

In the past, the Mexican economy has had balance of payment deficits and decreases in foreign exchange reserves. While the Mexican government does not currently restrict the ability of Mexican or foreign persons or entities to convert Pesos to U.S. Dollars, we cannot assure you that the Mexican government will not institute restrictive exchange control policies in the future, as has occurred from time to time in the past. To the extent that the Mexican government institutes restrictive exchange control policies in the future, our ability to transfer or to convert Pesos into U.S. Dollars and other currencies for the purpose of making timely payments of interest and principal of indebtedness, as well as to obtain foreign programming and other goods, would be adversely affected. See “— Risk Factors — Risk Factors Related to Mexico — Currency Fluctuations or the Devaluation and Depreciation of the Peso Could Limit the Ability of Our Company and Others to Convert Pesos into U.S. Dollars or Other Currencies, Which Could Adversely Affect Our Business, Financial Condition or Results of Operations”.

On April 22, 2016 the noon buying rate was Ps.17.4440 per U.S.\$1.00.

Risk Factors

The following is a discussion of risks associated with our company and an investment in our securities. Some of the risks of investing in our securities are general risks associated with doing business in Mexico. Other risks are specific to our business. The discussion below contains information, among other things, about the Mexican government and the Mexican economy obtained from official statements of the Mexican government as well as other public sources. We have not independently verified this information. Any of the following risks, if they actually occur, could materially and adversely affect our business, financial condition, results of operations or the price of our securities.

Risk Factors Related to Mexico

Economic and Political Developments in Mexico May Adversely Affect Our Business

Most of our operations and assets are located in Mexico. As a result, our financial condition, results of operations and business may be affected by the general condition of the Mexican economy, the depreciation or appreciation of the Peso as compared to the U.S. Dollar and other currencies, Mexican inflation, interest rates, regulation, taxation, social instability and other political, social and economic developments in or affecting Mexico over which we have no control.

Mexico Has Experienced Adverse Economic Conditions, Which Could Have a Negative Impact on Our Results of Operations and Financial Condition

Mexico has historically experienced uneven periods of economic growth. Mexican gross domestic product, or GDP, increased by 1.3% in 2013, increased by 2.3% in 2014 and increased by 2.5% in 2015. Mexican GDP growth fell short of Mexican government forecasts in 2015 and, according to Mexican government forecasts, Mexican GDP is expected to increase in a range between 2.6% – 3.6% in 2016. We cannot assure you that these estimates and forecasts will prove to be accurate.

Any future economic downturn, including downturns in the United States, Europe and/or Asia, could affect our financial condition and results of operations. For example, demand for advertising may decrease both because consumers may reduce expenditures for our advertisers’ products and because advertisers may reduce advertising expenditures and demand for publications, cable television, direct-to-home, or DTH, satellite services, pay-per-view programming, telecommunications services and other services and products may decrease because consumers may find it difficult to pay for these services and products.

Developments in Other Emerging Market Countries or in the U.S. and Other Developed Economies May Adversely Affect the Mexican Economy, the Market Value of Our Securities and Our Results of Operations

The market value of securities of Mexican companies, the social, economic and political situation in Mexico and our financial condition and results of operations are, to varying degrees, affected by economic and market conditions in other emerging market countries and in the United States and other developed economies. Although economic conditions in other emerging market countries and in the United States and other developed economies may differ significantly from economic conditions in Mexico, investors’ reactions to developments in any of these other countries may have an adverse effect on the market value or trading price of securities of Mexican issuers, including our securities, or on our business.

Our operations, including the demand for our products or services, and the price of our securities, have also historically been adversely affected by increases in interest rates in the United States and elsewhere. Economic downturns in the United States often have a significant adverse effect on the Mexican economy and other economies globally, which in turn, could affect our financial condition and results of operations.

Our profitability is affected by numerous factors, including changes in viewing preferences, priorities of advertisers and reductions in advertisers’ budgets. Historically, advertising in most forms of media has correlated positively with the general condition of the economy and thus, is subject to the risks that arise from adverse changes in domestic and global economic conditions, consumer confidence and spending. The demand for our products and services in Mexico, the U.S. and in the other countries in which we operate may be adversely affected by the tightening of credit markets and economic downturns. As a global media and cable company, we depend on the demand from customers in Mexico, the U.S. and the other countries in which we operate, and reduced consumer spending that falls short of our projections could adversely impact our revenues and profitability.

Uncertainty in Global Financial Markets Could Adversely Affect Our Financing Costs and Exposure to Our Customers and Counterparties

The global financial markets continue to be uncertain and it is hard to predict for how long the effects of the global financial stress of recent years will persist and what impact it will have on the global economy in general, or the economies in which we operate, in particular, and whether slowing economic growth in any countries could result in decreased consumer spending affecting our products and services. If access to credit tightens further and borrowing costs rise, our borrowing costs could be adversely affected. Difficulties in financial markets may also adversely affect some of our customers. In addition, we enter into derivative transactions with large financial institutions, including contracts to hedge our exposure to interest rates and foreign exchange, and we could be affected by severe financial difficulties faced by our counterparties.

Currency Fluctuations or the Devaluation and Depreciation of the Peso Could Limit the Ability of Our Company and Others to Convert Pesos into U.S. Dollars or Other Currencies, Which Could Adversely Affect Our Business, Financial Condition or Results of Operations

The Peso has been subject to significant depreciation against the U.S. Dollar in the past and may be subject to significant fluctuations in the future. A significant portion of our indebtedness and a significant amount of our costs are U.S. Dollar-denominated, while our revenues are primarily Peso-denominated. As a result, decreases in the value of the Peso against the U.S. Dollar could cause us to incur foreign exchange losses, which could reduce our net income.

Severe devaluation or depreciation of the Peso may also result in governmental intervention, or disruption of international foreign exchange markets. This may limit our ability to transfer or convert Pesos into U.S. Dollars and other currencies for the purpose of making timely payments of interest and principal on our indebtedness and adversely affect our ability to obtain foreign programming and other imported goods. The Mexican economy has suffered current account balance of payment deficits and shortages in foreign exchange reserves in the past.

While the Mexican government does not currently restrict the right or ability of Mexican or foreign persons or entities to convert Pesos into U.S. Dollars or to transfer other currencies outside of Mexico, there can be no assurance that the Mexican government will not institute restrictive exchange control policies in the future. To the extent that the Mexican government institutes restrictive exchange control policies in the future, our ability to transfer or convert Pesos into U.S. Dollars or other currencies for the purpose of making timely payments of interest and principal on indebtedness, as well as to obtain imported goods would be adversely affected. Devaluation or depreciation of the Peso against the U.S. Dollar or other currencies may also adversely affect U.S. Dollar or other currency prices for our debt securities or the cost of imported goods.

High Inflation Rates in Mexico May Decrease Demand for Our Services While Increasing Our Costs

In the past Mexico has experienced high levels of inflation, although the rates have been lower for the past years. The annual rate of inflation, as measured by changes in the Mexican National Consumer Price Index, or NCPI, was 4.0% in 2013, 4.1% in 2014, 2.1% in 2015 and is projected to be 3.0% in 2016. An adverse change in the Mexican economy may have a negative impact on price stability and result in higher inflation than its main trading partners, including the United States. High inflation rates can adversely affect our business and results of operations in, among others, the following ways:

- inflation can adversely affect consumer purchasing power, thereby adversely affecting consumer and advertiser demand for our services and products; and
- to the extent inflation exceeds our price increases, our prices and revenues will be adversely affected in “real” terms.

