

Price Controls

Voluntary price restraints or statutory price controls have been imposed historically in several of the countries in which we operate. At present, there are no price controls on our products in any of the territories in which we have operations, except for Argentina, where authorities directly supervise certain products sold through supermarkets to control inflation.

Taxation of Sparkling Beverages

All the countries in which we operate, except for Panama, impose a value-added tax on the sale of sparkling beverages, with a rate of 16% in Mexico beginning in January 2010 (15% through the end of 2009), 12% in Guatemala, 15% in Nicaragua, 13% in Costa Rica, 16% in Colombia (applied only to the first sale in supply chain), 12% in Venezuela (beginning in April 2009), 17% (Mato Grosso do Sul) and 18% (São Paulo and Minas Gerais) in Brazil, and 21% in Argentina. In addition, several of the countries in which we operate impose the following excise or other taxes:

- Guatemala imposes an excise tax of 0.18 cents in local currency (Ps. 0.28 as of December 31, 2009) per liter of sparkling beverage.
- Costa Rica imposes a specific tax on non-alcoholic bottled beverages based on the combination of packaging and flavor, a 5% excise tax on local brands, a 10% tax on foreign brands and a 14% tax on mixers, and another specific tax on non-alcoholic beverages of 14.39 colones (Ps. 0.33 as of December 31, 2009) for every 250 ml.
- Nicaragua imposes a 9% tax on consumption, and municipalities impose a 1% tax on our Nicaraguan gross income.
- Panama imposes a 5% tax based on the cost of goods produced.
- Brazil imposes an average production tax of 4.9% and an average sales tax of 7.8%, both assessed by the federal government. Most of these taxes are fixed, based on average retail prices in each state where the company operates (VAT) or fixed by the federal government (excise and sales tax).
- Argentina imposes an excise tax on sparkling beverages containing less than 5% lemon juice or less than 10% fruit juice of 8.7%, and an excise tax on flavored sparkling beverage with 10% or more fruit juice and on sparkling water of 4.2%, although this excise tax is not applicable to certain of our products.

Water Supply Law

In Mexico, we obtain water directly from municipal water companies and pump water from our own wells pursuant to concessions obtained from the Mexican government on a plant-by-plant basis. Water use in Mexico is regulated primarily by the *Ley de Aguas Nacionales de 1992* (the 1992 Water Law), and regulations issued thereunder, which created the *Comisión Nacional del Agua* (the National Water Commission). The National Water Commission is charged with overseeing the national system of water use. Under the 1992 Water Law, concessions for the use of a specific volume of ground or surface water generally run for five-, ten- or fifteen-year terms, depending on the supply of groundwater in each region as projected by the National Water Commission. Concessionaires may request concession terms to be extended upon termination. The Mexican government is authorized to reduce the volume of ground or surface water granted for use by a concession by whatever volume of water is not used by the concessionaire for two consecutive years. However, because the current concessions for each of our plants in Mexico do not match each plant's projected needs for water in future years, we successfully negotiated with the Mexican government the right to transfer the unused volume under concessions from certain plants to other plants anticipating greater water usage in the future. Our concessions may be terminated if, among other things, we use more water than permitted or we fail to pay required concession-related fees and do not cure such situations on a timely manner. Although we have not undertaken independent studies to confirm the sufficiency of the existing or future groundwater supply, we believe that our existing concessions satisfy our current water requirements in Mexico.

In Argentina, a state water company provides water to our Alcorta plant on a limited basis; however, we believe the authorized amount meets our requirements for this plant. In our Monte Grande plant in Argentina, we pump water from our own wells without the need for any specific permit or license.

In Brazil, we buy water directly from municipal utility companies, and we also pump water from our own wells or rivers (Mogi das Cruzes plant) pursuant to concessions granted by the Brazilian government for each plant. According to the Brazilian Constitution, water is considered an asset of common use and can only be exploited for the national interest, by Brazilians or companies formed under Brazilian law. Dealers and users have the responsibility for any damage to the environment. The exploitation and use of water is regulated by the *Código de Mineração* (Code of Mining, Decree Law No. 227/67), the *Código de Águas Minerais* (Mineral Water Code, Decree Law No. 7841/45), the National Water Resources Policy (Law No. 9433 / 97) and by regulations issued thereunder. The companies that exploit water are supervised by the *Departamento Nacional de Produção Mineira - DNPM* (National Department of Mineral Production) and the National Water Agency in connection with federal health agencies, as well as state and municipal authorities. In the Jundiaí and Belo Horizonte plants, we do not exploit mineral water. In the Mogi das Cruzes and Campo Grande plants, we have all the necessary permits related to the exploitation of mineral water.

