

RISK FACTORS

Risks Related to the Company

Changes in Fuel Costs and Availability Affect the Company's Results. Jet fuel costs are subject to wide fluctuations as a result of many economic and political factors and events occurring throughout the world that Ryanair can neither control nor accurately predict, including increases in demand, sudden disruptions in supply and other concerns about global supply, as well as market speculation. While oil prices increased substantially in fiscal years 2012, 2013 and 2014, they reduced significantly in the second half of fiscal 2015 and currently remain at these lower levels. As international prices for jet fuel are denominated in U.S. dollars, Ryanair's fuel costs are also subject to certain exchange rate risks. Substantial price increases, adverse exchange rates, or the unavailability of adequate fuel supplies, including, without limitation, any such events resulting from international terrorism, prolonged hostilities in the Middle East or other oil-producing regions or the suspension of production by any significant producer, may adversely affect Ryanair's profitability. In the event of a fuel shortage resulting from a disruption of oil imports or otherwise, additional increases in fuel prices or a curtailment of scheduled services could result.

Ryanair has historically entered into arrangements providing for substantial protection against fluctuations in fuel prices, generally through forward contracts covering periods of up to 18 months of anticipated jet fuel requirements. As of July 24, 2015, Ryanair had entered into forward jet fuel (jet kerosene) contracts covering approximately 90% of its estimated requirements for the fiscal year ending March 31, 2016 at prices equivalent to approximately \$910 per metric ton. In addition, as of July 24, 2015, Ryanair had entered into forward jet fuel (jet kerosene) contracts covering approximately 70% of its estimated requirements for the fiscal year ending March 31, 2017 at prices equivalent to approximately \$657 per metric ton. Ryanair is exposed to risks arising from fluctuations in the price of fuel, and movements in the euro/U.S. dollar exchange rate because of the limited nature of its hedging program, especially in light of the recent volatility in the relevant currency and commodity markets. Any further movements in fuel costs could have a material adverse effect on Ryanair's financial performance. In addition, any further strengthening of the U.S. dollar against the euro could have an adverse effect on the cost of buying fuel in euro. As of July 24, 2015, Ryanair had hedged approximately 90% of its forecasted fuel-related dollar purchases against the euro at a rate of approximately \$1.33 per euro for the fiscal year ending March 31, 2016 and approximately 90% of its forecasted fuel related dollar purchases against the euro at a rate of approximately \$1.19 per euro for the fiscal year ending March 31, 2017.

No assurances whatsoever can be given about trends in fuel prices, and average fuel prices for future years may be significantly higher than current prices. Management estimates that every \$10 movement in the price of a metric ton of jet fuel will impact Ryanair's costs by approximately €2.5 million, taking into account Ryanair's hedging program for the 2016 fiscal year. There can be no assurance, however, in this regard, and the impact of fuel prices on Ryanair's operating results may be more or less pronounced. There also cannot be any assurance that Ryanair's current or any future arrangements will be adequate to protect Ryanair from increases in the price of fuel or that Ryanair will not incur losses due to high fuel prices, either alone or in combination with other factors. Because of Ryanair's low fares and its no-fuel-surcharges policy, as well as Ryanair's expansion plans, which could have a negative impact on yields, its ability to pass on increased fuel costs to passengers through increased fares or otherwise is somewhat limited. Moreover, the expansion of Ryanair's fleet from September 2014 onwards has resulted and will likely continue to result in an increase, in absolute terms, in Ryanair's aggregate fuel costs.

Ryanair Has Seasonally Grounded Aircraft. In recent years, in response to high fuel prices, typically lower winter traffic and yields and higher airport charges and/or taxes, Ryanair has adopted a policy of grounding a certain portion of its fleet during the winter months (from November to March). In the winter of fiscal year 2015, Ryanair grounded approximately 50 aircraft (down from 70 in fiscal year 2014) and the Company intends to again ground approximately 50 aircraft in fiscal 2016. Ryanair's policy of seasonally grounding aircraft presents some risks. While Ryanair seeks to implement its seasonal grounding policy in a way that will allow it to reduce losses by operating flights during periods of high oil prices to high cost airports at low winter yields, there can be no assurance that this strategy will be successful.

Table of Contents

Additionally, Ryanair's growth has been largely dependent on increasing summer capacity, and decreasing winter capacity, which may affect the overall future growth of Ryanair. Furthermore, while seasonal grounding does reduce Ryanair's variable operating costs, it does not avoid fixed costs such as aircraft ownership costs, and it also decreases Ryanair's potential to earn ancillary revenues. Decreasing the number and frequency of flights may also negatively affect Ryanair's labor relations, including its ability to attract flight personnel only interested in year round employment. Such risks could lead to negative effects on Ryanair's financial condition and/or results of operations.

Ryanair May Not Achieve All of the Expected Benefits of its Recent Strategic Initiatives. Ryanair is in the process of implementing a series of strategic initiatives that are expected to have a significant impact on its business. Among other things, these initiatives include scheduling more flights to primary airports, selling flights via corporate travel agents on global distribution systems ("GDS"), a higher marketing spend, and adjusting the airline's yield management strategy with the goal of increasing load factors. In fiscal years 2014 and 2015, Ryanair announced a series of customer-experience related initiatives under its "Always Getting Better" customer experience program, including a new easier-to-navigate website with a fare finder facility, a mobile app, reduced penalty fees, more customer-friendly baggage allowances, 24 hour grace periods to correct minor booking errors, the introduction of allocated seating for all passengers and family, business traveler and group booking facilities. For additional information on these initiatives, see "Item 4. Information on the Company – Strategy". Although customer reaction to the measures has so far been positive and management expects these initiatives to be accretive to the Company's results over time, no assurance can be given that the financial impact of the initiatives will be positive, particularly in the short to medium term. In particular, certain of the strategic initiatives may have the effect of increasing certain of the Company's costs (including airport fees and marketing expenses) while reducing ancillary revenues previously earned from website sales and from various penalty fees and charges. Although the Company expects that revenues from allocated seating will offset the reduction in ancillary revenues, there can be no assurance that this will occur. Factors beyond Ryanair's control, including but not limited to customer acceptance, competitive reactions, market and economic conditions and other challenges described in this report could limit Ryanair's ability to achieve some or all of the expected benefits of these initiatives. A relatively minor shortfall from expected revenue levels (or increase in expected costs) could have a material adverse effect on the Company's growth or financial performance.

Currency Fluctuations Affect the Company's Results. Although the Company is headquartered in Ireland, a significant portion of its operations are conducted in the U.K. Consequently, the Company has significant operating revenues and operating expenses, as well as assets and liabilities, denominated in U.K. pounds sterling. In addition, fuel, aircraft, insurance, and some maintenance obligations are denominated in U.S. dollars. The Company's operations and financial performance can therefore be significantly affected by fluctuations in the values of the U.K. pound sterling and the U.S. dollar. Ryanair is particularly vulnerable to direct exchange rate risks between the euro and the U.S. dollar because a significant portion of its operating costs are incurred in U.S. dollars and none of its revenues are denominated in U.S. dollars.

Although the Company engages in foreign currency hedging transactions between the euro and the U.S. dollar, between the euro and the U.K. pound sterling, and between the U.K. pound sterling and the U.S. dollar, hedging activities cannot be expected to eliminate currency risks. See "Item 11. Quantitative and Qualitative Disclosures About Market Risk."

The Company May Not Be Successful in Increasing Fares to Cover Rising Business Costs. Ryanair operates a low-fares airline. The success of its business model depends on its ability to control costs so as to deliver low fares while at the same time earning a profit. Ryanair has limited control over its fuel costs and already has comparatively low operating costs. In periods of high fuel costs, if Ryanair is unable to further reduce its other operating costs or generate additional revenues, operating profits are likely to fall. Furthermore, as part of its change in marketing and airport strategy, the Company will expect increased marketing and advertising costs along with higher airport charges due to the increasing number of primary airports to which it operates. Ryanair cannot offer any assurances regarding its future profitability. Changes in fuel costs and availability could have a material adverse impact on Ryanair's results. See "–The Company Faces Significant Price and Other Pressures in a Highly Competitive Environment" below and "–Changes in Fuel Costs and Availability Affect the Company's Results" above.