High Interest Rates in Mexico Could Increase Our Financing Costs

In the past Mexico had, and may in the future have, real and nominal interest rates. The interest rates on 28-day Mexican government treasury securities averaged 3.8%, 3.0% and 3.0% for 2013, 2014 and 2015, respectively. High interest rates in Mexico could increase our financing costs and thereby impair our financial condition, results of operations and cash flow.

[Table of Contents](#)

Political Events in Mexico Could Affect Mexican Economic Policy and Our Business, Financial Condition and Results of Operations

The Mexican Federal Congress is not controlled by any single political party. However, the *Partido Revolucionario Institucional*, or the PRI, holds a significant position both in the Senate and in the *Cámara de Diputados*, or the Chamber of Representatives. Mexican congressional elections held in June 2015 in the Lower House resulted in a majority for the PRI but it still lacks an absolute majority, which could result in government gridlock and political uncertainty regarding further reforms and secondary legislation to modernize key sectors of the Mexican economy.

The current administration has been pursuing significant amendments to Mexico’s laws, regulations, public policies and government programs. Mexico’s current President Enrique Peña Nieto and the three main political parties of Mexico (i.e. PRI, *Partido Acción Nacional*, or PAN, and the *Partido de la Revolución Democrática*, or PRD) signed the *Pacto por México*, or Pact for Mexico, in 2012. In accordance with the Pact for Mexico, during 2013 several amendments to the *Constitución Política de los Estados Unidos Mexicanos*, or the Political Constitution of the United Mexican States, or Mexican Constitution, were approved, relating to (i) antitrust, (ii) telecommunications, (iii) public bids to grant new concessions to offer broadcasting services, (iv) energy policy and (v) education. Likewise, in accordance with the Pact for Mexico, in January 2014, amendments were made to 34 Mexican financial laws. During 2014, pursuant to the transitory articles of the June 2013 Telecom Reform (the “Telecom Reform”), the Mexican Federal Congress amended the applicable legal framework to implement the relevant provisions of the Mexican Constitution, and issued the new *Ley Federal de Telecomunicaciones y Radiodifusión*, or Telecommunications and Broadcasting Federal Law, or LFTR, on July 14, 2014 and the *Ley Federal de Competencia Económica*, or Mexico’s Federal Antitrust Law, which became effective on July 7, 2014. Such changes may have a material adverse effect on the Mexican economic, social and political situation, and on our business, financial condition and results of operations. See “– Existing Mexican Laws and Regulations or Changes Thereto or the Imposition of New Ones May Negatively Affect Our Operations and Revenue” and “– The Reform and Addition of Various Provisions of the Mexican Constitution Related to Telecommunications, the LFTR, and Other Recent Actions of IFT May Significantly and Adversely Affect the Business, Results of Operations and Financial Results of Some of Our Business Segments”.

In addition, any effects on the social and political situation in Mexico could adversely affect the Mexican economy, including the stability of its currency. We cannot ascertain, at this time, how any material adverse effect on Mexican economic policy, Mexico’s economic situation, the stability of Mexico’s currency or market conditions may affect our business or the price of our securities.

Mexico has Experienced a Period of Increased Criminal Activity and Such Activities Could Adversely Affect Our Financing Costs and Exposure to Our Customers and Counterparties

During recent years, Mexico has experienced a period of increased criminal activity and violence, primarily due to organized crime. These activities, their escalation and the violence associated with them could have a negative impact on the business environment in which we operate, and therefore on our financial condition and results of operations.

[Table of Contents](#)

Imposition of Fines by Regulators and Other Authorities Could Adversely Affect Our Financial Condition and Results of Operations

A significant portion of our business, activities and investments occur in heavily regulated sectors. The Mexican regulators and other authorities, including tax authorities, have increased their supervision and the frequency and amounts of fines and assessments have increased significantly. Although we intend to defend our positions vigorously when procedures are brought or fines are imposed by authorities, there can be no assurance that we will be successful in such defense. Accordingly, we may in the future be required to pay fines and assessments that could be significant in amount, which could materially and adversely affect our financial condition and results of operations.

Existing Mexican Laws and Regulations or Changes Thereto or the Imposition of New Ones May Negatively Affect Our Operations and Revenue

Our business, activities and investments are subject to various Mexican federal, state and local statutes, rules, regulations, policies and procedures, which are subject to change and are affected by the actions of various Mexican federal, state and local government authorities. In that regard, existing laws and regulations including, among others, antitrust, telecom, social security and tax laws were amended in recent years and the manner in which these laws and regulations are enforced or interpreted could change, and new laws or regulations could be adopted. Such changes could materially adversely affect our operations and our revenue.

Mexico's Federal Antitrust Law and the LFTR, including their regulations, may affect some of our activities, including our ability to introduce new products and services, enter into new or complementary businesses or joint ventures and complete acquisitions. In addition, the Federal Antitrust Law and its regulations, as well as the conditions and measures imposed by the *Instituto Federal de Telecomunicaciones*, or Federal Telecommunications Institute, or IFT, an institute with constitutional autonomy responsible for overseeing the broadcasting (radio and television) and telecommunications industries and their antitrust matters, or by the *Comisión Federal de Competencia Económica*, or Mexican Antitrust Commission, or CFCE, may adversely affect our ability to determine the rates we charge for our services and products or the manner in which we provide our products or services. Approval of IFT or the CFCE, as applicable, is required to acquire certain businesses or enter into certain joint ventures. There can be no assurance that in the future IFT or the CFCE, as the case may be, will authorize certain acquisitions or joint ventures related to our businesses, the denial of which may adversely affect our business strategy, financial condition and results of operations. IFT or CFCE, as applicable, may also impose conditions, obligations and fines that could adversely affect some of our activities, our business strategy, our financial condition and results of operations. See “— Imposition of Fines by Regulators and Other Authorities Could Adversely Affect Our Financial Condition and Results of Operations”.

As a result of the amendments to the Mexican Constitution and the LFTR, relating to telecommunications, television, radio and antitrust, concessions for the use of spectrum are now only granted through public bid processes. As a result of such reform, the “Auction Program for Digital Television Broadcast Frequencies”, or the Program, was approved by IFT and took place in 2014. The Program granted concessions over frequencies that might be grouped in order to create at least two national networks with national geographic coverage, or National Digital Networks. The Program provided that holders of concessions that may be granted thereunder will only be entitled to provide broadcasting services, in connection with each radioelectric frequency (channel), within the geographic coverage zone defined by the Program.

On March 7, 2014, IFT published in the *Diario Oficial de la Federación*, or the Official Gazette of the Federation, an invitation to a public auction for the concession for the two National Digital Networks which would be granted for a term of 20 years for the operation of stations with, among other characteristics, mandatory geographic coverage in 123 locations corresponding to 246 channels within the Mexican territory.

We were prevented from participating in the bidding. In March 2015, IFT issued its ruling announcing Grupo Radio Centro, S.A.B. de C.V., or Grupo Radio Centro and Cadena Tres I, S.A. de C.V., or Cadena Tres as winning bidders for two free to air broadcasting licenses with separate national coverage. However, since Grupo Radio Centro failed to pay the amount they bid for their free to air broadcasting license, the IFT's ruling announcing them as a winning bidder was declared null and void and they did not receive the license. As a result, the portion of the spectrum which was going to be assigned to Grupo Radio Centro is scheduled to be auctioned by August 2016, in accordance with IFT's Annual Work Program. Cadena Tres has completed the process and has received its license. See “— The Reform and Addition of Various Provisions of the Mexican Constitution Related to Telecommunications, the LFTR, and Other Recent Actions of IFT May Significantly and Adversely Affect the Business, Results of Operations and Financial Results of Some of Our Business Segments”.

