

D. RISK FACTORS

Investing in our shares involves risk. We expect to be exposed to some or all of the risks described below in our future operations. Such risks include, but are not limited to, the risk factors described below. Any of the risk factors described below, as well as additional risks of which we are not currently aware, could also affect our business operations and have a material adverse effect on our business activities, financial condition, results of operations and prospects and cause the value of our shares to decline. Moreover, if and to the extent that any of the risks described below materialize, they may occur in combination with other risks which would compound the adverse effect of such risks on our business activities, financial condition, results of operations and prospects. Investors in our shares and American Depositary Shares (“ADSS”) could lose all or part of their investment.

You should carefully consider the following information in conjunction with the other information contained or incorporated by reference in this document. The sequence in which the risk factors are presented below is not indicative of their likelihood of occurrence or of the potential magnitude of their financial consequences.

Risks Relating to Our Business

We are exposed to the risks of an economic recession, credit and capital markets volatility and economic and financial crisis, which could adversely affect the demand for our products and adversely affect the market price of our Ordinary Shares and ADSS.

We are exposed to the risk of a global recession or a recession in one or more of our key markets, credit and capital markets volatility and an economic or financial crisis, which could result in lower revenue and reduced profit.

Beer, other alcoholic beverage and soft drink consumption in many of the jurisdictions in which we operate is closely linked to general economic conditions, with levels of consumption tending to rise during periods of rising per capita income and fall during periods of declining per capita income. Additionally, per capita consumption is inversely related to the sale price of our products.

Besides moving in concert with changes in per capita income, beer and other alcoholic beverage consumption also increases or decreases in accordance with changes in disposable income.

Currently, disposable income is low in many of the developing countries in which we operate compared to disposable income in more developed countries. Any decrease in disposable income resulting from an increase in inflation, income taxes, the cost of living, unemployment levels, political or economic instability or other factors would likely adversely affect the demand for beer. Moreover, because a relevant portion of our brand portfolio consists of premium beers, our volumes and revenue may be impacted to a greater degree than those of some of our competitors, as some consumers may choose to purchase value or discount brands rather than premium or core brands. For additional information on the categorization of the beer market and our positioning, see “Item 4. Information on the Company–B. Business Overview–2. Principal Activities and Products–Beer.”

Capital and credit markets volatility, such as that experienced in recent years, may result in downward pressure on stock prices and the credit capacity of issuers. Potential changes in social, political, regulatory and economic conditions in the U.S. and the European Union, including changes in policies governing foreign trade and imports, may be significant drivers of capital and credit market volatility. A continuation or worsening of the levels of market disruption and volatility seen in the recent past could have an adverse effect on our ability to access capital, on our business, results of operations and financial condition, and on the market price of our Ordinary Shares and our ADSS.

Our results of operations are affected by fluctuations in exchange rates.

Although we report our consolidated results in U.S. dollars, in 2017, we derived approximately 73% of our revenue from operating companies that have non-U.S. dollar functional currencies (in most cases, in the local currency of the respective operating company). Consequently, any change in exchange rates between our operating companies' functional currencies and the U.S. dollar will affect our consolidated income statement and balance sheet when the results of those operating companies are translated into U.S. dollars for our reporting purposes, as we cannot hedge against translational exposures. Decreases in the value of our operating companies' functional currencies against the U.S. dollar will tend to reduce those operating companies' contributions in dollar terms to our financial condition and results of operations.

During 2017, several currencies, such as the Brazilian real, the Chinese yuan, the Mexican peso, the South African rand, the euro and the Colombian peso, appreciated against the U.S. dollar, which generally weakened during the same period. Our total consolidated revenue was USD 56.4 billion for the year ended 31 December 2017, an increase of USD 10.9 billion compared to the year ended 31 December 2016. The positive impact of favorable currency translation effects on our consolidated revenue in the year ended 31 December 2017 was USD 0.3 billion, primarily as a result of the impact of the currencies listed above.

Significant changes in the value of foreign currencies relative to the U.S. dollar could adversely affect the amounts we record for our foreign assets, liabilities, revenues and expenses, and could have a negative effect on our results of operations and profitability. See "Item 5. Operating and Financial Review-E. Results of Operations-Year Ended 31 December 2017 Compared to the Year Ended 31 December 2016" for further details on the impact of currency translation effects on our results of operations.

In addition to currency translation risk, we incur currency transaction risks whenever one of our operating companies enters into transactions using currencies other than its respective functional currency, including purchase or sale transactions and the issuance or incurrence of debt. Although we have hedging policies in place to manage commodity price and foreign currency risks to protect our exposure to currencies other than our operating companies' functional currencies, there can be no assurance that such policies will be able to successfully hedge against the effects of such foreign exchange exposure, particularly over the long term.

Much of our debt is denominated in U.S. dollars, while a significant portion of our cash flows is denominated in currencies other than the U.S. dollar. From time to time we enter into financial instruments to mitigate currency risk, but these transactions and any other efforts taken to better match the effective currencies of our liabilities to our cash flows could result in increased costs. See "Item 11. Quantitative and Qualitative Disclosures About Market Risk-Market Risk, Hedging and Financial Instruments", note 29 to our audited consolidated financial statements as of 31 December 2017 and 2016, and for the three years ended 31 December 2017, for further details on our approach to hedging commodity price and foreign currency risk.

Changes in the availability or price of raw materials, commodities and energy could have an adverse effect on our results of operations.

A significant portion of our operating expenses is related to raw materials and commodities, such as malted barley, wheat, corn grits, corn syrup, rice, hops, flavored concentrate, fruit concentrate, sugar, sweetener, water, glass, polyethylene terephthalate ("PET") and aluminum bottles, aluminum or steel cans and kegs, aluminum can stock, labels, plastic crates, metal and plastic closures, folding cartons, cardboard products and plastic films.

The supply and price of raw materials and commodities used for the production of our products can be affected by a number of factors beyond our control, including the level of crop production around the world, export demand, quality and availability of supply, speculative movements in the raw materials or commodities markets, currency fluctuations, governmental regulations and legislation affecting agriculture, trade agreements among producing and consuming nations, adverse weather conditions, natural disasters, economic factors affecting growth decisions, political developments, various plant diseases and pests.

We cannot predict future availability or prices of the raw materials or commodities required for our products. The markets in certain raw materials or commodities have experienced and may in the future experience shortages and significant price fluctuations, including as a result of unexpected increases in tariffs on such raw materials and commodities. The foregoing may affect the price and availability of ingredients that we use to manufacture our products, as well as the cans and bottles in which our products are packaged. We may not be able to increase our prices to offset these increased costs or increase our prices without suffering reduced volume, revenue

and operating income. To some extent, derivative financial instruments and the terms of supply agreements can protect against increases in materials and commodities costs in the short term. However, derivatives and supply agreements expire and upon expiry are subject to renegotiation and therefore cannot provide complete protection over the medium or longer term. To the extent we fail to adequately manage the risks inherent in such volatility, including if our hedging and derivative arrangements do not effectively or completely hedge against changes in commodity prices, our results of operations may be adversely impacted. In addition, it is possible that the hedging and derivative instruments we use to establish the purchase price for commodities in advance of the time of delivery may lock us into prices that are ultimately higher than actual market prices at the time of delivery. See “Item 11. Quantitative and Qualitative Disclosures About Market Risk—Market Risk, Hedging and Financial Instruments” for further details on our approach to hedging commodity price risk.

The production and distribution of our products require material amounts of energy, including the consumption of oil-based products, natural gas, biomass, coal and electricity. Energy prices have been subject to significant price volatility in the recent past and may be again in the future. High energy prices over an extended period of time, as well as changes in energy taxation and regulation in certain geographies, may result in a negative effect on operating income and could potentially challenge our profitability in certain markets. There is no guarantee that we will be able to pass along increased energy costs to our customers in every case.

The production of our products also requires large amounts of water, including water consumption in the agricultural supply chain. Changes in precipitation patterns and the frequency of extreme weather events may affect our water supply and, as a result, its physical operations. Water may also be subject to price increases in certain areas and changes in water taxation and regulation in certain geographies may result in a negative effect on operating income which could potentially challenge our profitability in certain markets. There is no guarantee that we will be able to pass along increased water costs to our customers in every case. See “—Climate change or other environmental concerns, or legal, regulatory or market measures to address climate change or other environmental concerns, may negatively affect our business or operations, including the availability of key production inputs.”

We may not be able to obtain the necessary funding for our future capital or refinancing needs and may face financial risks due to our level of debt, uncertain market conditions and as a result of the potential downgrading of our credit ratings.

We may be required to raise additional funds for our future capital needs or to refinance our current indebtedness through public or private financing, strategic relationships or other arrangements. There can be no assurance that the funding, if needed, will be available on attractive terms, or at all.

Following the combination with SAB, the portion of our consolidated balance sheet represented by debt is significantly higher as compared to former AB InBev’s historical position and we expect it to remain so for some time. To fund the combination with SAB, former AB InBev entered into, among others, the following transactions:

- in January 2016, our subsidiary Anheuser-Busch InBev Finance Inc. (“**ABIFI**”) issued bonds in debt capital markets offerings resulting in aggregate net proceeds of approximately USD 47.0 billion; and
- in March 2016, former AB InBev issued bonds in a debt capital markets offering under our Euro Medium-Term Notes Programme (“**EMTN Programme**”) resulting in aggregate net proceeds of approximately EUR 13.1 billion, to which we are the successor-in-interest.

Since the combination with SAB we have undertaken further debt issuance and debt liability management exercises; see “Item 5. Operating and Financial Review—G. Liquidity and Capital Resources—Funding Sources—Borrowings” for more information on our financing activities .

Our continued increased level of debt could have significant consequences, including:

- increasing our vulnerability to general adverse economic and industry conditions;

- limiting our ability to fund future working capital and capital expenditures, to engage in future acquisitions or development activities or to otherwise realize the value of our assets and opportunities fully;
- limiting our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- impairing our ability to obtain additional financing in the future, or requiring us to obtain financing involving restrictive covenants;
- requiring us to issue additional equity (possibly under unfavorable conditions), which could dilute our existing shareholders' equity; and
- placing us at a competitive disadvantage compared to our competitors that have less debt.