The Company is Subject to Legal Proceedings Alleging State Aid at Certain Airports. Formal investigations are ongoing by the European Commission into Ryanair's agreements with the Lübeck, Klagenfurt, Paris (Beauvais), La Rochelle, Carcassonne, Cagliari, Girona and Reus airports. The investigations seek to determine whether the agreements constitute illegal state aid under EU law. The investigations are expected to be completed in mid to late 2015, with the European Commission's decisions being appealable to the EU General Court. Between 2010 and 2014, investigations into Ryanair's agreements with the Bratislava, Tampere, Marseille, Berlin (Schönefeld), Aarhus, Dusseldorf (Weeze), Brussels (Charleroi), Frankfurt (Hahn), Alghero and Stockholm (Västerås) airports concluded with findings that these agreements contained no state aid. In 2014, the European Commission announced findings of state aid to Ryanair in its arrangements with Pau, Nîmes, Angoulême, Altenburg and Zweibrücken airports, ordering Ryanair to repay a total of approximately €10.4 million of alleged state aid. Ryanair has appealed to the EU General Court the decisions in the Angoulême and Pau cases, and is currently preparing appeals of the remaining 'aid' decisions. These appeal proceedings are expected to take between two and four years. In addition to the European Commission investigations, Ryanair is facing allegations that it has benefited from unlawful state aid in a number of national court cases, including in relation to its arrangements with Frankfurt (Hahn) and Lübeck airports. Adverse rulings in the above state aid matters could be used as precedents by competitors to challenge Ryanair's agreements with other publicly owned airports and could cause Ryanair to strongly reconsider its growth strategy in relation to public or state-owned airports across Europe. This could in turn lead to a scaling-back of Ryanair's overall growth strategy due to the smaller number of privately owned airports available for development.

On July 25, 2012, the European Commission decided that Ryanair, along with Aer Lingus Group plc ("Aer Lingus") and Aer Arann, had been in receipt of unlawful state aid from the Irish government as a result of being an identified beneficiary of the two-tier air travel tax in place for flights departing from Irish airports between March 2009 and March 2011. Ryanair was the original complainant to the European Commission, alleging that the air travel tax favored Aer Arann and Aer Lingus. Ryanair appealed the decision of the European Commission to the EU General Court on November 14, 2012. On February 5, 2015, the EU General Court partially annulled the European Commission's 2012 decision and held that the actual quantum of aid depended on the extent of pass-through of the "tax reduction" to passengers. Both Ryanair and the Commission have appealed the EU General Court's decision to the European Court of Justice. In addition, Ryanair has submitted a response to the European Commission's appeal, in support of certain findings of the EU General Court. On the basis of the European Commission's 2012 decision, the Irish State was obliged to recover the alleged unlawful state aid from Ryanair before the Irish courts, and initiated its claim in April 2013. The Irish State was seeking approximately €12 million plus interest from Ryanair in those proceedings. Following the EU General Court's partial annulment of the European Commission's decision, Ryanair applied for the Government's claim to be struck out. In April 2015, both the Irish State's case and Ryanair's application to have it struck out were stayed pending the outcome of the appeal to the European Court of Justice. Ryanair's proceedings, initiated in July 2012, before the Irish courts for recovery of the entire amount of the air travel tax paid during the period March 2009 - March 2011 on the basis of the two-tier nature of the tax being unlawful under EU law are pending.

No assurance can be given as to the outcome of these legal proceedings, nor as to whether any unfavorable outcomes may, individually or in the aggregate, have an adverse effect on the results of operations or financial condition of Ryanair.

For additional information, please see "Item 8. Financial Information—Other Financial Information—Legal Proceedings."

The Company Faces Significant Price and Other Pressures in a Highly Competitive Environment. Ryanair operates in a highly competitive marketplace, with a number of low-fare, traditional and charter airlines competing throughout its route network. Airlines compete primarily in respect of fare levels, frequency and dependability of service, name recognition, passenger amenities (such as access to frequent flyer programs), and the availability and convenience of other passenger services. Unlike Ryanair, certain competitors are state-owned or state-controlled flag carriers and in some cases may have greater name recognition and resources and may have received, or may receive in the future, significant amounts of subsidies and other state aid from their respective governments. In addition, the EU-U.S. Open Skies Agreement, which came into effect in March 2008, allows U.S. carriers to offer services in the intra-EU market, which could eventually result in increased competition in the EU market. See "Item 4. Information on the Company—Government Regulation—Liberalization of the EU Air Transportation Market."

[Table of Contents](#)

The airline industry is highly susceptible to price discounting, in part because airlines incur very low marginal costs for providing service to passengers occupying otherwise unsold seats. Both low-fare and traditional airlines sometimes offer low fares in direct competition with Ryanair across a significant proportion of its route network as a result of the liberalization of the EU air transport market and greater public acceptance of the low-fares model. The recent decrease in fuel prices may enable weaker, unhedged, airlines to pass through fuel savings via lower fares. While Ryanair is hedged at levels that are expected to deliver unit cost savings over the next two fiscal years, it is hedged at prices that are above the current spot prices. There is no guarantee that lower fuel prices will not lead to greater price competition and encourage new entrants to the market in the short to medium term.

Although Ryanair intends to compete vigorously and to assert its rights against any predatory pricing or other similar conduct, price competition among airlines could reduce the level of fares and/or passenger traffic on Ryanair's routes to the point where profitability may not be achievable.

In addition to traditional competition among airline companies and charter operators who have entered the low-fares market, the industry also faces competition from ground transportation (including high-speed rail systems) and sea transportation alternatives, as businesses and recreational travelers seek substitutes for air travel.

The Company Will Incur Significant Costs Acquiring New Aircraft and Any Instability in the Credit and Capital Markets Could Negatively Impact Ryanair's Ability to Obtain Financing on Acceptable Terms. Ryanair's continued growth is dependent upon its ability to acquire additional aircraft to meet additional capacity needs and to replace older aircraft. Ryanair had over 315 aircraft in its principle fleet by June 30, 2015 and has ordered an additional 372 new aircraft (a mix of new Boeing 737-800 next generation aircraft and 737-MAX-200 aircraft) for delivery during fiscal 2016 to fiscal 2024 pursuant to contracts with the Boeing Company (the "2013 Boeing Contract" and "2014 Boeing Contract"). Ryanair expects to have approximately 520 operating aircraft in its fleet by March 31, 2024, depending on the level of lease returns/disposals. For additional information on the Company's aircraft fleet and expansion plans, see "Item 4. Information on the Company-Aircraft" and "Item 5. Operating and Financial Review and Prospects-Liquidity and Capital Resources." There can be no assurance that this planned expansion will not outpace the growth of passenger traffic on Ryanair's routes or that traffic growth will not prove to be greater than the expanded fleet can accommodate. In either case, such developments could have a material adverse effect on the Company's business, results of operations, and financial condition.

As a result of the 2013 Boeing Contract and 2014 Boeing Contract, the Company is expected to raise substantial debt financing to cover all of the expected aircraft deliveries over the period from September 2014 to November 2023, including Ryanair's issuance of €850.0 million in 1.875% unsecured eurobonds with a 7 year tenor in June 2014 and issuance of €850.0 million in 1.125% unsecured eurobonds with an 8 year tenor in March 2015 that are both guaranteed by Ryanair Holdings. Furthermore, Ryanair's ability to raise unsecured or secured debt to pay for aircraft as they are delivered is subject to various conditions imposed by the counterparties and debt markets to such loan facilities and related loan guarantees, and any future financing is expected to be subject to similar conditions. Any failure by Ryanair to comply with such conditions would have a material adverse effect on its operations and financial condition.

Using the debt capital markets to finance the Company and the 2013 and 2014 Boeing Contracts requires the Company to retain its investment grade credit ratings, (the Company has a BBB+ (stable) credit rating from S&P and a BBB+ (stable) credit rating from Fitch Ratings). There is a risk that the Company will be unable, or unwilling, to access these markets if it is downgraded or is unable to retain its investment grade credit ratings and this could lead to a higher cost of finance for Ryanair.

