assuming that our unfunded net AFFA liability in Australian dollars remains unchanged at A\$817.3 million and that we do not hedge this foreign exchange exposure, a 10% movement in the A\$ to US\$ exchange rate (at the 31 March 2013 exchange rate of 0.9597) would have approximately a US\$77.4 million and US\$94.6 million favourable and unfavourable impact, respectively, on our net income.

For fiscal year 2012, assuming that our unfunded net AFFA liability in Australian dollars remained unchanged at A\$902.9 million and that we did not hedge this foreign exchange exposure, a 10% favourable or unfavourable movement in the A\$ to US\$ exchange rate (at the 31 March 2012 exchange rate of 0.9614) would have had approximately an US\$85.4 million and US\$104.3 million favourable and unfavourable impact, respectively, on our net income.

Interest Rate Risk

We have market risk from changes in interest rates, primarily related to our credit facilities. As of 31 March 2013 and 2012, all of our credit facilities were subject to variable interest rate. The interest rate is calculated two business days prior to the commencement of each draw-down period based on the US\$ London Interbank Offered Rate ("LIBOR") plus the margins of the individual lenders and is payable at the end of each draw-down period. From time to time, we may enter into interest rate swap contracts in an effort to mitigate interest rate risk. As of 31 March 2013, we had interest rate swap contracts with a total notional principal of US\$25.0 million and a fair value of US\$1.3 million, which are included in Accounts payable. For all of these interest rate swap contracts, we have agreed to pay fixed interest rates while receiving the floating interest rate. These contracts were entered into to protect against upward movements in LIBOR and the associated interest the Company pays on its external debt.

At 31 March 2013, we had no amounts outstanding under our credit facilities. However, if we draw-down on the existing credit facilities, we may become exposed to market risk due to changes in the rate at which interest accrues.

For fiscal year 2012, an assumed 10 basis point move in the interest rates applicable to our borrowings (a 10% move against our weighted-average floating rate interest rates as of 31 March 2012) would have had a 0.1% change on our fiscal year 2012 income before income taxes.

Commodity Price Risk

We are exposed to changes in prices of commodities used in our operations, primarily associated with energy, fuel and raw materials such as pulp and cement. Pulp has historically demonstrated more price sensitivity than other raw materials that we use in our manufacturing process. We expect that pulp prices will rise and that energy, fuel and cement prices will also fluctuate in the near future. To minimise the additional working capital requirements caused by rising prices related to these commodities, we have entered into various contracts that discount pulp prices in relation to pulp indices and purchase our pulp from several qualified suppliers in an attempt to mitigate price increases and supply interruptions. However, if such commodity prices do not continue to rise, our cost of sales may be negatively impacted due to fixed pricing over the longer-term.

We have assessed the market risk for pulp and believe that, a US\$88 per metric ton movement in market pulp prices, which represents approximately 10% of the average NBSK average pulp price

Table of Contents

relative to our US business for the year ended 31 March 2013, would have had approximately a 0.9% change in our cost of sales in fiscal year 2013. We have also assessed the market risk for cement and believe that, a US\$9 per metric ton price movement in cement prices, which represents approximately 10% of the market cement price at 31 March 2013, would have had approximately a 0.5% change in cost of sales in fiscal year 2013.

For fiscal year 2012, we had assessed the market risk for pulp and believe that, a US\$103 per metric ton movement in market pulp prices, which represented approximately 10% of the average NBSK pulp price relative to our US business for the year ended 31 March 2012, would have had approximately a 1.2% change in our cost of sales in fiscal year 2012. We also assessed the market risk for cement and believe that, a US\$9 per metric ton price movement in cement prices, which represents approximately 10% of the market cement price at 31 March 2012, would have had approximately a 0.5% change in cost of sales in fiscal year 2012.

AMERICAN DEPOSITARY SHARES

We have listed our securities for trading on the NYSE. We sponsor a program whereby beneficial ownership of five CUFS is represented by one ADS, which is issued by The BNY Mellon. These ADSs trade on the NYSE in the form of ADRs under the symbol "JHX." Trading principally takes place between the hours of 9:30 a.m. and 4:00 p.m. Eastern Time on each weekday (excluding US public holidays).

The following is a summary of the fee provisions of our deposit agreement with The Bank of New York Mellon. For more complete information regarding ADRs, the entire deposit agreement should be read. The deposit agreement, as amended, has been filed as an exhibit to this annual report as Exhibit 2.1.

Persons depositing or withdrawing share or ADS holders must pay:

Taxes and other governmental charges

Registration or transfer fees

Any charges incurred by the depositary or its
agents for servicing the deposited securities

Expenses of the depositary

\$5.00 (or less) per 100 ADSs (or portion of 100
ADSs)

\$0.02 (or less) per ADS (or portion thereof)

If any tax or other governmental charge becomes payable with respect to any security on deposit, such tax or other governmental charge is payable by the ADS holder to the Depositary. The Depositary may refuse to effect any transfer or withdrawal of a deposited security until such payment is made. The

For:

As necessary

Transfer and registration of shares on our share register
to or from the name of the depositary or its agent when you
deposit or withdraw shares

As necessary

Converting foreign currency to US dollars, cable, telex and
facsimile transmission expenses (when expressly provided
for in the deposit agreement)

Execution and delivery of ADSs, including issuances
resulting from a distribution of shares, rights, or other
property

Cancellation of ADSs for the purpose of withdrawal,
including if the deposit agreement terminates

Cash distributions and depositary services

Table of Contents

Depository may withhold any dividends or other distributions or may sell for the account of the ADS holder any part or all of the deposited securities, and may apply such dividends, other distributions, or proceeds of any such sale in payment of such tax or other governmental charge and the ADS holder will remain liable for any deficiency.

The Depository collects its fees for delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The depository collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depository may collect its annual fee for depository services by deductions from cash distributions or by directly billing investors or by charging the book-entry system of accounts of participants acting for them. The depository may generally refuse to provide fee-attracting services until its fees for those services are paid.

BNY Mellon, as depository, has agreed to reimburse us for expenses we incur that are related maintenance expenses of the American Depositary Receipt program. The Depository has also agreed to pay the standard out-of-pocket maintenance costs for the ADRs, which consist of the expenses of postage and envelopes for mailing annual financial reports, printing and distributing dividend checks, electronic filing of U.S. Federal tax information, mailing required tax forms, stationery, postage, facsimile and telephone calls. It has also agreed to reimburse us annually for certain investor relationship programs or special investor relations promotional activities. There are limits on the amount of expenses for which the Depository will reimburse us, but the amount of reimbursement available is not necessarily tied to the amount of fees the Depository collects from investors. For fiscal years ended 31 March 2013 and 2012, the Depository waived US\$121,805 and US\$121,714, respectively, in fees for standard, out-of-pocket maintenance costs for the administration of the ADR program.

All inquiries and correspondence regarding ADSs should be directed to BNY Mellon, depository for our ADSs, at 101 Barclay Street, 22W, New York, NY 10286. To speak directly to a Bank of New York Mellon representative, please call 1-888-BNY-ADRS (1-888-269-2377) if you are calling from within the United States. If you are calling from outside the US, please call 201-680-6825. You may also send an e-mail inquiry to shrrelations@bnymellon.com or visit the website at www.bnymellon.com/shareowner.

SECTION 4

SHARE/CHESS UNITS OF FOREIGN SECURITIES INFORMATION

James Hardie Industries plc voting rights:

As of 31 May 2013, James Hardie Industries plc had on issue 441,654,684 CUFS issued over 441,654,684 ordinary shares held by CHESS Depository Nominees Pty Ltd ("CDN") on behalf of 10,479 CUFS holders. Each ordinary share carries the right to one vote. CUFS holders can direct CDN how to vote the ordinary shares on a one vote per CUFS basis. Options and RSUs carry no voting rights.

James Hardie Industries plc distribution schedule as at 31 May 2013:

Size of Holding Range	CUFS		Options	
	Holders	Holdings	Holders	Holdings
1-1,000	4,898	2,290,060	-	-
1,001-5,000	4,280	10,054,323	16	34,391
5,001-10,000	734	5,257,619	24	192,377
10,001-100,000	497	11,326,273	57	1,836,446
100,001 and over	70	412,726,409	9	3,082,722
Totals	10,479	441,654,684	106	5,145,936

Based on the closing price of A\$9.96 on 31 May 2013, 294 CUFS holders held less than a marketable parcel.

James Hardie Industries plc substantial CUFS holders as at 31 May 2013:

As of 31 May 2013, all issued and outstanding ordinary shares were listed on the ASX in the form of CUFS. CUFS represent beneficial ownership of our shares. CHESS Depository Nominees Pty Ltd is the registered owner of the shares represented by CUFS. Each of our CUFS represents one share of our common stock.

To our knowledge, the following table identifies those shareholders who beneficially owned 5% or more of our shares based on the holdings reported by the shareholder in its last shareholder notice filed with the ASX and their percentage of shares outstanding based on the number of shares outstanding as of 31 May 2013 which was 441,654,684 shares.

Shareholder	Shares Beneficially Owned	Percentage of Shares Outstanding
FMR LLC and FIL Limited ¹	38,801,469	8.79%
Commonwealth Bank of Australia ²	34,442,731	7.80%
Lazard Asset Management Pacific Co ³	33,594,049	7.61%
Baillie Gifford & Co ⁴	31,301,628	7.09%
National Australia Bank Limited Group ⁵	28,198,184	6.38%
The Capital Group Companies, Inc ⁶	27,010,612	6.12%
Schroder Investment Management Australia Limited ⁷	24,136,828	5.47%
BlackRock Group ⁸	22,196,091	5.03%

Table of Contents

-
- ¹ FMR LLC and FIL Limited became a major shareholder on 23 July 2009, with a holding of 34,119,335 shares of our issued share capital and through subsequent sales and purchases, FMR LLC and FIL Limited increased its holding to 38,801,469 shares of our issued share capital on 17 October 2012 in the last notice received.
 - ² Commonwealth Bank of Australia became a major shareholder on 12 November 2009, with a holding of 21,820,423 shares of our issued capital and, through subsequent purchases and sales, increased its holdings of our issued capital to 34,442,731 shares on 19 July 2012 in the last notice received.
 - ³ Lazard Asset Management Pacific Co became a major shareholder on 1 April 2004, with a holding of 24,505,916 shares of our issued share capital and, through subsequent purchases and sales, Lazard Asset Management Pacific Co ceased to be a major shareholder on 3 May 2010. On 29 April 2011, Lazard Asset Management Pacific Co became a substantial shareholder again and through subsequent purchases, increased its holding to 33,594,049 shares of our issued share capital on 22 February 2013 in the last notice received.
 - ⁴ Baillie Gifford & Co and its affiliated companies became a major shareholder on 24 December 2007, with a holding of 24,577,253 shares of our issued share capital. On 26 June 2009, their holdings increased to over 5% of our issued share capital but their substantial holding status again ceased when their holdings of our issued share capital fell below 5% on 29 June 2009. On 12 November 2009, Baillie Gifford & Co became a major shareholder again and through subsequent purchases, has increased its holding to 31,301,628 shares of our issued share capital on 9 January 2012 in the last notice received.
 - ⁵ National Australia Bank Limited Group became a major shareholder on 25 May 2004, with 23,060,940 shares of our issued share capital and increased its holding to 28,198,184 shares of our issued share capital on 16 June 2004 in the last notice received.
 - ⁶ The Capital Group Companies, Inc became a major shareholder on 8 May 2012, with a holding of 22,021,150 shares of our issued share capital and increased its holding to 27,010,612 shares of our issued share capital on 15 January 2013 in the last notice received.
 - ⁷ Schroder Investment Management Australia Limited became a major shareholder on 28 January 2004, with a holding of 25,485,997 shares of our issued share capital and, through subsequent purchases and sales, Schroder Investment Management Australia Limited decreased its holding to 24,136,828 shares on 30 May 2013 in the last notice received.
 - ⁸ BlackRock Group became a major shareholder on 10 August 2012 with 21,970,820 shares of our issued capital and, through subsequent purchases and sales, they ceased to be a major shareholder on 10 September 2012. On 2 October 2012, their holdings increased to over 5% of our issued share capital, but their substantial holding status again ceased on 2 November 2012. Through subsequent purchases, they became a substantial shareholder again on 8 November 2012, but ceased their substantial holding status on 4 February 2013. BlackRock Group became a substantial shareholder once again by increasing its holding to 22,196,091 shares of our issued share capital on 19 February 2013 in the last notice received.

Ausbil Dexia became a major shareholder on 12 January 2011 with 24,980,920 shares of our issued capital, but their substantial holding status ceased when their holdings of our issued share capital fell below 5% on 4 September 2012 in the last notice received.

Each of the above shareholders has the same voting rights as all other holders of our common stock. To our knowledge, except for the major shareholders described above, we are not directly or indirectly owned or controlled by another corporation, by a foreign government or by any other natural or legal persons severally or jointly.

Definitions**Financial Measures - Australian equivalent terminology**

The Remuneration Report included in Section 1 of this 20-F contains financial measures that are considered to be non-US GAAP, but are consistent with those used by Australian companies. Because the Company prepares its consolidated financial statements in accordance with US GAAP, the following table and definitions listing cross-references each US GAAP financial measure as used in the Company's consolidated financial statements to the equivalent non-US GAAP financial measure, as used in the Remuneration Report:

Consolidated Statements of Operations and Other Comprehensive Income (Loss) (US GAAP)	Remuneration Report (non US GAAP)
Net sales	Net sales
Cost of goods sold	Cost of goods sold
Gross profit	Gross profit
Selling, general and administrative expenses	Selling, general and administrative expenses
Research and development expenses	Research and development expenses
Asbestos adjustments	Asbestos adjustments
Operating income (loss)	EBIT*
Sum of interest expense and interest income	Net interest income (expense)*
Other income (expense)	Other income (expense)
Income (loss) before income taxes	Operating profit (loss) before income taxes*
Income tax (expense) benefit	Income tax (expense) benefit
Net income (loss)	Net operating profit (loss)*
*- Represents non-US GAAP descriptions used by Australian companies.	

Operating income and Operating income margin - is equivalent to EBIT and EBIT margin

Income before income taxes - is equivalent to operating profit before income taxes

Net Income - is equivalent to net operating profit

Other Financial Measures

mm² - million square feet, where a square foot is defined as a standard square foot of 5/16" thickness.

ms² - thousand square feet, where a square foot is defined as a standard square foot of 5/16" thickness.

Non-GAAP Financial Information Derived from GAAP Measures

The following tables set forth the reconciliation of our non-GAAP financial measures included in our discussion above to the most directly comparable GAAP financial measure. These non-GAAP financial measures are not prepared in accordance with US GAAP; therefore, the information is not necessarily comparable to other companies' financial information and should be considered as a supplement to, not a substitute for, or superior to, the corresponding measures calculated in accordance with US GAAP.

Operating income excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability expenses - operating income excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability expenses is not a measure of financial performance under US GAAP and should not be considered to be more meaningful than operating income. Management has included this financial measure to provide investors with an alternative method for assessing our operating results in a manner that is focussed on the performance of our ongoing operations and provide useful information regarding our financial condition and results of operations. Management uses these non-US GAAP measures for the same purposes.