In addition, ratings agencies may downgrade our credit ratings below their current levels, including as a result of the incurrence of financial indebtedness related to the combination with SAB. In September 2015, Moody's Investors Service changed former AB InBev's outlook to "Developing," citing downward rating pressure following completion of the combination with SAB due to higher leverage and certain integration risks. In May 2016, Moody's Investors Service concluded its ratings review and assigned a definitive rating of A3 (stable outlook) to former AB InBev's long-term debt obligations. As of the date of this annual report, our credit rating from S&P Global Ratings was A- for long-term obligations and A-2 for short-term obligations, with a Negative outlook, and our credit rating from Moody's Investors Service was A3 for long-term obligations and P-2 for short-term obligations, with a stable outlook. Any credit rating downgrade could materially adversely affect our ability to finance our ongoing operations and our ability to refinance the debt incurred to fund the combination with SAB, including by increasing our cost of borrowing and significantly harming our financial condition, results of operations and profitability, including our ability to refinance our other existing indebtedness.

In recent years, we have given priority, among other things, to deleveraging, with surplus free cash flow being used to reduce the level of outstanding debt. In light of the increased debt we assumed in connection with the combination with SAB, deleveraging remains a priority and may restrict the amount of dividends we are able to pay.

Our ability to repay and renegotiate our outstanding indebtedness will depend upon market conditions. In recent years, the global credit markets experienced significant price volatility, dislocations and liquidity disruptions that caused the cost of debt financings to fluctuate considerably. The markets also put downward pressure on stock prices and credit capacity for certain issuers without regard to those issuers' underlying financial strength. Reflecting concern about the stability of the financial markets generally and the strength of counterparties, many lenders and institutional investors reduced and, in some cases, ceased to provide funding to borrowers. If such uncertain conditions persist, our costs could increase beyond what is anticipated. Such costs could have a material adverse impact on our cash flows, results of operations or both. In addition, an inability to refinance all or a substantial amount of our debt obligations when they become due, or more generally a failure to raise additional equity capital or debt financing or to realize proceeds from asset sales when needed, would have a material adverse effect on our financial condition and results of operations.

Our results could be negatively affected by increasing interest rates.

We use issuances of debt and bank borrowings as a source of funding and we carry a significant level of debt. Nevertheless, pursuant to our capital structure policy, we aim to optimize shareholder value through cash flow distribution to us from our subsidiaries, while maintaining an investment-grade rating and minimizing cash and investments with a return below our weighted average cost of capital. There can be no assurance that we will be able to pursue a similar capital structure policy in the future.

Some of the debt we have issued or incurred was issued or incurred at variable interest rates, which exposes us to changes in such interest rates. As of 31 December 2017, after certain hedging and fair value adjustments, USD 7.7 billion, or 6.6%, of our interest-bearing financial liabilities (which include loans, borrowings and bank

overdrafts) bore a variable interest rate, while USD 108.8 billion, or 93.4%, bore a fixed interest rate. Moreover, a significant part of our external debt is denominated in non-U.S. dollar currencies, including the Australian dollar, the Brazilian real, the Canadian dollar, the euro, the pound sterling, the South African rand and the South Korean won. Although we enter into interest rate swap agreements to manage our interest rate risk, and also enter into cross-currency interest rate swap agreements to manage both our foreign currency risk and interest-rate risk on interest-bearing financial liabilities, there can be no assurance that such instruments will be successful in reducing the risks inherent in exposures to interest rate fluctuations. See “Item 11. Quantitative and Qualitative Disclosures About Market Risk—Market Risk, Hedging and Financial Instruments”, note 29 to our audited consolidated financial statements as of 31 December 2017 and 2016, and for the three years ended 31 December 2017 for further details on our approach, currency and interest rate risk.

Certain of our operations depend on independent distributors or wholesalers to sell our products, and we may be unable to replace distributors or acquire interests in wholesalers or distributors. In addition, we may be adversely impacted by the consolidation of retailers.

Certain of our operations are dependent on government-controlled or privately owned but independent wholesale distributors for distribution of our products for resale to retail outlets. See “Item 4. Information on the Company—B. Business Overview—7. Distribution of Products” and “Item 4. Information on the Company—B. Business Overview—11. Regulations Affecting Our Business” for further information in this respect. There can be no assurance as to the financial affairs of such distributors or that these distributors, who often act both for us and our competitors, will not give our competitors’ products higher priority, thereby reducing their efforts to sell our products.

In the United States, for instance, we sell the vast majority of our beer to independent wholesalers for distribution to retailers and ultimately consumers. As independent companies, wholesalers make their own business decisions that may not always align themselves with our interests. If our wholesalers do not effectively distribute our products, our financial results could be adversely affected.

In addition, contractual restrictions and the regulatory environment of many markets may make it very difficult to change distributors and, in some markets, we may be prevented from acquiring interests in wholesalers or distributors (for example, see “—Our failure to satisfy our obligations under the SAB settlement agreement could adversely affect our financial condition and results of operations.”). In certain cases, poor performance by a distributor or wholesaler is not a sufficient reason for replacement. Our consequent inability to replace unproductive or inefficient distributors could adversely impact our business, results of operations and financial condition.

Moreover, the retail industry, particularly in Europe, North America and other countries in which we operate, continues to consolidate, resulting in larger retailers with increased purchasing power, which may affect our competitiveness in these markets. Larger retailers may seek to improve their profitability and sales by asking for lower prices or increased trade spending. The efforts of retailers could result in reduced profitability for the beer industry as a whole and indirectly adversely affect our financial results.

If we do not successfully comply with applicable anti-corruption laws, export control regulations and trade restrictions, we could become subject to fines, penalties or other regulatory sanctions, as well as to adverse press coverage, which could cause our reputation, our sales or our profitability to suffer.

We operate our business and market our products in emerging markets that, as a result of political and economic instability, a lack of well-developed legal systems and potentially corrupt business environments, present us with political, economic and operational risks. Although we are committed to conducting business in a legal and ethical manner in compliance with local and international statutory requirements and standards applicable to our business, there is a risk that employees or representatives of our subsidiaries, affiliates, associates, joint ventures or other business interests may take actions that violate applicable laws and regulations that generally prohibit the making of improper payments to foreign government officials for the purpose of obtaining or keeping business, including laws relating to the 1997 OECD Convention on Combating Bribery of Foreign Public Officials in International Business Transactions, the U.S. Foreign Corrupt Practices Act (the “FCPA”), the U.K. Bribery Act and Brazilian Law No. 12,846/13 (an anti-bribery statute that was enacted in January 2014). Such actions could expose us to potential liability and the costs associated with investigating potential misconduct. In addition, any press coverage associated with misconduct under these laws and regulations, even if unwarranted or baseless, could damage our reputation and sales.

In respect of the FCPA, we cooperated with the U.S. Securities and Exchange Commission (the “SEC”) and the U.S. Department of Justice in connection with their investigations into the relationships of our current and former affiliates in India, including our former non-consolidated Indian joint venture, which we exited during 2015. See “Item 8. Financial Information–A. Consolidated Financial Statements and Other Financial Information–Legal and Arbitration Proceedings.” On 8 June 2016, the U.S. Department of Justice notified us that it was closing its investigation and would not be pursuing enforcement action in this matter. On 28 September 2016, we entered into a settlement agreement with the SEC, pursuant to which we agreed to pay an aggregate amount (including disgorgement and penalties) of approximately USD 6 million to the SEC and assume certain ongoing reporting and cooperation obligations.

In Brazil, governmental authorities are currently investigating consulting services provided by a firm part-owned by a former elected government official who has been convicted of corruption and racketeering by Brazil’s highest court. Our subsidiary, Ambev, has, in the past, hired the services of this consulting firm. We have reviewed our internal controls and compliance procedures in relation to these services and have not identified any evidence of misconduct.

As a global brewer, we also operate our business and market our products in countries that may be subject to export control regulations, embargoes, economic sanctions and other forms of trade restrictions imposed by the United States, the European Union, the United Nations and other participants in the international community. For example, we indirectly own subsidiaries in Russia and Ukraine, the net combined revenues of which accounted for less than 1.0% of our total revenues in 2017. We do not sell directly into the Crimea region but are aware that indirect shipments may occur. In addition, certain of our associates also operate their business and market their products in countries subject to trade restrictions. For example, our associate Anadolu Efes Biracilik ve Malt Sanayii AŞ (“**Anadolu Efes**”) has an indirect interest in a Syrian soft drinks bottler and has limited distribution to Iran and Crimea. Furthermore, our subsidiary Ambev operates a joint venture in Cuba with the Government of Cuba. See “Our subsidiary Ambev operates a joint venture in Cuba, in which the Government of Cuba is its joint venture partner. Cuba remains subject to comprehensive economic and trade sanctions by the United States and Ambev’s operation in Cuba may adversely affect our reputation and the liquidity and value of our securities.”

If we or any of our associates fail to comply with economic sanctions or trade restrictions imposed by the United States, the European Union or other national or international authorities that are applicable to us or them, we may be exposed to potential legal liability and the costs associated with investigating potential misconduct, as well as potential reputational damage. Moreover, new or expanded export control regulations, economic sanctions, embargoes or other forms of trade restrictions imposed on Russia, Ukraine, Syria, Cuba or other countries in which we or our associates do business may curtail our existing business and may result in serious economic challenges in these geographies, which could have a material adverse effect on our and our subsidiaries’ operations, and may result in impairment charges on goodwill or other intangible assets.

Competition and changing consumer preferences could lead to a reduction in our margins, increase costs and adversely affect our profitability.

We compete with both brewers and other drinks companies and our products compete with other beverages. Globally, brewers, as well as other players in the beverage industry, compete mainly on the basis of brand image, price, quality, distribution networks and customer service. Consolidation has significantly increased the capital base and geographic reach of our competitors in some of the markets in which we operate, and competition is expected to increase further as the trend towards consolidation among companies in the beverage industry continues. Consolidation activity has also increased along our distribution channels—in the case of both on-trade points of sale, such as pub companies, and off-trade retailers, such as supermarkets. Such consolidation could increase the purchasing power of players in our distribution channels. For more information, see “Certain of our operations depend on independent distributors or wholesalers to sell our products, and we may be unable to replace distributors or acquire interests in wholesalers or distributors. In addition, we may be adversely impacted by the consolidation of retailers.”

