
[Table of Contents](#)

The U.S. Treasury has expressed concerns that parties to whom ADRs are released may be taking actions that are inconsistent with the claiming of foreign tax credits for U.S. Holders of ADRs. Such actions would also be inconsistent with the claiming of the reduced rate of tax, described below, applicable to dividends received by certain non-corporate U.S. Holders. Accordingly, the analysis of the availability of foreign tax credits and the reduced tax rate for dividends received by certain non-corporate U.S. Holders, described below, could be affected by actions taken by parties to whom the ADRs are released.

Taxation of Distributions

The amount of any distribution paid to a U.S. Holder, including any Israeli taxes withheld from the amount of such distribution, will be subject to U.S. federal income taxation as ordinary income from sources outside the United States to the extent paid out of current or accumulated earnings and profits, as determined for U.S. federal income tax purposes. Subject to applicable limitations, dividends paid to non-corporate U.S. Holders with respect to taxable years beginning on or before December 31, 2010 are generally subject to tax at a maximum rate of 15%. The amount of any distribution of property other than cash will be the property's fair market value on the date of the distribution. To the extent that an amount received by a U.S. Holder exceeds that U.S. Holder's allocable share of current and accumulated earnings and profits, such excess will be applied first to reduce that U.S. Holder's tax basis in the shares and then, to the extent the distribution exceeds that U.S. Holder's tax basis, will be treated as a capital gain. Any dividend received will not be eligible for the dividends-received deduction generally allowed to U.S. corporations in respect of dividends received from other U.S. corporations.

Dividends paid in NIS will be included in a U.S. Holder's income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the date of the U.S. Holder's (or, in the case of ADRs, the depository's) receipt of the dividend, regardless of whether the payment is in fact converted into U.S. dollars. If the dividend is converted into U.S. dollars on the date of receipt, a U.S. Holder should generally not be required to recognize foreign currency gain or loss in respect of the dividend income. A U.S. Holder may have foreign currency gain or loss, which will be treated as income from sources within the United States, if he or she does not convert the amount of such dividend into U.S. dollars on the date of receipt. The amount of any distribution of property other than cash will be the property's fair market value on the date of the distribution.

Subject to applicable limitations that may vary depending on a U.S. Holder's circumstances, Israeli taxes withheld from dividends on Teva ADRs at the rate provided by the U.S.-Israel tax treaty will be creditable against a U.S. Holder's U.S. federal income tax liability. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. The rules governing foreign tax credits are complex, and, therefore, you should consult your own tax advisor regarding the availability of foreign tax credits in your particular circumstances. Instead of claiming a credit, a U.S. Holder may elect to deduct such otherwise creditable Israeli taxes in computing taxable income, subject to generally applicable limitations.

Taxation of the Disposition of ADRs

Upon the sale or exchange of ADRs, a U.S. Holder will generally recognize capital gain or loss for U.S. federal income tax purposes in an amount equal to the difference between the amount realized and the U.S. Holder's tax basis determined in U.S. dollars in the ADRs. The gain or loss will generally be gain or loss from sources within the United States for foreign tax credit limitation purposes. In general, the capital gain of a non-corporate U.S. Holder is subject to tax at ordinary rates for ADRs held for one year or less and at the long-term capital gains rate (currently 15%) for ADRs held for more than one year. A U.S. Holder's ability to deduct capital losses is subject to limitations.

The surrender of ADRs in exchange for ordinary shares, or vice versa, will not be a taxable event for U.S. federal income tax purposes, and U.S. Holders will not recognize any gain or loss upon such an exchange.

U.S. Information Reporting and Backup Withholding

A U.S. Holder generally will be subject to information reporting with respect to dividends paid on, or proceeds from the sale or other disposition of, an ADR unless the U.S. Holder is a corporation or comes within another category of exempt recipients. If it is not exempt, a U.S. Holder may also be subject to backup withholding with respect to dividends or proceeds from the sale or disposition of an ADR unless a taxpayer identification number is provided and the other applicable requirements of the backup withholding rules are complied with. Any amount withheld under these rules will be creditable against the U.S. Holder's U.S. federal income tax liability or refundable to the extent that it exceeds such liability, provided that the required information is timely furnished to the Internal Revenue Service.

U.S. Holders should review the summary below under “Israeli Taxation” for a discussion of the Israeli taxes which may be applicable to them.

Israeli Taxation

Corporate Tax Rate

The regular corporate tax rate in Israel was 29% in 2007 compared to 31% in 2006 and 34% in 2005. This rate is currently scheduled to decrease as follows: in 2008–27%, 2009–26% and 2010 and onward–25%. However, Teva’s effective consolidated tax rates (before deduction of certain charges) for the years ended December 31, 2005, 2006 and 2007 were 18%, 22% and 17%, respectively, since a major portion of Teva’s income is derived from Approved Enterprises (as discussed below), the applicable tax rate for which has not been reduced, and from operations outside of Israel, where Teva has enjoyed lower tax rates.