Ryanair has also entered into significant derivative transactions intended to hedge its current aircraft acquisition-related debt obligations. These derivative transactions expose Ryanair to certain risks and could have adverse effects on its results of operations and financial condition. See "Item 11. Quantitative and Qualitative Disclosures About Market Risk."

The Company's Growth May Expose It to Risks. Ryanair's operations have grown rapidly since it pioneered the low-fares operating model in Europe in the early 1990s. Ryanair intends to continue to expand its fleet and add new destinations and additional flights, with the goal of increasing Ryanair's booked passenger volumes to approximately 160.0 million passengers per annum by March 31, 2024, an increase of approximately 77% from the approximately 90.6 million passengers booked in the 2015 fiscal year. However, no assurance can be given that this target will be met. If growth in passenger traffic and Ryanair's revenues do not keep pace with the planned expansion of its fleet, Ryanair could suffer from overcapacity and its results of operations and financial condition (including its ability to fund scheduled purchases of the new aircraft and related debt repayments) could be materially adversely affected.

The continued expansion of Ryanair's fleet and operations, at a rate lower than in previous years (although in absolute terms it may be higher), combined with other factors, may also strain existing management resources and related operational, financial, management information and information technology systems. Expansion will generally require additional skilled personnel, equipment, facilities and systems. An inability to hire skilled personnel or to secure required equipment and facilities efficiently and in a cost-effective manner may adversely affect Ryanair's ability to achieve its growth plans and sustain or increase its profitability.

Ryanair's New Routes and Expanded Operations May Have an Adverse Financial Impact on its Results. Currently, a substantial number of carriers operate routes that compete with Ryanair, and the Company expects to face further intense competition.

When Ryanair commences new routes, its load factors and fares tend to be lower than those on its established routes and its advertising and other promotional costs tend to be higher, which may result in initial losses that could have a material negative impact on Ryanair's results of operations as well as require a substantial amount of cash to fund. In addition, there can be no assurance that Ryanair's low-fares service will be accepted on new routes. Ryanair also periodically runs special promotional fare campaigns, in particular in connection with the opening of new routes. Promotional fares may have the effect of increasing load factors and reducing Ryanair's yield and passenger revenues on such routes during the periods that they are in effect. Ryanair has other significant cash needs as it expands, including the cash required to fund aircraft purchases or aircraft deposits related to the acquisition of additional Boeing 737-800 and Boeing 737-MAX-200 series aircraft. There can be no assurance that Ryanair will have sufficient cash to make such expenditures and investments, and to the extent Ryanair is unable to expand its route system successfully, its future revenue and earnings growth will in turn be limited. See "—The Company Will Incur Significant Costs Acquiring New Aircraft and Any Instability in the Credit and Capital Markets Could Negatively Impact Ryanair's Ability to Obtain Financing on Acceptable Terms" above.

Ryanair's Continued Growth is Dependent on Access to Suitable Airports; Charges for Airport Access are Subject to Increase. Airline traffic at certain European airports is regulated by a system of grandfathered "slot" allocations. Each slot represents authorization to take-off and land at the particular airport at a specified time. As part of Ryanair's recent strategic initiatives, which include more flights to primary airports, Ryanair is operating to an increasing number of slot coordinated airports, a number of which have constraints at particular times of the day. There can be no assurance that Ryanair will be able to obtain a sufficient number of slots at slot-coordinated airports that it may wish to serve in the future, at the time it needs them, or on acceptable terms. There can also be no assurance that its non-slot constrained bases, or the other non-slot constrained airports Ryanair serves, will continue to operate without slot allocation restrictions in the future. See "Item 4. Information on the Company—Government Regulation—Slots." Airports may impose other operating restrictions such as curfews, limits on aircraft noise levels, mandatory flight paths, runway restrictions, and limits on the number of average daily departures. Such restrictions may limit the ability of Ryanair to provide service to or increase service at such airports.

Ryanair's future growth also materially depends on its ability to access suitable airports located in its targeted geographic markets at costs that are consistent with Ryanair's strategy. Any condition that denies, limits, or delays Ryanair's access to airports it serves or seeks to serve in the future would constrain Ryanair's ability to grow. A change in the terms of Ryanair's access to these facilities or any increase in the relevant charges paid by Ryanair as a result of the expiration or termination of such arrangements and Ryanair's failure to renegotiate comparable terms or rates could have a material adverse effect on the Company's financial condition and results of operations. For example in July 2012, the Spanish government increased airport taxes at the two largest airports, Barcelona and Madrid, by over 100%, while smaller increases were implemented at other Spanish airports. As a result, Ryanair

cancelled routes and reduced capacity on remaining routes from Madrid and Barcelona in response to the Spanish government's decision to double airport taxes at the two airports. For additional information, see "Item 4. Information on the Company—Airport Operations—Airport Charges." See also "—The Company Is Subject to Legal Proceedings Alleging State Aid at Certain Airports" above.

The Company's Acquisition of 29.8% of Aer Lingus and Subsequent Failure to Conclude a Complete Acquisition of Aer Lingus Could Expose the Company to Risk. During the 2007 fiscal year, the Company acquired 25.2% of Aer Lingus. The Company increased its interest to 29.3% during the 2008 fiscal year, and to 29.8% during the 2009 fiscal year at a total aggregate cost of €407.2 million. Following the acquisition of its initial stake and upon the approval of the Company's shareholders, management proposed to effect a tender offer to acquire the entire share capital of Aer Lingus. This 2006 offer was, however, prohibited by the European Commission on competition grounds.

In October 2007, the European Commission reached a formal decision that it would not force Ryanair to sell its shares in Aer Lingus. This decision has been affirmed on appeal. However, EU legislation may change in the future to require such a forced disposition. If eventually forced to dispose of its stake in Aer Lingus, Ryanair could suffer significant losses due to the negative impact on market prices of the forced sale of such a significant portion of Aer Lingus' shares.

The United Kingdom's Office of Fair Trading ("OFT") wrote to Ryanair in September 2010, advising that it intended to investigate Ryanair's minority stake in Aer Lingus. Ryanair objected on the basis that the OFT's investigation was time-barred. On June 15, 2012, the OFT referred the investigation of Ryanair's minority stake in Aer Lingus to the U.K. Competition Commission (the "Competition Commission").

On June 19, 2012, Ryanair announced its third all cash offer to acquire all of the ordinary shares of Aer Lingus it did not own at a price of €1.30 per ordinary share and immediately commenced pre-notification discussions with the European Commission for the purpose of preparing a merger filing. Ryanair contended that, pending the outcome of the European Commission's review of Ryanair's bid, on the basis of the duty of "sincere cooperation" between the EU and the Member States, and under the EU Merger Regulation, the Competition Commission's investigation of Ryanair's minority stake in Aer Lingus should not proceed. Nevertheless, Aer Lingus argued that the investigation should proceed and that Ryanair's offer was in breach of certain provisions of the UK Enterprise Act 2002.

On July 10, 2012, the Competition Commission ruled that Ryanair's bid was not in breach of the UK Enterprise Act, but nevertheless decided that its investigation of the minority stake could proceed in parallel with the European Commission's investigation of Ryanair's offer for Aer Lingus. In July 2012, Ryanair appealed the latter part of the Competition Commission's ruling to the UK Competition Appeal Tribunal ("CAT"), and the Competition Commission's investigation was suspended pending the appeal process. On August 8, 2012, the CAT rejected Ryanair's appeal and found that the Competition Commission's investigation could proceed in parallel with the European Commission's investigation, but that the Competition Commission must avoid taking any final decision which could conflict with the European Commission's ultimate conclusion on Ryanair's bid. In August 2012, Ryanair appealed the CAT judgment to the UK Court of Appeal. In December 2012, the Court of Appeal rejected Ryanair's appeal and subsequently the Competition Commission's investigation restarted. On December 13, 2012, Ryanair applied to the UK Supreme Court for permission to appeal the judgment of the UK Court of Appeal. The UK Supreme Court refused permission to appeal on April 25, 2013.