Concurrently, competition in the beverage industry is expanding and the market is becoming more fragmented, complex and sophisticated as consumer preferences and tastes change. Such preferences can change rapidly and in unpredictable ways due to a variety of factors, including changing levels of health consciousness among target consumers (including concerns about obesity and alcohol consumption), changes in prevailing economic conditions, changes in the demographic make-up of target consumers, changing social trends and attitudes regarding alcoholic beverages, changes in travel, vacation or leisure activity patterns, negative publicity resulting from regulatory action or litigation against us or comparable companies or a downturn in economic conditions. Consumers also may begin to prefer the products of competitors or may generally reduce their demand for products in the category.

Competition with brewers and producers of alternative beverages in our various markets and an increase in the purchasing power of players in our distribution channels could cause us to reduce pricing, increase capital investment, increase marketing and other expenditures and/or prevent us from increasing prices to recover higher costs, thereby causing us to reduce margins or lose market share. Further, we may not be able to anticipate or respond adequately either to changes in consumer preferences and tastes or to developments in new forms of media and marketing. Any of the foregoing could have a material adverse effect on our business, financial condition and results of operations. Innovation faces inherent risks, and the new products we introduce may not be successful, while competitors may be able to respond more quickly than we can to emerging trends, such as the increasing consumer preference for “craft beers” produced by similar microbreweries.

Additionally, the absence of level playing fields in some markets and the lack of transparency, or even certain unfair or illegal practices, such as tax evasion and corruption, may skew the competitive environment in favor of our competitors with material adverse effects on our profitability or ability to operate.

The ability of our subsidiaries to distribute cash upstream may be subject to various conditions and limitations.

To a large extent, we are organized as a holding company and our operations are carried out through subsidiaries. Our domestic and foreign subsidiaries’ and affiliated companies’ ability to upstream or distribute cash (to be used, among other things, to meet our financial obligations) through dividends, intercompany advances, management fees and other payments is, to a large extent, dependent on the availability of cash flows at the level of such domestic and foreign subsidiaries and affiliated companies and may be restricted by applicable laws and accounting principles. In particular, 26.4% (USD 14.9 billion) of our total revenue of USD 56.4 billion in 2017 came from our Brazilian listed subsidiary, Ambev, which is not wholly owned and is listed on the São Paulo Stock Exchange and the New York Stock Exchange. In addition to the above, some of our subsidiaries are subject to laws restricting their ability to pay dividends or the amount of dividends they may pay. If we are not able to obtain sufficient cash flows from our domestic and foreign subsidiaries and affiliated companies, this could adversely impact our ability to pay dividends, and otherwise negatively impact our business, results of operations and financial condition. See “Item 5. Operating and Financial Review–G. Liquidity and Capital Resources–Transfers from Subsidiaries” for further information in this respect.

An inability to reduce costs could affect profitability.

Our future success and earnings growth depend in part on our ability to be efficient in producing, advertising and selling our products and services. A number of our subsidiaries are in the process of executing a major cost-saving and efficiency program and we are pursuing a number of initiatives to improve operational efficiency. If we fail for any reason to successfully complete these measures and programs as planned or to derive the expected benefits from these measures and programs, there is a risk of increased costs associated with these efforts, delays in benefit realization, disruption to the business, reputational damage or a reduced competitive advantage in the medium term. Failure to generate significant cost savings and margin improvement through these initiatives could adversely affect our profitability and our ability to achieve our financial goals.

We are exposed to developing market risks, including the risks of devaluation, nationalization and inflation.

A substantial proportion of our operations are carried out in developing markets, representing approximately 59.2% of our 2017 revenue, which include Argentina, Bolivia, Brazil, China, Colombia, Ecuador, El Salvador, Honduras, India, Mexico, Mozambique, Nigeria, Paraguay, Peru, Russia, South Africa, Tanzania, Ukraine and Zambia.

Our operations and equity investments in these markets are subject to the customary risks of operating in developing countries, which include political instability or insurrection, external interference, financial risks, changes in government policy, political and economic changes, changes in the relations between countries, actions of governmental authorities affecting trade and foreign investment, regulations on repatriation of funds, interpretation and application of local laws and regulations, enforceability of intellectual property and contract rights, local labor conditions and regulations, lack of upkeep of public infrastructure, potential political and economic uncertainty, application of exchange controls, nationalization or expropriation, empowerment legislation and policy, corrupt business environments, crime and lack of law enforcement. Such factors could affect our results by causing interruptions to our operations or by increasing the costs of operating in those countries or by limiting our ability to repatriate profits from those countries. The financial risks of operating in developing markets also include risks of illiquidity, inflation (for example, Brazil, Argentina, Turkey and Russia have periodically experienced extremely high rates of inflation), devaluation (see “Our results of operations are affected by fluctuations in exchange rates.”) (for example, the Brazilian, Argentine, Colombian, Peruvian, Turkish and several African currencies have been devalued frequently during the last several decades), price volatility, currency convertibility and country default.

These various factors could adversely impact our business, results of operations and financial condition. Moreover, the economies of developing countries are often affected by developments in other developing market countries and, accordingly, adverse changes in developing markets elsewhere in the world could have a negative impact on the markets in which we operate. Due to our geographic mix, these factors could affect us more than our competitors with less exposure to developing markets, and any general decline in developing markets as a whole could impact us disproportionately compared to our competitors.

We rely on the reputation of our brands.

Our success depends on our ability to maintain and enhance the image and reputation of our existing products and to develop a favorable image and reputation for new products. The image and reputation of our products may be reduced in the future and concerns about product quality, even when unfounded, could tarnish the image and reputation of our products. An event, or series of events, that materially damages the reputation of one or more of our brands could have an adverse effect on the value of that brand and subsequent revenues from that brand or business. Restoring the image and reputation of our products may be costly and may not be possible.

Moreover, our marketing efforts are subject to restrictions on the permissible advertising style, media and messages used. In a number of countries, for example, television is a prohibited medium for advertising beer and other alcoholic beverage products, and in other countries, television advertising, while permitted, is carefully regulated. Any additional restrictions in such countries, or the introduction of similar restrictions in other countries, may constrain our brand building potential and thus reduce the value of our brands and related revenues.

Negative publicity, perceived health risks and associated government regulation may harm our business.

In recent years, there has been increased public and political attention directed at the alcoholic beverage and food and soft drinks industries. This attention is the result of a rising health and wellbeing trend that is reshaping the entire food and drinks industry and of fiscal concerns as health costs become an increasingly important component of public finances in some markets. In the long term, this trend represents a risk for our business if it results in the social acceptance of our products being negatively altered.

The global policy framework shaping the regulatory space for our products is the World Health Organization's Global Action Plan for the Prevention and Control of Non-Communicable Diseases (NCDs) 2013-2020, in which the harmful use of alcohol is cited as key risk factor for NCDs and governments are requested to take action to reduce it by at least 10% by 2020 from a 2013 base. The definition of harmful use of alcohol, however, was left to be determined by each government according to its national context. The United Nations' Sustainable Development Goals, approved in September 2015, further reinforced this mandate by urging the nations to strengthen the prevention and treatment of harmful use of alcohol.

The World Health Organization has begun the consultation process needed to issue a new global policy framework on NCDs by 2020. As a result, in the next two years, we are likely to experience an increase in the number of publications and studies debating the health risks associated to harmful consumption of alcohol, as advocates who oppose the current regulatory status quo try to shape the public discussions around the new global policy framework.

We may also be subject to laws and regulations aimed at reducing the affordability or availability of beer in some of our markets. Although public health concerns over harmful consumption of alcohol are frequently cited as the rationale for governments to increase beer taxation, fiscal needs or the lobbying of other alcohol categories are often also drivers. Additional regulatory restrictions on our business, such as those on opening hours or marketing activities (including the marketing or selling of beer at sporting events), may cause the social acceptability of beer to decline significantly and consumption trends to shift away from it, which would have a material adverse effect on our business, financial condition and results of operations.

Moreover, key brand names are used by us, our subsidiaries, associates and joint ventures, and are licensed to third-party brewers. To the extent we or one of our subsidiaries, associates, joint ventures or licensees are subject to negative publicity, and the negative publicity causes consumers and customers to change their purchasing patterns, it could have a material adverse effect on our business, results of operations, cash flows or financial condition. As a significant portion of our operations occur in developing and growth markets, there is a greater risk that we may be subject to negative publicity, in particular in relation to environmental issues, labor rights and local work conditions. Negative publicity that materially damages the reputation of one or more of our brands could have an adverse effect on the value of that brand and subsequent revenues from that brand or business, which could adversely impact our business, results of operations, cash flows and financial condition.

Climate change or other environmental concerns, or legal, regulatory or market measures to address climate change or other environmental concerns, may negatively affect our business or operations, including the availability of key production inputs.

There is a growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather and precipitation patterns and the frequency and severity of extreme weather and natural disasters. In the event that such climate change has a negative effect on agricultural productivity, we may be subject to decreased availability or less favorable pricing for certain agricultural commodities necessary for our products, such as barley, hops, sugar and corn. Climate change may also subject us to water scarcity and quality risks due to the large amounts of water required to produce our products, including water consumed in the agricultural supply chain. In the event that climate change causes water over-exploitation or has a negative effect on water availability or quality, the price of water may increase in certain areas and certain jurisdictions may enact unfavorable changes to applicable water-related taxes and regulations. Such measures, if adopted, could lead to increased regulatory pressures, production costs or capacity constraints. In addition, public expectations for reductions in greenhouse gas emissions could result in increased energy, transportation and raw material costs and may require us to make additional investments in facilities and equipment due to increased regulatory pressures. As a result, the effects of climate change could have a long-term, material adverse impact on our business and results of operations.

We are required to report greenhouse gas emissions, energy data and other related information to a variety of entities, and to comply with the wider obligations of the European Union Emissions Trading Scheme. If we are unable to measure, track and disclose information accurately and in a timely manner, we could be subject to civil penalties for non-compliance in the various European Union member states in which we operate. In addition, the

need for us to comply with the European Union Emissions Trading Scheme could result in increased operational costs if we are unable to meet our compliance obligations and exceed our emission allocations. There is also a risk of new environmental regulation in many geographies where we operate, including the European Union, U.S., Mexico and China, among others.

More generally, our operations are subject to environmental regulations by national, state and local agencies, including, in certain cases, regulations that impose liability without regard to fault. These regulations can result in liability that might adversely affect our operations. The environmental regulatory climate in the markets in which we operate is becoming stricter, with a greater emphasis on enforcement. While we have continuously invested in reducing our environmental risks and budgeted for future capital and operating expenditures to maintain compliance with environmental laws and regulations, there can be no assurance that we will not incur a substantial environmental liability or that applicable environmental laws and regulations will not change or become more stringent in the future.

If any of our products is defective or found to contain contaminants, we may be subject to product recalls or other liabilities.

We take precautions to ensure that our beverage products and our associated packaging materials (such as bottles, crowns, cans and other containers) meet accepted food safety and regulatory standards. Such precautions include quality-control programs and various technologies for primary materials, the production process and our final products. We have established procedures to correct issues or concerns that are detected.

In the event that any failure to comply with accepted food safety and regulatory standards (such as a contamination or a defect) does occur in the future, it may lead to business interruptions, product recalls or liability, each of which could have an adverse effect on our business, reputation, prospects, financial condition and results of operations.

Although we maintain insurance against certain product liability (but not product recall) risks, we may not be able to enforce our rights in respect of these policies, and, in the event that contamination or a defect occurs, any amounts that we recover may not be sufficient to offset any damage we may suffer, which could adversely impact our business, results of operations and financial condition.

We may not be able to protect our intellectual property rights.

Our future success depends significantly on our ability to protect our current and future brands and products and to defend our intellectual property rights, including trademarks, patents, domain names, trade secrets and know-how. We have been granted numerous trademark registrations and patents covering our brands and products and have filed, and expect to continue to file, trademark and patent applications seeking to protect newly developed brands and products. We cannot be sure that trademark and patent registrations will be issued with respect to any of our applications. There is also a risk that we could, by omission, fail to renew a trademark or patent on a timely basis or that our competitors will challenge, invalidate or circumvent any existing or future trademarks and patents issued to, or licensed by, us.

Although we have taken appropriate action to protect our portfolio of intellectual property rights (including patent applications, trademark registration and domain names), we cannot be certain that the steps we have taken will be sufficient or that third parties will not infringe upon or misappropriate proprietary rights. Moreover, some of the countries in which we operate offer less effective intellectual property protection than is available in Europe or the United States. If we are unable to protect our proprietary rights against infringement or misappropriation, it could have a material adverse effect on our business, results of operations, cash flows or financial condition and, in particular, on our ability to develop our business.

We rely on key third parties, including key suppliers, and the termination or modification of the arrangements with such third parties could negatively affect our business.

We rely on third-party suppliers for a range of raw materials for our beer and non-beer products, such as malted barley, corn grits, corn syrup, rice, hops, water, flavored concentrate, fruit concentrate, sugar and sweeteners, and for packaging material, such as glass, PET and aluminum bottles, aluminum or steel cans and kegs, labels, plastic crates, metal and plastic closures, folding cartons, cardboard products and plastic films.

We seek to limit our exposure to market fluctuations in the supply of these raw materials by entering into medium- and long-term fixed-price arrangements. We have a limited number of suppliers of aluminum cans and glass bottles. Consolidation of the aluminum can industry and glass bottle industry in certain markets in which we operate has reduced local supply alternatives and increased the risk of disruption to aluminum can and glass bottle supplies. Although we generally have other suppliers of raw materials and packaging materials, the termination of or material change to arrangements with certain key suppliers, disagreements with suppliers as to payment or other terms, or the failure of a key supplier to meet the contractual obligations it owes to us or otherwise deliver materials consistent with current usage would or may require us to make purchases from alternative suppliers, in each case at potentially higher prices than those agreed with that supplier. Additionally, we may be subject to potential reputational damage if one of our suppliers violates applicable laws or regulations. These factors could have a material impact on our production, distribution and sale of beer, other alcoholic beverages and soft drinks and have a material adverse effect on our business, results of operations, cash flows or financial condition.

A number of our key brand names are both licensed to third-party brewers and used by companies over which we do not have control. See “Item 4. Information on the Company–B. Business Overview–8. Licensing.” If we are unable to maintain such arrangements on favorable terms, this could have a material adverse effect on our business, results of operations, cash flows or financial condition.

We monitor brewing quality to ensure our high standards, but, to the extent that one of these key licensed brand names is subject to negative publicity, it could have a material adverse effect on our business, results of operations, cash flows or financial condition.

For certain packaging supplies and raw materials, we rely on a small number of important suppliers. In addition, certain of our subsidiaries may purchase nearly all of their key packaging materials from sole suppliers under multi-year contracts. The loss of or temporary discontinuity of supply from any of these suppliers without sufficient time to develop an alternative source could cause us to spend increased amounts on such supplies in the future. If these suppliers became unable to continue to meet our requirements, and we are unable to develop alternative sources of supply, our operations and financial results could be adversely affected.

We could incur significant costs as a result of compliance with, and/or violations of or liabilities under, various regulations that govern our operations.

Our business is highly regulated in many of the countries in which we or our licensed third parties operate. The regulations adopted by the authorities in these countries govern many parts of our operations, including brewing, marketing and advertising (in particular to ensure our advertising is directed to individuals of legal drinking age), consumer promotion s and rebates, environmental protection, transportation, distributor relationships, sales and data privacy. We may be subject to claims that we have not complied with existing laws and regulations, which could result in fines and penalties or loss of operating licenses.

We are also routinely subject to new or modified laws and regulations with which we must comply in order to avoid claims, fines and other penalties, which could adversely impact our business, results of operations and financial condition. For example, we are subject to the General Data Protection Regulation adopted in the European Union in April 2016, which must be fully implemented in all member states by May 2018. Breach of any of these laws or regulations can lead to significant fines and/or damage to our reputation, as well as significantly restrict our ability to deliver on our digital productivity and growth plans.

We may also be subject to laws and regulations aimed at reducing the availability of beer and other alcoholic beverage products in some of our markets to address alcohol abuse and other social issues. See “–Negative publicity, perceived health risks and associated government regulation may harm our business.” There can be no assurance that we will not incur material costs or liabilities in connection with compliance with applicable regulatory requirements, or that such regulation will not interfere with our beer, other alcoholic beverage and soft drinks businesses.

For further detail regarding common regulations and restrictions on us, see “Item 4. Information on the Company–B. Business Overview–11. Regulations Affecting Our Business” and “Item 5. Operating and Financial Review–A. Key Factors Affecting Results of Operations–Governmental Regulations.”

We are exposed to the risk of litigation.

We are now and may in the future be party to legal proceedings and claims and significant damages may be asserted against us. See “Item 8. Financial Information–A. Consolidated Financial Statements and Other Financial Information–Legal and Arbitration Proceedings” and “Item 5. Operating and Financial Review–H. Contractual Obligations and Contingencies–Contingencies” and note 32 to our audited consolidated financial statements as of 31 December 2017 and 2016, and for the three years ended 31 December 2017, for a description of certain material contingencies which we believe are reasonably possible (but not probable) to be realized. Given the inherent uncertainty of litigation, it is possible that we might incur liabilities as a consequence of the proceedings and claims brought against us, including those that are not currently believed by us to be reasonably possible.

Moreover, companies in the alcoholic beverage industry and soft drink industry – including our operations – are, from time to time, exposed to collective suits (class actions) or other litigation relating to alcohol advertising, alcohol abuse problems or health consequences from the excessive consumption of beer, other alcoholic beverages and soft drinks. As an illustration, we and certain other beer and other alcoholic beverage producers from Brazil, Canada, Europe and the United States have been involved in class actions and other litigation seeking damages for, among other things, alleged marketing of alcoholic beverages to underage consumers. If any of these types of litigation were to result in fines, damages or reputational damage to us or our brands, this could have a material adverse effect on our business, results of operations, cash flows or financial position. See “Item 8. Financial Information–A. Consolidated Financial Statements and Other Financial Information–Legal and Arbitration Proceedings.”

Our failure to satisfy our obligations under the Grupo Modelo settlement agreement could adversely affect our financial condition and results of operations.

The settlement agreement we reached with the U.S. Department of Justice in relation to the combination with Grupo Modelo included certain transition services agreements as well as certain distribution guarantees for Constellation Brands, Inc. in the 50 states of the United States, the District of Columbia and Guam. Our compliance with our obligations under the settlement agreement is monitored by the U.S. Department of Justice and the Monitoring Trustee appointed by it. Were we to fail to fulfill our obligations under the settlement, whether intentionally or inadvertently, we could be subject to monetary fines. See “Item 10. Additional Information–C. Material Contracts–Grupo Modelo Settlement Agreement.”

Our failure to satisfy our obligations under the SAB settlement agreement could adversely affect our financial condition and results of operations.

We entered into a consent decree with the U.S. Department of Justice in relation to the combination with SAB on 20 July 2016. As part of this consent decree, we agreed (i) not to acquire control of a distributor if doing so would result in more than 10% of our U.S. annual volume being distributed through majority owned distributorships in the U.S., (ii) not to terminate any wholesalers as a result of the combination with SAB, (iii) to review and modify certain aspects of our U.S. sales programs and policies to ensure that we do not limit the ability and incentives of independent distributors to sell and promote third-party brewers’ products and (iv) to notify the U.S. Department of Justice at least 30 days prior to the consummation of any acquisition of a beer brewer, importer, distributor or brand owner deriving more than USD 7.5 million in annual gross revenue from beer sold for further resale in the United States or from license fees generated by such sales, subject to certain exceptions. The consent decree is awaiting

approval by the U.S. federal district court in the District of Columbia. The consent decree will expire ten years after its approval by the U.S. federal district court in the District of Columbia, unless the court grants an extension. Our compliance with our obligations under the settlement agreement is monitored by the U.S. Department of Justice and the Monitoring Trustee appointed by it. Were we to fail to fulfill our obligations under the settlement, whether intentionally or inadvertently, we could be subject to monetary fines. Our obligations under the settlement agreement (in particular the restrictions on our U.S. sales programs and policies) may also adversely impact our U.S. operations.

In other jurisdictions, we were required to make certain divestitures and to fulfill a number of other commitments as a condition to receiving regulatory clearance for the combination with SAB, and we are now in the process of fulfilling these commitments. For more information on commitments related to the combination with SAB, see “—We are exposed to antitrust and competition laws in certain jurisdictions and the risk of changes in such laws or in the interpretation and enforcement of existing antitrust and competition laws. In addition, in connection with our previous acquisitions, various regulatory authorities have previously imposed conditions with which we are required to comply.”