In Colombia, in addition to natural spring water, we obtain water directly from our own wells and from local public companies. We are required to have a specific concession to exploit water from natural sources. Water use is regulated by law no. 9 of 1979 and decrees no. 1594 of 1984 and no. 2811 of 1974. The National Institute of National Resources supervises companies that exploit water. In Nicaragua and Costa Rica, we own and exploit our own water wells granted to us through governmental concessions. In Guatemala, no license or permits are required to exploit water from the private wells in our own plants. In Panama, we acquire water from a state water company. In Venezuela, we use private wells in addition to water provided by the municipalities, and we have taken the appropriate actions, including actions to comply with water regulations, to have water supply available from these sources.

We cannot assure you that water will be available in sufficient quantities to meet our future production needs, that we will be able to maintain our current concessions or that additional regulations relating to water use will not be adopted in the future in our territories. We believe we are in material compliance with the terms of our existing water concessions and that we are in compliance with all relevant water regulations.

Environmental Matters

In all of the countries where we operate, our businesses are subject to federal and state laws and regulations relating to the protection of the environment. In Mexico, the principal legislation is the *Ley General de Equilibrio Ecológico y Protección al Ambiente* (the Federal General Law for Ecological Equilibrium and Environmental Protection) or the Mexican Environmental Law and the *Ley General para la Prevención y Gestión Integral de los Residuos* (the General Law for the Prevention and Integral Management of Waste) which are enforced by the *Secretaría del Medio Ambiente y Recursos Naturales* (the Ministry of the Environment and Natural Resources, or SEMARNAT). SEMARNAT can bring administrative and criminal proceedings against companies that violate environmental laws, and it also has the power to close non-complying facilities. Under the Mexican Environmental Law, rules have been promulgated concerning water, air and noise pollution and hazardous substances. In particular, Mexican environmental laws and regulations require that we file periodic reports with respect to air and water emissions and hazardous wastes and set forth standards for waste water discharge that apply to our operations. We are also subject to certain minimal restrictions on the operation of delivery trucks in Mexico City. We have implemented several programs designed to facilitate compliance with air, waste, noise and energy standards established by current Mexican federal and state environmental laws, including a program that installs catalytic converters and liquid petroleum gas in delivery trucks for our operations in Mexico City. See “—The Company—Product Distribution.”

In addition, we are subject to the Ley de Aguas Nacionales (the Natural Waters Law), enforced by the Comisión Nacional del Agua (the Mexican National Water Commission), or CONAGUA. Adopted in December

1992, the law provides that plants located in Mexico that use deep water wells to supply their water requirements must pay a fee to the city for the discharge of residual waste water to drainage. Pursuant to this law, certain local authorities test the quality of the waste water discharge and charge plants an additional fee for measurements that exceed certain standards published by CONAGUA. All of our bottling plants located in Mexico City, as well as the Toluca plant, met these standards as of 2001. See “–Description of Property, Plant and Equipment.”

In our Mexican operations, we established a partnership with The Coca-Cola Company and ALPLA, a supplier of plastic bottles to us in Mexico, to create *Industria Mexicana de Reciclaje* (IMER), a PET recycling facility located in Toluca, Mexico. This facility started operations in 2005 and has a recycling capacity of 25,000 metric tons per year from which 15,000 metric tons can be re-used in PET bottles for food packaging purposes. We have also continued contributing funds to a nationwide recycling company, ECOCE, or *Ecología y Compromiso Empresarial* (Environmentally Committed Companies). In addition, our plants located in Toluca, Reyes, Cuautitlan, Apizaco, San Cristobal, Morelia, Ixtacomitan and Coatepec have received a *Certificado de Industria Limpia* (Certificate of Clean Industry).

As part of our environmental protection and sustainability strategies, in December 2009, some of our affiliates, jointly with other third parties, entered into a generation and wind energy supply agreement with a subsidiary of GAMESA Energia, S.A. to supply energy to a plant in Toluca, Mexico, owned by our subsidiary, Propimex, S.A. de C.V. The plant, which is located in La Ventosa, Oaxaca, is expected to generate approximately 100 thousand megawatt hours annually. The energy supply services began in April 2010.