Law for the Encouragement of Industry (Taxes), 1969 (the “Industry Encouragement Law”)

Teva and certain of its Israeli subsidiaries currently qualify as “Industrial Companies” pursuant to the Industry Encouragement Law. As such, Teva and these subsidiaries qualify for certain tax benefits, including amortization of the purchase price of a good-faith acquisition of a patent or of certain other intangible property rights at the rate of 12.5% per annum and the right to file consolidated tax returns. Currently, Teva files consolidated tax returns together with certain Israeli subsidiaries. The tax laws and regulations dealing with the adjustment of taxable income for local inflation provide that industrial enterprises such as those of Teva and its subsidiaries which qualify as Industrial Companies can claim special rates of depreciation of up to 40% on a straight line basis for industrial equipment. In addition, new regulations generally allow the depreciation of industrial equipment purchased during the period from July 1, 2005 until December 31, 2006 over a period of two tax years.

Eligibility for benefits under the Industry Encouragement Law is not subject to receipt of prior approval from any government authority. Teva cannot assure you that Teva or any of its Israeli subsidiaries that presently qualify as Industrial Companies will continue to qualify as such in the future, or that the benefits will be granted in the future.

Law for the Encouragement of Capital Investments, 1959 (the “Investment Law”)

Industrial projects of Teva and certain of its Israeli subsidiaries are eligible to be granted “Approved Enterprise” status under the Investment Law.

The Investment Law empowers the Israeli Investment Center to grant Approved Enterprise status to capital investments in production facilities that meet certain relevant criteria. In general, such capital investments will receive Approved Enterprise status if the enterprise is expected to contribute to the development of the productive capacity of the economy, absorption of immigrants, creation of employment opportunities, or improvement in the balance of payments.

The tax benefits derived from any such Approved Enterprise relate only to taxable profits attributable to the specific program of investment to which the status was granted. In the event that Teva and its subsidiaries that have been granted Approved Enterprise status are operating under more than one approval, or in the event that their capital investments are only partly approved, their effective corporate tax rate will be the result of a weighted combination of the various rates applicable.

Table of Contents

Most of Teva's projects in Israel were granted Approved Enterprise status. For the vast majority of such Approved Enterprises, the companies elected to apply for alternative tax benefits—the waiver of government grants in return for tax exemptions on undistributed income. Upon distribution of such exempt income, the distributing company will be subject to corporate tax at the rate ordinarily applicable to the Approved Enterprise's income. Such tax exemption on undistributed income applies for a limited period of between two to ten years, depending upon the location of the enterprise. During the remainder of the benefits period (generally until the expiration of ten years), a corporate tax rate not exceeding 25% will apply (rather than the usual rate which was 29% in 2007, gradually scheduled to be reduced to 25% in 2010).

Teva is a foreign investors company, or FIC, as defined by the Investment Law, and is entitled to further reductions in the tax rate normally applicable to Approved Enterprises. Due to the fact that its current level of foreign ownership is more than 74%, its Approved Enterprise income is taxable at a tax rate not exceeding 15% for a 10 year period. Teva cannot assure you that it will continue to qualify as a FIC in the future or that the benefits described herein will be granted in the future.

Dividends paid by a company owning an Approved Enterprise, the source of which dividends is income derived from the Approved Enterprise, accrued during the benefits period, are generally taxed at a rate of 15% (which is withheld and paid by the company paying the dividend) if such dividends are paid during the benefits period or at any time up to 12 years thereafter. The 12-year limitation does not apply to a FIC.

In April 2005, a major amendment to the Investment Law came into effect, which is intended to provide expanded tax benefits to local and foreign investors and to simplify the bureaucratic process relating to the approval of investments that qualify under the Investment Law. Under the amendment, certain minimum qualifying investment requirements, time restrictions in which the investment is made and other conditions were established for new approved enterprises or expansions. Moreover, with a view to simplifying the bureaucratic process, the amendment provides that, in the event that an investment project meets all of the eligibility criteria under one of the Alternative Tracks (Standard Alternative Track, Ireland Track or Strategic Investment Track), as discussed further below, a project will automatically qualify for Approved Enterprise taxation benefits under the Investment Law with no need for prior approval from the Investment Center.

The amendment generally does not apply retroactively to investment programs having an Approved Enterprise approval certificate from the Investment Center issued prior to December 31, 2004 (even when investments under these programs are made after January 1, 2005). The amendment will only apply to a new Approved Enterprise and to an Approved Enterprise expansion for which the first year of benefits is 2004 or any year thereafter.