We may be subject to adverse changes in taxation.

Taxation on our products in the countries in which we operate is comprised of different taxes specific to each jurisdiction, such as excise and other indirect taxes (such as value-added tax (“VAT”)). In many jurisdictions, these taxes make up a large proportion of the cost of beer charged to consumers. Increases in excise and other indirect taxes applicable to our products either on an absolute basis or relative to the levels applicable to other beverages tend to adversely affect our revenue or margins, both by reducing overall consumption of our products and by encouraging consumers to switch to other categories of beverages. These increases also adversely affect the affordability of our products and our profitability. In recent years, Russia, Ukraine, Australia, South Africa, Egypt, Singapore, and Argentina among others, increased beer excise taxes.

In Russia, between 2009 and 2016, the beer excise rate increased nearly tenfold—from RUB 3/liter to RUB 20/liter. Similarly, in Ukraine, between 2013 and 2017, the beer excise tax increased 219.5% from UAH 0.87/liter in 2013 to UAH 2.78/liter in January 2017. These tax increases have resulted in significant price increases in both countries, have had a significant impact on our sales of beer in those countries, and may continue to do so. See “—Negative publicity, perceived health risks and associated government regulation may harm our business.”

In the United States, the brewing industry is subject to significant taxation. The U.S. federal government currently levies an excise tax on beer sold for consumption in the United States of USD 16 per barrel (equivalent to approximately 117 liters) for the first six million barrels and USD 18 per barrel thereafter. All states also levy excise and/or sales taxes on alcoholic beverages. From time to time, there are proposals to increase these taxes, and in the future, these taxes could increase. Increases in excise taxes on alcohol could adversely affect our United States business and its profitability.

In addition to excise taxes, additional charges may be levied in relation to tax stamps and other forms of fiscal marking. In the last year we have seen a strong pressure to introduce costly fiscal marking systems in several African markets, Russia and Ukraine. The cost of these marking schemes could adversely affect our businesses in the relevant countries (including their profitability).

Proposals to increase excise or other indirect taxes may result from the current economic climate and may also be influenced by changes in public perceptions regarding the consumption of beer and other alcoholic beverages. To the extent that the effect of the tax reforms described above or other proposed changes to excise and other indirect duties in the countries in which we operate is to increase the total burden of indirect taxation on our products, our results of operations in those countries could be adversely affected.

In addition to excise and other indirect duties, we are subject to income and other taxes in the countries in which we operate. There can be no assurance that the operations of our breweries and other facilities will not become subject to increased taxation by local, national or foreign authorities or that we and our subsidiaries will not become subject to higher corporate income tax rates or to new or modified taxation regulations and requirements.

For example, the work being carried out by the Organisation for Economic Co-operation and Development on base erosion and profit shifting and initiatives at the European Union level (including the anti-tax avoidance directive adopted by the Council of the European Union on 12 July 2016) as a response to increasing globalization of trade and business operations could result in changes in tax treaties, the introduction of new legislation, updates to existing legislation, or changes to regulatory interpretations of existing legislation, any of which could impose additional taxes on businesses. Furthermore, the U.S. tax reform legislation signed on 22 December 2017 (Public Law 115-97) (the “**Tax Act**”), known as the Tax Cuts and Jobs Act, brings major tax legislation changes into law. While the Tax Act reduces the statutory rate of U.S. federal corporate income tax to 21% and provides an exemption for certain dividends from 10%-owned foreign subsidiaries, the Tax Act expands the tax base by introducing further limitations on deductibility of interest, the imposition of a “base erosion and anti-abuse tax” and the imposition of minimum tax for “global intangible low-tax income,” among other changes which would adversely impact our results of operations. The overall impact of the Tax Act also depends on the future interpretations and regulations that may be issued by U.S. tax authorities, and it is possible that future guidance could adversely impact us.

Additionally, international global climate change negotiations and other international treaties, such as the Montreal Protocol, increasingly encourage countries to introduce regulations and other measures to mitigate greenhouse gas emissions, including carbon taxes. For more information on environmental regulations and taxation, see “Climate change or other environmental concerns, or legal, regulatory or market measures to address climate change or other environmental concerns, may negatively affect our business or operations, including the availability of key production inputs.” Any such increases or changes in taxation would tend to adversely impact our results of operations.

We are exposed to antitrust and competition laws in certain jurisdictions and the risk of changes in such laws or in the interpretation and enforcement of existing antitrust and competition laws. In addition, in connection with our previous acquisitions, various regulatory authorities have previously imposed conditions with which we are required to comply.

We are subject to antitrust and competition laws in the jurisdictions in which we operate. Consequently, we may be subject to regulatory scrutiny in certain of these jurisdictions. For instance, in June 2016, the European Commission announced an investigation into alleged abuse of a dominant position by us in Belgium and on 30 November 2017, the European Commission informed us of its preliminary view in a Statement of Objections that these practices are an infringement and invited us to respond, which we shall do. The fact that a Statement of Objections has been issued does not mean that the European Commission has concluded that there is an infringement. See “Item 8. Financial Information—A. Consolidated Financial Statements and Other Financial Information—Legal and Arbitration Proceedings—Anheuser-Busch InBev SA/NV—Antitrust Matters” for more information. In addition, our Brazilian listed subsidiary, Ambev, has been subject to monitoring by antitrust authorities in Brazil. There can be no assurance that the introduction of new competition laws in the jurisdictions in which we operate, the interpretation of existing antitrust or competition laws, the enforcement of existing antitrust or competition laws by competent authorities or civil antitrust litigation by private parties, or any agreements with competent antitrust or competition authorities, against us or our subsidiaries, including Ambev, will not affect our business or the businesses of our subsidiaries in the future or have a financial impact.

For example, we had to obtain regulatory clearances for the combination with SAB in over 30 jurisdictions, and certain regulatory authorities imposed conditions in connection therewith, including the United States, South Africa, Botswana, Malawi, Zambia, Zimbabwe, Ecuador, Colombia, El Salvador, Australia and Moldova. The terms and conditions of any authorizations, approvals and/or clearances obtained to date, or other actions taken by a regulatory authority following the closing of the combination with SAB to obtain further authorizations, approvals and/or clearances may require, among other things, the divestiture of our assets or businesses to third parties, changes to our operations, restrictions on our ability to operate in certain jurisdictions, restrictions on the two businesses combining their operations in certain jurisdictions or other commitments to regulatory authorities regarding ongoing operations. Any such actions could have a material adverse effect on our business and diminish substantially the synergies and the advantages which we expect to achieve from the combination with SAB.

In addition, divestitures and other commitments made in order to obtain regulatory approvals, or our failure to comply with such commitments, may have an adverse effect on our business, results of operations, financial condition and prospects. These or any conditions, remedies or changes also reduce the price we are able to obtain for such disposals or imposing additional costs on or limiting our revenues, any of which might have a material adverse effect on us and our results of operations.

Our subsidiary Ambev operates a joint venture in Cuba, in which the Government of Cuba is its joint venture partner. Cuba remains subject to comprehensive economic and trade sanctions by the United States and Ambev's operations in Cuba may adversely affect our reputation and the liquidity and value of our securities.

On 28 January 2014, a subsidiary of our subsidiary Ambev acquired from us a 50% equity interest in Cerveceria Bucanero S.A., a Cuban company in the business of producing and selling beer. Consequently, we indirectly own, through our subsidiary Ambev, a 50% equity interest in Cerveceria Bucanero S.A. The other 50% equity interest is owned by the Government of Cuba. Cerveceria Bucanero S.A. is operated as a joint venture in which Ambev appoints the general manager. Cerveceria Bucanero S.A.'s main brands are Bucanero and Cristal, but it also imports and sells in Cuba other brands produced by certain of our non-U.S. subsidiaries. In 2017, Cerveceria Bucanero S.A. sold 1.8 million hectoliters of beer, representing about 0.3% of our global volume of 613 million hectoliters for the year. Although Cerveceria Bucanero S.A.'s production is primarily sold in Cuba, a small portion of its production is exported to and sold by certain distributors in other countries outside Cuba (but not in the United States).

The U.S. Treasury Department's Office of Foreign Assets Control and the U.S. Commerce Department together administer and enforce broad and comprehensive economic and trade sanctions based on U.S. foreign policy towards Cuba. Although our operations in Cuba through our subsidiary Ambev are quantitatively immaterial, our overall business reputation may suffer or we may face additional regulatory scrutiny as a result of our activities in Cuba based on the identification of Cuba as a target of U.S. economic and trade sanctions.

In addition, the Cuban Liberty and Democratic Solidarity (LIBERTAD) Act of 1996 (known as the "**Helms-Burton Act**") authorizes private lawsuits for damages against anyone who traffics in property confiscated without compensation by the Government of Cuba from persons who at the time were, or have since become, nationals of the United States. Although this section of the Helms-Burton Act is currently suspended by discretionary presidential action, the suspension may not continue in the future. Claims accrue notwithstanding the suspension and may be asserted if the suspension is discontinued. The Helms-Burton Act also includes a section that authorizes the U.S. Department of State to prohibit entry into the United States of non-U.S. persons who traffic in confiscated property, and corporate officers and principals of such persons, and their families. In 2009, we received notice of a claim purporting to be made under the Helms-Burton Act relating to the use of a trademark by Cerveceria Bucanero S.A., which is alleged to have been confiscated by the Cuban government and trafficked by us through our former ownership and management of the company. Although we have attempted to review and evaluate the validity of the claim, due to the uncertain underlying circumstances, we are currently unable to express a view as to the validity of such claim or as to the claimants' standing to pursue it.

We may not be able to recruit or retain key personnel.

In order to develop, support and market our products, we must hire and retain skilled employees with particular expertise. The implementation of our strategic business plans could be undermined by a failure to recruit or retain key personnel or the unexpected loss of senior employees, including in acquired companies.

We face various challenges inherent in the management of a large number of employees across diverse geographical regions. It is not certain that we will be able to attract or retain key employees and successfully manage them, which could disrupt our business and have an unfavorable material effect on our financial position, income from operations and competitive position.

We are exposed to labor strikes and disputes that could lead to a negative impact on our costs and production level.

