### Taxation

Taxation on beer in the countries where we operate is comprised of different taxes specific to each jurisdiction, such as an excise tax and a value-added tax. The amount of sales tax charged on our beer products in 2015, represented as a percentage of gross sales, was: 42.0% in Brazil; 21.3% in Canada; 20.6% in Central America; 31.6% in Ecuador; 44.4% in Peru; 41.4% in the Dominican Republic; 25.6% in Argentina; 31.5% in Bolivia; 31.5% in Chile; 16.0% in Paraguay; and 31.4% in Uruguay.

Taxation on CSD & NANC in the countries where we operate is comprised of taxes specific to each jurisdiction, such as an excise tax and a value-added tax. The amount of taxes ed on our CSD & NANC products in 2015, represented as a percentage of gross sales, was: 35.9% in Brazil; 13.7% in the Dominican Republic; 23.6% in Argentina; 22.7% in Bolivia; and charged on our C 30.0% in Uruguay

In November 2008, the Brazilian Congress approved changes (effective as of January 1, 2009) to the taxable amount and tax rates for (1) the IPI Excise Tax, (2) the PIS Contribution and (3) the COFINS. Under the previous system, these taxes were paid as a fixed rate per hectoliter by all taxpayers. Under the system approved in 2008, higher priced brands pay higher taxes per hectoliter than lower priced brands based on a consumer price reference table. The taxable amount is calculated through the application of a rate to the consumer price established in the respective consumer price reference table. In recent years, taxes on the beverage industry were increased at the Brazilian federal and state levels. In April 2013, an aggregate increase of 2% was approved with respect to the rates of the IPI Excise Tax, the PIS Contribution and the COFINS on beer sales. In addition, in 2014 the IPI Excise Tax, the PIS Contribution and the COFINS were subject to another aggregate increase of 4% in April and 2% in October with respect to beer sales. Moreover, in January 2015 the Brazilian federal government enacted Law No. 13,097, which introduced a new federal taxation model for beer and soft drinks. The law is a result of the combined efforts of the Brazilian federal government and beverage companies with a view to creating a less complex and more predictable tax system for the industry. The new tax model came into force on May 1, 2015. Among other changes, the new set of rules establishes that the IPI Excise Tax, the PIS Contribution and the COFINS are due by manufacturers and wholesalers, and shall be calculated based on the respective sales price (ad valorem). Under the previous legislation, the referred taxes were due exclusively by the manufacturer at fixed amounts per liter of beer or soft drink produced (ad rem).

In 2013 and 2014 the following six Brazilian states increased their rates for ICMS Value-Added Tax applicable to beer: Minas Gerais, Sergipe, Amazonas, Mato Grosso, Bahia and the Federal District. In addition, in 2015 the States of São Paulo, Rio de Janeiro, Rio Grande do Sul, Ceará and Mato Grosso do Sul increased their ICMS Value-Added Tax rate applicable to beer and soft drinks, while the state of Minas Gerais and the Federal District once again increased the rate of that tax applicable to the referred beverages.

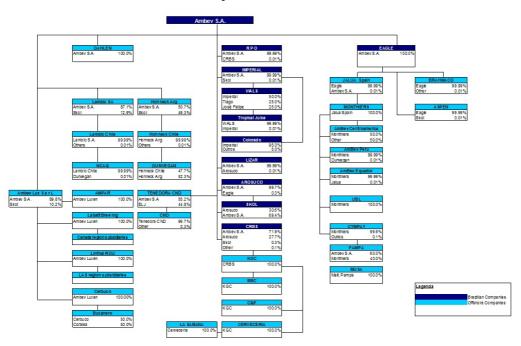

## Organizational Structure

Our two direct controlling shareholders, IIBV and AmBrew, both of which are subsidiaries of ABI, together with FAHZ, held in aggregate 71.9% of our total and voting capital stock (excluding treasury shares) as of December 31, 2015.

ABI indirectly holds shares in us representing 62.0% of our total and voting capital stock (excluding treasury shares) as of December 31, 2015. ABI thus has control over us, even though (1) ABI remains subject to the Ambev Shareholders' Agreement and (2) ABI is jointly controlled by the Braco Group and the Interbrew Founding Families. For further information on these matters see "Item 4. Information on the Company—A. History and Development of the Company—The InBev-Ambev Transactions" and "Item 7. Major Shareholders and Related Party Transactions—A. Major Shareholders—Ambev's Major Shareholders—Ambev Shareholders—

We conduct the bulk of our operations in Brazil directly. We also indirectly control Labatt and the operations conducted by our CAC and Latin America South units. The following chart illustrates the ownership structure of our principal subsidiaries as of December 31, 2015 based on total share capital owned.

# Organizational Structure

## D. Property, Plant and Equipment

Our properties consist primarily of brewing, soft drink production, malting, bottling, distribution and office facilities in the countries where we operate.

As of December 31, 2015, our aggregate beer and CSD production capacity was 269.9 million hectoliters per year. Our total annual beer production capacity was 192.4 million hectoliters as of that date. Our total CSD production capacity was 77.5 million hectoliters at December 31, 2015. In 2015, the total production at the facilities set forth below was equal to 124.0 million hectoliters of beer and 42.0 million hectoliters of CSD.

The following is a list of our principal production facilities as of December 31, 2015:
