

Purchases and sales of foreign currencies effected outside the formal exchange market are carried out in the *Mercado Cambiario Informal* (the informal exchange market). The informal exchange market reflects the supply and demand for foreign currency. There are no limits imposed on the extent to which the rate of exchange in the informal exchange market can fluctuate above or below the observed exchange rate. On March 31, 2013, the average exchange rate in the informal exchange market was CLP472.34 per U.S. dollar and the U.S. dollar observed exchange rate was CLP472.03 per U.S. dollar, which is explained by the current excess of foreign currency.

The following table sets forth the low, high, average and period-end observed exchange rates for U.S. dollars for each of the indicated periods starting in 2008 as reported by the Central Bank of Chile. The Federal Reserve Bank of New York does not report a noon buying rate for Chilean pesos.

	Daily Observed Exchange Rate ⁽¹⁾			
	(CLP per USD)			
	<u>Low ⁽²⁾</u>	<u>High ⁽²⁾</u>	<u>Average ⁽³⁾</u>	<u>Period-end⁽⁴⁾</u>
2008	431.22	676.75	522.35	636.45
2009	491.09	643.87	559.15	507.10
2010	468.01	549.17	510.22	468.01
2011	455.91	533.74	483.57	519.20
2012	469.65	519.69	486.55	478.60
October 2012	471.54	481.98	475.67	480.59
November 2012	476.20	484.48	480.56	480.39
December 2012	474.36	481.28	477.11	478.60
January 2013	470.67	475.47	472.28	471.44
February 2013	470.67	473.60	472.42	472.96
March 2013	471.10	474.82	472.44	472.03

Risk Factors

RISKS RELATING TO CHILE

We are substantially dependent on economic conditions in Chile, which may adversely impact our results of operations and financial condition.

We are predominantly engaged in business in Chile and 67.9% of our sales revenues in 2012 were generated from our Chilean operations, 24.1% came from operations in Argentina and 8.0% from exports out of Chile. Thus, our results of operations and financial condition are dependent to a large extent on the overall level of economic activity in Chile. The Chilean economy has experienced an average annual growth rate of 0.01% between 2008 and 2012, and 5.6% in 2012. In the past, slower economic growth in Chile has slowed down the rate of consumption of our products and adversely affected our profitability. Chile's recent economic performance was affected in 2009 by the disruption in the global financial markets and in 2010 by an earthquake, and therefore the growth rate of the 2008-2012 period is not necessarily indicative of future performance.

Furthermore, Chile, as an emerging market economy, is more exposed to unfavorable conditions in the international markets which can possibly have a negative impact on the demand for our products as well as products of third parties with whom we conduct business. On August 5, 2011, Standard & Poor's Ratings Group, Inc., or Standard & Poor's, lowered its long term sovereign credit rating on the United States from AAA to AA+. In addition, significant concerns regarding the sovereign debt of numerous other countries have developed recently and required some of these countries to seek emergency financing. The downgrade of the U.S. credit rating and the ongoing European debt crisis have contributed to the instability in global financial markets. The sovereign debt crisis could adversely impact the financial health of the global banking system and lower consumer confidence, which could impact global financial markets and economic conditions in the United States and throughout the world. As a result, any combination of lower consumer confidence, disrupted global capital markets and/or reduced international economic conditions could have a negative impact on the Chilean economy and consequently on our business. In 2012, VSPT, one of CCU's affiliate, exported 38.4% of its wine volume to Europe and 28% of its Net sales were denominated in Euros. Therefore, the economic crisis in Europe may negatively affect our wine exports, which could have an adverse effect on our results.

The relative liquidity and volatility of Chilean securities markets may increase the price volatility of our ADSs and adversely impact a holder's ability to sell any shares of our common stock withdrawn from our ADR facility.

The Chilean securities markets are substantially smaller, less liquid and more volatile than major securities markets in the United States. For example, the Santiago Stock Exchange, which is Chile's principal stock exchange, had a market capitalization of approximately US\$313.3 billion as of December 31, 2012, while The New York Stock Exchange ("NYSE") had a market capitalization of approximately US\$14.1 trillion and the NASDAQ National Market ("NASDAQ") had a market capitalization of approximately US\$4.6 trillion as of the same date. In addition, the Chilean securities markets can be materially affected by developments in other emerging markets, particularly other countries in Latin America.

The lower liquidity and greater volatility of the Chilean markets relative to markets in the United States could increase the price volatility of the ADSs and may impair a holder's ability to sell in the Chilean market shares of our common stock withdrawn from the ADR facility in the amount and at the price and time the holder wishes to do so. See "Item 9: The Offer and Listing."

Chilean economic policies, currency fluctuations, exchange controls and currency devaluations may adversely affect the price of our ADSs.

The Chilean government's economic policies and any future changes in the value of the Chilean peso relative to the U.S. dollar could adversely affect the dollar value and the return on any investment in our ADSs. The Chilean peso has been subject to large nominal devaluations and appreciations in the past and may be subject to significant fluctuations in the future. For example, in the period from December 31, 2011 to December 31, 2012, the daily average value of the Chilean peso relative to the U.S. dollar increased by 0.6% in nominal terms, whereas the year end value decreased by 7.8% based on the observed exchange rate for U.S. dollars on those dates. See "Item 3: Key Information-Selected Financial Data-Exchange Rates."

Chilean trading in the shares of our common stock underlying our ADSs is conducted in Chilean pesos. Cash distributions to be received by the depositary for the shares of our common stock underlying our ADSs will be denominated in Chilean pesos. The depositary will translate any Chilean pesos received by it to U.S. dollars at the then-prevailing exchange rate with the purpose of making dividend and other distribution payments on the ADSs. If the value of the Chilean peso declines relative to the U.S. dollar, the value of our ADSs and any distributions to holders of our ADSs received from the depositary may be adversely affected. See "Item 8: Financial Information - Dividend Policy and Dividends."

We are subject to different corporate disclosure requirements and accounting standards than U.S. companies.

Although the securities laws of Chile which govern open stock corporations and publicly listed companies such as us have as a principal objective promoting disclosure of all material corporate information to the public, Chilean disclosure requirements differ from those in the United States in certain important respects. In addition, although Chilean law imposes restrictions on insider trading and price manipulation, the Chilean securities market is not as highly regulated and supervised as the U.S. securities market. We have been subject to the periodic reporting requirements of the Exchange Act since our initial public offering of ADSs in September 1992.

RISKS RELATING TO ARGENTINA

We have significant operations in Argentina, and economic conditions there have adversely affected our results of operations in the past and may do so in the future.

In addition to our operations in Chile, we maintain substantial assets in Argentina and derive significant revenue from our operations in Argentina. In 2012, we derived CLP258,941 million, or 24.1%, of our revenues from our Argentinean operations, and, as of December 31, 2012, CLP211,827 million, or 16.0%, of our assets were located in Argentina. Because demand for soft drinks and beverage products usually is correlated to economic conditions prevailing in the local market, which in turn is dependent on the macroeconomic condition of the country, the financial condition and results of our operations in Argentina are, to a considerable extent, dependent upon political and economic conditions prevailing in Argentina. From 1999 through 2002, Argentina suffered a prolonged recession, which culminated in an economic crisis. Although the economic situation in Argentina has improved since the 2002 Argentine financial crisis, we have been observing a slowdown and accordingly cannot assure you that economic conditions in Argentina will improve or that our business will not be materially affected if Argentine economic conditions were to deteriorate. See “Item 5: Operating and Financial Review and Prospects – Trend Information.”

The Argentine peso is subject to volatility which could adversely affect our results.

A devaluation of the Argentine peso may adversely affect our operating results. While the economic situation in Argentina has been improving, we cannot assure you that the Argentine economy will recover or that it will not face a recession, or predict what effect such a recession would have on our operations in Argentina. In 2009, the Company first reported its financial statements under IFRS, using the Argentine peso as the functional currency for our Argentine subsidiaries. They are calculated in said currency and translated into Chilean pesos for consolidation purposes.

Argentina’s legal regime and economy are susceptible to changes that could adversely affect our Argentinean operations.

The measures taken by the Argentine government to address the Argentine economic crisis of 2002, severely affected the Argentine financial system’s stability and have had a materially negative impact on its reputation. For example, on April 16, 2011, the Argentine government announced its intention to expropriate YPF, S.A. (“YPF”), the largest oil and gas company in Argentina, which is controlled by Repsol YPF, S.A., a Spanish integrated oil and gas company. The Argentine government submitted a bill to Congress to approve the expropriation of 51% of YPF’s capital stock. The nationalized capital stock would be distributed as follows: 49% to certain Argentine provinces and the remaining 51% to the national government. Recently, Argentina has been increasing restrictions on foreign exchange transactions. If Argentina were to experience a new fiscal and economic crisis, the Argentine government could implement economic and political measures, which could adversely impact our business. The unpredictability, timing and scope of possible measures enacted by the Argentine government, including expropriations, higher taxes and exchange control measures, could adversely affect our Argentinean operations and our future results of operations.

Since January 2006, the Argentine government has adopted different methods to directly and indirectly regulate the prices of various consumer goods, including bottled beer, in an effort to slow inflation. Additionally, the present measures taken by the Argentine government to control the Trade Balance and the limited access to foreign currencies, have negatively impacted the free import of goods and the repatriation of profits. For example, in 2011, a new Argentine policy with respect to imports was put in place which mandates that a company can import goods only if it can demonstrate a flow of exports to balance trading. This new policy may affect our Argentine operations as we regularly import raw materials and finished products into Argentina. Moreover, another Argentine policy was put in place during 2012 in relation to price control by the Secretariat of Interior Commerce, and in 2013 informal measures were implemented to freeze prices, which has affected pricing in Argentina and may continue to do so in the future.

We cannot assure you that these and other measures enacted by the Argentine government will not have an adverse effect on our Argentine operations.

RISKS RELATING TO OUR BUSINESS

Fluctuations in the cost of our raw materials may adversely impact our profitability if we are unable to pass those costs along to our customers.

We purchase malt, rice and hops for beer, sugar for soft drinks, grapes for wine and packaging material from local producers or in the international market. The prices of those commodities are subject to volatility caused by market conditions, and have experienced significant fluctuations over time and are determined by the global supply and demand for those commodities as well as other factors, such as fluctuations in exchange rates, over which we have no control.

Although we historically have been able to implement price increases in response to increases in raw material costs and thus have not sought to hedge our exposure to increases in raw material prices, we cannot assure you that our ability to recover increases in the cost of raw materials will continue in the future. In particular, where raw material price fluctuations do not keep with market conditions in the markets in which we operate, we may have limited capacity to raise prices to offset increases in costs. If we are unable to increase prices in response to increases in raw material costs, any future increases in raw material costs may reduce our margins and profitability if we are not able to offset such cost increases through efficiency improvements or other measures.

We are controlled by one majority shareholder, whose interests may differ from those of holders of our ADSs, and this shareholder may take actions which adversely affect the value of a holder's ADSs or common stock.

As of March 31, 2013, Inversiones y Rentas S.A. ("IRSA") a Chilean closed corporation, directly and indirectly owned 66.1% of our shares of common stock. Accordingly, IRSA has the power to control the election of most members of our board of directors and its interests may differ from those of the holders of our ADSs. IRSA also has significant influence in determining the outcome of any corporate transaction submitted to our shareholders for approval, including mergers, consolidations, the sale of all or substantially all of our assets and going-private transactions. In addition, actions by IRSA with respect to the disposition of the shares of common stock that it owns, or the perception that such actions may occur, may adversely affect the trading prices of our ADSs or common stock.

Competition in the Chilean beer market may erode our market share and lower our profitability.

In 2012, our market share of the Chilean beer market by volume was approximately 78.8%. Our largest competitor in the Chilean beer market by volume is Cervecería Chile S.A. ("Cervecería Chile"), a subsidiary of Quilmes Industrial S.A. ("Quilmes"), the largest Argentine brewer, and a subsidiary of Companhia de Bebidas das Américas ("AmBev") since January 2007. AmBev and Interbrew merged in 2004, creating Inbev N.V./S.A. which merged with Anheuser Busch Cos. Inc. on November 18, 2008, forming Anheuser-Busch InBev ("AB InBev"). In 2012, AB InBev announced the acquisition of Modelo's Group, but such acquisition is still pending regulatory approvals. We estimate that Cervecería Chile had a market share by volume in Chile of approximately 14% in 2012. Often, Cervecería Chile has engaged in aggressive price discounting. If Cervecería Chile were to amplify its aggressive price discounting practice in the future, we cannot assure you, given the current environment that any such discounting or other competitive activities will not have a material adverse impact on our profitability or market share.

Additionally, if business conditions in the beer market continue to be relatively favorable in Chile, more enterprises may attempt to enter the Chilean beer market, either by producing beer locally or through imports. While we expect per capita beer consumption in Chile to continue to increase, mitigating the effect of competition, the entry into the market of additional competitors could further erode our market share or lead to price discounting.

Our beer brands in Chile may face increased competition from other alcoholic beverages such as wine and spirits, as well as from non-alcoholic beverages such as soft drinks.

Beer consumption in Chile may be influenced by changes in domestic wine, spirits and/or other non-alcoholic beverages' relative prices. Increases in domestic wine prices have tended to lead to increases in beer consumption, while reductions in wine prices have tended to reduce or slow the growth of beer consumption. As a result of our lower market share in the Chilean wine, spirits and soft drinks markets as compared to our market share in the Chilean beer market, we expect that our profitability would be adversely affected if beverage consumers were to shift their consumption from beer to either wine, spirits or soft drinks.

Quilmes dominates the beer market in Argentina and we may not be able to maintain our current market share.

In Argentina, we face competition from Quilmes and from Cervecería Argentina S.A. Isenbeck ("CASA Isenbeck"), a former subsidiary of Warsteiner Brauerei Hans Cramer GmbH & Co. ("Warsteiner"), which was acquired by SABMiller plc on November 24, 2010. We estimate that in 2012 Quilmes had a market share of 73.8% and CASA Isenbeck had a market share of 3.1%. We estimate that our market share of the Argentine beer market was 23.1% in 2012. As a result of its dominant position in Argentina, Quilmes' large size enables it to benefit from economies of scale in the production and distribution of beer throughout Argentina. Therefore, we cannot assure you that we will be able to grow or maintain our current market share of the Argentine beer market.

Consolidation in the beer industry may impact our market share.

In 2005, SABMiller plc merged with Grupo Empresarial Bavaria, a Colombian brewer with operations in Colombia, Peru, Ecuador and Panama, forming the then second-largest brewer in the world. In 2010 SABMiller Plc acquired CASA Isenbeck, the third-largest brewer in Argentina.

In March 2004, AmBev and Interbrew announced an agreement to merge, creating the world's largest brewer under the name InBev. Additionally, in January 2007, AmBev assumed control of Quilmes. Inbev and Anheuser-Busch merged in November 2008, creating AB Inbev, the world's global beer leader. In Chile, Quilmes sells its beer through Cervecería Chile, which had a market share of approximately 14% in 2012, and in Argentina it had a market share of approximately 74% in 2012. In 2012, AB Inbev announced the acquisition of Modelo's Group, but such acquisition is still pending regulatory approvals. As a consequence of the above referenced merger, the brand Budweiser, whose production and distribution license contract was granted to Compañía Cervecerías Unidas Argentina S.A. ("CCU Argentina") until 2025, belongs to a competitor. Cervecera CCU Chile Ltda. ("CCU Chile") has a distribution contract until 2015 to distribute Budweiser in Chile. We cannot assure you that the contracts will be renewed.

Consolidation in the beer industry has resulted in larger and more competitive participants, which could change the current market conditions under which we operate.

Restrictions in the gas supply from Argentina have increased our energy costs, and higher oil prices have increased our distribution expenses.

Since 2005, the Argentine government has restricted gas exports to Chile due to domestic supply problems. This has increased the cost of operating our beer production plants in Chile and Argentina, as well as our soft drinks plants in Chile. Gas supplies have become stable at the current time, reducing the risk of further cost increases. However, these restrictions have increased electrical power costs. Because our boilers can work with gas or with alternative fuels, such as diesel oil or butane gas, we do not anticipate the need for additional investments. The Chilean government is presently implementing a strategy to diversify energy supply. The construction in Quintero of the first plant to process imported GNL (liquefied natural gas), which started its operation in August 2009, brought relief to the energy issue. However, we cannot assure you that the supply of energy or the cost thereof will not experience further fluctuations as a result of these policies. Oil price increases may reduce our margins if we are unable to improve efficiencies or increase our prices to offset them.

Changes in the labor market in the countries in which we operate may affect margins in our business.

In 2012, Chile's unemployment rate was relatively low at 6.0%, which had a direct impact on our salary expense given the resulting competition for workers. Additionally, the mining industry's need for a large unqualified workforce has put additional pressure on salary expenses as our business is work-force intensive, particularly in the distribution area. Furthermore, certain propositions to increase the minimum wage in Chile are currently being discussed in the Chilean Congress, and the passage of any such propositions may result in further increases in our salary expenses, which may have an effect on our margins and profitability.

We depend upon the renewal of certain license agreements to maintain our current operations.

Most of our license agreements include certain conditions that must be met during their term, as well as provisions for their renewal at their expiry date. We cannot assure you that such conditions will be fulfilled, and therefore that the agreements will remain in place until their expiration or that they will be renewed, or that any of these contracts will not undergo early termination. Termination of, or failure to renew our existing license agreements could have an adverse impact on our operations.

Consolidation in the supermarket industry may affect our operations.

The Chilean supermarket industry has gone through a consolidation process, increasing the importance and purchasing power of a few supermarket chains. As a result, we may not be able to negotiate favorable prices, which may adversely affect our sales and profitability. The importance of supermarkets to our business operations is disclosed in the discussion of each of our business segments.

Additionally, and despite having insurance coverage, this supermarket chain consolidation has the effect of increasing our exposure to counterparty credit risk such that we have more exposure in the event one of these large customers fails to honor its payment obligations to us for any reason.

Dependence on few suppliers for some important raw materials.

In the case of cans, both in Chile and Argentina we purchase from a single supplier, Rexam, with plants in each country. However cans can also be imported from other Rexam plants or from alternative suppliers in the region. In the case of glass bottles, in Chile, we purchase most of our bottles from a single local supplier, Cristalerías Chile, although there are other glass suppliers in Chile from whom we can purchase and we also import from other suppliers. For Malt we have long term contracts in Chile and in Argentina where we purchase our requirements from Cargill which has two plants in the country. While we have alternatives in procuring our supplies, if we experience disruptions in our supply chain we may not be able to obtain replacement supplies at favorable pricing or advantageous terms, which may adversely affect our results. In the case of one way polyethylene terephthalate resins ("PET"), we purchase from several suppliers located in China, Mexico and the U.S. and in the past we have also bought from Argentina. For hotfill PET, we purchase from Mexico (Indorama).

Water supply is essential to the development of our businesses.

Water is an essential component for beer, soft drinks, mineral and purified water. While we have adopted policies for the responsible and sustainable use of water, a failure in our water supply could negatively affect our sales and profitability.

The supply, production and logistics chain is key to the timely supply of our products to consumer centers.

Our supply, production and logistics chain is crucial for the delivery of our products to consumer centers. An interruption or a significant failure in this chain may negatively affect our results, if the failure is not quickly resolved. An interruption in the chain could be caused by various factors, such as strikes, riots or other factors which are beyond our control.

If we are unable to protect our information systems against data corruption, cyber-based attacks or network security breaches, our operations could be disrupted.

We are increasingly dependent on information technology networks and systems, including the Internet, to process, transmit and store electronic information. In particular, we depend on our information technology infrastructure for digital marketing activities and electronic communications among us and our clients, suppliers and also among our subsidiaries. Security breaches of this infrastructure can create system disruptions, shutdowns or unauthorized disclosure of confidential information. If we are unable to prevent such breaches, our operations could be disrupted, or we may suffer financial damage or loss because of lost or misappropriated information.

Possible restrictions on the sale and promotion of alcoholic beverages and other food products in Chile could adversely affect us.

Senators and congressmen from different political parties have submitted to the Chilean congress proposed bills to restrict the consumption, sale and promotion of alcoholic beverages. The principal modifications proposed in these bills are the incorporation of warnings on product labels of the possible dangers of excessive alcohol consumption on human health, similar to those required in the United States, restrictions on television advertising and a prohibition of alcoholic beverages at sports, cultural or related events.

On March 15, 2012 law 20,580 was enacted by the Chilean congress. This law amended the limit for blood alcohol content while driving reducing the limit from less than 0.5 gr/lt to less than 0.3 gr/lt., which has already had an impact on the level of consumption of alcoholic beverages and consequently our business.

If further proposed bills are passed, or other regulations restricting the sale of non-alcoholic beverages or sweet snacks are enacted, this could affect consumption of our products and, as a consequence, negatively impact our business.

Our production activities depend on our ability to comply with environmental regulations, which may become more stringent in the future and negatively affect our profitability.

The regulation of matters relating to the protection of the environment is not as well developed in Chile and Argentina as in the United States and certain other countries. Accordingly, we anticipate that additional laws and regulations will be enacted over time in these countries with respect to environmental matters. If public authorities issue new and stricter standards, or enforce or interpret existing laws and regulations in a more restrictive manner, we may be forced to make expenditures to comply with such new rules, which could result in higher overall production costs and negatively affect our profitability.

Our businesses are taxed with different duties, particularly with excise taxes on the consumption of alcoholic and non-alcoholic beverages.

The Argentine excise tax is 8.7% for beer, and the Chilean excise tax is 15% for beer and wine, 27% for spirits, and 13% for carbonated softdrinks beverages and nectars and juices. An increase in the rate of these or any other tax could negatively affect our sales and profitability.

Chilean peso fluctuations may affect our profitability.

Because we purchase some of our supplies at prices set in U.S. dollars, and export wine in U.S. dollars, euros and pounds, we are exposed to foreign exchange risks that may adversely affect our financial condition and results of operations. Therefore, any future changes in the value of the Chilean peso against said currencies would affect the revenues of our wine export business, as well as the cost of several of our raw materials, especially in the beer and soft drink businesses where raw materials are purchased in U.S. dollars. The effect of the exchange rate variation on export revenues would have an inverse effect on the cost of raw materials expressed in Chilean peso terms.

Catastrophic events in the markets in which we operate could have a material adverse effect on our financial condition.

Natural disasters, climate change, terrorism, pandemics, strikes or other catastrophic events could impair our ability to manufacture, distribute or sell our products. Failure to take adequate steps to mitigate the likelihood or potential impact of such events, or to manage such events effectively if they occur, could adversely affect our sales volume, cost of raw materials, earnings and financial results. For example, on February 27, 2010, an 8.8 magnitude earthquake struck central Chile, followed by a subsequent tsunami. The earthquake epicenter was located 200 miles southwest of Santiago and 70 miles north of Concepción, Chile's second largest city. A future earthquake, tsunami or other natural disaster could have a significant effect on our business, results of operations and financial condition. See "Item 5: Operating and Financial Review and Prospects-Overview-Impact of the February 27, 2010 Earthquake and Tsunami."

If we are unable to maintain the image and quality of our products our financial results may suffer.

The image and quality of our products is essential for our success and growth. Problems with product quality could tarnish the reputation of our products and may adversely affect our revenues.

If we are unable to finance our operations we may be adversely affected.

A global liquidity crisis or an increase in financial interest rates may eventually limit our ability to obtain the cash needed to fulfill our commitments. Sales could also be affected by a global disruption if consumption decreases sharply, placing stress on our cash position.

RISKS RELATING TO OUR ADSs

The price of our ADSs and the U.S. dollar value of any dividends will be affected by fluctuations in exchange conditions.

Our ADSs trade in U.S. dollars. Fluctuations in the exchange rate between Chilean and Argentine currencies and the U.S. dollar are likely to affect the market price of our ADSs. For example, since our financial statements are reported in Chilean pesos, a decline in the value of the Chilean peso against the dollar would reduce our earnings as reported in U.S. dollars. Any dividend we may pay in the future would be denominated in Chilean pesos. A decline in the value of the Chilean peso against the U.S. dollar would reduce the U.S. dollar equivalent of any such dividend. Additionally, in the event of a dividend or other distribution, if exchange rates fluctuate during any period of time when the ADS depositary cannot convert a foreign currency into dollars, a holder of our ADSs may lose some of the value of the distribution. Also, since dividends in Chile are subject to withholding taxes, which we retain until the following year when the exact amount to be paid is determined, if part of the retained amount is refunded to the shareholders, the amount received by holders of our ADSs would be subject to exchange rate fluctuations between the two dates.

A holder of ADSs may be subject to certain risks due to the fact that holders of our ADSs do not hold shares of our common stock directly.

In order to vote at shareholders' meetings, if a holder is not registered on the books of the ADS depository, the holder of our ADSs is required to transfer its ADSs for a certain number of days before a shareholders' meeting into a blocked account established for that purpose by the ADS depository. Any ADSs transferred to this blocked account will not be available for transfer during that time. If a holder of our ADSs is registered on the books of the ADS depository, it must give instructions to the ADS depository not to transfer its ADSs during this period before the shareholders' meeting. A holder of our ADSs must therefore receive voting materials from the ADS depository sufficiently in advance in order to make these transfers or give these instructions. There can be no guarantee that a holder of our ADSs will receive voting materials in time to instruct the ADS depository how to vote. It is possible that a holder of our ADSs will not have the opportunity to exercise a right to vote at all. Additionally, a holder of our ADSs may not receive copies of all reports from us or the ADS depository. A holder of our ADSs may have to arrange with the ADS depository's offices to inspect any reports issued.

Controls on foreign investment and repatriation of investments in Chile may adversely impact a holder of our ADSs ability to obtain and dispose of the shares of our common stock underlying its ADRs.