Our success depends on maintaining good relations with our workforce. In several of our operations, a majority of our workforce is unionized. For instance, a majority of the hourly employees at our breweries in several key countries in different geographies are represented by unions. Our production may be affected by work stoppages

or slowdowns as a result of disputes under existing collective labor agreements with labor unions. We may not be able to satisfactorily renegotiate our collective labor agreements when they expire and may face tougher negotiations or higher wage and benefit demands. Furthermore, a work stoppage or slowdown at our facilities could interrupt the transport of raw materials from our suppliers or the transport of our products to our customers. Such disruptions could put a strain on our relationships with suppliers and clients and may have lasting effects on our business even after the disputes with our labor force have been resolved, including as a result of negative publicity.

Our production may also be affected by work stoppages or slowdowns that affect our suppliers, distributors and retail delivery/logistics providers as a result of disputes under existing collective labor agreements with labor unions, in connection with negotiations of new collective labor agreements, as a result of supplier financial distress or for other reasons.

A strike, work stoppage or slowdown within our operations or those of our suppliers, or an interruption or shortage of raw materials for any other reason (including, but not limited to, financial distress, natural disaster or difficulties affecting a supplier) could have a material adverse effect on our earnings, financial condition and ability to operate our business.

Our United States organization has approximately 5,100 hourly brewery workers represented by the International Brotherhood of Teamsters. Their compensation and other terms of employment are governed by collective bargaining agreements negotiated between us and the Teamsters, which expire on 28 February 2019.

Information technology failures, including those that affect the privacy and security of sensitive customer and business information, could damage our reputation and we could suffer a loss of revenue, incur substantial additional costs and become subject to litigation and regulatory scrutiny.

We rely on information technology systems to process, transmit and store large amounts of electronic data, including personal information. We engage in ecommerce in nearly two dozen countries, which includes direct sales to some customers. Additionally, a significant portion of the communication between our personnel, customers and suppliers depends on information technology. As with all large systems, our information systems may be vulnerable to a variety of interruptions due to events beyond our control, including, but not limited to, natural disasters, terrorist attacks, telecommunications failures, computer viruses, hackers or other security issues.

We depend on information technology to enable us to operate efficiently and interface with customers, as well as to maintain in-house management and control. We also collect and store non-public personal information that customers provide to purchase products or services, including personal information and payment information. We have entered into various information technology services agreements pursuant to which our information technology is partially outsourced to leading vendors, and we may share information about customers and employees with vendors that assist with certain aspects of our business.

In addition, the concentration of processes in shared services centers means that any technology disruption could impact a large portion of our business within the operating regions served. Any transitions of processes to, from or within shared services centers as well as other transformational projects could lead to business disruptions. If we do not allocate, and effectively manage, the resources necessary to build and sustain the proper technology infrastructure, we could be subject to transaction errors, processing inefficiencies, loss of customers, operations disruptions, or the loss of or damage to intellectual property through a security breach. As with all information technology systems, our system could also be penetrated by outside parties intent on extracting information, corrupting information or disrupting business processes.

We take various actions with the aim of minimizing potential technology disruptions, such as investing in intrusion detection solutions, proceeding with internal and external security assessments, building and implementing business continuity plans and reviewing risk management processes. These protections may be compromised as a result of third-party security breaches, burglaries, cyberattack, errors by employees or employees of third-party vendors, of contractors, misappropriation of data by employees, vendors or unaffiliated third parties, or other irregularities that may result in persons obtaining unauthorized access to company data or otherwise disrupting our business. For example, if outside parties gained access to confidential data or strategic information and appropriated such information or made such information public, this could harm our reputation or our competitive advantage, or could expose us or our customers to a risk of loss or misuse of information. More generally, technology disruptions can have a material adverse effect on our business, results of operations, cash flows or financial condition.

While we continue to invest in new technology monitoring and cyberattack prevention systems, no commercial or government entity can be entirely free of vulnerability to attack or compromise given how rapidly and unpredictably techniques evolve to obtain unauthorized access or disable or degrade service. During the normal course of business, we have experienced and continue to expect to experience attempted breaches of our technology systems and networks from time to time. In 2017, as in previous years, we experienced several attempted breaches of our technology systems and networks. None of the attempted breaches of our systems (as a result of cyberattacks, security breaches or similar events) had a material impact on our business or operations or resulted in known material unauthorized access to our data or our customers' data.

Natural and other disasters could disrupt our operations.

Our business and operating results could be negatively impacted by natural, social, technical or physical risks such as a widespread health emergency (or concerns over the possibility of such an emergency), earthquakes, hurricanes, flooding, fire, water scarcity, power loss, loss of water supply, telecommunications and information technology system failures, cyberattacks, labor disputes, political instability, military conflict and uncertainties arising from terrorist attacks, including a global economic slowdown, the economic consequences of any military action and associated political instability.

Our insurance coverage may not be sufficient.

We purchase insurance for director and officer liability and other coverage where required by law or contract or where considered to be in our best interest. In accordance with the co-operation agreement entered into with SAB (as amended from time to time, the **"Co-operation Agreement"**), we have also procured the provision of directors' and officers' insurance for former directors and officers of SAB for a period of six years following the completion of the combination with SAB. Even though we maintain these insurance policies, we self-insure most of our insurable risk. Should an uninsured loss or a loss in excess of insured limits occur, this could adversely impact our business, results of operations and financial condition.

The audit report included in this annual report is prepared by an auditor who is not inspected by the Public Company Accounting Oversight Board and, as such, you are deprived of the benefits of such inspection.

Auditors of companies that are registered with the SEC and traded publicly in the United States, including our independent registered public accounting firm, must be registered with the U.S. Public Company Accounting Oversight Board (United States) (the **"PCAOB"**) and are required by the laws of the United States to undergo regular inspections by the PCAOB to assess their compliance with the laws of the United States and professional standards. Because our auditors are located in Belgium, a jurisdiction where the PCAOB is currently unable to conduct inspections without the approval of the Belgian authorities, our auditors are not currently inspected by the PCAOB.

This lack of PCAOB inspections in Belgium prevents the PCAOB from regularly evaluating audits and quality-control procedures of any auditors operating in Belgium, including our auditors. As a result, investors may be deprived of the benefits of PCAOB inspections.

The inability of the PCAOB to conduct inspections of auditors in Belgium makes it more difficult to evaluate the effectiveness of our auditor's audit procedures or quality-control procedures as compared to auditors outside of Belgium that are subject to PCAOB inspections.

We may not be able to realize all of the anticipated benefits and synergies of the combination with SAB, including as a result of difficulty in integrating the businesses of the companies involved, and any such benefits and synergies will be offset by the significant transaction fees and other costs we incurred in connection with the combination with SAB.

Achieving the advantages of the combination with SAB depends partly on the rapid and efficient combination of our activities with SAB, two companies of considerable size that functioned independently and were incorporated in different countries, with geographically dispersed operations, and with different business cultures and compensation structures.

The integration process continues to involve inherent costs and uncertainties. These uncertainties are exacerbated because SAB was active in new or developing markets in which former AB InBev did not have significant operations, and because former AB InBev had little opportunity to perform detailed due diligence on SAB prior to the announcement of the combination with SAB. We may face increased exposure to certain risks as a result of the combination with SAB. For example, SAB had entered into important strategic partnerships in a number of Eurasian and African countries. We may face challenges in continuing to develop collaborative relationships with these partners in order to ensure that decisions are taken in such partnerships which promote our strategic and business objectives.

Furthermore, there is no assurance that the combination with SAB will achieve the benefits we anticipate from the integration. We believe that the consideration paid was justified, in part, by the procurement and engineering savings, brewery and distribution efficiency gains, best practice sharing and other cost savings, synergies and benefits that we expect to achieve by combining our operations with SAB's operations. However, these expected savings, gains, synergies and other benefits may not be achieved, and the assumptions upon which we determined the consideration paid to the former SAB shareholders in connection with the combination with SAB may prove to be incorrect. The implementation of the combination with SAB and the successful integration of SAB's operations also require a significant amount of management time and, thus, may affect or impair management's ability to implement the integration of the businesses effectively.

In addition, we have incurred and may continue to incur significant transaction fees and other costs associated with the combination with SAB. These fees and costs are substantial and include financing, financial advisory, legal and accounting fees and expenses. In addition, we may face additional unanticipated costs as a result of the integration, which would offset any realized synergy benefits resulting from the combination with SAB.

Finally, the agreement which we have entered into with Altria Group Inc. ("**Altria**"), pursuant to which we agreed to provide assistance and co-operation and to give certain representations, indemnities and undertakings to Altria in relation to certain matters relevant to Altria under U.S. tax legislation (as amended from time to time, the "**Tax Matters Agreement**"), imposes some limits on our ability to effect some reorganizations after the completion of the combination with SAB, which may limit our capacity to integrate SAB's operations. See "Item 10. Additional Information—C. Material Contracts—Material Contracts Related to the Acquisition of SAB—Tax Matters Agreement" for more information.

Although the cost savings and other synergies contemplated by the combination with SAB are significant, there can be no assurance that we will realize these benefits in the time expected, or at all. Any failures, material delays or unexpected costs of the integration process could therefore have a material adverse effect on our business, results of operations and financial condition.

The uncertainties about the effects of the combination with SAB could materially and adversely affect our businesses and operations.

Uncertainty regarding the effect of the combination with SAB could cause disruptions to our businesses. Customers, distributors, other business partners and other parties that have business relationships with us may defer the consummation of other transactions or other decisions concerning our businesses, or seek to change existing business relationships. For example, on 4 October 2017, we announced the completion of the transition of our stake in Africa's largest bottler, Coca-Cola Beverages Africa (Pty) Ltd ("**CCBA**") to The Coca-Cola Company pursuant to SAB's prior contractual arrangements with The Coca-Cola Company. In addition, key employees of either former

AB InBev or the SAB Group could leave their employment because of the uncertainties about their roles in the AB InBev Group or because of a general desire not to remain with the AB InBev Group. Such uncertainties and disruptions related to the combination with SAB could disrupt our business and have an unfavorable material effect on our financial position, our income from operations and our competitive position. Our size, contractual limitations we are subject to and our position in the markets in which we operate may decrease our ability to successfully carry out further acquisitions and business integrations.