The Amendment provides two additional tracks—"The Ireland Track" and "The Strategic Investment Track"—in addition to those previously available. The Ireland Track generally enables companies that have an Approved Enterprise at a certain location in the country to distribute dividends while maintaining a low company and dividend tax burden. Upon election, the Ireland Track generally provides that during the 10-year benefit period the Approved Enterprise income will be subject to a corporate tax rate of 11.5% and a tax rate of 4% on dividends distributed from such income to foreign investors. Effectively, in the case of foreign shareholders, the aggregate corporate tax and withholding tax burden will be 15%. With respect to Israeli shareholders, the regular 15% rate still applies to dividend distributions, and therefore there would be an aggregate corporate tax and dividend liability of 24.78%.

The Strategic Investment Track applies to companies that have an Approved Enterprise in a certain location in the country, which enterprise has (i) investments of at least NIS 600 million or NIS 900 million (approximately \$167 or \$250 million) depending on the location in the country; and (ii) annual revenues (measured for the company's consolidated group) for the tax year prior to the year the new investment begins (or the annual average for the three years prior to the year of investment) of at least NIS 13 billion or NIS 20 billion (approximately \$3.62 billion or \$5.57 billion). Income accrued under this track during the benefits period will be exempt from a corporate tax liability. In addition, dividends distributed from such income will also be exempt from Israeli tax. The Israeli government, in certain cases, may reduce these minimum requirements if it determines that the investments will result in material contributions to the Israeli economy.

Unless extended, benefits under the Investment Law are granted with respect to qualified investments made in the period until December 31, 2008. However, as previously mentioned, eligibility for benefits under the Investment Law with respect to Approved Enterprises and expansions of Approved Enterprises from 2004 and onwards, is not subject to receipt of prior approval from any governmental authority. Teva cannot assure that it or any of its subsidiaries will continue to meet all the requirements in order to qualify for Approved Enterprise taxation benefits or that the benefits described above will continue to be granted in the future.

Taxation of Non-Israeli Subsidiaries

Non-Israeli subsidiaries are generally taxed based upon tax laws applicable in their countries of residence. In accordance with the provisions of Israeli-controlled foreign corporation rules, certain income of a non-Israeli subsidiary, if the subsidiary's primary source of income is passive income (such as interest, dividends, royalties, rental income or income from capital gains), may be deemed distributed as a dividend to the Israeli parent company and consequently is subject to Israeli taxation. An Israeli company that is subject to Israeli taxes on such deemed dividend income of its non-Israeli subsidiaries may generally receive a credit for non-Israeli income taxes paid by the subsidiary in its country of residence or are to be withheld from the actual dividend distributions.

Withholding Taxes on Dividends Distributed by Teva to Non-Israeli Residents

Dividends distributed by an Israeli company to non-Israeli residents are generally subject to a 20% tax to be withheld at the source (generally 15% in the case of dividends distributed from taxable income attributable to an Approved Enterprise), unless a lower rate is provided in a treaty between Israel and the shareholder's country of residence.

Under the U.S.-Israel tax treaty, the maximum Israeli tax and withholding tax on dividends paid to a holder of ordinary shares or ADRs who is a resident of the United States is generally 25%, but is reduced to 12.5% if the dividends are paid to a corporation that holds in excess of 10% of the voting rights of Teva during Teva's taxable year preceding the distribution of the dividend and the portion of Teva's taxable year in which the dividend was distributed. Dividends of an Israeli company derived from the income of an Approved Enterprise will still be subject to a 15% dividend withholding tax; provided that, if the dividend is attributable partly to income derived from an Approved Enterprise, and partly to other sources of income, the withholding rate will be a blended rate reflecting the relative portions of the two types of income. The withheld tax is the final tax in Israel on dividends paid to non-residents who do not conduct business in Israel. The rate of tax withheld on Teva's dividends in the fourth quarter of 2007 was 16.5%.

A non-resident of Israel who has interest or dividend income derived from or accrued in Israel, from which tax was withheld at the source, is generally exempt from the duty to file tax returns in Israel in respect of such income, provided such income was not derived from a business conducted in Israel by the taxpayer.

Capital Gains and Income Taxes Applicable to Non-Israeli Shareholders

Israeli law generally imposes a capital gains tax on the sale of securities and any other capital asset.

Gains on the sale of ordinary shares traded on a recognized stock exchange (including the Tel Aviv Stock Exchange and NASDAQ) by non-Israeli tax resident investors will generally be exempt from Israeli capital gains tax. Notwithstanding the foregoing, dealers in securities in Israel are taxed at regular tax rates applicable to business income.

In addition, the U.S.-Israel tax treaty exempts U.S. residents who hold an interest of less than 10% in an Israeli company, including Teva, and who did not hold an interest of 10% or more in the company at any time during the 12 months prior to a sale of their shares, from Israeli capital gains tax in connection with such sale. Certain other tax treaties to which Israel is a party also grant exemptions from Israeli capital gains taxes.