Our Central American operations are subject to several federal and state laws and regulations relating to the protection of the environment, which have been enacted in the last ten years, as awareness has increased in this region about the protection of the environment and the disposal of dangerous and toxic materials, as well as water usage. In some countries in Central America, we are in the process of bringing our operations into compliance with new environmental laws on the timeline established by the relevant regulatory authorities. Our Costa Rica and Panama operations have participated in a joint effort along with the local division of The Coca-Cola Company, *Misión Planeta* (Mission Planet), for the collection and recycling of non-returnable plastic bottles.

Our Colombian operations are subject to several Colombian federal, state and municipal laws and regulations related to the protection of the environment and the disposal of treated water and toxic and dangerous materials. These laws include the control of atmospheric emissions, noise emissions, disposal of treated water and strict limitations on the use of chlorofluorocarbons. We are also engaged in nationwide campaigns for the collection and recycling of glass and plastic bottles as well as reforestation programs. For our plants in Colombia, we have obtained the “*Certificación Ambiental Fase IV*” (Phase IV Environmental Certificate).

Our Venezuelan operations are subject to several Venezuelan federal, state and municipal laws and regulations related to the protection of the environment. The most relevant of these laws are the *Ley Orgánica del Ambiente* (the Organic Environmental Law), the *Ley Sobre Sustancias, Materiales y Desechos Peligrosos* (the Substance, Material and Dangerous Waste Law), the *Ley Penal del Ambiente* (the Criminal Environment Law) and the *Ley de Aguas* (the Water Law). Since the enactment of the Organic Environmental Law in 1995, our Venezuelan subsidiary has presented the proper authorities with plans to bring our production facilities and distribution centers into compliance with the law, which mainly consist of building or expanding the capacity of water treatment plants in our bottling facilities. Even though we have had to adjust some of the originally proposed timelines due to construction delays, in 2009, we completed the construction and received all the required permits to operate a new water treatment plant in our bottling facility located in the city of Barcelona. At the end of 2009, we also agreed with the relevant authorities to construct a water treatment plant in our Valencia plant within the next 18 months. We expect to complete the water treatment plant projects in the rest of our bottling facilities during the first half of 2011. We are also in process of obtaining the ISO 14000 certification for all of our plants in Venezuela.

Our Brazilian operations are subject to several federal, state and municipal laws and regulations related to the protection of the environment. Among the most relevant laws and regulations are those dealing with the emission of toxic and dangerous gases and disposal of wastewater, which impose penalties, such as fines, facility closures or criminal charges depending upon the level of non-compliance.

Our production plant located in Jundiaí has been recognized by the Brazilian authorities for its compliance with environmental regulations and for having standards well above those imposed by the law. The plant has been certified for (i) ISO 9001 since March 1995; (ii) ISO 14001 since March 1997; (iii) norm OHSAS 18001 since 2005; and (iv) ISO 22000 since 2007. In Brazil it is also necessary to obtain concessions from the government to cast drainage. Our plants in Brazil have been granted this concession, except Mogi das Cruzes, where we have timely begun the process of obtaining one. We are in the process of expanding the capacity of our water treatment plant in our Jundiaí facility, which is expected to be completed in 2010.

In Brazil, a municipal regulation of the City of São Paulo, implemented pursuant to Law 13.316/2002, came into effect in May 2008. This regulation requires us to collect for recycling a specified annual percentage of plastic bottles made from PET sold in the municipality; such percentage increases each year. As of May 2009, we were required to collect for recycling 50% of the PET bottles sold in the City of São Paulo and by May 2010, we will be required to collect 75% of PET bottles for recycling and 90% in May 2011. Currently, we are not able to collect the entire required volume of PET bottles we sold in the City of São Paulo for recycling. If we do not meet the requirements of this regulation, which are more onerous than those imposed by the countries with the highest recycling standards, we could be fined and be subject to other sanctions, such as the suspension of operations in any of our plants and/or distribution centers located in the City of São Paulo. In May 2008, we and other bottlers in the City of São Paulo, through the *Associação Brasileira das Indústrias de Refrigerantes e de Bebidas Não-alcoólicas*

(Brazilian Soft Drink and Non-Alcoholic Beverage Association, or ABIR), filed a motion requesting a court to overturn this regulation due to the impossibility of compliance. Through ABIR, we are also negotiating the reduction of recycling percentages and more reasonable timelines for compliance. In addition, in November 2009 in response to a municipal authority request for us to demonstrate the destination of the PET bottles sold in São Paulo, we filed a motion presenting all of our recycling programs and requesting a more practical timeline to comply with the requirements of the law. We are currently awaiting resolution of both of these matters.