In the past, we have made acquisitions of, investments in and joint ventures and similar arrangements with other companies and businesses. Much of our growth in recent years is attributable to such transactions, including, in addition to the combination with SAB, the combination of Interbrew S.A. and Ambev in 2004, the combination of InBev and Anheuser-Busch Companies in 2008 and the combination of AB InBev and Grupo Modelo in 2013.

We may be unsuccessful in the implementation of future acquisitions, investments or joint ventures or alliances.

We will need to identify suitable acquisition targets and agree on the terms with them if we are to make further acquisitions. Our size, contractual limitations to which we are subject and our position in the markets in which we operate may make it harder to identify suitable targets, including because it may be harder for us to obtain regulatory approval for future transactions. If appropriate opportunities do become available, we may seek to acquire or invest in other businesses; however, any future acquisition may pose regulatory, antitrust and other risks.

In addition, after completion of any transaction in the future, we may be required to integrate the acquired companies, businesses or operations into our existing operations. Such transactions may also involve the assumption of certain actual or potential, known or unknown liabilities, which may have a potential impact on our financial risk profile. These risks and limitations may limit our ability to implement our global strategy and our ability to achieve future business growth.

An impairment of goodwill or other intangible assets would adversely affect our financial condition and results of operations.

We have previously recognized significant goodwill on our balance sheet through acquisitions. For example, as a result of the combination with Grupo Modelo in 2013, we recognized USD 19.6 billion of goodwill on our balance sheet and recorded several brands from the Grupo Modelo business (including brands in the Corona brand family, among others) as intangible assets with indefinite useful lives with a fair value of USD 4.7 billion. Similarly, as a result of the 2008 Anheuser-Busch Companies acquisition, we recognized USD 32.9 billion of goodwill on our balance sheet and recorded several brands from the Anheuser-Busch Companies business (including brands in the Budweiser brand family, among others) as intangible assets with indefinite useful lives with a fair value of USD 21.4 billion.

Additionally, upon completion of the combination with SAB, we recognized USD 72.4 billion of incremental goodwill on our balance sheet.

Our accounting policy considers brands and distribution rights for our own products as intangible assets with indefinite useful lives, which are tested for impairment on an annual basis (or more often if an event or circumstance indicates that an impairment loss may have been incurred) and not amortized. After the completion of the combination with SAB, we recorded brands and other intangibles from the SAB business as intangible assets with indefinite useful lives, with a fair value of USD 15.0 billion.

As of 31 December 2017, our goodwill amounted to USD 140.9 billion and intangible assets with indefinite useful lives amounted to USD 43.6 billion. If the continuing integration of our businesses with SAB's businesses meets with unexpected difficulties or if the combined business does not develop as expected, impairment charges may be incurred in the future that could be significant and that could have an adverse effect on our results of operations and financial condition.

We may be unable to influence our associates in which we have minority investments.

A portion of our global portfolio consists of associates in new or developing markets, including investments where we may have a lesser degree of control over the business operations. For example, through our investment in the beverage operations of Société des Brasseries et Glacières Internationales and B.I.H. Brasseries Internationales Holding Limited we have exposure to a number of countries in Africa, and through our investment in Anadolu Efes, we have exposure to Turkey and countries in the Commonwealth of Independent States.

We face several challenges inherent to these various culturally and geographically diverse business interests. Although we work with our associates on the implementation of appropriate processes and controls, we also face additional risks and uncertainties with respect to these minority investments because we may be dependent on systems, controls and personnel that are not under our control, such as the risk that our associates may violate applicable laws and regulations, which could have an adverse effect on our business, reputation, results of operations and financial condition. For more information, see “If we do not successfully comply with applicable anti-corruption laws, export control regulations and trade restrictions, we could become subject to fines, penalties or other regulatory sanctions, as well as to adverse press coverage, which could cause our reputation, our sales or our profitability to suffer.”

Risks Related to Our Ordinary Shares and American Depositary Shares

The market price of our Ordinary Shares and ADSs may be volatile.

The market price of our Ordinary Shares and ADSs may be volatile as a result of various factors, many of which are beyond our control. These factors include, but are not limited to, the following:

- market expectations for our financial performance;
- actual or anticipated fluctuations in our results of operations and financial condition;
- changes in the estimates of our results of operations by securities analysts;
- investor perception of the impact of the combination with SAB on us and our shareholders;
- the conversion of Restricted Shares into Ordinary Shares, the Restricted Shares becoming so convertible on 10 October 2021, subject to certain limited exceptions (see “Item 10—Additional Information—B. Memorandum and Articles of Association and Other Share Information—Form and Transferability of Our Shares—Restricted Shares—Conversion into Ordinary Shares”);
- potential or actual sales of blocks of our Ordinary Shares or ADSs in the market by any shareholder or short selling of our Ordinary Shares or ADSs. Any such transaction could occur at any time or from time to time, with or without notice;
- the entry of new competitors or new products in the markets in which we operate;
- volatility in the market as a whole or investor perception of the beverage industry or of our competitors; and
- the occurrence of any of the matters discussed in the risk factors mentioned in this section.

The market price of our Ordinary Shares and ADSs may be adversely affected by any of the preceding or other factors regardless of our actual results of operations and financial condition.

Our largest shareholder may use its significant interest to take actions not supported by our other shareholders.

As of 31 December 2017, our largest shareholder, Stichting Anheuser-Busch InBev (the “**Stichting**”), owned 34.29% of our voting rights (and the Stichting and certain other entities acting in concert with it (within the meaning of the Belgian Law of 1 April 2007 on public takeover bids and/or the Belgian Law of 2 May 2007 on the disclosure of significant holdings in listed companies) held, in aggregate, 43.84% of our voting rights), based on the number of shares outstanding on 31 December 2017, excluding the 85,541,785 treasury shares held by us and our subsidiaries, Brandbrew S.A., Brandbev S.à.R.L. and Mexbrew S.à.R.L. (see “Item 7. Major Shareholders and Related Party Transactions–A. Major Shareholders”). In accordance with our articles of association, the Stichting has the ability to effectively control the election of a majority of our board of directors, as a result of which, under Belgian law, it has control of us. It is also able to have a significant influence on the outcome of corporate actions requiring shareholder approval, including dividend policy, mergers, share capital increases, going private transactions and other extraordinary items. See “Item 10. Additional Information–B. Memorandum and Articles of Association and Other Share Information–Description of the Rights and Benefits Attached to Our Shares” for further information in this respect.

The interests and time horizons of the Stichting may differ from those of other shareholders. As a result of its influence on our business, the Stichting could prevent us from making certain decisions or taking certain actions that would protect the interests of our other shareholders. For example, this concentration of ownership may delay or prevent a change of control of Anheuser-Busch InBev SA/NV, even in the event that this change of control may benefit other shareholders generally. Similarly, the Stichting could prevent us from taking certain actions that would dilute its percentage interest in our shares, even if such actions would generally be beneficial to us and/or to other shareholders. These and other factors related to the Stichting’s holding of a significant interest in our shares may reduce the liquidity of our shares and ADSs and their attractiveness to investors.

We may be unable to pay dividends.

As a general matter, we cannot guarantee that we will pay dividends in the future. The payment of dividends will depend on factors such as our business outlook, cash flow requirements and financial performance, the state of the market and the general economic climate and other factors, including tax and other regulatory considerations. In particular, in light of the increased debt that resulted from completion of the combination with SAB, deleveraging remains a priority and may restrict the amount of dividends we are able to pay. In addition, we must, under Belgian law and our articles of association, before we proceed with any dividend payment, allocate an amount equal to 5% of our annual net profit on an unconsolidated basis to a legal reserve in our unconsolidated financial statements until the reserve reaches 10% of our share capital, in accordance with Belgian accounting principles.

Fluctuations in the exchange rate between the euro, the South African rand, the Mexican peso and the U.S. dollar may increase the risk of holding our ADSs and Ordinary Shares.

Our Ordinary Shares currently trade on Euronext Brussels in euros and we have secondary listings of our shares on the Johannesburg Stock Exchange in South African rand and on the Mexican Stock Exchange (*Bolsa Mexicana de Valores*) in Mexican pesos. Our ADSs trade on the New York Stock Exchange (“**NYSE**”) in U.S. dollars. Fluctuations in the exchange rate between the euro, the South African rand, the Mexican peso and the U.S. dollar may result in temporary differences between the value of our Ordinary Shares trading in different currencies and between the value of our Ordinary Shares and ADSs, which may result in heavy trading by investors seeking to exploit such differences. Similarly, uncertainty over fiscal and budgetary challenges in the United States, Mexico, South Africa and/or Europe may negatively impact global economic conditions, and could trigger sharply increased trading and consequent market fluctuations, which would increase the volatility of, and may have an adverse effect upon, the price of our Ordinary Shares or ADSs.

In addition, as a result of fluctuations in the exchange rate between the U.S. dollar, the euro, the South African rand and the Mexican peso, the U.S. dollar equivalent of the proceeds that a holder of our ADSs would receive upon the sale in Belgium, South Africa or Mexico of any shares withdrawn from the American Depositary Receipt (“**ADR**”) depository and the U.S. dollar equivalent of any cash dividends paid in euros on our Ordinary Shares represented by the ADSs could also decline.

Future equity issuances may dilute the holdings of current shareholders or ADS holders and could materially affect the market price of our Ordinary Shares or ADSs.

We may in the future decide to offer additional equity to raise capital or for other purposes, in compliance with applicable Belgian legislation. Any such additional offering could reduce the proportionate ownership and voting interests of holders of our Ordinary Shares and ADSs, as well as our earnings per share or ADS and net asset value per share or ADS, and any offerings by us or our main shareholders could have an adverse effect on the market price of our Ordinary Shares and ADSs.

We entered into a registration rights agreement requiring us to register for resale under the Securities Act of 1933, as amended (the “**Securities Act**”), all registrable shares held by the holders of Restricted Shares (the “**Restricted Shareholders**”) no earlier than five years after completion of the combination with SAB, at which point the Restricted Shares will become eligible for conversion into Ordinary Shares at the option of the Restricted Shareholder. As of the closing of the combination with SAB, Restricted Shares represented 16.14% of our outstanding share capital. Although the Restricted Shares are generally subject to certain holdback and suspension periods until 21 October 2021, the Restricted Shares, once they are converted to Ordinary Shares, are not subject to a “lock-up” or similar restriction under the registration rights agreement. Accordingly, sales of large numbers of Ordinary Shares may be made upon registration of such shares with the SEC in accordance with the terms of the registration rights agreement. Registration and sales of our Ordinary Shares effectuated pursuant to the registration rights agreement will increase the number of shares being sold in the public market and may increase the volatility of the price of our Ordinary Shares and ADSs.