On February 27, 2013, the European Commission prohibited Ryanair's bid to acquire the entire share capital of Aer Lingus on the claimed basis that it would be incompatible with the EU internal market. Ryanair appealed this decision to the EU General Court on May 8, 2013. The judgment of the EU General Court is expected in 2016 and may affirm or annul the decision of the European Commission.

Following the European Commission's decision to prohibit its offer for Aer Lingus, Ryanair actively engaged with the Competition Commission's investigation of the minority stake. On August 28, 2013, the Competition Commission issued its final decision in which it found that Ryanair's shareholding "gave it the ability to exercise material influence over Aer Lingus" and "had led or may be expected to lead to a substantial lessening of competition in the markets for air passenger services between Great Britain and Ireland." As a result of its findings, the Competition Commission ordered Ryanair to reduce its shareholding in Aer Lingus to no more than five percent of Aer Lingus' issued ordinary shares. Ryanair appealed the Competition Commission's final decision to the CAT on September 23, 2013. The CAT rejected Ryanair's appeal on March 7, 2014. On April 23, 2014, the CAT granted Ryanair permission to appeal the CAT's judgment to the UK Court of Appeal. The UK Court of Appeal rejected Ryanair's appeal on February 12, 2015. On March 12, 2015, Ryanair applied to the UK Supreme Court for permission to appeal the judgment of the UK Court of Appeal. On July 14, 2015, the Supreme Court refused permission, bringing the appeal process against the Competition Commission's final decision to conclusion.

On February 12, 2015, Ryanair applied to the Competition and Markets Authority ("CMA") (formerly the Competition Commission) for a review of its August 28, 2013 decision on the basis that the proposed offer by the International Airlines Group ("IAG") for Aer Lingus, announced in December 2014, amounted to a material change of circumstances which necessitated such review and the setting aside of the divestment order. On June 11, 2015 the CMA adopted a decision rejecting Ryanair's contention that IAG's proposed bid amounted to a material change of circumstances and imposing its divestment order. Ryanair appealed that decision and the imposition of the divestment order to the CAT. On July 15, 2015, the CAT dismissed Ryanair's appeal. Ryanair has submitted an application for permission to appeal this ruling to the UK Court of Appeal.

On June 19, 2015, IAG issued a formal offer for Aer Lingus Group plc. The offer, which was recommended by the Board of Aer Lingus Group plc, consists of cash consideration of €2.50 per ordinary share plus a €0.05 ordinary dividend (already paid in May 2015). The offer is subject to the acceptance of the offer by key shareholders, namely the Irish government and Ryanair, and regulatory approval from the European competition authorities.

On July 10, 2015, Ryanair confirmed that the Board of Ryanair Holdings voted unanimously to accept the IAG offer for Ryanair's 29.8% shareholding in Aer Lingus Group plc, subject to that offer receiving merger clearance from the European Commission (which was subsequently granted on July 14, 2015).

For more information, see "Item 8. Financial Information—Other Financial Information—Legal Proceedings—Matters Related to Investment in Aer Lingus."

Labor Relations Could Expose the Company to Risk. A variety of factors, including, but not limited to, Ryanair's profitability and its seasonal grounding policy, may make it difficult for Ryanair to avoid increases to salary levels and productivity payments. Consequently, there can be no assurance that Ryanair's existing employee compensation arrangements will not be subject to change or modification at any time. These steps may lead to deterioration in labor relations in Ryanair and could impact Ryanair's business or results. Ryanair also operates in certain jurisdictions with above average payroll taxes and employee-related social insurance costs, which could have an impact on the availability and cost of employees in these jurisdictions. Ryanair's crew in continental Europe generally operate on Irish contracts of employment on the basis that those crew work mainly on Irish Territory, (i.e., on board Irish Registered Aircraft). A number of challenges have been initiated by government agencies in a number of countries to the applicability of Irish labor law to these contracts, and if Ryanair were forced to concede that Irish jurisdiction did not apply to those crew who operate from continental Europe then it could lead to increased salary, social insurance and pension costs and a potential loss of flexibility. In relation to social insurance costs, the European Parliament implemented amendments to Regulation (EC) 883/2004 which, in the majority of jurisdictions, imposes substantial social insurance contribution increases for either or both Ryanair and the individual employees. While this change to social insurance contributions relates primarily to new employees, its effect in the long term may materially increase Company or employee social insurance contributions and could affect Ryanair's decision to operate from those high cost locations, resulting in redundancies and a consequent deterioration in labor relations. For additional details see – "Change in EU Regulations in Relation to Employers and Employee Social Insurance could Increase Costs" below.

Ryanair currently conducts collective bargaining negotiations with groups of employees, including its pilots and cabin crew, regarding pay, work practices, and conditions of employment, through collective-bargaining units called Employee Representative Committees ("ERC"). Following negotiations through this ERC system, pilots at all of Ryanair's bases are covered by four, five or six year collective agreements on pay, allowances and rosters which fall due for negotiation at various dates between 2016 and 2021. Cabin crew at all of Ryanair's bases are also party to long term collective agreements on pay, allowances and rosters, which expire in March 2017. On June 19, 2009, BALPA (the U.K. pilots union) made a request for voluntary recognition under applicable U.K. legislation, which Ryanair rejected. BALPA had the option of applying to the U.K.'s Central Arbitration Committee ("CAC") to organize a vote on union recognition by Ryanair's pilots in relevant bargaining units, as determined by the CAC, but BALPA decided not to proceed with an application at that time. The option to apply for a ballot remains open to BALPA and if it were to seek and be successful in such a ballot, it would be able to represent the U.K. pilots in negotiations over salaries and working conditions. Limitations on Ryanair's flexibility in dealing with its employees or the altering of the public's perception of Ryanair generally could have a material adverse effect on Ryanair's business, operating results, and financial condition. For additional details, see "Item 6. Directors, Senior Management and Employees—Staff and Labor Relations." Limitations on Ryanair's flexibility in dealing with its staff or the altering of the public's perception of Ryanair generally could have a material adverse effect on the Company's business, operating results, and financial condition.

The Company is Dependent on External Service Providers. Ryanair currently assigns its engine overhauls and "rotable" repairs to outside contractors approved under the terms of Part 145, the European regulatory standard for aircraft maintenance established by the European Aviation Safety Agency ("Part 145"). The Company also assigns its passenger, aircraft and ground handling services at airports other than Dublin and certain airports in Spain and the Canary Islands to established external service providers. See "Item 4. Information on the Company—Maintenance and Repairs—Heavy Maintenance" and "Item 4. Information on the Company—Airport Operations—Airport Handling Services."

The termination or expiration of any of Ryanair's service contracts or any inability to renew them or negotiate replacement contracts with other service providers at comparable rates could have a material adverse effect on the Company's results of operations. Ryanair will need to enter into airport service agreements in any new markets it enters, and there can be no assurance that it will be able to obtain the necessary facilities and services at competitive rates. In addition, although Ryanair seeks to monitor the performance of external parties that provide passenger and aircraft handling services, the efficiency, timeliness, and quality of contract performance by external providers are largely beyond Ryanair's direct control. Ryanair expects to be dependent on such outsourcing arrangements for the foreseeable future.

The Company is Dependent on Key Personnel. Ryanair's success depends to a significant extent upon the efforts and abilities of its senior management team, including Michael O'Leary, the Chief Executive Officer, and key financial, commercial, operating and maintenance personnel. In October 2014, Mr. O'Leary signed a new five year contract with the Company. This contract can be terminated by either party giving twelve months' notice. See "Item 6. Directors, Senior Management and Employees—Compensation of Directors and Executive Officers—Employment and Bonus Agreement with Mr. O'Leary." Ryanair's success also depends on the ability of its executive officers and other members of senior management to operate and manage effectively, both independently and as a group. Although Ryanair's employment agreements with Mr. O'Leary and some of its other senior executives contain non-competition and non-disclosure provisions, there can be no assurance that these provisions will be enforceable in whole or in part. Competition for highly qualified personnel is intense, and either the loss of any executive officer, senior manager, or other key employee without adequate replacement or the inability to attract new qualified personnel could have a material adverse effect upon Ryanair's business, operating results, and financial condition.

The Company Faces Risks Related to its Internet Reservations Operations and its Announced Elimination of Airport Check-in Facilities. Ryanair's flight reservations are made through its website, GDSs and mobile app. Although Ryanair has established a contingency program whereby the website is hosted in three separate locations, each of these locations accesses the same booking engine, located at a single center, in order to make reservations.

Table of Contents

A back-up booking engine is available to Ryanair to support its existing platform in the event of a breakdown in this facility. Nonetheless, the process of switching over to the back-up engine could take some time and there can be no assurance that Ryanair would not suffer a significant loss of reservations in the event of a major breakdown of its booking engine or other related systems, which, in turn, could have a material adverse effect on Ryanair's operating results or financial condition.

Since October 1, 2009, all passengers have been required to use Internet check-in. Internet check-in is part of a package of measures intended to reduce check-in lines and passenger handling costs and pass on these savings by reducing passenger airfares. Ryanair has deployed this system across its network. Any disruptions to the Internet check-in service as a result of a breakdown in the relevant computer systems or otherwise could have a material adverse impact on these service-improvement and cost-reduction efforts. There can be no assurance, however, that this process will continue to be successful or that consumers will not switch to other carriers that provide standard check-in facilities, which would negatively affect Ryanair's results of operations and financial condition.

The Company Faces Risks Related to Unauthorized Use of Information from the Company's Website. Screenscraper websites gain unauthorized access to Ryanair's website and booking system, extract flight and pricing information and display it on their own websites for sale to customers at prices which may include hidden intermediary fees on top of Ryanair's fares. Ryanair does not allow any such commercial use of its website and objects to the practice of screenscraping also on the basis of certain legal principles, such as database rights, copyright protection, etc. Ryanair is currently involved in a number of legal proceedings against the proprietors of screenscraper websites in Ireland, Germany, The Netherlands, France, Spain, Italy and Switzerland. Ryanair's objective is to prevent any unauthorized use of its website. Ryanair does allow certain companies who operate fare comparison (i.e. not reselling) websites to access its schedule and fare information for the purposes of price comparison provided they sign a license and use the agreed method to access the data. Ryanair also permits Travelport (trading as Galileo and Worldspan), Amadeus and Sabre, GDS operators, to provide access to Ryanair's fares to traditional and corporate travel agencies. Ryanair has received favorable rulings in Ireland, Germany and The Netherlands, and unfavorable rulings in Spain, France and Italy, in its actions against screenscrapers. However, pending the outcome of these legal proceedings and if Ryanair were to be ultimately unsuccessful in them, the activities of screenscraper websites could lead to a reduction in the number of customers who book directly on Ryanair's website and consequently to a reduction in Ryanair's ancillary revenue stream. Also, some customers may be lost to Ryanair once they are presented by a screenscraper website with a Ryanair fare inflated by the screenscraper's intermediary fee. This could also adversely affect Ryanair's reputation as a low-fares airline, which could negatively affect Ryanair's results of operations and financial condition.

For additional details, see "Item 8. Financial Information—Other Financial Information—Legal Proceedings—Legal Proceedings Against Internet Ticket Touts."

Ryanair is Subject To Cyber Security Risks And May Incur Increasing Costs In An Effort To Minimize Those Risks. As almost all of Ryanair's reservations are made through its website, security breaches could expose it to a risk of loss or misuse of customer information, litigation and potential liability. Although Ryanair takes steps to secure its website and management information systems, the security measures it has implemented may not be effective, and its systems may be vulnerable to theft, loss, damage and interruption from a number of potential sources and events, including unauthorized access or security breaches, cyber attacks, computer viruses, power loss, or other disruptive events. Ryanair may not have the resources or technical sophistication to anticipate or prevent rapidly evolving types of cyber attacks. Attacks may be targeted at Ryanair, its customers and suppliers, or others who have entrusted it with information.

In addition, data and security breaches can also occur as a result of non-technical issues, including breaches by Ryanair or by persons with whom it has commercial relationships that result in the unauthorized release of personal or confidential information. Any such cyber attack or other security issue could result in a significant loss of reservations and customer confidence in the website and its business which, in turn, could have a material adverse effect on Ryanair's operating results or financial condition and potentially entail its incurring significant litigation or other costs.

Table of Contents

The Irish Corporation Tax Rate Could Rise. The majority of Ryanair's profits are subject to Irish corporation tax at a statutory rate of 12.5%. Due to the size and scale of the Irish government's budgetary deficit and although Ireland has exited the "bailout" which was funded by a combination of loans from the International Monetary Fund and the European Union, there remains a risk that the Irish government could increase Irish corporation tax rates above 12.5% in order to repay current or future loans or to increase tax revenues.

At 12.5%, the rate of Irish corporation tax is lower than that applied by most of the other European Union member states, and has periodically been subject to critical comment by the governments of other EU member states. Although the Irish government has repeatedly publicly stated that it will not increase corporation tax rates, there can be no assurance that such an increase in corporation tax rates will not occur.

In the event that the Irish government increases corporation tax rates or changes the basis of calculation of corporation tax from the present basis, any such changes would result in the Company paying higher corporate taxes and would have an adverse impact on our cash flows, financial position and results of operations.

Change in EU Regulations in Relation to Employers and Employee Social Insurance Could Increase Costs. The European Parliament passed legislation governing the payment of employee and employer social insurance costs in May 2012. The legislation was introduced in late June 2012. The legislation governs the country in which employees and employers must pay social insurance costs. Prior to June 2012, Ryanair paid employee and employer social insurance in the country under whose laws the employee's contract of employment is governed, which is either the U.K. or Ireland. Under the terms of this new legislation, employees and employers must pay social insurance in the country where the employee is based. The legislation includes grandfathering rights which means that existing employees (i.e. those employed prior to the introduction of the new legislation in June 2012) should be exempt from the effects of this legislation for a period of 10 years up until 2022. However, both new and existing employees who transfer from their present base location to a new base in another EU country may be impacted by the new rules in relation to employee and employer contributions. Each country within the EU has different rules and rates in relation to the calculation of employee and employer social insurance contributions. Ryanair estimates that the change in legislation will not have any initial material impact on its salary costs although it will have an adverse impact over time in the majority of jurisdictions in which Ryanair currently operates from.

Ryanair is Subject to Tax Audits. The Company operates in many jurisdictions and is, from time to time, subject to tax audits, which by their nature are often complex and can require several years to conclude. While the Company is of the view that it is tax compliant in the various jurisdictions in which it operates, there can be no guarantee, particularly in the current economic environment, that it will not receive tax assessments following the conclusion of the tax audits. If assessed, the Company will robustly defend its position. In the event that the Company is unsuccessful in defending its position, it is possible that the effective tax rate, employment and other costs of the Company could materially increase. See "The Irish Corporation Tax Rate Could Rise" above.

Risks Associated with the Euro. The Company is headquartered in Ireland and its reporting currency is the euro. As a result of the ongoing uncertainty arising from the Eurozone debt crisis, in 2012 there was widespread speculation regarding the future of the Eurozone, including with regard to Ireland, the country in which the Company is headquartered. To date, there have been no exits from the Eurozone. Although the economic environment in Ireland has considerably improved, there is still a risk of contagion spreading to the weaker Eurozone members. Greece in particular is a potential risk as negotiations around the final restructuring of their existing debt program continue. As many international banks no longer have material exposure to Greek bonds or Greek banks, the risk of contagion in the banking system as a result of Greek default is now considered to be low but should not be totally discounted. In addition, the UK government confirmed in May 2015 that it plans to hold a referendum in relation to the UK's continuing membership of the EU before 2017. Should the UK decide to leave the EU, this could have a negative impact on the euro's value relative to the UK pound sterling. Ryanair predominantly operates to/from countries within the Eurozone and has significant operational and financial exposures to the Eurozone that could result in a reduction in the operating performance of Ryanair or the devaluation of certain assets. Ryanair has taken certain risk management measures to minimize any disruptions, however these risk management measures may be insufficient.