Our Argentine operations are subject to federal and provincial laws and regulations relating to the protection of the environment. The most significant of these are regulations concerning waste water discharge, which are enforced by the *Secretaría de Ambiente y Desarrollo Sustentable* (the Ministry of Natural Resources and Sustainable Development) and the *Organismo Provincial para el Desarrollo Sostenible* (the Provincial Organization for Sustainable Development) for the province of Buenos Aires. Our Alcorta plant is in compliance with environmental standards and we have been certified for ISO 14001:2004 for the plants and operative units in Buenos Aires.

For all of our plant operations, we employ an environmental management system: *Sistema de Administración Ambiental* (Environmental Administration System, or EKOSYSTEM) that is contained within the *Sistema Integral de Calidad* (Integral Quality System or SICKOF).

We do not believe that our business activities pose a material risk to the environment, and we believe that we are in material compliance with all applicable environmental laws and regulations.

We have expended, and may be required to expend in the future, funds for compliance with and remediation under local environmental laws and regulations. Currently, we do not believe that such costs will have a material adverse effect on our results of operations or financial condition. However, since environmental laws and regulations and their enforcement are becoming increasingly stringent in our territories, and there is increased awareness by local authorities of higher environmental standards in the countries where we operate, changes in current regulations may result in an increase in costs, which may have an adverse effect on our future results of operations or financial condition. Management is not aware of any significant pending regulatory changes that would require a significant amount of additional remedial capital expenditures.

Other regulations

In December 2009, the Venezuelan government issued a decree requiring a reduction in energy consumption by at least 20% for industrial companies whose consumption is greater than two megawatts per hour and to submit an energy-usage reduction plan. Some of our bottling operations in Venezuela outside of Caracas met this threshold and we submitted a plan, which included the purchase of generators for our plants. In January 2010, the Venezuelan government subsequently implemented power cuts and other measures for all industries in Caracas whose consumption was above 35 kilowatts per hour. All of our bottling and distribution centers as well as administrative offices in Caracas met this threshold.

In January 2010, the Venezuelan government amended the *Ley para la Defensa y Acceso a las Personas a los Bienes y Servicios* (Access to Goods and Services Defense Law). Any violation by a company that produces, distributes and sells goods and services could lead to fines, penalties or the confiscation of the assets used to produce, distribute and sell these goods without compensation. Although we believe we are in compliance with this law, consumer protection laws in Venezuela are subject to continuing review and changes, and any such changes could lead to an adverse impact on us.

BOTTLER AGREEMENTS

Coca-Cola Bottler Agreements

Bottler agreements are the standard agreements for each territory that The Coca-Cola Company enters into with bottlers outside the United States. Pursuant to our bottler agreements, we are authorized to manufacture, sell and distribute *Coca-Cola* trademark beverages within specific geographic areas, and we are required to purchase concentrate and artificial sweeteners in some of our territories for all *Coca-Cola* trademark beverages from companies designated by the Coca-Cola Company.

These bottler agreements also provide that we will purchase our entire requirement of concentrate for *Coca-Cola* trademark beverages from The Coca-Cola Company and other authorized suppliers at prices, terms of payment and on other terms and conditions of supply as determined from time to time by The Coca-Cola Company at its sole discretion. Concentrate prices are determined as a percentage of the weighted average retail price in local currency, net of applicable taxes. Although the price multipliers used to calculate the cost of concentrate and the currency of payment, among other terms, are set by The Coca-Cola Company at its sole discretion, we set the price of products sold to customers at our discretion, subject to the applicability of price restraints. We have the exclusive right to distribute *Coca-Cola* trademark beverages for sale in our territories in authorized containers of the nature prescribed by the bottler agreements and currently used by our company. These containers include various configurations of cans and returnable and non-returnable bottles made of glass and plastic and fountain containers.

The bottler agreements include an acknowledgment by us that The Coca-Cola Company is the sole owner of the trademarks that identify the *Coca-Cola* trademark beverages and of the secret formulas with which The Coca-Cola Company's concentrates are made. Subject to our exclusive right to distribute *Coca-Cola* trademark beverages in our territories, The Coca-Cola Company reserves the right to import and export *Coca-Cola* trademark beverages to and from each of our territories. Our bottler agreements do not contain restrictions on The Coca-Cola Company's ability to set the price of concentrates charged to our subsidiaries and do not impose minimum marketing obligations on The Coca-Cola Company. The prices at which we purchase concentrates under the bottler agreements may vary materially from the prices we have historically paid. However, under our bylaws and the shareholders agreement among certain subsidiaries of The Coca-Cola Company and certain subsidiaries of FEMSA, an adverse action by The Coca-Cola Company under any of the bottler agreements may result in a suspension of certain voting rights of the directors appointed by The Coca-Cola Company. This provides us with limited protection against The Coca-Cola Company's ability to raise concentrate prices to the extent that such increase is deemed detrimental to us pursuant to the shareholder agreement and the bylaws. See "Item 7. Major Shareholders and Related Party Transactions—Major Shareholders—The Shareholders Agreement."