Equity investments in Chile by persons who are not Chilean residents are generally subject to exchange control regulations that restrict the repatriation of investments and earnings from Chile. Our ADSs are subject to an ADR foreign investment contract among us, the depository and the Central Bank of Chile, which is intended to grant holders of our ADSs and the depository access to Chile's formal exchange market. See "Item 3: Key Information-Selected Financial Data-Exchange Rates." Pursuant to current Chilean law, our ADR foreign investment contract may not be amended unilaterally by the Central Bank of Chile. However, we cannot assure you that additional Chilean restrictions applicable to holders of our ADSs, the disposition of underlying shares of our common stock or the repatriation of the proceeds from the disposition of the underlying common stock could not be imposed in the future, nor can we assess the duration or impact of the restrictions if imposed. If for any reason, including changes to our ADR foreign investment contract or Chilean law, the depository is unable to convert Chilean pesos to U.S. dollars, investors would receive dividends or other distributions in Chilean pesos. Transferees of shares of our common stock withdrawn from the ADR facility will not be entitled to access the formal exchange market unless the withdrawn shares are redeposited with the depository. See "Item 10: Additional Information - Exchange Controls in Chile."

The rights of a holder of our ADSs to force us to purchase its underlying shares of our common stock pursuant to Chilean corporate law upon the occurrence of certain events may be limited.

In accordance with Chilean laws and regulations, any shareholder that votes against certain corporate actions or does not attend the meeting at which certain corporate actions are approved and communicates to the corporation its dissent in writing within the time period established by law may exercise a withdrawal right, tender its shares to the company and receive cash compensation for its shares, provided that the shareholder exercises its rights within the prescribed time periods. See "Item 10: Additional Information - Memorandum and Articles of Association - Rights, preferences and restrictions regarding shares." In our case, the actions triggering a right of withdrawal include the approval of:

- our transformation into a different type of legal entity;
- our merger with and/or into another company;
- the transfer of 50% or more of our corporate assets, whether or not liabilities are also transferred, to be determined according to the balance sheet of the previous fiscal year, or the proposal or amendment of any business plan that contemplates the transfer of assets exceeding said percentage; the disposition of 50% or more of the corporate assets of a subsidiary, which represents at least 20% of the assets of the corporation, as well as any disposition of shares which results in the parent company losing its status as controller;

- the granting of real or personal guarantees to secure third-party obligations exceeding 50% of the corporate assets except when the third party is a subsidiary of the company (in which case approval of the board of directors will suffice);
- the creation of preferences for a series of shares or the increase, extension or reduction in the already existing ones. In this case, only dissenting shareholders of the affected series shall have the right to withdraw;
- curing certain formal defects in our charter which otherwise would render it null and void or any modification of our by-laws that grant this right; and
- other cases provided for by statute or in our bylaws, if any.

In addition, shareholders may withdraw if a person becomes the owner of two-thirds or more of the outstanding shares of the corporation as a consequence of a share acquisition and such person does not make a tender offer for the remaining shares within 30 days from the date of such acquisition.

Minority shareholders are also granted the right to withdraw when the controller acquires more than 95% of the shares of an open stock corporation.

Our bylaws do not provide for additional circumstances under which shareholders may withdraw.

Because of the absence of legal precedent as to whether a shareholder that has voted both for and against a proposal, such as the depositary of our ADSs, may exercise withdrawal rights with respect to those shares voted against the proposal, there is doubt as to whether a holder of ADSs will be able to exercise withdrawal rights either directly or through the depositary for the shares of our common stock represented by its ADSs. Accordingly, for a holder of our ADSs to exercise its appraisal rights, it may be required to surrender its ADRs, withdraw the shares of our common stock represented by its ADSs, and vote the shares against the proposal.

Preemptive rights to purchase additional shares of our common stock may be unavailable to holders of our ADSs in certain circumstances and, as a result, their ownership interest in us may be diluted.

The *Ley sobre Sociedades Anónimas N° 18,046* and the *Reglamento de Sociedades Anónimas*, which we refer to in this document collectively as the “Chilean Corporations Act”, requires us, whenever we issue new shares for cash, to grant preemptive rights to all holders of shares of our common stock, including shares of our common stock represented by ADSs, giving those holders the right to purchase a sufficient number of shares to maintain their existing ownership percentage. We may not be able to offer shares to holders of our ADSs pursuant to preemptive rights granted to our shareholders in connection with any future issuance of shares unless a registration statement under the Securities Act is effective with respect to those rights and shares, or an exemption from the registration requirements of the Securities Act is available.

We intend to evaluate at the time of any future offerings of shares of our common stock the costs and potential liabilities associated with any registration statement as well as the indirect benefits to us of enabling U.S. owners of our ADSs to exercise preemptive rights and any other factors that we consider appropriate at the time, before making a decision as to whether to file such a registration statement. We cannot assure you that any such registration statement would be filed.