Investors may suffer dilution if they are not able to participate in equity offerings, and our ADS holders may not receive any value for rights that we may grant.

Our constitutional documents provide for preference rights to be granted to our existing shareholders unless such rights are disappplied by resolution of our shareholders’ meeting or the Board of Directors. Our shareholders’ meeting or our Board of Directors may disapply such rights in future equity offerings, while no preference rights apply to capital increases through contributions in kind. In addition, certain shareholders (including shareholders resident in, or citizens of, certain jurisdictions, such as the United States, Australia, Canada and Japan) may not be entitled to exercise such rights even if they are not disappplied unless the rights and related shares are registered or qualified for sale under the relevant legislative or regulatory framework. In particular, there can be no assurance that we will be able to establish an exemption from registration under the Securities Act and we are under no obligation to file a registration statement with respect to any such preferential subscription rights or underlying securities or to endeavor to have a registration statement declared effective under the Securities Act (other than as set out in the Registration Rights Agreement) (see “Item 10. Additional Information–C. Material Contracts–Material Contracts Related to the Acquisition of SAB” for more information on the Registration Rights Agreement). As a result, there is the risk that investors may suffer dilution of their shareholding should they not be permitted to participate in preference right equity or other offerings that we may conduct in the future.

If rights are granted to our shareholders, but the ADR depositary is unable to sell rights corresponding to shares represented by ADSs that are not exercised by, or distributed to, our ADS holders, or if the sale of such rights is not lawful or reasonably practicable, the ADR depositary will allow the rights to lapse, in which case ADS holders will receive no value for such rights.

ADS holders may not be able to exercise their right to vote the shares underlying our ADSs.

Holders of ADSs may be entitled to exercise voting rights with respect to the Ordinary Shares represented by our ADSs only in accordance with the provisions of the deposit agreement (as amended from time to time, the “**Deposit Agreement**”), dated 30 June 2009, as amended from time to time, among former AB InBev, The Bank of New York Mellon, as depositary, and the owners and holders of American Depositary Shares from time to time under the Deposit Agreement, to which we are successor-in-interest. The Deposit Agreement provides that, upon receipt of a notice of any meeting of holders of our Ordinary Shares, the depositary will, if we so request, distribute

to the ADS holders a notice which shall contain (i) such information as is contained in the notice of the meeting sent by us, (ii) a statement that the ADS holder as of the specified record date shall be entitled to instruct the ADR depositary as to the exercise of voting rights and (iii) a statement as to the manner in which instructions may be given by the holders.

Under the Deposit Agreement, holders of ADSs may instruct the depositary to vote the shares underlying their ADSs, but they will only receive the notice described above if we ask the depositary to ask for their instructions. Otherwise, ADS holders will not be able to exercise their right to vote, unless they withdraw the Ordinary Shares underlying the ADSs they hold. However, ADS holders may not know about the meeting far enough in advance to withdraw those shares. If we ask for the instructions of ADS holders, the depositary, upon timely notice from us, will notify ADS holders of the upcoming vote and arrange to deliver our voting materials to them. We cannot guarantee ADS holders that they will receive the voting materials in time to ensure that they can instruct the depositary to vote their shares. In addition, the depositary and its agents are not responsible for failing to carry out voting instructions or for the manner of carrying out voting instructions. This means that ADS holders may not be able to exercise their right to vote, and there may be nothing they can do if the shares underlying their ADSs are not voted as requested.

ADS holders may be subject to limitations on the transfer of their ADSs or the withdrawal of the underlying Ordinary Shares from the deposit facility.

ADSs are transferable on the books of the ADR depositary. However, the ADR depositary may refuse to deliver, transfer or register transfers of ADSs generally when the books of the depositary are closed or if such action is deemed necessary or advisable by the depositary or by us because of any requirement of law or of any government or governmental body or commission or under any provision of the Deposit Agreement. Moreover, the surrender of ADSs and withdrawal of Ordinary Shares may be suspended subject to the payment of fees, taxes and similar charges or if we direct the depositary at any time to cease new issuances and withdrawals of our Ordinary Shares during periods specified by us in connection with shareholders' meetings, the payment of dividends or as otherwise reasonably necessary for compliance with any applicable laws or government regulations.

Shareholders may not enjoy under Belgian corporate law and our articles of association certain of the rights and protections generally afforded to shareholders of U.S. companies under U.S. federal and state laws and the NYSE rules.

We are a public limited liability company incorporated under the laws of Belgium. Shareholders may not enjoy under Belgian corporate law and our articles of association certain of the rights and protections generally afforded to shareholders of U.S. companies under U.S. federal and state laws and the NYSE rules. The rights provided to our shareholders under Belgian corporate law and our articles of association differ in certain respects from the rights that you would typically enjoy as a shareholder of a U.S. company under applicable U.S. federal and/or state laws. In general, the Belgian Corporate Governance Code is a code of best practice applying to Belgian listed companies on a non-binding basis. The Belgian Corporate Governance Code applies a "comply or explain" approach, that is, companies may depart from the Belgian Corporate Governance Code's provisions if, as required by law, they give a reasoned explanation of the reasons for doing so.

We rely on a provision in the NYSE Listed Company Manual that allows us to follow Belgian corporate law and the Belgian Corporate Governance Code with regard to certain aspects of corporate governance. This allows us to follow certain corporate governance practices that differ in significant respects from the corporate governance requirements applicable to U.S. companies listed on the NYSE. See "Item 16G. Corporate Governance" for additional information on these differences. In particular, the NYSE rules require a majority of the directors of a listed U.S. company to be independent while, in Belgium, only three directors need be independent. Our board currently comprises three independent directors and twelve directors not deemed to be "independent" under the NYSE listing standards. See "Item 6. Directors, Senior Management and Employees-A. Directors and Senior Management-Board of Directors." The NYSE rules further require that each of the nomination, compensation and audit committees of a listed U.S. company be comprised entirely of independent directors. However, the Belgian Corporate Governance Code recommends only that a majority of the directors on each of these committees meet the technical requirements for independence under Belgian corporate law. All voting members of our Audit Committee are independent for purposes of Rule 10A-3 under the U.S. Securities Exchange Act of 1934, as amended (the

“Exchange Act”). Our Audit Committee, Nomination Committee and Remuneration Committee have members who would not be considered independent under NYSE rules, and therefore our Audit Committee, Nomination Committee and Remuneration Committee would not be in compliance with the NYSE Corporate Governance Standards for domestic issuers in respect of the independence of these committees. However, our Audit Committee, Nomination Committee and Remuneration Committee are composed exclusively of non-executive directors who are independent of management and whom we consider to be free of any business or other relationship which could materially interfere with the exercise of their independent judgment. See “Item 6. Directors, Senior Management and Employees–C. Board Practices –Information about Our Committees–General.”

Under Belgian corporate law, other than certain limited information that we must make public, our shareholders may not ask for an inspection of our corporate records, while under Delaware corporate law any shareholder, irrespective of the size of his or her shareholdings, may do so. Shareholders of a Belgian corporation are also unable to initiate a derivative action, a remedy typically available to shareholders of U.S. companies, in order to enforce a right of AB InBev, in case we fail to enforce such right ourselves, other than in certain cases of director liability under limited circumstances. In addition, a majority of our shareholders may release a director from any claim of liability we may have, including if he or she has acted in bad faith or has breached his or her duty of loyalty, provided, in some cases, that the relevant acts were specifically mentioned in the convening notice to the shareholders’ meeting deliberating on the discharge. In contrast, most U.S. federal and state laws prohibit a company or its shareholders from releasing a director from liability altogether if he or she has acted in bad faith or has breached his or her duty of loyalty to the company. Finally, Belgian corporate law does not provide any form of appraisal rights in the case of a business combination.

For additional information on these and other aspects of Belgian corporate law and our articles of association, see “Item 10. Additional Information–B. Memorandum and Articles of Association and Other Share Information.” As a result of these differences between Belgian corporate law and our articles of association, on the one hand, and U.S. federal and state laws, on the other hand, in certain instances, you could receive less protection as a shareholder of our company than you would as a shareholder of a U.S. company.

As a “foreign private issuer” in the United States, we are exempt from a number of rules under U.S. securities laws and are permitted to file less information with the SEC.

As a “foreign private issuer,” we are exempt from certain rules under the Exchange Act that impose certain disclosure obligations and procedural requirements for proxy solicitations under Section 14 of the Exchange Act. In addition, our officers, directors and principal shareholders are exempt from the reporting and “short-swing” profit recovery provisions under Section 16 of the Exchange Act. Moreover, we are not required to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act. Accordingly, there may be less publicly available information concerning us than there is for U.S. public companies.

It may be difficult for investors outside Belgium to serve process on or enforce foreign judgments against us.

We are a Belgian public limited liability company. Certain of the members of our Board of Directors and Executive Board of Management and certain of the persons named herein are non-residents of the United States. All or a substantial portion of the assets of such non-resident persons and certain of our assets are located outside the United States. As a result, it may not be possible for investors to effect service of process upon such persons or on us or to enforce against them or us a judgment obtained in U.S. courts. Original actions or actions for the enforcement of judgments of U.S. courts relating to the civil liability provisions of the federal or state securities laws of the United States are not directly enforceable in Belgium. The United States and Belgium do not currently have a multilateral or bilateral treaty providing for reciprocal recognition and enforcement of judgments, other than arbitral awards, in civil and commercial matters. In order for a final judgment for the payment of money rendered by U.S. courts based on civil liability to produce any effect on Belgian soil, it is accordingly required that this judgment be recognized or be declared enforceable by a Belgian court pursuant to the relevant provisions of the 2004 Belgian Code of Private International Law. Recognition or enforcement does not imply a review of the merits of the case and is irrespective of any reciprocity requirement. A U.S. judgment will, however, not be recognized or declared enforceable in Belgium if it infringes upon one or more of the grounds for refusal which are exhaustively listed in