In September 2010, Mexico's former President Felipe Calderon Hinojosa, published through the *Secretaría de Comunicaciones y Transportes*, or Secretary of Communications and Transport, or SCT, in the Official Gazette of the Federation, a decree establishing the actions to be taken to expedite the transition to digital television and digital radio broadcasting (referred to in this annual report as the 2010 Decree). The transition was completed, and analog broadcasting ended, on December 31, 2015.

[Table of Contents](#)

Due to the recent digital transition, and the analog shutdown in Mexico, we already experienced a loss of a portion of our audience which do not have access to digital radio and / or television. We may be further impacted by this transition.

Article 15-A of the *Ley del Seguro Social*, or the Social Security Law, could materially adversely affect our financial condition and results of operations. Article 15-A provides that a company that receives personnel services from a third party on any of the company's premises is jointly bound to comply with the obligations related to social security that have to be fulfilled by such personnel services providers for the benefit of their respective employees. Article 15-A also requires the Company to send a list to the *Instituto Mexicano del Seguro Social*, or the Social Security Mexican Institute, of all agreements entered into with personnel services providers.

In addition to the foregoing, certain provisions of the *Ley Federal del Trabajo*, or the Federal Labor Law, could materially adversely affect our financial condition and results of operations. The Federal Labor Law, as amended in November 2012, provides, among other things, that personnel outsourcing agreements must meet certain requirements. If these requirements are not met, the company that receives the benefit of the outsourced services might be deemed to be the employer of the personnel performing the services and thus required to comply with all the obligations applicable to employers pursuant to the Federal Labor Law in respect of such personnel.

In the last quarter of 2013, the Mexican Federal Congress approved a new tax reform, which became effective as of January 1, 2014. The reform has the following effects on the Mexican tax laws: the issuance of a new income tax law, the repeal of the flat rate business tax law and the cash deposits tax law, and certain amendments and changes to the Mexican tax laws related to value added tax, or VAT, and excise tax.

Among the tax reforms approved by the Mexican Federal Congress, the most relevant changes include (i) the elimination of the consolidation regime; (ii) the increase to the border VAT rate from 11% to 16%; (iii) the increase of the excise tax rates applicable to certain activities and industries such as the sale of foods with high density fat and the sale of

sweetened drinks; (iv) the elimination of several deductions to the income tax, including the deduction of 47% of non-taxable employee benefits; (v) the imposition of an additional tax of 10% on dividends paid to individuals or foreign residents; and (vi) the increase in the maximum income tax rate to 35% for individuals.

In February 2014, certain subsidiaries of the Company filed an *amparo* proceeding challenging the constitutionality of the elimination of the deduction of 47% of the non-taxable employee benefits against the income tax. The *amparo* petition is pending resolution.

The following describes the tax reforms that will have an important impact on the Group.

Elimination of the tax consolidation regime: As a consequence of this reform, we will have to pay in the coming 10 years, starting in 2014, income tax that was deferred in prior years in an aggregate amount of Ps.6,813 million.

Limitation of the deduction of non-taxable employee benefits: As a result of the tax reform, employee benefits that are exempt from income tax are deductible only up to 53%. This reform will result in an increase in income tax payable by some of our subsidiaries.

Increase to the border VAT rate: The preferential VAT rate of 11% applicable to operations carried out in the border region of Mexico was eliminated; consequently, going forward, the general VAT rate of 16% must be applied in the entire country. This means that any of our entities that render services or sell goods in the border region will have to charge an additional 5% of VAT to their customers.

The Reform and Addition of Various Provisions of the Mexican Constitution Related to Telecommunications, the LFTR, and Other Recent Actions of IFT May Significantly and Adversely Affect the Business, Results of Operations and Financial Results of Some of Our Business Segments

On June 12, 2013, the Telecom Reform came into force. As a result of the Telecom Reform, the LFTR was published in the Official Gazette of the Federation, and became effective on August 13, 2014. The LFTR amends, supplements and repeals certain provisions related to previous telecommunications and broadcasting legislation, in order to be consistent with the Telecom Reform. The Telecom Reform, the LFTR and any regulations related thereto to be issued by the President and IFT, as applicable, and certain actions recently taken by IFT, or to be taken by IFT

14

[Table of Contents](#)

from time to time, affect or could significantly and adversely affect the business, results of operations and financial condition of certain of our subsidiaries that provide services in the areas of broadcasting, cable and telecommunications.

The LFTR provides that measures taken or decisions issued by IFT are not subject to judicial stay. Therefore, subject to limited exceptions, until a decision, action or omission by IFT is declared void or unconstitutional by a competent court through a binding and final judgment, IFT's decision, action or omission will be valid and will have full legal effect.

As a result of the reforms to the Mexican Constitution and the must-offer and must-carry regulations issued by IFT, starting on September 10, 2013, concessionaires of broadcast services have been required to permit pay-TV concessionaires to retransmit broadcast signals, free of charge and on a non-discriminatory basis, within the same geographic coverage area simultaneously and without modifications, including advertising, and with the same quality of the broadcast signal, except in certain specific cases provided in the Telecom Reform. Also, since September 10, 2013, our pay-TV concessionaires are required to retransmit broadcast signals of free television concessionaires, free of charge and on a non-discriminatory basis, subject to certain exceptions and additional requirements provided for in the Telecom Reform.

Certain pay-TV concessionaires benefit from the free use of broadcast for retransmission to their subscribers. Consequently, our subsidiary that licenses to pay-TV concessionaires our broadcast television signals and our subsidiary that is the owner and/or licensor of the audiovisual works that we have produced or distributed, jointly or separately by us and some of our subsidiaries, have ceased receiving significant income from licensing retransmission rights, which has affected and will continue to affect their results of operations.

On February 27, 2014, the "General Guidelines Regarding the Provisions of Section 1 of the Eight Article of the Transitory Decree Amending and Supplementing a Number of Provisions of Articles 6, 7, 27, 28, 73, 78, 94 and 105 of the Mexican Constitution in Telecommunications," or the Guidelines, were published in the Official Gazette of the Federation, which include, among other obligations, the obligation of concessionaires of broadcast television licenses to permit the retransmission of their broadcast signals and the obligation of pay-TV concessionaires to perform such retransmission (without requiring the prior consent of the broadcast television concessionaires) in the same geographic coverage zone for free (subject to certain exceptions) and in a non-discriminatory manner in its entirety, simultaneously and without modifications, including advertising, and with the same quality of the broadcast signal without requiring consent from the broadcast television concessionaires.

On April 11, 2014, we, together with some of our subsidiaries, filed an *amparo* proceeding challenging the constitutionality of the Guidelines. On February 2015, certain amendments to the Guidelines were published in the Official Gazette, which among other provisions, require pay-TV concessionaires to retransmit the broadcast signals on all the commercial packages they offer to their subscribers and not only on their basic packages. On March 2015, the Company and the aforementioned subsidiaries, filed an extension to the original claims in the *amparo* proceeding, which is still under review by the relevant court. There can be no assurance that the outcome of such proceeding will be favorable to us and our subsidiaries.