The Company has cash and aircraft assets and debt liabilities that are denominated in euro on its balance sheet. In addition, the positive/negative mark-to-market value of derivative-based transactions are recorded in euro as either assets or liabilities on the Company's balance sheet. Uncertainty regarding the future of the Eurozone could have a materially adverse effect on the value of these assets and liabilities. In addition to the assets and liabilities on Ryanair's balance sheet, the Company has a number of cross currency risks as a result of the jurisdictions of the operating business including non-euro revenues, fuel costs, certain maintenance costs and insurance costs. A weakening in the value of the euro primarily against U.K. pound sterling and U.S. dollar, but also against other non-Eurozone European currencies and Moroccan Dirhams, could negatively impact the operating results of the Company.

Recession, austerity and uncertainty in connection with the euro could also mean that Ryanair is unable to grow. The recent European recession and austerity measures still in effect in several European countries could mean that Ryanair may be unable to expand its operations due to lack of demand for air travel.

Risks Related to the Airline Industry

The Airline Industry Is Particularly Sensitive to Changes in Economic Conditions: A Continued Recessionary Environment Would Negatively Impact Ryanair's Result of Operations. Ryanair's operations and the airline industry in general are sensitive to changes in economic conditions. Unfavorable economic conditions such as government austerity measures, the uncertainty relating to the Eurozone, high unemployment rates, constrained credit markets and increased business operating costs could lead to reduced spending by both leisure and business passengers. Unfavorable economic conditions, such as the conditions persisting as of the date hereof, also tend to impact Ryanair's ability to raise fares to counteract increased fuel and other operating costs. A continued recessionary environment, combined with austerity measures by European governments, will likely negatively impact Ryanair's operating results. It could also restrict the Company's ability to grow passenger volumes, secure new airports and launch new routes and bases, and could have a material adverse impact on its financial results.

The Introduction of Government Taxes on Travel Could Damage Ryanair's Ability to Grow and Could Have a Material Adverse Impact on Operations. The U.K. government levies an Air Passenger Duty ("APD") of £13 per passenger. The tax was previously set at £5 per passenger, but it was increased to £10 per passenger in 2007, £11 in 2009, £12 in 2010 and subsequently to £13 in April 2012. The increase in this tax is thought to have had a negative impact on Ryanair's operating performance, both in terms of average fares paid and growth in passenger volumes. On December 3, 2014, the U.K. government announced that it is reducing APD for children under the age of 12 years from May 1, 2015. It also announced that this reduction of APD will be extended to persons under the age of 16 years from March 1, 2016. In 2008, the Dutch government introduced a travel tax ranging from €11 on short-haul flights to €45 on long-haul flights (withdrawn with effect from July 1, 2009). On March 30, 2009, the Irish government also introduced a €10 Air Travel Tax on all passengers departing from Irish airports on routes longer than 300 kilometers but subsequently reduced it to €3 on March 30, 2011. On April 1, 2014 the tax imposed by the Irish government was abolished. In Germany, the government introduced an air passenger tax of €8 in January 2011 which was subsequently reduced to €7.50 in January 2012. In Austria, the government also introduced an ecological air travel levy of €8 in January 2011. The Moroccan government has also introduced a similar tax (equivalent to approximately €9) from April 2014. The Italian government has recently proposed to increase the municipal taxes in Italy by €2, however, no final decision has yet been made.

Other governments also have introduced or may introduce similar taxes. See "Item 4. Information on the Company—Airport Operations—Airport Charges." The introduction of government taxes on travel has had a negative impact on passenger volumes, particularly given the current period of decreased economic activity. The introduction of further government taxes on travel across Europe could have a material negative impact on Ryanair's results.

Terrorism in the United Kingdom or Elsewhere in Europe Could Have a Material Detrimental Effect on the Company. On August 10, 2006, U.K. security authorities arrested and subsequently charged eight individuals in connection with an alleged plot to attack aircraft operating on transatlantic routes. As a result of these arrests, U.K. authorities introduced increased security measures, which resulted in all passengers being body-searched, and a ban on the transportation in carry-on baggage of certain liquids and gels. The introduction of these measures led to passengers suffering severe delays while passing through these airport security checks. As a result, Ryanair cancelled 279 flights in the days following the incident and refunded a total of €2.7 million in fares to approximately 40,000 passengers. In the days following the arrests, Ryanair also suffered reductions in bookings estimated to have resulted in the loss of approximately €1.9 million of additional revenue. As in the past, the Company reacted to these adverse events by initiating system-wide fare sales to stimulate demand for air travel.

In addition, reservations on Ryanair's flights to London dropped materially for a number of days in the immediate aftermath of the terrorist attacks in London on July 7, 2005. Although the terrorist attack in Glasgow on June 30, 2007 and the failed terrorist attacks in London on July 21, 2005 and June 29, 2007 had no material impact on bookings, there can be no assurance that future such attacks will not affect passenger traffic. Future acts of terrorism or significant terrorist threats in markets that are significant to Ryanair, could have a material adverse effect on the Company's profitability or financial condition should the public's willingness to travel to and from those markets decline as a result. See also "The 2001 Terrorist Attacks on the United States Had a Severe Negative Impact on the International Airline Industry" below.

The 2001 Terrorist Attacks on the United States Had a Severe Negative Impact on the International Airline Industry. The terrorist attacks on the United States on September 11, 2001, in which four commercial aircraft were hijacked, had a severe negative impact on the international airline industry, particularly on U.S. carriers and carriers operating international services to and from the United States. Although carriers such as Ryanair that operate primarily or exclusively in Europe were generally spared from such material adverse impacts on their businesses, the cost to all commercial airlines of insurance coverage for certain third-party liabilities arising from "acts of war" or terrorism increased dramatically after the September 11 attacks. See "Item 4. Information on the Company—Insurance." In addition, Ryanair's insurers have indicated that the scope of the Company's current "act of war"-related insurance may exclude certain types of catastrophic incidents, such as certain forms of biological, chemical or "dirty bomb" attacks. This could result in the Company's seeking alternative coverage, including government insurance or self-insurance, which could lead to further increases in costs. Although Ryanair to date has included increased insurance costs in the ticket price charged to passengers, there can be no assurance that it will continue to be successful in doing so.

Because a substantial portion of airline travel (both business and personal) is discretionary and because Ryanair is substantially dependent on discretionary air travel, any prolonged general reduction in airline passenger traffic may adversely affect the Company. Similarly, any significant increase in expenses related to security, insurance or related costs could have a material adverse effect on the Company. Any further terrorist attacks in the U.S. or in Europe, particularly in London or other markets that are significant to Ryanair, any significant military actions by the United States or EU nations or any related economic downturn may have a material adverse effect on demand for air travel and thus on Ryanair's business, operating results, and financial condition. See also "—Terrorism in the United Kingdom or Elsewhere in Europe Could have a Material Detrimental Effect on the Company" above.

EU Regulation on Passenger Compensation Could Significantly Increase Related Costs. EU Regulation (EC) No. 261/2004 requires airlines to compensate passengers (holding a valid ticket) who have been denied boarding or whose flight has been cancelled or delayed more than 3 hours on arrival. This legislation, which came into force on February 17, 2005, imposes fixed levels of compensation to be paid to passengers in the event of the situations described above. In November 2009, the Court of Justice of the EU in the *Sturgeon* case decided that provisions of the legislation in relation to monetary compensation are not only applicable to denied boarding and flight cancellations but also to flight delays (over three hours on arrival). However, such provisions do not apply when the flight cancellation or delay (over three hours on arrival), is caused for reasons outside of the control of the airline (extraordinary circumstances) such as unsafe weather conditions, air-traffic control strikes/delays, unexpected flight safety shortcomings, sabotage, aircraft manufacturing defects, security risks, political instability. A recent UK court case—*Huzar vs. Jet2* heard in the UK Court of Appeal in May 2014 has considerably narrowed the 'extraordinary circumstances' defence. This case was referred to the UK Supreme Court for a final appeal.