To the extent a holder of our ADSs is unable to exercise its preemptive rights because a registration statement has not been filed, the depositary will attempt to sell the holder’s preemptive rights and distribute the net proceeds of the sale, net of the depositary’s fees and expenses, to the holder, provided that a secondary market for those rights exists and a premium can be recognized over the cost of the sale. A secondary market for the sale of preemptive rights can be expected to develop if the subscription price of the shares of our common stock upon exercise of the rights is below the prevailing market price of the shares of our common stock. Nonetheless, we cannot assure you that a secondary market in preemptive rights will develop in connection with any future issuance of shares of our common stock or that if a market develops, a premium can be recognized on their sale. Amounts received in exchange for the sale or assignment of preemptive rights relating to shares of our common stock will be taxable in Chile and the United States. See “Item 18: Additional Information - Taxation - Chilean Tax Considerations - Capital Gains” and “- United States Tax Considerations - Capital Gains.” If the rights cannot be sold, they will expire and a holder of our ADSs will not realize any value from the grant of the preemptive rights. In either case, the equity interest of a holder of our ADSs in us will be diluted proportionately.

ITEM 4: Information on the Company

History and Development of the Company

Our current legal and commercial name is Compañía Cervecerías Unidas S.A.. We were incorporated in the Republic of Chile in 1902 as an open stock corporation, following the merger of two existing breweries, one of which traces its origins back to 1850, when Mr. Joaquín Plagemann founded one of the first breweries in Chile in the port of Valparaíso. By 1916, we owned and operated the largest brewing facilities in Chile. Our operations have also included the production and marketing of soft drinks since the beginning of the last century, the bottling and selling of mineral water products since 1960, the production and marketing of wine since 1994, the production and marketing of beer in Argentina since 1995, the production and marketing of pisco since 2003, the production and marketing of sweet snacks products since 2004 and the production and marketing of rum since 2007.

We are subject to a full range of governmental regulation and supervision generally applicable to companies engaged in business in Chile and Argentina. These regulations include labor laws, social security laws, public health, consumer protection and environmental laws, securities laws, and anti-trust laws. In addition, regulations exist to ensure healthy and safe conditions in facilities for the production and distribution of beverages and sweet snacks products.

Our principal executive offices are located at Vitacura 2670, Santiago, Chile. Our telephone number in Santiago is (56-2) 2427-3000, our fax number is (56-2) 2427-3333 and our website is www.ccu.cl. Our authorized representative in the United States is Puglisi & Associates, located at 850 Library Avenue, Suite 204, Newark, Delaware 19715, USA, telephone number (302) 738-6680 and fax number (302) 738-7210. The information on our website is not incorporated by reference into this document.

In 1986, IRSA, our current principal shareholder, acquired its controlling interest in us through purchases of common stock at an auction conducted by a receiver who had assumed control of us following the economic crisis in Chile in the early 80's, which resulted in our inability to meet our obligations to our creditors. IRSA, at that time, was a joint venture between Quiñenco S.A. ("Quiñenco") and the Schörghuber Group from Germany through its wholly owed subsidiary Finance Holding International B.V. ("FHI") of the Netherlands.

To our knowledge, none of our common stock is currently owned by governmental entities. Our common stock is listed and traded on the principal Chilean stock exchanges. See "Item 7: Major Shareholders and Related Party Transactions."

In September 1992, we issued 4,520,582 ADSs, each representing five shares of our common stock, in an international American Depositary Receipt ("ADR") offering. The underlying ADSs were listed and traded on the NASDAQ, until March 25, 1999. Since that date, the ADSs have been listed and traded on the NYSE. On December 20, 2012, the ratio of ADSs to shares of common stock was changed from 1 to 5, to a new ratio of 1 to 2.

In 1994, we diversified our operations both in the domestic and international markets. In that year, we purchased a 48.4% interest in the Chilean wine producer Viña San Pedro S.A. ("VSP", today, "VSPT"). Since December 31, 2008, that interest amounts to 50.0%. In November 1994, we and Buenos Aires Embotelladora S.A. ("BAESA"), (the PepsiCo bottler in Chile at that time) merged to create Embotelladoras Chilenas Unidas S.A. ("ECCUSA"), for the production, bottling, distribution and marketing of soft drinks and mineral water products in Chile. In November 1999, we purchased BAESA's interest in ECCUSA and thereafter have controlled 100% of that company.