On March 6, 2014, IFT issued a decision (the "Preponderance Decision") whereby it determined that we, together with other entities with concessions to provide broadcast television, including some of our subsidiaries, are preponderant economic agents in the broadcasting sector in Mexico (together, the "Preponderant Economic Agent"). The Preponderance Decision imposes on the Preponderant Economic Agent various measures, terms, conditions and restrictive obligations, some of which are described below, that may significantly and adversely affect the activities and businesses of our broadcasting businesses, as well as the results of operations and financial condition:

- **Infrastructure sharing** – The Preponderant Economic Agent must make its passive broadcasting infrastructure available to third-party concessionaires of broadcast television for commercial purposes in a non-discriminatory and non-exclusive manner, with the exception of broadcasters that, at the time the measures enter into force, have 12 MHz or more of radio-electric spectrum in the geographic area concerned. Such broadcasting infrastructure includes, among others, non-electronic elements at transmitting locations, rights of way, ducts, masts, trenches, towers, poles, security, sites, land, energy sources and air conditioning system elements. This action may result in the Preponderant Economic Agent being bound to incur substantial additional costs and obligations in complying with this requirement, as

well as affecting the results of operations. Furthermore, this measure will facilitate the entry and expansion of new competitors in the broadcasting industry without such competitors having to incur costs or investment expenses that new businesses in this industry otherwise would have made and which we incurred in the past and will continue incurring in the future in order to remain competitive. On December 19, 2014, an infrastructure offer with the terms and conditions to make our passive broadcasting infrastructure available to third-party concessionaires was published on our website. The price to be paid by the concessionaires for the use of our infrastructure is subject to negotiation. As of this date, we have not received any request from third-party concessionaires regarding such infrastructure offer. If the Company and the relevant concessionaire do not agree on a price, the IFT may determine a price, which, if it does not meet market conditions, may affect the businesses, results of operations and financial conditions of certain of our subsidiaries that provide services in the areas of broadcasting and telecommunications.

- Advertising sales – According to the Preponderance Decision, the Preponderant Economic Agent must deliver to IFT the terms and conditions of its broadcast advertising services and fee structures, including commercials, packages, discount plans and any other commercial offerings and publish them on its webpage. The Preponderant Economic Agent also must make publicly available on its website its forms of contracts and terms of sale for each service. Based on this decision, the Preponderant Economic Agent is expressly prohibited from refusing to sell advertising and/or discriminate with respect to the advertising spaces being offered. If IFT considers that the Preponderant Economic Agent has failed to comply with the foregoing, IFT may order the Preponderant Economic Agent to make its advertising spaces available, which, in turn, could affect the ability of the Preponderant Economic Agent to carry out its advertising sales plans in an efficient and competitive manner, affecting its operating results. This provision may also affect the ability of the Preponderant Economic Agent to offer competitive rates to its customers. This provision, may give a competitive advantage to, among others, our broadcast television competitor, TV Azteca, S.A.B. de C.V., or TV Azteca, and new concessionaires of broadcast television spectrum.
- Prohibition on acquiring certain exclusive content – The Preponderant Economic Agent may not acquire transmission rights, on an exclusive basis, for any location within Mexico with respect to certain relevant content, determined by IFT in the “Ruling whereby IFT identifies the relevant audiovisual contents in terms and for the purposes of the fourth measure and the second transitory article of the fourth attachment of the Telecommunication Preponderance Decision and the Broadcasting Preponderance Decision”, or the Relevant Content Ruling, which list may be updated every two years by IFT. Relevant content is defined as programs with a high expected level of regional or national audience and with unique characteristics that in the past have generated high levels of national or regional audiences. The Relevant Content Ruling identified certain programs that would be considered relevant content, namely, Mexican national soccer team games, the opening and closing ceremonies of the Olympic Games, the opening and closing ceremonies and semifinals and finals of the FIFA World Cup, and the finals of the Mexican Soccer League. This Ruling applies to broadcasting Preponderant Economic Agents and may limit the ability of Preponderant Economic Agents to negotiate and have access to this content and could affect its ability to acquire content in the medium and long term, which could significantly and adversely affect its revenues and results of operations from the sale of advertising, as well as the quality of the programming offered for its audiences. These audiences may move to other broadcast television transmissions or other technological platforms that transmit such content, or to other leisure activities such as cruising the internet or playing videogames, among others.
- Over-the-air channels – When the Preponderant Economic Agent offers any of its over-the-air channels, or channels that have at least 50% of the programming that is broadcast daily between 6:00 a.m. and midnight on such channels, to its affiliates, subsidiaries, related parties or third parties, for distribution through a different technological platform than over-the-air broadcast television, the Preponderant Economic Agent must offer these channels to any other person that asks for distribution over the same platform as the Preponderant Economic Agent has offered, on the same terms and conditions. Also, if the Preponderant Economic Agent offers a package of two or more of these channels, it must also offer them in an unpackaged form. This may significantly affect our ability to commercialize our programming, including programming that is not produced for broadcast television, which could affect our revenues and results of operations. Likewise, our ability to make more efficient use of other technological platforms could be significantly affected.
- Prohibition on participating in “buyers’ clubs” or syndicates to acquire audiovisual content, without IFT’s prior approval – The Preponderant Economic Agent may not enter into or remain a member of any “buyers’ club” or syndicates of audiovisual content unless it has received the prior approval of IFT. A “buyers’ club”

is defined as any arrangement between two or more economic agents to jointly acquire broadcast rights to audiovisual content in order to obtain better contractual terms. This may result in the Preponderant Economic Agent not having exclusive access to certain audiovisual content and consequently its audiences may move to other broadcast television transmissions or other technological platforms that transmit such content. It may also result in its acquisition costs significantly increasing, which can affect business strategy, financial condition and results of operations. This provision, when applied, will award a competitive advantage to, among others, our broadcast television competitor, TV Azteca, and to new licensees of broadcast television spectrum. This measure will also prevent other domestic players and the Preponderant Economic Agent from obtaining content together at competitive prices and taking advantage of economies of scale which may be available to international players.

On March 28, 2014, we, together with our subsidiaries determined to be the Preponderant Economic Agent in the broadcasting sector, filed an *amparo* proceeding challenging the constitutionality of the Preponderance Decision. The final resolution is still pending. We are unable to predict the outcome of this procedure.

The Telecom Reform provided for a public bid or auction to grant licenses to establish the National Digital Networks. The “Auction Program for Digital Television Broadcast Frequencies” took place in 2014 and the first part of 2015. On March 7, 2014, IFT published in the Official Gazette of the Federation a resolution whereby concessionaires or groups having commercial, organizational, economic or legal relations and that together hold concessions for broadcasting services representing at least 12 MHz of radio-electric spectrum in any geographic coverage zone may not participate in the public bid for National Digital Networks. Accordingly, we were prevented from participating in the bidding. In March 2015, IFT issued its ruling announcing Grupo Radio Centro and Cadena Tres as winning bidders for two free to air broadcasting licenses with separate national coverage. However, since Grupo Radio Centro has failed to pay the amount they bid for their free to air broadcasting license, the IFT’s ruling announcing them as a winning bidder was declared null and void and they will not receive the license. As a result, the portion of the spectrum which was going to be assigned to Grupo Radio Centro is scheduled to be auctioned by August 2016, in accordance with IFT’s Annual Work Program. Cadena Tres has completed the process and has received its license.