However in October 2014 the Supreme Court refused to hear the appeal on the grounds that it did not raise a point of law of general public importance and because the existing European Union law given by the European Court of Justice (*Sturgeon* case) already provided a sufficient answer. As matters stand now only technical issues which can be attributed to a manufacturing defect or sabotage will fall within the extraordinary circumstances defence. There is one last bastion of hope in the form of yet another referral to the European Court of Justice. *Van der Lans v KLM* is asking for further clarification on the meaning of extraordinary technical defects. This case was heard by the Ninth Chamber of the European Court of Justice in May 2015 with a final decision expected before the end of the year. The regulation calls for compensation of €250, €400, or €600 per passenger, depending on the length of the flight. As Ryanair's average flight length is less than 1,500 km – the upper limit for short-haul flights – the amount payable is generally €250 per passenger. Passengers subject to flight delays over two hours are also entitled to "assistance," including meals, drinks and telephone calls, as well as hotel accommodation if the delay extends overnight. For delays of over five hours, the airline is also required to offer the option of a refund of the cost of the unused ticket. There can be no assurance that the Company will not incur a significant increase in costs in the future due to the impact of this legislation, if Ryanair experiences a large number of cancelled flights, which could occur as a result of certain types of events beyond its control. See "–Risks Related to the Airline Industry–Volcanic Ash Emissions Could Affect the Company and Have a Material Adverse Effect on the Company's Results of Operations" below.

EU Regulation of Emissions Trading Will Increase Costs. On November 19, 2008, the European Council of Ministers adopted legislation to add aviation to the EU Emissions Trading Scheme ("ETS") with effect from 2012. This scheme, which had until then applied mainly to industrial companies, is a cap-and-trade system for CO₂ emissions to encourage industries to improve their CO₂ efficiency. Under the legislation, airlines are granted initial CO₂ allowances based on historical performance and a CO₂ efficiency benchmark. Any shortage of allowances has to be purchased in the open market and/or at government auctions. The cost of such allowances in the context of the Company's energy costs are not material at current market prices. There can be no assurance that Ryanair will be able to obtain sufficient carbon credits or that the cost of the credits will not have a material adverse effect on the Company's business, operating results, and financial condition.

Volcanic Ash Emissions Could Affect the Company and Have a Material Adverse Effect on the Company's Results of Operations. Between April 15 and April 20, 2010 and May 4 and May 17, 2010, a significant portion of the airspace over northern Europe was closed by authorities as a result of safety concerns presented by emissions of ash from an Icelandic volcano. This closure forced Ryanair to cancel 9,490 flights. In May 2011, there were further periodic closures of parts of the European airspace due to emissions of ash from another Icelandic volcano, which resulted in the cancellation of 96 flights.

Under the terms of Regulation (EC) No. 261/2004, described above, Ryanair has certain duties to passengers whose flights are cancelled. In particular, Ryanair is required to reimburse passengers who have had their flights cancelled for certain reasonable, documented expenses – primarily for accommodation and food. Passengers must also be given a re-routing option if their flight is delayed over three hours or if it is cancelled. Such re-routing options are not limited to Ryanair flights and other carriers must be considered if no suitable Ryanair flight can be sourced. If a passenger elects for a refund, Ryanair's reimbursement and re-routing obligations cease.

Volcanic emissions may happen again and could lead to further significant flight cancellation costs which could have a material adverse impact on the Company's financial condition and results of operations. Furthermore, volcanic emissions (whether from current or new sources) or similar atmospheric disturbances and resulting cancellations due to the closure of airports could also have a material adverse effect on the Company's financial performance indirectly, as a consequence of changes in the public's willingness to travel within Europe due to the risk of flight disruptions.

Any Significant Outbreak of any Airborne Disease Could Significantly Damage Ryanair's Business. Worldwide, there has, from time to time, been substantial publicity in recent years regarding certain potent influenza viruses and other disease epidemics. Publicity of this type may have a negative impact on demand for air travel in Europe. Past outbreaks of MERS, SARS, foot-and-mouth disease, avian flu and swine flu have adversely impacted the travel industries, including aviation, in certain regions of the world, including Europe. The Company believes that if any influenza or other pandemic becomes severe in Europe, its effect on demand for air travel in the markets in which Ryanair operates could be material, and it could therefore have a significantly adverse impact on the

[Table of Contents](#)

Company. A severe outbreak of swine flu, MERS, SARS, foot-and-mouth disease, avian flu or another pandemic or livestock-related disease also may result in European or national authorities imposing restrictions on travel, further damaging Ryanair's business. A serious pandemic could therefore severely disrupt Ryanair's business, resulting in the cancellation or loss of bookings, and adversely affecting Ryanair's financial condition and results of operations.

The Company is Dependent on the Continued Acceptance of Low-fares Airlines. Ryanair has an excellent 30 year safety record. In past years, however, accidents or other safety-related incidents involving certain other low-fares airlines have had a negative impact on the public's acceptance of such airlines. Any adverse event potentially relating to the safety or reliability of low-fares airlines (including accidents or negative reports from regulatory authorities) could adversely impact the public's perception of, and confidence in, low-fares airlines like Ryanair, and could have a material adverse effect on Ryanair's financial condition and results of operations.

The Company Faces the Risk of Loss and Liability. Ryanair has an excellent 30 year safety record, however, it is exposed to potential catastrophic losses that may be incurred in the event of an aircraft accident or terrorist incident. Any such accident or incident could involve costs related to the repair or replacement of a damaged aircraft and its consequent temporary or permanent loss from service. In addition, an accident or incident could result in significant legal claims against the Company from injured passengers and others who experienced injury or property damage as a result of the accident or incident, including ground victims. Ryanair currently maintains passenger liability insurance, employer liability insurance, aircraft insurance for aircraft loss or damage, and other business insurance in amounts per occurrence that are consistent with industry standards.

Ryanair currently believes its insurance coverage is adequate (although not comprehensive). However, there can be no assurance that the amount of insurance coverage will not need to be increased, that insurance premiums will not increase significantly, or that Ryanair will not be forced to bear substantial losses from any accidents not covered by its insurance. Airline insurance costs increased dramatically following the September 2001 terrorist attacks on the United States. See "The 2001 Terrorist Attacks on the United States Had a Severe Negative Impact on the International Airline Industry" above. Substantial claims resulting from an accident in excess of related insurance coverage could have a material adverse effect on the Company's results of operations and financial condition. Moreover, any aircraft accident, even if fully insured, could lead to the public perception that Ryanair's aircraft were less safe or reliable than those operated by other airlines, which could have a material adverse effect on Ryanair's business.

EU Regulation No. 2027/97, as amended by Regulation No. 889/2002, governs air carrier liability. See "Item 4. Information on the Company—Insurance" for details of this regulation. This regulation increased the potential liability exposure of air carriers such as Ryanair. Although Ryanair has extended its liability insurance to meet the requirements of the regulation, no assurance can be given that other laws, regulations, or policies will not be applied, modified or amended in a manner that has a material adverse effect on Ryanair's business, operating results, and financial condition.

Airline Industry Margins are Subject to Significant Uncertainty. The airline industry is capital intensive and is characterized by high fixed costs and by revenues that generally exhibit substantially greater elasticity than costs. Although fuel accounted for approximately 43% of total operating expenses in the 2015 fiscal year, management anticipates that this percentage may vary significantly in future years. See "Changes in Fuel Costs and Availability Affect the Company's Results" above. The operating costs of each flight do not vary significantly with the number of passengers flown, and therefore, a relatively small change in the number of passengers, fare pricing, or traffic mix could have a disproportionate effect on operating and financial results. Accordingly, a relatively minor shortfall from expected revenue levels could have a material adverse effect on the Company's growth or financial performance. See "Item 5. Operating and Financial Review and Prospects." The very low marginal costs incurred for providing services to passengers occupying otherwise unsold seats are also a factor in the industry's high susceptibility to price discounting. See "Risks Related to the Company—The Company Faces Significant Price and Other Pressures in a Highly Competitive Environment" above.