The Coca-Cola Company has the ability, at its sole discretion, to reformulate any of the *Coca-Cola* trademark beverages and to discontinue any of the *Coca-Cola* trademark beverages, subject to certain limitations, so long as all *Coca-Cola* trademark beverages are not discontinued. The Coca-Cola Company may also introduce new beverages in our territories in which case we have a right of first refusal with respect to the manufacturing, packaging, distribution and sale of such new beverages subject to the same obligations as then exist with respect to the *Coca-Cola* trademark beverages under the bottler agreements. The bottler agreements prohibit us from producing, bottling or handling beverages other than *Coca-Cola* trademark beverages, or other products or packages that would imitate, infringe upon, or cause confusion with the products, trade dress, containers or trademarks of The Coca-Cola Company, except under the authority of, or with the consent of, the Coca-Cola Company. The bottler agreements also prohibit us from acquiring or holding an interest in a party that engages in such restricted activities. The bottler agreements impose restrictions concerning the use of certain trademarks, authorized containers, packaging and labeling of The Coca-Cola Company so as to conform to policies prescribed by The Coca-Cola Company. In particular, we are obligated to:

- maintain plant and equipment, staff and distribution facilities capable of manufacturing, packaging and distributing the *Coca-Cola* trademark beverages in authorized containers in accordance with our bottler agreements and in sufficient quantities to satisfy fully the demand in our territories;
- undertake adequate quality control measures prescribed by The Coca-Cola Company;

- develop, stimulate and satisfy fully the demand for *Coca-Cola* trademark beverages using all approved means, which includes the investment in advertising and marketing plans;
- maintain a sound financial capacity as may be reasonably necessary to assure performance by us and our affiliates of our obligations to The Coca-Cola Company; and
- submit annually to The Coca-Cola Company our marketing, management, promotional and advertising plans for the ensuing year.

The Coca-Cola Company contributed a significant portion of our total marketing expenses in our territories during 2009 and has reiterated its intention to continue providing such support as part of our new cooperation framework. Although we believe that The Coca-Cola Company will continue to provide funds for advertising and marketing, it is not obligated to do so. Consequently, future levels of advertising and marketing support provided by The Coca-Cola Company may vary materially from the levels historically provided. See “Item 7. Major Shareholders and Related Party Transactions–Major Shareholders –The Shareholders Agreement” and “Item 7. Major Shareholders and Related Party Transactions–Major Shareholders –Cooperation Framework with The Coca-Cola Company.”

We have separate bottler agreements with The Coca-Cola Company for each of the territories in which we operate, on substantially the same terms and conditions. These bottler agreements are automatically renewable for ten-year terms, subject to the right of either party to give prior notice that it does not wish to renew a specific agreement.

In Mexico, we have four bottler agreements; the agreements for two territories expire in June 2013 and the agreements for the other two territories expire in May 2015. Our bottler agreements with The Coca-Cola Company will expire for our territories in the following countries: Argentina in September 2014; Brazil in April 2014; Colombia in June 2014; Venezuela in August 2016; Guatemala in March 2015; Costa Rica in September 2017; Nicaragua in May 2016; and Panama in November 2014.

The bottler agreements are subject to termination by The Coca-Cola Company in the event of default by us. The default provisions include limitations on the change in ownership or control of our company and the assignment or transfer of the bottler agreements and are designed to preclude any person not acceptable to The Coca-Cola Company from obtaining an assignment of a bottler agreement or from acquiring our company independently of other rights set forth in the shareholders agreement. These provisions may prevent changes in our principal shareholders, including mergers or acquisitions involving sales or dispositions of our capital stock, which will involve an effective change of control, without the consent of The Coca-Cola Company. See “Item 7. Major Shareholders and Related Party Transactions–Major Shareholders –The Shareholders Agreement.”