When the National Digital Networks are established, they will compete with our broadcasting subsidiaries for advertising revenues, which together with the measures previously described, can affect revenues and operating results and our ability to have access to competitive content or content of interest to advertisers and audiences. As a result, these advertisers and audiences may move to other broadcast television stations or other technological platforms, and our audience share may be

reduced. Likewise, we may incur additional costs in order to meet other obligations of IFT as previously described and which may be imposed on us as a result of the LFTR and the secondary regulations issued by the executive power and IFT, as applicable.

In addition to competition from the National Digital Networks, we could also be subject to additional competition from new competitors in the broadcast, cable and telecommunications markets in which we participate, including pay-TV, broadband, telephone services, cable providers, DTH television, telephone operators and/or other participants as a result of the elimination on the restrictions on foreign investment in telecommunications services and satellite communication and the increase in the maximum permitted foreign-ownership in broadcasting (television and radio) to 49%.

The LFTR provides that integrated multiservice concessions will be renewed for terms equal to the maximum terms for which they could be granted, namely, up to 30 years. To request the renewal of a concession, a concession holder must (i) file its request with IFT one year prior to the beginning of the fifth period of the term of the concession; (ii) comply with its obligations established in the applicable laws and in the concession title; and (iii) accept the new conditions that IFT may impose. In such cases, IFT will issue its ruling within 180 days following the date the concession holder files the renewal request. If IFT does not issue its ruling within 180 days the renewal will be automatically granted.

In the case of concessions for the use of radio-electric spectrum, the maximum term of renewal is 20 years. Renewal of concessions for the use of spectrum require, among others: (i) to request such renewal to IFT in the year prior to the last fifth period of the fixed term of the related concession; (ii) to be in compliance with the concession holder's obligations under the LFTR, other applicable regulations, and the concession title; (iii) a declaration by IFT that there is no public interest in recovering the spectrum granted under the related concession; and (iv) the

[Table of Contents](#)

acceptance by the concession holder of any new conditions for renewing the concession as set forth by IFT, including the payment of a related fee. To our knowledge, no spectrum granted for broadcasting services in Mexico has been recovered by the Mexican government in the past several years for public interest reasons; however, the Company is unable to predict the outcome of any action by IFT in this regard.

On March 13, 2015, the IFT investigative authority issued a preliminary opinion (the "Opinion") which was published in the Official Gazette on March 18, 2015. The Opinion was issued pursuant to Transitory Article 39 of the LFTR and presumed the probable existence of substantial power in the pay television and audio services market in Mexico, with respect to the Company and some of its subsidiaries. The authority determined that the Company does not hold substantial power in the investigated markets. Although this resolution is final at the administrative level, certain third parties have filed *amparo* proceedings challenging the constitutionality of the IFT resolution. These challenges are still under review by the competent courts and the Company is not able to predict the outcome of these challenges.

As part of our expansion of our cable business, on August 13, 2014, we acquired Cablecom and its subsidiaries (the "Cablecom Acquisition"), and on January 8, 2015, we acquired Telecable and its affiliates and subsidiaries (the "Telecable Acquisition"). For each of the Cablecom and Telecable Acquisitions, the IFT conducted an investigation pursuant to transitory Article 9 of the LFTR in order to analyze and determine if, as result of each transactions, the Company acquired substantial market power in the restricted television and audio services market. On November 2, 2015, and February 29, 2016, respectively, the IFT ruled that there were no sufficient elements to determine the existence of market power in the municipalities of Mexico in which Cablecom and Telecable operate. The resolution concerning the Cablecom Acquisition has been challenged by certain third parties. These challenges are still under review by the competent courts.

Overall, the Telecom Reform, the LFTR and secondary regulations already issued and to be issued by the executive power or IFT, as applicable, as well as any actions taken by IFT, may increase our operating costs and interfere with our ability to provide, or prevent us from offering, some of our current or future services. Moreover, the entry of new market participants and the introduction of new products could result in an impairment to the prices of some of our products and/or costs and adversely affect our results in some business segments in future periods.

The resolutions issued by IFT under the Telecom Reform significantly and adversely affect certain areas related to some of our activities, including broadcasting, cable and telecommunications, as well as our ability to introduce new products, infrastructure and services, to enter into new businesses or complementary businesses, to consummate acquisitions or joint ventures, to determine the rates we charge for our products, services and use of our infrastructure, to acquire broadcast rights to exclusive content, and to charge market rates for the licensing of copyrights we hold.

See "Information on the Company – Business Overview – Regulation – Telecom Reform and Broadcasting Regulations".

Risk Factors Related to Our Major Stockholders

Emilio Azcárraga Jean has Substantial Influence Over Our Management and the Interests of Mr. Azcárraga Jean may Differ from Those of Other Stockholders

We have four classes of common stock: Series "A" Shares, Series "B" Shares, Series "D" Shares, and Series "L" Shares. A trust for the benefit of Emilio Azcárraga Jean, or the Azcárraga Trust, currently holds 43.0% of the outstanding Series "A" shares, 0.1% of the outstanding Series "B" shares, 0.1% of the outstanding Series "D" shares and 0.1% of the outstanding Series "L" shares of the Company. As a result, Emilio Azcárraga Jean controls the vote of most of the shares held through the Azcárraga Trust. The Series "A" Shares held through the Azcárraga Trust constitute a majority of the Series "A" Shares whose holders are entitled to vote because non-Mexican holders of CPOs and GDSs are not permitted to vote the underlying Series "A" Shares in accordance with the trust agreement governing the CPOs and the Company's bylaws. Accordingly, and so long as non-Mexicans own more than a minimal number of Series "A" Shares, Emilio Azcárraga Jean will have the ability to direct the election of 11 out of 20 members of our Board of Directors, as well as prevent certain actions by the stockholders, including dividend payments, mergers, spin-offs, changes in corporate purpose, changes of nationality and amendments to the anti-takeover provisions of our bylaws. See "Major Stockholders and Related Party Transactions – The Major Stockholders".

[Table of Contents](#)

As Controlling Stockholder, Emilio Azcárraga Jean Will Have the Ability to Limit Our Ability to Raise Capital, Which Would Require Us to Seek Other Financing Arrangements

Emilio Azcárraga Jean has the voting power to prevent us from raising money through equity offerings. Mr. Azcárraga Jean has informed us that if we conduct a primary sale of our equity, he would consider exercising his pre-emptive rights to purchase a sufficient number of additional Series "A" Shares in order to maintain such power. In the event that Mr. Azcárraga Jean is unwilling to subscribe for additional shares and/or prevents us from raising money through equity

offerings, we would need to raise money through a combination of debt or other forms of financing, which we may not obtain, or if so, possibly not on favorable terms.

Risk Factors Related to Our Business

The Operation of Our Business May Be Adversely Affected if the Mexican Government Does Not Renew or Revokes Our Broadcast or Other Concessions

In June 2013, the Mexican Federal Congress passed the Telecom Reform which, among other things, created IFT. IFT has the authority to grant concessions for radio and television stations as well as for telecommunications services.

Under Mexican law, we need concessions from IFT (previously from SCT) to broadcast our programming over our television and radio stations, and to provide telecommunication services. In July 2004, in connection with the adoption of a release issued by the SCT for the transition to digital television, all of our broadcast television concessions were renewed until 2021. The expiration dates for the concessions for our radio stations range from 2016 to 2020. See “– Risk Factors Related to Mexico – Existing Mexican Laws and Regulations or Changes Thereto or the Imposition of New Ones May Negatively Affect Our Operations and Revenue”. The expiration dates of our Cable and Telecommunications concessions range from 2016 to 2044 and our DTH concessions expire in 2020 and 2026. The expiration dates for the concessions for our telephone services range from 2016 to 2044. Cablevisión obtained a telecommunications concession, which expires in 2029. Before the Telecom Reform in 2013, the SCT typically renewed the concessions of those concessionaires that complied with the applicable renewal procedures under Mexican law and with their obligations under the concession. In July 2014, the Mexican Federal Congress enacted the LFTR, which provides that integrated multiservice concessions will be renewed for terms equal to the maximum terms for which they could be granted, namely, up to 30 years.