Safety-Related Undertakings Could Affect the Company's Results. Aviation authorities in Europe and the United States periodically require or suggest that airlines implement certain safety-related procedures on their aircraft. In recent years, the U.S. Federal Aviation Administration (the "FAA") has required a number of such procedures with regard to Boeing 737-800 aircraft, including major modifications to implement changes to the take-off configuration warning lights, cabin pressurization system, pilot system heating, fuel tank boost pump electrical arcing protection, and the European Commission's Datalink mandate. Ryanair's policy is to implement any such required procedures in accordance with FAA guidance and to perform such procedures in close collaboration with Boeing. To date, all such procedures have been conducted as part of Ryanair's standard maintenance program and have not interrupted flight schedules nor required any material increases in Ryanair's maintenance expenses. However, there can be no assurance that the FAA or other regulatory authorities will not recommend or require other safety-related undertakings or that such undertakings would not adversely impact Ryanair's operating results or financial condition.

There also can be no assurance that new regulations will not be implemented in the future that would apply to Ryanair's aircraft and result in an increase in Ryanair's cost of maintenance or other costs beyond management's current estimates. In addition, should Ryanair's aircraft cease to be sufficiently reliable or should any public perception develop that Ryanair's aircraft are less than completely reliable, Ryanair's business could be materially adversely affected.

Risks Related to Ownership of the Company's Ordinary Shares or ADRs

EU Rules Impose Restrictions on the Ownership of Ryanair Holdings' Ordinary Shares by Non-EU Nationals, and the Company Has Instituted a Ban on the Purchase of Ordinary Shares by Non-EU Nationals. EU Regulation No. 1008/2008 requires that, in order to obtain and retain an operating license, an EU air carrier must be majority-owned and effectively controlled by EU nationals. The regulation does not specify what level of share ownership will confer effective control on a holder or holders of Ordinary Shares. The Board of Directors of Ryanair Holdings is given certain powers under Ryanair Holdings' articles of association (the "Articles") to take action to ensure that the number of Ordinary Shares held in Ryanair Holdings by non-EU nationals ("Affected Shares") does not reach a level that could jeopardize the Company's entitlement to continue to hold or enjoy the benefit of any license, permit, consent, or privilege which it holds or enjoys and which enables it to carry on business as an air carrier. The directors, from time to time, set a "Permitted Maximum" on the number of the Company's Ordinary Shares that may be owned by non-EU nationals at such level as they believe will comply with EU law. The Permitted Maximum is currently set at 49.9%. In addition, under certain circumstances, the directors can take action to safeguard the Company's ability to operate by identifying those Ordinary Shares, American Depositary Shares ("ADSs") or Affected Shares which give rise to the need to take action and treat such Ordinary Shares, the American Depositary Receipts ("ADRs") evidencing such ADSs, or Affected Shares as "Restricted Shares".

The Board of Directors may, under certain circumstances, deprive holders of Restricted Shares of their rights to attend, vote at, and speak at general meetings, and/or require such holders to dispose of their Restricted Shares to an EU national within as little as 21 days. The directors are also given the power to transfer such Restricted Shares themselves if a holder fails to comply. In 2002, the Company implemented measures to restrict the ability of non-EU nationals to purchase Ordinary Shares, and non-EU nationals are currently effectively barred from purchasing Ordinary Shares, and will remain so for as long as these restrictions remain in place. There can be no assurance that these restrictions will ever be lifted. Additionally, these foreign ownership restrictions could result in Ryanair's exclusion from certain stock tracking indices. Any such exclusion may adversely affect the market price of the Ordinary Shares and ADRs. On April 19, 2012, the Company obtained shareholder approval to repurchase ADRs as part of its general authority to repurchase up to 5% of the issued share capital in the Company. See "Item 10. Additional Information—Limitations on Share Ownership by Non-EU Nationals" for a detailed discussion of restrictions on share ownership and the current ban on share purchases by non-EU nationals.

As of June 30, 2015, EU nationals owned at least 54.2% of Ryanair Holdings' Ordinary Shares (assuming conversion of all outstanding ADRs into Ordinary Shares).

Holders of Ordinary Shares are Currently Unable to Convert those Shares into American Depositary Receipts. In an effort to increase the percentage of its share capital held by EU nationals, on June 26, 2001, Ryanair Holdings instructed The Bank of New York Mellon, the depository for its ADR program (the "Depository"), to suspend the issuance of new ADRs in exchange for the deposit of Ordinary Shares until further notice. Holders of Ordinary Shares cannot convert their Ordinary Shares into ADRs during this suspension, and there can be no assurance that the suspension will ever be lifted. See also "–EU Rules Impose Restrictions on the Ownership of Ryanair Holdings' Ordinary Shares by Non-EU nationals and the Company has Instituted a Ban on the Purchase of Ordinary Shares by Non-EU Nationals" above.

The Company's Results of Operations May Fluctuate Significantly. The Company's results of operations have varied significantly from quarter to quarter, and management expects these variations to continue. See "Item 5. Operating and Financial Review and Prospects–Seasonal Fluctuations." Among the factors causing these variations are the airline industry's sensitivity to general economic conditions, the seasonal nature of air travel, and trends in airlines' costs, especially fuel costs. Because a substantial portion of airline travel (both business and personal) is discretionary, the industry tends to experience adverse financial results during general economic downturns. The Company is substantially dependent on discretionary air travel.

The trading price of Ryanair Holdings' Ordinary Shares and ADRs may be subject to wide fluctuations in response to quarterly variations in the Company's operating results and the operating results of other airlines. In addition, the global stock markets from time to time experience extreme price and volume fluctuations that affect the market prices of many airline company stocks. These broad market fluctuations may adversely affect the market price of the Ordinary Shares and ADRs.

Ryanair Holdings May or May Not Pay Dividends. Since its incorporation as the holding company for Ryanair in 1996, Ryanair Holdings has only occasionally declared special dividends on both its Ordinary Shares and ADRs. The directors of the Company declared on June 1, 2010 that Ryanair Holdings intended to pay a special dividend of approximately €500 million, and following shareholder approval at its annual general meeting on September 22, 2010 this special dividend was paid on October 1, 2010. Directors of the Company also declared on May 21, 2012 that Ryanair Holdings intended to pay a special dividend of €0.34 per ordinary share (approx. €492 million) and following shareholder approval at the annual general meeting on September 21, 2012 this special dividend was paid on November 30, 2012. In June 2013, the Company detailed plans to return up to €1 billion to shareholders over the following next two years. The Company completed €481.7 million in share buybacks in the fiscal year 2014 (including just over 6.0 million ADR buybacks) and €112.0 million in share buy-backs in the fiscal year 2015. The Company had indicated on May 19, 2014 that it planned to pay a special dividend of up to approximately €520 million in the fourth quarter of fiscal year 2015, and following shareholder approval at its annual general meeting on September 25, 2014, this special dividend was paid on February 27, 2015. In addition, in February 2015, Ryanair commenced a €400 million ordinary share buy-back program (to be completed by August 2015). The Company has made no further commitments in relation to the payment of dividends, share buybacks or other shareholder distributions. See "Item 8. Financial Information–Other Financial Information–Dividend Policy." As a holding company, Ryanair Holdings does not have any material assets other than the shares of Ryanair.

Increased Costs for Possible Future ADR and Share Repurchases. In April 2012, the Company held an extraordinary general meeting ("EGM") to authorize the directors to repurchase Ordinary Shares and ADRs for up to 5% of the issued share capital of the Company traded on the NASDAQ Stock Market ("NASDAQ"). Up until April 2012, shareholders had only authorized the directors to repurchase Ordinary Shares. As the ADRs typically trade at a premium of 15% to 20% compared to Ordinary Shares, this may result in increased costs in performing share buy-backs in the future. In fiscal 2015, the Company bought back 10.9 million Ordinary Shares for cancellation, as part of its overall share buyback. On June 20, 2013, the Company detailed plans to return up to €1 billion to shareholders over the following two years. The Company completed €481.7 million in share buybacks in the fiscal year 2014 and €112.0 million in fiscal year 2015. On May 19, 2014, the Company had indicated that it planned to pay a special dividend of up to approximately €520 million in the fourth quarter of fiscal year 2015, and following shareholder approval at its annual general meeting on September 25, 2014, this special dividend was paid on February 27, 2015. In February 2015, Ryanair commenced a €400 million ordinary share buy-back program (to be completed by August 2015). The Company has made no further commitments in relation to the payment of dividends, share buybacks or other shareholder distributions.