We have also entered into tradename licensing agreements with The Coca-Cola Company pursuant to which we are authorized to use certain trademark names of The Coca-Cola Company. These agreements have a ten-year term, but are terminated if we cease to manufacture, market, sell and distribute *Coca-Cola* trademark products pursuant to the bottler agreements or if the shareholders agreement is terminated. The Coca-Cola Company also has the right to terminate a license agreement if we use its trademark names in a manner not authorized by the bottler agreements.

DESCRIPTION OF PROPERTY, PLANT AND EQUIPMENT

Over the past several years, we made significant capital improvements to modernize our facilities and improve operating efficiency and productivity, including:

- increasing the annual capacity of our bottling plants by installing new production lines;
- installing clarification facilities to process different types of sweeteners;
- installing plastic bottle-blowing equipment;
- modifying equipment to increase flexibility to produce different presentations, including faster sanitation and changeover times on production lines; and
- closing obsolete production facilities.

See “Item 5. Operating and Financial Review and Prospects—Capital Expenditures.”

As of December 31, 2009, we owned thirty-one bottling plants company-wide. By country, we have ten bottling facilities in Mexico, five in Central America, six in Colombia, four in Venezuela, four in Brazil and two in Argentina.

As of December 31, 2009, we operated 210 distribution centers, approximately 40% of which were in our Mexican territories. We own more than 88% of these distribution centers and lease the remainder. See “—The Company—Product Distribution.”

We maintain an “all risk” insurance policy covering our properties (owned and leased), machinery and equipment and inventories as well as losses due to business interruptions. The policy covers damages caused by natural disaster, including hurricane, hail, earthquake and damages caused by human acts, including explosion, fire, vandalism, riot and losses incurred in connection with goods in transit. In addition, we maintain an “all risk” liability insurance policy that covers product liability. We purchase our insurance coverage through an insurance broker. In most cases the policies are issued by Allianz México, S.A., Compañía de Seguros, and the coverage is partially reinsured in the international reinsurance market.

The table below summarizes by country principal use, installed capacity and percentage utilization of our production facilities:

Bottling Facility Summary
As of December 31, 2009

Country	Installed Capacity (thousands of unit cases)	% Utilization ⁽¹⁾
Mexico	1,594,568	75%
Guatemala	36,850	70%
Nicaragua	85,766	43%
Costa Rica	78,486	58%
Panama	38,399	62%
Colombia	370,776	59%
Venezuela	275,205	81%
Brazil	623,676	66%
Argentina	285,825	66%

(1) Annualized rate.

The table below summarizes by country plant location and facility area of our production facilities:

Bottling Facility by Location
As of December 31, 2009

Country	Plant	Facility Area (thousands of sq. meters)
Mexico	San Cristóbal de las Casas, Chiapas	45
	Cuautitlán, Estado de México	35
	Los Reyes la Paz, Estado de México	50
	Toluca, Estado de México	242
	Celaya, Guanajuato	87
	León, Guanajuato	38
	Morelia, Michoacán	50
	Ixtacomitán, Tabasco	117
	Apizaco, Tlaxcala	80
	Coatepec, Veracruz	142
Guatemala	Guatemala City	47
Nicaragua	Managua	54
Costa Rica	Calle Blancos (San José)	52
	Coronado (San José)	14
Panama	Panama City	29
Colombia	Barranquilla	37
	Bogotá	105
	Bucaramanga	26
	Cali	76
	Manantial	67
	Medellín	47
Venezuela	Antímano	15
	Barcelona	141
	Maracaibo	68
	Valencia	100
Brazil	Campo Grande	36
	Jundiaí	191
	Mogi das Cruzes	119
	Belo Horizonte	73
Argentina	Alcorta	73
	Monte Grande (Buenos Aires)	32

SIGNIFICANT SUBSIDIARIES

The table below sets forth all of our direct and indirect significant subsidiaries and the percentage of equity of each subsidiary we owned directly or indirectly as of December 31, 2009:

Name of Company	Jurisdiction of Incorporation	Percentage Owned	Description
Propimex, S.A. de C.V	Mexico	100.00%	Manufacturer of bottles and distributor of bottled beverages.
Controladora Interamericana de Bebidas, S.A. de C.V	Mexico	100.00%	Holding company of manufacturers and distributors of beverages.
Spal Industria Brasileira de Bebidas, S.A	Brazil	97.71%	Manufacturer of cans and related products for bottling beverages.
Coca-Cola FEMSA de Venezuela S.A. (formerly, Panamco Venezuela, S.A. de C.V.)	Venezuela	100.00%	Manufacturer of bottles and related products for bottling beverages.