Under Mexican law, we need a permit, or Gaming Permit, from the *Secretaría de Gobernación*, or Mexican Ministry of the Interior, to operate our gaming business. The operation of our gaming business may be terminated or interrupted if the Mexican Government does not renew or revokes our Gaming Permit. The Gaming Permit was granted to us on May 25, 2005 and the expiration date is May 24, 2030. We are unable to predict if we will obtain a renewal of the Gaming Permit.

See “– Risk Factors Related to Mexico – Existing Mexican Laws and Regulations or Changes Thereto or the Imposition of New Ones May Negatively Affect Our Operations and Revenue” and “– The Reform and Addition of Various Provisions of the Mexican Constitution Related to Telecommunications, the LFTR, and Other Recent Actions of IFT May Significantly and Adversely Affect the Business, Results of Operations and Financial Results of Some of Our Business Segments”.

We Face Competition in Each of Our Markets That We Expect Will Intensify

We face competition in all of our businesses, including broadcasting, advertising sales, cable, pay TV, telecommunications and all other businesses. The entities in which we have strategic investments and the joint ventures in which we participate also face competition. We expect that competition in our different businesses will intensify.

This competition mainly arises from the growth of the convergent market, pursuant to which certain concessionaries of telecommunication services are allowed to provide other services not included in their original concessions.

In television broadcasting, we face substantial competition from TV Azteca and other broadcasters such as Cadena 3 and Multimedios, among others. See “Information on the Company – Business Overview – Our Operations – Content – Television Industry in Mexico” and “Information on the Company – Business Overview – Our Operations – Programming – Television Networks”.

[Table of Contents](#)

Over-the-air broadcasting television also faces increased competition from other audiovisual platforms, including a great variety of pay-television channels distributed in Mexico, internet over-the-top (“OTT”) providers, and audiovisual content distributed over the internet and videogame systems.

We will also face additional competition in television broadcasting from at least Cadena Tres, which was granted a free to air broadcasting license with separate national coverage by IFT in March 2015. See “– Risk Factors Related to Mexico – The Reform and Addition of Various Provisions of the Mexican Constitution Related to Telecommunications, the LFTR, and Other Recent Actions of IFT May Significantly and Adversely Affect the Business, Results of Operations and Financial Results of Some of Our Business Segments”.

In radio broadcasting, we compete with other radio stations in their respective markets. Among our main competitors in the radio broadcast business are Grupo Radio Centro S.A.B. de C.V., NRM Comunicaciones, S.A. de C.V. and Grupo Acir, S.A. de C.V.

With respect to advertising, our radio and television stations compete with other radio and television stations in their respective markets, as well as with other advertising media, such as pay-TV, newspapers, magazines, internet and outdoor advertising.

Our DTH satellite business faces competition from various competitors, including Dish Mexico, a DTH satellite pay-TV platform which launched its services in Mexico at the end of 2008, Mega Cable Comunicaciones, S.A. de C.V., or Megacable, and from cable television companies which are subsidiaries of the Company. In addition, the DTH market competes with other media with respect to advertising and sales, including Pay-TV, outdoor advertising and publishing, among others.

At the end of 2012, Axtel launched a product called Axtel TV, which as of this date, under its basic package, offers up to 48 standard definition channels, optional virtual recording, in addition to internet and voice services.

In addition, the entertainment and telecommunications industries in which we operate are changing rapidly because of new participants and evolving distribution technologies, including the internet. As Mexico has completed the transition to digital television, it is likely that competition will also increase.

The cable industry in Mexico has become highly competitive and we face significant competition. Most cable operators are authorized to provide pay-TV, internet broadband services and voice services, including Voice over Internet Protocol, or VoIP, which poses a risk to us. We also face competition from the Preponderant Economic Agent in telecommunications, particularly in the provision of data and fixed telephony services.

Our pay-TV companies face competition from IPTV or online over-the-top (“OTT”) providers such as Netflix and Claro Video, as well as from other pay-TV operators such as Total Play, Megacable and other cable television companies, as well as from Dish Mexico and Sky.

We also face competition in our publishing business, where each of our magazine publications competes for readership and advertising revenues with other magazines of a general character and with other forms of print and non-print media.

Our business for production and distribution of feature films is a highly competitive business in Mexico. The various producers compete for the services of recognized talent and for film rights to scripts and other literary property. We compete with other feature film producers, Mexican and non-Mexican, and distributors in the distribution of films in Mexico and in the U.S. We also face competition in our other businesses. See “Information on the Company – Business Overview – Competition”.

Our principal competitors in the gaming industry are Codere S.A., or Codere, Corporación Interamericana de Entretenimiento, S.A.B. de C.V., or CIE, and Grupo Caliente S.A. de C.V., or Grupo Caliente.

With respect to the lottery industry, our principal competitors are the governmental lotteries, Pronósticos Deportivos and Loteria Nacional.

Our future success will be affected by changes in the broadcasting, advertising sales, cable, telecommunications, entertainment, gaming and other industries where we participate, which we cannot predict, and

[Table of Contents](#)

consolidation in such industries could further intensify competitive pressures. We expect to face competition from an increasing number of sources in Mexico, including emerging technologies that provide new services to pay-TV customers and new entrants in the public and pay-TV industries, which will require us to make significant capital expenditures in new technologies and will result in higher costs in the acquisition of content or may impair our ability to renew rights to special events, including sporting and entertainment events. Our cable business is highly competitive and capital intensive. Our business may require substantial capital to pursue additional acquisitions and capital expenditures which may result in additional incurrence of leverage, issuance of additional capital or a combination thereof.

The Seasonal Nature of Our Business Affects Our Revenue and a Significant Reduction in Fourth Quarter Net Sales Could Impact Our Results of Operations

Our business reflects seasonal patterns of advertising expenditures, which is common in the television broadcast industry, as well as cyclical patterns in periodic events such as the FIFA World Cup and the Olympic Games. We typically recognize a disproportionately large percentage of our Content advertising net sales in the fourth quarter in connection with the holiday shopping season. For example, in 2013, 2014 and 2015 we recognized 33.5%, 33.9% and 33.4%, respectively, of our net sales in the fourth quarter of the year. Accordingly, a significant reduction in fourth quarter advertising revenue could adversely affect our business, financial condition and results of operations.

DIRECTV Has Certain Governance and Veto Rights Over Some Operations of Innova

We own a 58.7% interest in Innova, our DTH venture in Mexico, Central America and the Dominican Republic. The remaining balance of Innova’s equity is indirectly owned by The DIRECTV Group, Inc., or DIRECTV, through its subsidiaries DTH (Mexico) Investment, LTD, DIRECTV Latin America Holdings, Inc., or DIRECTV Holdings, and DIRECTV Latin America LLC, or DTVLA. Although we hold a majority of Innova’s equity and designate a majority of the members of Innova’s Board of Directors, DIRECTV has certain governance and veto rights in Innova, including the right to block certain transactions between us and Innova. According to public information, DIRECTV was acquired by AT&T Inc. in July 2015.

Loss of Transmission or Loss of the Use of Satellite Transponders Could Cause a Business Interruption in Innova, Which Would Adversely Affect Our Net Income

Media and telecom companies, including Innova, rely on satellite transmissions to conduct their day-to-day business. Any unforeseen and sudden loss of transmission or non-performance of the satellite for Innova can cause huge losses to Innova’s business. The unforeseen loss of transmission may be caused due to the satellite’s loss of the orbital slot or the reduction in the satellite’s functional life.

The size of the business interruption impact for Innova in the case of a satellite loss exceeds the insurance we have acquired to cover this risk. In order to reduce the possibility of financial consequences resulting from an unforeseen loss of transmission, Innova entered into an agreement to launch a backup satellite jointly with Sky Brasil Servicos Ltda., or Sky Brasil, which was launched in the first quarter of 2010. In the third quarter of 2013, Sky entered into an agreement with DirecTV for the acquisition and launch of a satellite (“SM1”), which started operations in June 2015. In the future, we may have to invest in additional satellite capacity. We cannot predict the extent of losses to Innova in the case of current or new satellite loss or the effectiveness of any alternative strategy.

Any Incidents Affecting Our Network and Information Systems or Other Technologies Could Have an Adverse Impact on Our Business, Reputation and Results of Operations

Our business operations rely heavily on network and information systems and other technology systems. Incidents affecting these systems, including cyber-attacks, viruses, other destructive or disruptive software or activities, process breakdowns, outages, or accidental release of information, could result in a disruption of our operations, improper disclosure of personal data or other privileged or confidential information, or unauthorized access to our digital content or any other type of intellectual property. Any such incident could cause damage to our reputation and may require us to expend substantial resources to remedy the situation and could therefore have a material adverse effect on our business and results of operations. In addition, there can be no assurance that any efforts we make to prevent or mitigate these incidents will be successful in avoiding harm to our business.

[Table of Contents](#)

The Results of Operations of Univision Holdings, Inc. May Affect Our Results of Operations and the Value of Our Investment in That Company

We have a substantial investment in Univision Holdings, Inc., or UHI (formerly known as Broadcasting Media Partners, Inc., or BMP), the parent company of Univision Communications, Inc., or Univision. However, we do not control and do not consolidate the results of UHI. Our investment in UHI is currently held in the form of common stock and warrants that are exercisable for shares of common stock. Our exercise of the warrants into shares of common stock of UHI is subject to certain conditions. The value of the common stock of UHI could materially increase or decrease the carrying value of the warrants, as they are measured at fair value. After the exercise of the warrants, we will remain a minority equity holder of UHI. The results of operations of UHI and Univision may affect the value of our investment in UHI and our results of operations. The business, financial condition and results of operations of Univision could be materially and adversely affected by risks including, but not limited to: (i) failure to service debt, (ii) cancellation, reductions or postponements of advertising, (iii) an increase in the preference among Hispanics for English-language programming, (iv) an increase in the cost of, and decrease in the supply, quality of and demand for, Univision’s programming, (v) changes in the rules and

regulations of the Federal Communications Commission (the “FCC”), (vi) competitive pressures from other broadcasters and other entertainment and news media, (vii) failure to retain the rights to sports programming, (viii) possible strikes or other union job actions and (ix) the impact of new technologies.

There can be no assurance that the results of operations of UHI and its respective subsidiaries will be sufficient to maintain or increase the value of our investment in such company, or that such results will not materially and adversely affect our results of operations. For a discussion of our investment in UHI, see “Information on the Company— Business Overview – Univision”.

The Amendment to the Regulations of the General Health Law on Advertising Could Materially Affect Our Business, Results of Operations and Financial Condition

On February 14, 2014, the Mexican Ministry of Health published in the Official Gazette of the Federation an amendment to the Regulations of the General Health Law on Advertising, pursuant to which advertisers of certain high-caloric foods and non-alcoholic beverages are required to obtain prior permission from the health authorities in order to advertise their products on radio, broadcast television, pay-TV and in movie theaters (the “Health Law Amendment”). The Health Law Amendment became effective on April 16, 2014 and comprehensive guidelines entitled “Guidelines with nutritional and advertising criteria for advertisers of food and non-alcoholic beverages for obtaining permission for the advertising of their products with respect to the provisions of Articles 22bis and 79 of the Regulations of the General Health Law on Advertising” (the “Health Law Guidelines”) were published in the Official Gazette of the Federation on April 15, 2014 and became effective on July 7, 2014 for the advertisement of the following products: snacks, flavored drinks, candies, chocolates, or foods similar to chocolates and became effective for the remaining products on January 1, 2015.

The Health Law Guidelines restrict the hours that certain high-caloric foods and non-alcoholic drinks can be advertised. These restrictions do not apply when the advertisement is aired during certain programs such as sports, telenovelas, news programs, series officially rated as unsuitable for children, films with ratings of B, B15, C and D, and programs where the advertiser certifies through audience research that people between the ages of 4 and 12 represent no more than 35% of the audience and receives the prior consent from the Federal Commission for the Protection Against Health Risks.

Risk Factors Related to Our Securities

Any Actions Stockholders May Wish to Bring Concerning Our Bylaws or the CPO Trust Must Be Brought in a Mexican Court

Our bylaws provide that a stockholder must bring any legal actions concerning our bylaws in courts located in Mexico City. All parties to the trust agreement governing the CPOs, including the holders of CPOs, have agreed to submit any legal actions concerning the trust agreement only to Mexican courts.

22

[Table of Contents](#)

Non-Mexicans May Not Hold Series “A” Shares, Series “B” Shares or Series “D” Shares Directly and Must Have Them Held in a Trust at All Times

Although, as a result of the Telecom Reform, foreign investors are no longer restricted from holding equity interests in Mexican companies doing business in the telecommunications industry, the trust governing the CPOs and our bylaws nevertheless restrict non-Mexicans from directly owning Series “A” Shares, Series “B” Shares or Series “D” Shares. Non-Mexicans may hold Series “A” Shares, Series “B” Shares or Series “D” Shares indirectly through the CPO Trust, which will control the voting of such shares. Under the terms of the CPO Trust, a non-Mexican holder of CPOs or GDSs may instruct the CPO Trustee to request that we issue and deliver certificates representing each of the shares underlying its CPOs so that the CPO Trustee may sell, to a third party entitled to hold the shares, all of these shares and deliver to the holder any proceeds derived from the sale.

Non-Mexican Holders of Our Securities Forfeit Their Securities if They Invoke the Protection of Their Government

Pursuant to Mexican law, our bylaws provide that non-Mexican holders of CPOs and GDSs may not ask their government to interpose a claim against the Mexican government regarding their rights as stockholders. If non-Mexican holders of CPOs and GDSs violate this provision of our bylaws, they will automatically forfeit the Series “A” Shares, Series “B” Shares, Series “L” Shares and Series “D” Shares underlying their CPOs and GDSs to the Mexican government.

Non-Mexican Holders of Our Securities Have Limited Voting Rights

In accordance with the bylaws and trust governing the CPOs of the Company, non-Mexican holders of CPOs or GDSs are not entitled to vote the Series “A” Shares, Series “B” Shares and Series “D” Shares underlying their securities. The Series “L” Shares underlying CPOs or GDSs, the only series of our Shares that can be voted by non-Mexican holders of CPOs or GDSs, have limited voting rights. These limited voting rights include the right to elect two directors and limited rights to vote on extraordinary corporate actions, including the delisting of the Series “L” Shares and other actions which are adverse to the holders of the Series “L” Shares. For a brief description of the circumstances under which holders of Series “L” Shares are entitled to vote, see “Additional Information – Bylaws – Voting Rights and Stockholders’ Meetings”.

Our Antitakeover Protections May Deter Potential Acquirers and May Depress Our Stock Price

Certain provisions of our bylaws could make it substantially more difficult for a third party to acquire control of us. These provisions in our bylaws may discourage certain types of transactions involving the acquisition of our securities. These provisions may also limit our stockholders’ ability to approve transactions that may be in their best interests and discourage transactions in which our stockholders might otherwise receive a premium for their Shares over the then current market price, and could possibly adversely affect the trading volume in our equity securities. As a result, these provisions may adversely affect the market price of our securities. Holders of our securities who acquire Shares in violation of these provisions will not be able to vote, or receive dividends, distributions or other rights in respect of these securities and would be obligated to pay us a penalty. For a description of these provisions, see “Additional Information – Bylaws – Antitakeover Protections”.

GDS Holders May Face Disadvantages When Attempting to Exercise Voting Rights as Compared to Other Holders of Our Securities

In situations where we request that The Bank of New York Mellon, the depository for the securities underlying the GDSs, ask GDS holders for voting instructions, the holders may instruct the depository to exercise their voting rights, if any, pertaining to the deposited securities. The depository will attempt, to the extent practical, to arrange to deliver voting materials to these holders. We cannot assure holders of GDSs that they will receive the voting materials in time to ensure that they can instruct the depository how to vote the deposited securities underlying their GDSs, or that the depository will be able to forward those instructions and the appropriate proxy request to the CPO Trustee in a timely manner. For stockholders’ meetings, if the depository does not receive voting instructions from holders of GDSs or does not forward such instructions and appropriate proxy request in a timely manner, if requested in writing from us, it will provide a proxy to a representative designated by us to exercise these voting rights. If no such written request is made by us, the depository

will not represent or vote, attempt to represent or vote any right that attaches to, or instruct the CPO Trustee to represent or vote, the shares underlying the CPOs in the relevant meeting and, as a result, the underlying shares will be voted in the manner described under "Additional Information – Bylaws – Voting Rights and Stockholders' Meetings – Holders of CPOs". For CPO Holders'

[Table of Contents](#)

meetings, if the depository does not timely receive instructions from a Mexican or non-Mexican holder of GDSs as to the exercise of voting rights relating to the underlying CPOs in the relevant CPO holders' meeting, the depository and the custodian will take such actions as are necessary to cause such CPOs to be counted for purposes of satisfying applicable quorum requirements and, unless we in our sole discretion have given prior written notice to the depository and the custodian to the contrary, vote them in the same manner as the majority of the CPOs are voted at the relevant CPOs holders' meeting.

This means that holders of GDSs may not be able to exercise their right to vote and there may be nothing they can do if the deposited securities underlying their GDSs are not voted as they request.

The Interests of Our GDS Holders Will Be Diluted if We Issue New Shares and These Holders Are Unable to Exercise Preemptive Rights for Cash

Under Mexican law and our bylaws, our stockholders have preemptive rights with respect to capital increases. This means that in the event that we issue new Shares for cash, our stockholders will have a right to subscribe and pay the number of Shares of the same series necessary to maintain their existing ownership percentage in that series. U.S. holders of our GDSs cannot exercise their preemptive rights unless we register any newly issued Shares under the U.S. Securities Act of 1933, as amended, or the Securities Act, or qualify for an exemption from registration. If U.S. holders of GDSs cannot exercise their preemptive rights, the interests of these holders will be diluted in the event that we issue new Shares for cash. We intend to evaluate at the time of any offering of preemptive rights the costs and potential liabilities associated with registering any additional Shares. We cannot assure you that we will register under the Securities Act any new Shares that we issue for cash. In addition, although the Deposit Agreement provides that the depository may, after consultation with us, sell preemptive rights in Mexico or elsewhere outside the U.S. and distribute the proceeds to holders of GDSs, under current Mexican law these sales are not possible. See "Directors, Senior Management and Employees – Stock Purchase Plan and Long-Term Retention Plan" and "Additional Information – Bylaws – Preemptive Rights".

The Protections Afforded to Minority Stockholders in Mexico Are Different From Those in the U.S.

Under Mexican law, the protections afforded to minority stockholders are different from those in the U.S. In particular, the law concerning fiduciary duties of directors is not well developed, there is no procedure for class actions or stockholder derivative actions and there are different procedural requirements for bringing stockholder lawsuits. As a result, in practice, it may be more difficult for our minority stockholders to enforce their rights against us or our directors or major stockholders than it would be for stockholders of a U.S. company.

The *Ley del Mercado de Valores*, or the Mexican Securities Market Law, provides additional protection to minority stockholders, such as (i) providing stockholders of a public company representing 5% or more of the capital stock of the public company, an action for liability against the members and secretary of the Board and relevant management of the public company, and (ii) establishing additional responsibilities on the audit committee in all issues that have or may have an effect on minority stockholders and their interests in an issuer or its operations.

It May Be Difficult to Enforce Civil Liabilities Against Us or Our Directors, Executive Officers and Controlling Persons

We are organized under the laws of Mexico. Substantially all of our directors, executive officers and controlling persons reside outside the U.S., all or a significant portion of the assets of our directors, executive officers and controlling persons, and substantially all of our assets, are located outside of the U.S., and some of the parties named in this annual report also reside outside of the U.S. As a result, it may be difficult for you to effect service of process within the United States upon these persons or to enforce against them or us in U.S. courts judgments predicated upon the civil liability provisions of the federal securities laws of the U.S. We have been advised by our Mexican counsel, Mijares, Angoitia, Cortés y Fuentes, S.C., that there is doubt as to the enforceability, in original actions in Mexican courts, of liabilities predicated solely on U.S. federal securities laws and as to the enforceability in Mexican courts of judgments of U.S. courts obtained in actions predicated upon the civil liability provisions of U.S. federal securities laws.

[Table of Contents](#)

Forward-Looking Statements

This annual report and the documents incorporated by reference into this annual report contain forward-looking statements. In addition, we may from time to time make forward-looking statements in reports to the SEC, on Form 6-K, in annual reports to stockholders, in prospectuses, press releases and other written materials and in oral statements made by our officers, directors or employees to analysts, institutional investors, representatives of the media and others. Words such as "believe", "anticipate", "plan", "expect", "intend", "seek", "potential", "target", "estimate", "project", "predict", "forecast", "guideline", "may", "should", "could", "will" and similar words and expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying these statements. Examples of these forward-looking statements include, but are not limited to:

- estimates and projections of financial results, cash flows, capital expenditures, dividends, capital structure, financial position or other financial items or ratios;
- statements of our plans, objectives or goals, including those relating to anticipated trends, competition, regulation and rates;
- statements concerning our current and future plans regarding our online and wireless content division, Televisa Interactive Media, or TIM;
- statements concerning our current and future plans regarding our investment in and other arrangements with Imagina Media Audiovisual S.L., or Imagina;
- statements concerning our current and future plans regarding our investment in Grupo de Telecomunicaciones de Alta Capacidad, S.A.P.I. de C.V., or GTAC;
- statements concerning our current and future plans regarding our gaming business;
